A Reparation: Universal Gravitation a Universal Fake « on: March 01, 2010, 06:13:15 AM »

Just got my copies of *Zetetic Cosmogeny* by Thomas Winship and *A Reparation: Universal Gravitation a Universal Fake by C.S. DeFord*, both of which are still available in pretty excellent condition:

I hope to eventually get the latter book scanned and available for download, but for now I'm just going to post the author's preface, which I think is an especially poignant expression of the values which bind and drive Zetetics:

#### Ouote

99

#### **Authors Preface**

To me truth is precious. I love it. I embrace it at every opportunity. I do not stop to enquire, Is it popular? ere I embrace it. I inquire only, Is it truth? If my judgement is convinced my conscience approves and my will enforces my acceptance. I want truth for truth's sake, not for the applaud or approval of men. I would not reject truth because it is unpopular, nor accept error because it is popular. I should rather be right and stand alone than run with the multitude and be wrong.

The holding of the views herein set forth has already won for me the scorn and contempt and ridicule of some of my fellowmen. I am looked upon as being odd, strange, peculiar; as being a little weakminded; as having a broken wheel or slipping cog in my mental machinery. But truth is truth and though all the world reject it and turn against me, I will cling to truth still

I am deeply grateful to Mrs. A.C. Caldwell, Tieton, Washington, and all others who indorse my views and who have contributed so generously their financial support.

I shall be pleased to receive any fair, kindly, courteous criticism of these views from any of my readers. But pleae read the little volume through before you condemn it or its author.

Yours for enduring truth, C.S.D.

I recently got in a copy of Terra Firma 1901 which I don't believe is available in full online. I'll see about scanning that one in as well.

Would you know if there is any reliable OCR scanning software in existence?

I am interested in reading Universal Gravitation: A Universal Fake

I wouldn't worry too much about the OCR. A lot of the newer copiers can scan and save in PDF format. 200 DPI is quite readable and pretty reasonable in file size.

In truth I have no idea. I'm just at the 'scanning this seems like a good idea' stage - I haven't got round to looking at the nitty gritty of it. However, you can get hold of *Universal Gravitation:* A *Universal Fake* pretty cheap from AbeBooks, which is where I got mine:

http://www.abebooks.co.uk/servlet/SearchResults? bt.x=17&bt.y=17&sts=t&tn=A+Reparation%3A+universal+gravitation

The first two listings are the same edition as my copy.

Also, I really must order Terra Firma 1901 sometime soon. James says it's quite good.

#### **Potential Addition to FAQ**

« on: November 22, 2010, 11:30:25 AM »

Thork and EnglshGentleman have sent me a possible addition to the FAQ. I thought I should put it up here and see what other Believers think of it, and if they have any suggestions or criticisms:

Quote

## Aerospace and flying ...

Q: As a passenger on an aircraft, how is it I can see the curvature of the earth?

A: Quite simply you cannot. It is widely stated you would need to be at a height of at least 40,000 ft to get even a hint of curvature if earth were round. Commercial aircraft are not allowed to fly this high. They are only allowed to fly just under this altitude. 36,000ft might be typical.

Q: What about Concorde? That flew at 60,000 ft.

A: It did, but Concorde also had incredibly small windows as a design concession, to prevent passengers seeing enough of the horizon and building up a picture of earth's shape for themselves. Only 6 inches across. As even that was deemed risky, Concorde has since been decommissioned.

Q: So what about flight times then? How can FEr's calculate times with the distorted map above?

A: Quite simply RErs can't do that either. There are two many variables. Performance is effected by fuel loads, ambient temperatures and pressures, engine models, the list goes on. Depending on what is happening with other traffic you might be in a hold, or routed out of your way to avoid other traffic or storms. The pilots do not fly direct to their destination either. Depending on the wind they might take off in the opposite direction to the intended route. They then fly SIDS (Standard Instrument Departures) onto a route, follow some beacons, get onto an Oceanic Highway on the way their, follow a STAR (STandard ARrival) on approach, and again go right round the back of an airport to land in the right direction. When pilots are following routes like the typical ones below, how can anyone make a simple straight line DST comparison to ascertain shape? Only the aircraft's Flight Management System really knows how far that trip is. The pilot just uses the data it provides. However FMS source code is closely guarded.

Below is a SID example. Note how the pilots fly curves and loops. They do not go direct.

A: No. Pilots make use of jet-streams in both directions. Quote

Jet streams are undulating bands of strong, high-altitude winds, associated with cold fronts. They have an average altitude of 10 km and may occasionally exceed 400 km/h. Pilots often seek out a jet stream to speed their jet planes

http://www.moriartey.ca/wd/wxfacts1.php

- Q: What about balloon flights? I see lots of amateur videos on the internet of high altitude camera shots.
- A: They do not show ball-like curvature. The horizon curves all the way around, but what do you expect? Look at the map in the geography section above. The earth is flat and round like a plate. It is this curvature you see. Not the earth falling away at the edges.
- Q: How come the sun takes longer to set when flying west?
- A: Again look at the FE map above. You are following the spotlight of the sun for longer, when you fly west.
- Q: What about Intercontinental Ballistic Missiles? You said there was no space flight.
- A: Correct. ICBMs fly just below what would be deemed space. Orbit is not possible.

Both of these responses are pathetic in my opinion because they sound as if they were concocted by globularists in order to make the flat earth position appear weak and unconvincing. In both the case of a window too small for a view as well as planes that fly too low for a good view an implication is made by these answers that flat earth theory cannot face reality.

40,000 feet is a completely arbitrary number, and Rowbotham's answer to the same question was far more satisfactory. Rowbotham addressed the same issue in the context of hot air balloons and actually reported that passengers witnessed concavity! Although available technology has changed since the early nineteenth century, the shape of the earth has not and his logic is just as applicable now as it was at that time.

I agree with my noble colleague that Rowbotham's concavity argument merits inclusion in the FAQ. However, alerting globularists to the deviances of the aerospace Conspiracy is a high priority, and it is my firm belief, and the belief of many of my zetetic allies, that aircraft window design, as well as the "altitude appeal" are staples of the deception, and should therefore be included.

The rest of the material is fantastic, my commendations go out to those contributors.

The undisputed fact that the horizon is always at the observers eye-level makes the myth of globularism apparent.

The reason for small windows on the Concorde given is insulting to the reader. The fact that such a small window may inhibit Field of View (FOV) which makes detecting alleged curvature possible is, however, relevant.

This is the one criticism I would share. Aside from that however, I think it neatly deals with several questions which appear time and time again in debate and discussion on this forum. The ultimate purpose of the FAQ is to anticipate such questions, so I think that most of this will make an excellent addition to the FAQ.

Frther additions have also been suggested:

#### Ouote

ee Lth

I think it helpfully answers questions about UA. Thanks for your consideration!

## **Physics**

Q: "What about gravity? Wouldn't a Flat Earth eventually form a sphere if gravity existed?"

A: In the Finite Earth model, the Earth does not have any gravity of its own.

Q: "But wait, why then do I see objects fall?"

A: Good question. The phenomenon that you recognize as being gravity is actually the effects of Universal Acceleration, also known as UA.

Q: "How exactly does UA work?"

A: It is quite simple. The Universe is accelerating upwards. The Earth shields us from being affected by UA directly, though we are still indirectly affected by this since the Earth is pushing us upwards.

Q: "How is that I can jump and then come back down then?"

A: This is another good question. Since the Earth is pushing you upwards, you are moving at the same speed as the Earth, much like when you are sitting in a car, the car is pushing you along. When you jump, your upward velocity is for a moment, greater than the Earth's so you rise above it. But after a few moments, the Earth eventually catches up.

Q: "But when I throw a ball, it "falls" down in a parabolic path. If what you are saying is true, wouldn't the ball be moving in a straight diagonal line?"

A: The ball indeed does move in a straight line in the direction you threw it. However, you must also remember that the Earth is moving upwards. Because of this, you eyes mistake the distance between the ball and the Earth changing for the ball moving in a curved path. For the upward part of the arc, the ball's acceleration is greater than the Earth', and for the downward part of the arc the ball's velocity acceleration is no longer greater than the Earth's and thus the Earth catches up.

Q: "It is just too hard to think that an Earth accelerating upwards will simulate the same affects that we see gravity do every day."

A: When you look at Einstein's Equivalence Principle, you will find that it is not only quite possible, but true that they will locally appear to be the same.

Q: "Oh wait! I just remembered that nothing can reach the speed of light, and if the Universe was accelerating upwards at a constant rate, wouldn't this end up happening?"

A: When you look at equations from Special Relativity, you will find this will never happen. The relevant equation is v/c = tanh (at/c). Since tanh(at/c) is always less than 1, you can never reach the speed of light.

Q: "Even if that were true, it would create a gigantic amount of energy to do so wouldn't it?"

A: Universal Acceleration requires energy to move objects no more than gravity does. In Round Earth Theory a good example of gravity constantly accelerating objects without outputting energy would be an orbit.

I think that although the above contribution is good, there is a good deal of overlap between it and other sections. I think some kind of revision of the FAQ might be in order, and we should collaborate on it. These and other revisions can then be made, and can be posted and pinned by various mods/members.

40k is not arbitrary, it is based off the formula for apparent curvature of the earth given a RE model.

You are correct. (However, we can truthfully insist that the alleged 25,000 mile globular circumference which the math behind the 40,000 feet altitude is based upon is fictional.)

The important point is that suggested addition to the FAQ leaves the ominous and legitimate question hanging in peoples' minds as to whether curvature would be visible from an airplane IF they did fly at 40,000 feet altitude. It should also include the essence of Rowbotham's conclusion about hot air balloons which more adequately answers questions about the appearance of horizons from great altitude.

I think there is a very great divide between

- 1) ancient sources (early Christian and otherwise) and
- 2) simply older sources like Rowbotham (the last couple of hundred years or so).

I have recently become more cognizant of the fact that the greatest wealth of scientific knowledge bridging these two sources is the Arab-Islamic scientific tradition. To the researcher who knows where to look, Arab-Islamic geographical knowledge is especially rich with both concepts and specific concrete knowledge that are unknown to modern western science. And we might gain a priceless knowledge from a given Arab cartographer, geographer, or historian in spite of the fact that he believes the world is spherical. Medieval Arab science may technically be globular, but the medieval Arab idea of even a spherical world is so much closer to the traditional flat earth concept generally than western science today, and it contains innumerable vestiges of old truth which have been purged by the west. As in all things, take what is valuable and leave the rest. The Arab Islamic geographers and savants can be keys to much knowledge which the prejudice of western science has prevented it from understanding or even pursuing.

## **Aether**

Aether is, according to the Aetheric Wind Model, a substance which fills up the majority of the universe and causes Universal Acceleration.

### **Physics**

It is made of a mixture of Hydrogen (H) and Helium (He). Aether was formed before the Big Bang, when all matter and energy in the Universe was crushed together in the same particle with near infinite heat and pressure. It is of a state of matter unreachable by man. It, like gas, is very fluid, and is so spread out that not even London Dispersal Forces (van der Waals Forces) affect it. As such, it retains energy indefinitely. It is also what warms the Earth and causes the lava under the crust.

## Aetheric Whirlpool

The Aetheric Whirlpool (or Whirlwind) is an extremely important phenomenon in the Aetheric Wind Model. As aether rushes past the earth, it is attracted to the vacuum that it itself makes. It thus falls back down towards the earth in a pattern similar to the whirlpool easily observable in one's sink. When it reaches the middle of the whirlpool, the aether continues on its way. The process in comparable to that of a siphon.

### Shadow of the Whirlpool

The shadow of the Aetheric Whirlpool is a hypothesized effect in which objects traveling along the earth are subtly pulled into a path taking them around the disk. It is not known exactly how it operates, but it may be related to gravity.

### Path of the sun, the moon, and the stars

The Moon and Sun travel along the Aetheric Whirlpool. The Sun is relatively near a portion of the whirlpool comparable to an eyewall, which causes Sunset and Sunrise. It moves from side to side on this wall, which is the reason for the seasons. The stars are somewhere near the top of the whirlpool.

### Sunset/sunrise and the Midnight Sun

The sunrise/set and midnight sun are caused by a several eyewalls throughout the Whirlpool, which distort light to the point that it does not reach the earth.

The opening paragraphs to Immanuel Kant's *An Answer to the Question: "What is Enlightenment?"*:

#### Quote

IMMANUEL KANT

An Answer to the Question: "What is Enlightenment?"

Konigsberg in Prussia, 30th September, 1784.

Enlightenment is man's emergence from his self-incurred immaturity. Immaturity is the inability to use one's own understanding without the guidance of another. This immaturity is self-incurred if its cause is not lack of understanding, but lack of resolution and courage to use it without the guidance of another. The motto of enlightenment is therefore: Sapere aude! Have courage to use your own understanding!

Laziness and cowardice are the reasons why such a large proportion of men, even when nature has long emancipated them from alien guidance (naturaliter maiorennes), nevertheless gladly remain immature for life. For the same reasons, it is all too easy for others to set themselves up as their guardians. It is so convenient to be immature! If I have a book to have understanding in place of me, a spiritual adviser to have a conscience for me, a doctor to judge my diet for me, and so on, I need not make any efforts at all. I need not think, so long as I can pay; others will soon enough take the tiresome job over for me. The guardians who have kindly taken upon themselves the work of supervision will soon see to it that by far the largest part of mankind (including the entire fair sex) should consider the step forward to maturity not only as difficult but also as highly dangerous. Having first infatuated their domesticated animals, and carefully prevented the docile creatures from daring to take a single step without the leading-strings to which they are tied, they next show them the danger which threatens them if they try to walk unaided. Now this danger is not in fact so very great, for they would certainly learn to walk eventually after a few falls. But an example of this kind is intimidating, and usually frightens them off from further attempts.

Thus it is difficult for each separate individual to work his way out of the immaturity which has become almost second nature to him. He has even grown fond of it and is really incapable for the time being of using his own understanding, because he was never allowed to make the attempt. Dogmas and formulas, those mechanical instruments for rational use (or rather misuse) of his natural endowments, are the ball and chain of his permanent immaturity. And if anyone did throw them off, he would still be uncertain about jumping over even the narrowest of trenches, for he would be unaccustomed to free movement of this kind. Thus only a few, by cultivating the;r own minds, have succeeded in freeing themselves from immaturity and in continuing boldly on their way.

I feel it is of some relevance to the principles of Zeteticism and the ideals of our Society.

The enlightenment of the eighteenth century philosophes which Kant describes above was a good movement in that it zealously opposed an evil culture which was entrenched by aristocratic government and false religion which were rightly attacked by the enlightenment.

The monarchies which the philosophes attacked employed their own philosophes in order to subvert and control this movement, and the enlightenment became divided into schools of thought. Enlightenment writers vary significantly.

Kant's essay is indiscriminately prejudiced against any kind of systematic perspective, but it is foolish to listen to instruction that causes us to stray from knowledge.

Eighteenth century science did deserve criticism, but Kant replaces one evil with another. His indiscreet opposition to *all* "dogmas and formulas" can easily be used to condemn the innocent and righteous simultaneously with the wicked.

To be fair to Kant, cult myths like heliocentricity were already institutionalized dogmas by Kant's time which have instilled a debilitated "immature" mentality (to use Kant's term) that dares not question childish dogmas about moon visitations or patently illogical formulas like relativity. Kant's analysis is applicable to our cause if applied to those false doctrines.

#### Rousseau versus Voltaire

The enlightenment embraces a whole spectrum of opinions.

Rousseau and Voltaire were opposites and occupied two extremes of this spectrum. The writers of Voltaire's school of thought including D'Alembert, LaPlace, and Diderot were tools of the aristocracy and ardent teachers of heliocentric dogma. They feigned opposition to aristocracy whilst harshly attacking its staunchest opponents. For example, Voltaire wrote that Rousseau's 'Social Contract' was "an essay against the human race." This school of writers corrupted the enlightenment.

Jean Jacques Rousseau was more enlightened than Voltaire's followers since he questioned and opposed false sciences and arts, and the intellectual and moral degeneracy which they engendered. Likewise, John Wesley saw through both the corrupt Anglican church and phony British astronomy. John Wesley was a geocentrist and a rebel who devoted his life to fighting ecclesiastical corruption, and he did a better job than Voltaire who hypocritically befriended Pope Clement XIV.

#### **Augustin Barruel**

http://en.wikipedia.org/wiki/Augustin\_Barruel

Augustin Barruel was an ultra-conservative papist who wrote a famous book in four parts during the 1790's entitled 'Memoirs Illustrating the History of Jacobinism'. The first quarter of the book which I find most useful outlines Voltaire's career. The second part against Rousseau is the worst part of the book in my opinion. The last half of the book about the Illuminati is why it is so famous.

*Marvelous.* This is the english translation first published in 1798. Very well documented, it quotes the correspondence of Voltaire, King Frederick of Prussia, d'Alembert, and Diderot with one another and like minded persons from book publishers to european monarchs, nobles, academics, and sacerdotals in order to facilitate the annihilation of Christian culture in europe. This essay is mostly arranged into short chapters on each area in which this conspiracy ventured. Completely documented, well organized, and not at all boring.

This particular essay about anti-Christian conspiracy is indispensable in outlining the history of opposition to geocentrism and its vestiges because the opponents of such traditional science were *identical* with the most fanatical opponents of traditional Christianity during that period.

The chapter on the suppression of the Jesuits mentions an alliance of Voltaire's clique with Pope Clement XIV. Unfortunately, no significant investigation is made into such an odd phenomenon.

Very unlike Barruel's right of centre political outlook, most Jesuits (especially throughout the Hispanic empire) were actively interested in the welfare of common people. Perhaps the Jesuits lack of sufficient concern for capitalist and bourgeoisie interests explains why the very aristocratic Voltaire sought to have Pope Clement XIV disband the Jesuits whilst ignoring other religious orders more allied to aristocratic interests such as the Dominicans.

#### 'The Anti-Monarchical Conspiracy'

By Augustin Barruel

Inferior and misguided compared with his first essay, this work exposes Barruel's aristocratic prejudice. Barruel takes aim against Jean Jacques Rousseau and is clearly a partisan of aristocratic interests and an enemy of the French revolution who does not even consider or mention the welfare of common people in this essay. Unlike the meticulous documentation of directly relevant material in his first essay, over half of this borish essay is spent recounting conspiracies from centuries ago. It is convoluted and not well organized.

Barruel claims that the anti-Christian conspiracy of his first essay is united with the anti-monarchy movement, but he ignores huge contradictions to this thesis like Voltaire's close friendship and connections with the sovereigns of europe. Barruel will not countenance the abundant evidence that Voltaire shares his own aristocratic bias, and his arguments in this essay defending aristocracy are fundamentally weak.

#### Pierre-Simon Laplace (1749-1827) & His System of Astronomy http://en.wikipedia.org/wiki/Pierre-Simon Laplace

Like Newton and Einstein, Pierre LaPlace's astronomy uses excessive math and unfamiliar language to bolster false astronomy which is the atheistic heliocentrism of Voltaire and Galileo. In fact, the correspondence of Voltaire's colleague D'Alembert reveals that D'Alembert secured LaPlace's entrance to the French National Academie. Also like Newton and Einstein, LaPLace's use of esoteric language and inordinate math distracts people from critical and objective thinking as to whether or not his system is true which is the real reason these devices are used.

LaPlace's astronomy is responsible for the demonstrably false 200,000 mile earth to moon distance. LaPlace's math is false, theoretical, and complicated. *Like Newton, LaPlace's astronomy only uses complicated math because his premise is too easily refuted if stated in simple terms.* The influence of LaPlace's theoretical math gradually replaced traditional Euclidean geometry during the nineteenth century through indoctrinated universities like the French Academie where money and energy are spent on theories whilst Euclidean geometry was ignored. Noam Chomsky once astutely observed that the wealthiest 20% of the population are also the most indoctrinated.

Samuel Rowbotham understood that LaPlace's hypothetical astronomy was a fabrication. Guided strictly by observable reality, Rowbotham found the Achilles' heel of heliocentric and global earth theories by using the immutable laws of Euclidean geometry and basic trigonometry.

I suppose I should begin by saying that I posted this section from Kant more out of agreement with the spirit of his comments in these particular sections, rather than the substance of his argument overall. I think the most dangerous aspect of Kant's version of enlightenment is not just that it "can easily be used to condemn the innocent and righteous simultaneously with the wicked", but rather that it favours the haves over the have-nots. Simply put, under any reasonable interpretation, Kant effectively outlaws civil disobedience in this essay. He essentially takes the view that in the ideal state, all would be free to say what they like in a public capacity, so long as all obeyed the law with respect to their roll in society. However, it surely takes no great effort to see that only under very particular circumstances would this result in a just outcome. Under a great many, it would clearly take away the one method of political leverage available to those who have least.

I am aware of 17's political interests, and in order to avoid appearing as one who fawns over this undoubtedly great philosopher, I feel I should present a more critical take on Kant and his outline of an enlightened Republic, based on an essay I have written. Please note that due to the limitations of the forum software, I cannot maintain proper formatting, but I've tried to make quotes etc. clear:

A Critique of Kantian Republicanism

In the essays What is Enlightenment? and Perpetual Peace, Immanuel Kant attempts to sketch a socio-political system in which freedom of thought and expression exists in harmony with social stability and order. The model he advocates is essentially a representative republic, in which absolute freedom of thought and expression is permitted in the public sphere, but obedience to the law is required in the exercise of one's duties, office or profession. Kant contrasts this with faith in an elite group of rulers, and what he sees as the central flaw of democracy, namely that it essentially amounts to a tyranny of the majority. In this essay, I will argue that Kant does not recognise that precisely the same arguments can be levelled at any non-ideal representative republic. If in practice a representative of the citizenry fails to represent all of the citizens she is charged with representing, instead only supporting those whose support she requires, the system is no better than a repressive democracy. Moreover, Max Weber's analysis of the development of the occidental city and Western politics not only shows that supposedly representative officials often fail to adequately represent the citizens, but that groups often have to collectively leverage their position, often through civil disobedience or the use of force, in order to acquire rights and representation. I will conclude by asking whether or not there is any middle ground between these two positions, or if an adjustment or restatement of Kant's ideas can solve the problems inherent to his model.

In An Answer to the Question: What is Enlightenment?, Kant attempts to outline what an enlightened society would look like, focussing on the need for freedom to use one's reason publicly. He begins by describing what he sees as the sociopolitical "immaturity" of societies which demand unthinking obedience (Enlightenment 54), and where not only action but free-thought and discussion are restricted. Kant contends that most people are all too ready to abdicate moral and intellectual responsibility, and that as a result self-proclaimed guardians can easily persuade people that such responsibility is dangerous and best avoided (Enlightenment 54). This blind faith in conventional wisdom can eventually infect the rulers themselves, leading to a vicious circle of prejudice and intellectual stagnation (Enlightenment 55). Kant believes that such societies appeal to and empower our moral deficiencies, and argues that many find it easier to unthinkingly do as they are told than to engage in self-cultivation and improvement. Only by allowing people to think for themselves can dogmatism be overcome, and therefore the freedom to think for oneself and publicly express those thoughts is essential if society is to become enlightened (Enlightenment 55).

The objection Kant anticipates is that the kind of freedom of expression that he is advocating would lead to disorder and civil disobedience, and make public offices and positions unreliable or unworkable (Enlightenment 56). Kant's solution is to argue that although the necessity for obedience in one's social role may require "the private use of reason . . . [to] be very narrowly restricted" (Enlightenment 55), this should not lead to any restrictions on the public use of one's reason, the two being distinct in his view: "But by the public use of one's own reason I mean that use which anyone may make of it as a man of learning addressing the entire reading public. What I term the private use of reason is that which a person may make of it in a particular civil post or office with which he is entrusted" (Enlightenment 55). In other words, one should be free to articulate one's opinions and views in public, so long as one does so in a way that does not interfere with one's civic duties. Kant makes it clear that it is not only public officials who have such duties, but that even in our capacity as citizens we have certain civic obligations (Enlightenment 56). Kant's essential contention therefore is that enlightenment and freedom of

expression need not come at the cost of social order and stability

The freedom to use one's reason in a public capacity ties in directly with his constitutional ideal, a representative republic. In his essay *Perpetual Peace: A Philosophical Sketch*, Kant describes all three in the following passage: "A republican constitution is founded upon three principles: firstly, the principle of freedom for all members of a society (as men); secondly, the principle of the dependence of everyone upon a single common legislation (as subjects); and thirdly, the principle of legal equality for everyone (as citizens)" (Peace 20). Kant does not explain precisely what he means by "freedom", but we can surely assume that it includes the freedom to use one's reason in a public capacity, as outlined above, and does not mean absolute freedom or the freedom to disobey the state or to refuse to carry out one's civic duties. Similarly, the common law and equality under that law presumably only applies with respect to one's public rights, as different civic roles will obviously come with obligations and rights that will give one more or less freedom when fufilling that role. What is important to note is that if the freedom Kant refers to in *Perpetual Peace* is the same kind of freedom he describes in *What is Enlightenment*, then we must bear in mind the range of legitimate actions available to citizens of a Kantian republic when assessing its structure.

Kant recognises that the above principles, taken at face value, could lead to representative republics being "confused" with democracies (Peace 21), and so introduces one further defining characteristic, namely its representative nature. For Kant, "Republicanism is that political principle whereby the executive power (the government) is separated from the legislative power" (Peace 21), such that the power to enact law is not held by the same body that creates law. Instead the representative (or representatives) of the executive power can prevent any assault on the republican nature of the constitution. Moreover, because that constitution guarantees the freedom of citizens to use their reason in a public capacity, any person or group that is adversely affected by (or disapproving of) proposed legislation can thereby appeal to the representative executive power (and presumably the legislature). Kant obviously feels that such a constitution offers the best balance between guaranteeing the founding principles of a representative republic and social stability.

In many ways, Kant's vision of an ideal constitution is best illuminated by examining his critique of what he appears to consider the worst form of government: democracy. Kant's central criticism of democracy is that because the legislative body also wields most (if not all) executive powers, there is no counter-balance which can prevent the tyranny of the majority over the minority:

"Of the three forms of sovereignty, democracy, in the truest sense of the word, is necessarily a despotism, because it establishes an executive power through which all the citizens may make decisions about (and indeed against) the single individual without his consent, so that decisions are made by all the people and yet not by all the people; and this means that the general will is in contradiction with itself, and thus also with freedom." (Peace 22)

Kant's description of democracy, and especially his qualification "in the truest sense of the word", seems to indicate that he is referring to direct democracy. One is tempted to read between the lines and see this as Kant leaving space for representative democracy within a republican framework, but it is hard to say whether his reticence to say so openly is due to his own disapproval, or a rhetorical decision made in light of the anticipated disapproval of his audience. In any event, he does not explicitly consider it. What is clear is that for Kant, representative, republican governance is good and just primarily because a representative, functioning as such, must represent all of the people she serves.

Part II

Quote

There are two significant and connected problems with Kant's account of the relative merits of democracy and republicanism. The first is that his account of democracy, even assuming it is the most direct form of democracy feasible, is clearly unfair, for two reasons. First of all, the sheer impracticality of an absolutely direct democracy ensures that the most direct form of democracy that is feasible (in a society of the size Kant is discussing) will necessarily require some kind of constitutional framework, or something akin and equivalent. In short, if by democracy in "the truest sense of the word' (Peace 22) Kant means a form of democracy that is practically impossible, then he is not really saying anything interesting. Alternatively, if he is referring to the most direct form of democracy that is feasible in a state of significant size, then his description amounts to little more than a caricature, as it will obviously not function in the way he describes representative institutions of some kind will clearly be necessary. Either way, there is something straw man-esque about his argument. Secondly, Kant's contention that a democracy "is necessarily a despotism, because it establishes an executive power through which all the citizens may make decisions about (and indeed against) the single individual" (Peace 22) is surely equivalent to arguing that democracy is despotic because it can potentially exhibit despotic features, which is surely a patent non sequitur. There is absolutely no reason why voters in a democracy must necessarily vote in a totally selfinterested and despotic way with respect to minorities. Indeed, it is entirely plausible that voters will vote in a way that defends the rights of others, even if it is to their material disadvantage, because they believe that such rights have an inherent social value. Kant might reasonably claim that direct democracy is flawed because it has the potential to lead to despotism, but to claim that it is therefore necessarily despotic is simply not a sustainable argument.

This may seem like a somewhat trivial criticism to make, but it ties into the the second problem with Kant's comparison between democracy and republicanism. Even if we grant that the possibility of despotism under a direct democracy necessarily makes it a despotism, the same argument can be levelled at representative republicanism. For just as voters in a democracy will not necessarily vote in a self-interested and despotic way, there is absolutely no guarantee that the representatives in a representative republic will necessarily represent all those they are charged with representing in an adequate manner. Whether they represent a constituency within the state or the entirety of the citizenship, and regardless of the way in which they come to hold office (electorally, hereditarily, by lot, etc), it is highly plausible that they will have interests which they can promote through that office, and which if promoted will run counter to the interests of at least some, conceivably most, and possibly all of the people they represent. It is of course true that the interests they promote and how they promote them may depend on the means by which they come to hold office. For example, if the official is democratically elected, she may seek to promote the interests of those who elected her, whereas if she is elected by lot she is more likely to promote her own interests and the interests of those most important to her. However, the important point is that there is no iron-clad way of guaranteeing that representatives represent the "general will" (Peace 22). Indeed, historically speaking it is a fairly uncontroversial point that a great many representative governments have primarily (or even exclusively) represented a majority, and made decisions against the will of a minority. Even granting a division of power between the executive and legislative branches of government, a tyranny of the majority is still entirely possible (and indeed plausible) under a representative government. If, as Kant argues, the possibility of despotism under direct democracy

necessarily makes it a despotism, then the possibility of despotism under a representative republic must necessarily make it a despotism as well. In short, if Kant's criticism holds against direct democracy, then it holds against representative republics too.

Of course, the above arguments do not significantly undermine Kant's overall model, but simply counter his claims regarding the relative merits of representative republicanism versus direct democracy. However, the last point does highlight a more serious problem with Kant's attempt to ground the process of enlightenment in a socio-political model of public freedom and private or civic duty. Such a system essentially grants citizens the freedom to voice their opinions in exchange for the obligation to obey. However, this means that all forms of civil disobedience, unsanctioned protest or industrial action are effectively forbidden. The dissenting citizen's only legitimate recourse is to try and persuade those charged with representing him that a given policy marginalises him, or is in some way contrary to the values of the republic. If for whatever reason the representative fails or refuses to represent the marginalised citizen adequately, that citizen has no way of legitimately defending his rights in a Kantian republic.

This is especially problematic when one considers that historically, groups have often only been able to challenge unresponsive representatives through the use of force, or by bringing the power and influence of their civic role to bear. In Economy and Society, Max Weber charts how the burgher associations in the emerging cities of western Europe came to acquire the rights and degree of representation we now associate with them. As Weber points out, the burgher associations were not originally significant in a legal, political or social sense:

"Everywhere, not only in England, the burgher associations of the emerging cities were initially treated by the political power, the lord of the city, as passive liturgical associations of urban landowners who shared in certain specific tasks and duties as well as privileges . . . the economically most important of the privileges initially were not in a formal legal sense acquisitions of the burgher associations, but the property of the political or manorial lord of the city. It was he, rather than the burghers, who formally acquired these important rights which were to the immediate economic advantage of the burghers." (Weber 1248)

The burgher associations thus began with no legal rights or status. They merely exercised the rights of the lord with his permission and on his behalf. Even the functionaries they elected to court did not represent them, but rather the lord (Weber 1249). They lacked any independent representation or rights.

Weber contends that the burgher associations gained legal and representative legitimacy principally by defying and usurping the existing social order. He acknowledges that "[i]n a formal sense the corporation of the burghers and its authorities had their "legitimate" origin in (real or ficticious) privileges granted by the political and at times by the manorial powers", but maintains that "quite often, and especially in the most important cases, the real origin is to be found in what is from the formal legal point of view a revolutionary usurpation of rights" (Weber 1250). In other words, rights were rarely granted due to what Kant would consider the legitimate persuasion of representatives, but rather through collective action in defiance of ethe authorities.

Indeed, although to begin with these actions were often actively and continually resisted by existing representatives (Weber 1251), such disobedience did not just involve defying the law by asserting the right to confraternize. Rather, it subsequently extended to "seizing all or the major part of judicial powers and the supreme command in wartime", with judicial officials "now obtain[ing] office from the sworn burgher fraternity by election rather than from the city lord by appointment" (Weber 1253). The burgher associations then typically moved to curtail or limit the capacity of the existing powers to deploy coercive force against them, by razing castles positioned within the city, and asserting clear legal boundaries regarding the proximity of any new military fortifications. These rights were "obtained either by force or by extorted or purchased grant from the emporer or the bishop" (Weber 1254). Wherever he looks, Weber finds that "the urban communes originated in revolutionary usurpation by asssociations of burghers, merchants and urban rentiers who either united with the resident knights-as in the South-or with the confraternitates and guilds of the artisans-as in the North-to seize political power" (Weber 1256). Adequate and satisfactory representation could not be achieved through persuasion, or even public confraternization, but instead required civil disobedience or the direct use of force. Weber's central point in these sections is that the legal rights and political representation obtained by the burgher associations were primarily the result of collective action in defiance of existing laws. His examples not only show that those in power pften do not represent those they are charged with representing, but also that the public use of reason is rarely sufficient to persuade representatives to act against their own interests. Simply put, though at the time Kant was fortunate to live under a relatively benign monarch, Frederich II of Prussia, he was just that: fortunate. His claims about representation and the public use of reason seem thoroughly naïve in the light of Weber's empirical take on the way representation and rights are obtained in practice.

Yet it is still worth asking whether we can fashion a version of Kant's argument of an enlightened republic that takes account of these criticisms, and can be reconciled with Weber's analysis of the progression of legal and political representation in western Europe. For if this can be done, I believe the resulting model might serve as a strong and persuasive position from which to defend the idea that social freedom need not come at the expense of social stability. There are two approaches that would move Kant's position beyond the range of the above criticisms, one of which I believe would further this goal, and one which would not.

The easiest way to bring Kant's model clear of these problems would be essentially rhetorical in nature. Much of the fire I have directed at Kant could be deflected by presenting roughly the same argument in a less strident tone, scaling back the strength of Kant's claims whilst preserving the core of his position. Essentially, representative republicanism could be presented as better than direct democracy or other alternatives, without being held up as infallible or inherently just. Such a defence would essentially make the far more limited claim that representative republicanism may not always be superior to direct democracies, but in practice would tend to result in societies that are more fair, more just and more peaceful. The first, and less important problem with such an approach is that its highly consequentialist undertones would make it very difficult to square with the rest of Kant's philosophical views, or even his original reasons for supporting it, such as that it "springs from the pure concept of right" (Peace 20). More importantly, scaling back the strength of Kant's claims necessarily lessens the utility of his argument for the purposes of denying that there is a trade-off between freedom and stability. For if it is restated to claim no more than that representative republicanism will tend to produce better results than direct democracy or other alternatives, then for the argument to have any force it must be grounded in an empirical demonstration of that claim. Any such empirical study is bound to be difficult to produce and extremely contentious, so that what remains of Kant's argument will have very little persuasive power. For these reasons, I think a purely argumentative or rhetorical restatement of his position will bear very little fruit.

Rather, I think a more fundamental change is needed. A full account of how Kant's argument in favour of the representative republic could be reshaped so as to resolve the above problems whilst still being philosophically significant is well beyond the scope of this paper. However, I will attempt to briefly sketch what such an argument might look like. First of all, I believe that space can and should be made in Kant's argument for representative democracy, and that this should be explicitly preferred to monarchical models, which Kant expresses a strong preference for throughout Perpetual Peace. This is not simply a case of pandering to modern sensibilities: democratically elected representatives are far more likely to really attempt to represent those who elect them than a monarch, or any other kind of representative whose continued holding of the position is not necessarily linked with their performance in it. Representative, democratic republics do not exclude any of the features Kant finds so admirable in representative republics; they merely add a check against potentially unrepresentative representatives.

Moreover, I believe that the scope of legitimate public freedoms should be widened to include peaceful civil disobedience, industrial action, and other forms of protest that cannot reasonably be interpreted as constituting the public use of one's reason. Kant's criticism of direct democracy, that it easily results in a tyranny of the majority, is an old but valid line of argument. Furthermore, it also holds true (to a greater or lesser extent) of almost any form of democracy, representative or otherwise. That is why the right to engage in peaceful civil disobedience or protest is considered to be such an important feature of a just democratic state. It provides minority groups in a democracy with a legitimate way of defending their rights and views when the public use of reason has failed to persuade voters or representatives. It also provides those who are insufficiently articulate, educated, or influential to persuasively express their thoughts through language with an alternative means of communicating their dissent. Kant's concept of the public use of one's reason is effectively limited to "[men] of learning" (Enlightenment 55), but in democracies those who are marginalised or under

represented are often those who lack the resources, intellectual or material, to bring their views into the public consciousness through language. Hence a broader concept of what constitutes legitimate expression is necessary if this new  $emphasis \ on \ representative \ democracy \ is \ to \ satisfactor ally \ address \ Kant's \ own \ concerns \ about \ the \ potential \ for \ democratic$ despotism.

A restatement of Kant's original argument along the above lines would, I believe, present clear structural advantages over both direct democracy and non-democratic representative republics, with democratic institutions keeping representatives in check, and a broader range of legitimate forms of expression providing a bulwark against majoritism. Finally, it would be wholly consistent with Weber's analysis of how representative power structures evolve.

Thank you for this information which indicates that Immanuel Kant shared the aristocratic views of Voltaire who was 30 years older and probably influenced him. Voltaire was a racist aristocrat who believed that black people were not human and that democracy was the "idiocy of the masses." Men who write on behalf of the wealthy are hypocritical at best when they attack corruption.

Sadly, Kant was evidently opposed to Rousseau who to his credit favoured the "have-nots."

Voltaire does seem to have been inclined to attack faults in Christians more than others which can be a blessing in disguise to a Christian who is worthy of the Name.

Enlightenment is a much older subject and be traced as far back as the Mayans, Egyptians, Sumerian, and Eastern roots.

To be honest, with the hordes and hordes of knowledge from all these sources, in the end enlightment, like most things, are what you make of it.

Q 1296

Although I am not interested in Joseph Priestley's religious doctrines, I like his social and political writings which include a refutation of Edmund Burke's critique of the French revolution. He was in the camp of Rousseau and Tom Paine. http://en.wikipedia.org/wiki/Joseph\_Priestley

I was very careful in selecting a book by William Godwin, known as the father of anarchism and decided on Godwin's refutation of Malthus's famous (anti-people) overpopulation theory. http://en.wikipedia.org/wiki/William\_Godwin

Prior to agreeing more wholeheartedly with Lenin and Stalin, I extensively read and investigated the anarchist Prince Kropotkin of Russia who was one of the most famous of those influenced by Godwin. Kropotkin like most anarchists was one of the most critical of leftists towards the Bolshevik revolution.

Anarchism is distinguished by the fact that it does not believe in government, but it was another anarchist (of all people) who initially convinced me of the need for government to defend the cause of the weak and exploited and the powerful. I once heard Noam Chomsky make this defence of government in his critique of Bill Clinton's policies as a continuation of those of the Reagan-Bush era.

I weighed what Chomsky said and concluded that anarchists and businessmen both want the same thing. They both view government as evil - albeit for different reasons. I later actually discovered that the anarchist William Godwin credited right wing philosopher Edmund Burke as a key influence for anarchist ideas in his most famous work.

## Antarctica

Antartica is the name given to the southern polar region of the earth.

There are two main theories concerning the nature and extent of Antarctica. The first and most widely accepted theory says that Antarctica is a portion of ice surrounding earth, and that in its end there is a huge wall of ice (with different sizes depending on the subtheory) which is the edge of the earth. The second theory says that the center of the earth's surface is the point where the Equator and the Prime Meridian meet, and therefore Antarctica is a distinct continent located at the South.

Below are images of the two flat earth geographic models, which convey the different concepts of Antarctica within flat earth theory:

Another alternative model descripting Antarctica as a distinct continent. There is still an "ice wall" in this model, but it not Antarctica. Beyond the rays of the sun the waters will naturally freeze.

#### Context in Science

Èṣù was walking down a road one day, wearing a hat that was red on one side and black on the other. Sometime after he entered a village which the road went through, the villagers who had seen him began arguing about whether the stranger's hat was black or red. The villagers on one side of the road had only been capable of seeing the black side, and the villagers on the other side had only been capable of seeing the red one. They soon came to blows over the disagreement which caused him to turn back and rebuke them, revealing to them how one's perspective can be as correct as another person's even when they appear to be diametrically opposed to each other. He then left them with a stern warning about how closed-mindedness can cause one to be made a fool.

Lets look further into this interesting phenomenon as it relates to a far more common phenomenae: that of Gestalt shifts. The ability to suspend one's context and wholesale take upon new ones at will can be very useful, especially to science.

From a strictly interpretative level we can easily apply this method of Gestalt shifting to any work. Some works are designed towards this end however. Figure i shows us a cube. First, we have the illusion hidden in our Observational Language showing us a three dimensional image portrayed through our knowledge of its intended subject in spite of its two dimensional representation. On the other hand, it is just as valid to see it instead as a set of lines on a flat surface, portraying a completely different message conceptually and mathematically. One could easily imagine it as a map of a few streets, for example.

#### Figures i, ii, iii

A popular, and perhaps more visually striking, application of this switching of context is found in Figure ii and Figure iii. Depending on which context set you view Figure iii from you may either see an Old Lady or a Young Woman; likewise for Figure ii you may see a rabbit, or perhaps a bird. One may even be able to hold these two different concepts in your mind at the same time, once having had the relationship revealed sufficiently. We do not cease thinking of Newton's laws when we have been introduce to relativity.

Until such relationship is sufficiently disillusioned it remains hidden - forcing us into choosing one context or the other. One can imagine from the reference of either context the opposing contextual choice seems nonsensical or even blatantly incorrect and silly. At the very least we can expect some signs of discordance and discontinuity between sets, and likely some additional continuities as well.

images/context/Rorschach\_blot\_05.jpg

#### Figure iv

Another parallel situation can be found in the Rorschach Test. The Rorschach Test is a psychological test in which the participant interprets inkblots (Figure iv). Their analysis of these blots are then analyzed by a professional. Through these interpretations these

otherwise contextless works are thought to be a reflection of the individual's context. The subject gives them his context through faith that his context is realized.

This is an interesting case in its minimal intent to represent. The original artist or contextual set is essentially void of purposeful order. Given a somewhat random set of data, it shows a subject tends to read into it a context that seems as continuitous as possible. Given no outside clues, this continuity is to the subject's context.

This is not merely relevant to images, psychology and art interpretation. This shift is prevalent in a wide range of fields, if not arguably all fields. Steven Pinker talks in depth on the importance of frame flipping to him in the advance of linguistics in The Stuff Of Thought. It is a common theme in mythologies and faerie tales across the world - take the tale of Eso at the head of this section.

Why would it be so curiously absent in scientific and mathematical thought?

We can answer this question simply: It is not. Many when they think of science prefer to think of it as a drudge of accumulation of facts. A simple matter of bookkeeping and ultimately a small dent one makes in a very specialized area. While this view and path is perfectly acceptable, valid, and useful to us we are simply discussing the cases which do not conform to this pattern.

To examine shift as it happens in scientific methodology or mathematical models, let us first look at a simple incarnations of this, and then examine a few instances of this same illusive behavior briefly across mathematical and scientific disciplines.

Most should be at least familiar with is the illusion between Polar and Cartesian coordinates depicted in Figure v. Sin is not by nature different in these two graphings, we are simply viewing them from a different context.

#### Figure v

Scientifically, this shifting has been a tremendous help, and again has shown us that ideas that are apparently false are the most valuable to scientific endeavor. This is not only due to their tendency to show us new contexts and tools for examining the available data, and their inherent promise in superseding existing theory, but also due to the relationships they betray between the incumbent worldview and that of the new imposer.

It forces us to ask: Why does this new view "work"? What does it say? What does that, in turn, say about the previous world-view? Where did it come from - or what need caused it to arise? What is the reaction? Further, and perhaps more importantly, what does it say about the relationship of all such possible worldviews to each other, and ultimately, to some objective truth (or even truths ability to be objective at all)?

Consider a few notable advances in science and neo-zeteticism and examine how they, at least at the time, were faith based choices due to the equivalence of the theories involved.

#### Galileo's Tower of Pisa

First we turn our attention to one of the most notable and important scientific shifts in thinking and the scientist behind this shift. Galileo whose work to support Copernican views were instrumental.

It is true that it can be shown that Galileo's work is faulty at its start: in example it's mathematical model that predicts one tide per day an everyday observation that one cannot possibly imagine he would be ignorant to. We must like Einstein conclude that "his endeavors are not so much directed at factual knowledge as at comprehension." Let us then examine what some have called his most fruitful attempt at lending comprehension and discuss the famous Leaning Tower of Pisa experiment.

The Tower Experiment was a central obstacle to Galileo's argument. Galileo uses an imaginary conversation between three people. On the second day of conversation attention is brought to the tower argument: if one were to drop a ball from a tower, if the earth was moving it should appear some distance away from the tower greater than its distance from the tower when dropped. Since the tower is fixed to the ground, it is assumed in the Aristotelian view that the tower would move with the ground while the ball, not fixed to any moving element, would then be seen to move relative to the tower horizontally, which is to say the tower, due to the rotation of the earth, would rotate away from the ball which would fall in a straight line towards the earth.

The illusion Galileo illuminates for us here hides an equivalence between a rotating earth and a terra firma. Obviously the ball will experimentally fall down either way. This is shown to us by dissolving the idea that the ball doesn't leave the tower with the momentum of the tower. Both explanations explain just as well, and given current knowledge of the time are just as

correct.

Similarly, noting wind doesn't rush at us at high speeds can lead us to the conclusion the earth is not rotating. Likewise, if we switch our context, we have no implication that the atmosphere rotates as well.

Fratosthenes vs Huai Nan tzu

Often times Eratosthenes is cited as having shown us the Earth was round and as having given us calculations of its circumference using only comparisons of the lengths of shadows at various points on the earth. It can be seen upon inspection that this is indeed no proof at all. Consider the cosmology in Huai Nan tzu which takes the same practice, identical validity of reasoning, and similar measurements with instead the intent to measure the distance to the heavenly bodies, in contradistinction to the purpose of Eratosthenes - to measure the circumference of the pre-assumed round planet.

In the the case of Eratosthenes he must begin with the first assumption in his contextual language of a round earth. Without this framework and modelling his data is meaningless. On the other hand, when we look at the Huai Nan Tzu when confronted with a similar issue we are left with the realization of close planets and stars of a smaller size and a flat earth, the same view developed in the 1900s by the (mostly) Christian Flat Earth theorists.

Einstein's Equivalence Principle

We shall therefore assume the complete physical equivalence of a gravitational field and a corresponding acceleration of the reference system.

Einstein

Einstein was fond of a form of inquiry known as thought experiments. In a thought experiment, a premise is assumed to deduct from it the possible consequences. One of these thoughts experiments in particular involved a solitary passenger on an elevator that is alone in the universe.

When the elevator starts accelerating upwards, a pull downwards is felt by the passenger. This is due to the passengers momentum. Recall that in accordance with Newton's Laws, a body at rest tends to stay at rest. Einstein hypothesised that since this pull, caused by the momentum of the passenger fighting against his acceleration, is indistinguishable from gravitational influences, it is only logical to assume that they are one and the same phenomenon. Comparatively, another pseudo-force like this arises from a rotating reference frame, say if one is on a spinning carnival ride one would presumably feel a pull away from the center.

Consider the scenario of this elevator accelerating upwards at 9.81m/s/s. If the passenger were to jump in the elevator while it was accelerating upwards at 9.81m/s/s (the rate at which we are pulled to the earth by gravitational forces) he would observe the same effect as if he was jumping on the earth. An initial resistance would be felt; the ground, or elevator floor, would recede away from him at 9.81m/s/s until he has traveled enough distance to expend the force given by jumping. Then the elevator floor would rise up to meet him at 9.81m/s/s. This can be seen as an observational illusion: much like that of Galileos', the elevator floor can be seen to either be accelerating upwards at 9.81m/s/s or the passenger could be seen as falling towards the floor. To the passenger - its indistinguishable! Einstein's inductive leap here was the realization that perhaps the forces are indistinguishable because they are. They both are accelerating frames of reference. This is known as the equivalence principle.

The equivalence principle also comes into play in an outdated yet still modern flat earth belief. It was, and still is in some circles, believed that the earth is accelerating upwards at 9.81m/s/s like our passengers elevator. This is what accounts for gravitational influences towards the earth in this model. It should be clear why this model is foolish - it completely discounts gravitational phenomena on smaller scales and the role of matter in gravitational interaction. The view presented next is far more cohesive.

The Ferrari Effect

No doubt you're familiar with Einstein's theory of the curvature of space. If space is curved - and modern physics is based on that assumption - the Earth, from space, would appear circular. It's a simple optical illusion

We do not cease thinking of Newton's laws when we have been introduce to relativity.

Many round earth Newtonians claim, the planets couldn't rise around the sun because of their grater weight.

A good experiment for the Newtonian flat earth geocentricity is:

- 1. Hold a bag in opposite to another with the same weight.
- 2. Rotate in feeling the centrifugal force.

Q: In what direction you're mooved?

A: In none, because the both bags are pulling with the same force.

-> If e. g. Jupiter, Saturn and Neptun rise around the earth, although their greater weigh, 'cause around the earth is everywhere the same gravitation and cotrifugal force.

'Earth is Square and Heaven is Round'

Confucian and Taoist cosmology as well as traditional Feng Shui all acknowledge that the Earth is flat. This was true of the majority of people in China and Japan until the midseventeenth century when the globularist influence of the antiChristian Jesuits perverted their sciences. Therefore, Confucian flat Earth science dominated geography in China until the end of the Ming dynasty circa 1644 and in Japan well into the Tokugawa shogunate. #### The Earth is flat.

This is a belief I hold as the beginning of an ongoing search for truth and certainty. It is a starting point – an intellectual foundation on which I feel further knowledge can soundly be built. Much as Descartes did in his *Meditations on First Philosophy*, I wish to start from a place of certainty and build upon it. The Flat Earth is an obvious truth to me now. My senses show me and my reason confirms it.

However, my belief that the Earth is flat is not a popular one and it is not a belief I have always held. Like most people, I was taught from an early age that the Earth is a rotating sphere which, along with a collection of other spherical bodies, revolves in an elliptical orbit around our Sun. To most of you, this will seem like an obvious and unarguable fact. It is something you have been told by teachers. Told by parents. Told by textbooks. It is something you are utterly sure of. And, more than likely, it is something you have never truly investigated.

It isn't surprising, then, that people believe so strongly that the Earth is a sphere. We are bombarded every day of our lives with information. Television, radio, books and the Internet all compete to tell us things. Society agrees that some ideas are worth debating and that others are not. The idea of a spherical Earth falls into that second category. At some point, our society decided with great certainty that the Earth is a sphere and, consequently, that further consideration is unnecessary and anyone holding an opposing viewpoint is unworthy of debate. That the Earth is spherical is a 'fact' and we are, from an early age, told to accept it without question and in the face of our own first-hand experience. But as 16th Century mathematician Pierre-Simon Laplace stated, "The weight of evidence for an extraordinary claim must be proportioned to its strangeness." The Spherical Earth model is truly extraordinary and runs contrary to all of our senses. Consequently, the burden of proof is extraordinary – and this burden has never been met. But, because the idea is so firmly ingrained in our culture, few of us bother to hold the Spherical Earth model to account.

This tendency to firmly maintain beliefs while intentionally disregarding opposing evidence – particularly evidence in the form of first-hand experience – is intellectually dishonest and unscientific. Man's quest for truth is furthered only through experience and reason. During the 19<sup>th</sup> Century, Samuel Birley Rowbotham pioneered an approach to astronomy called Zetetic Astronomy. Zeteticism stresses the importance of reason and experience over the trusting acceptance of dogma. This emphasis on experience as the only source of true knowledge dates back to ancient Greek empiricists such as Aristotle and was also prominent in the more recent British empiricism espoused by John Locke. In his *An Essay Concerning Human Understanding*, Locke states, "No man's knowledge can go beyond his experience." While second-hand 'knowledge' is often a useful tool for dealing with practical, day-to-day tasks, it should not be mistaken for truth and certainty.

Empiricism forms the foundation of the scientific method, a tremendously useful tool for learning about the world. One of the scientific method's greatest strengths – when it is practiced honestly and sincerely – is its willingness to

engage opposing data. In the preface of his book *Zetetic Astronomy: Earth Not a Globe*, Rowbotham makes the Zetetic dedication to this principle clear:

I advise all my readers who have become Zetetic not to look with disfavour upon the objections of their opponents. Should such objections be well or even plausibly founded, they will only tend to free us from error, and to purify and exalt our Zetetic philosophy. In a word, let us make friends, or, at least, friendly and useful instruments of our enemies; and, if we cannot convert them to the better cause, let us carefully examine their objections, fairly meet them if possible, and always make use of them as beacons for our future guidance.

Despite its frequent criticism from mainstream science, the Zetetic approach to science is happy to take on board objections from its opponents because those objections will ultimately be used to strengthen the Flat Earth position.

The modern Flat Earth Society has its roots in Zetetic Astronomy. After Rowbotham's death in 1884, his followers formed the Universal Zetetic Society and continued to publish Zetetic literature in the spirit of Rowbotham's *Zetetic Astronomy: Earth Not a Globe.* In 1956, the Universal Zetetic Society became the Flat Earth Society. While the Society's focus became more religious throughout the 20<sup>th</sup> Century, the Zetetic underpinnings remained intact. In the 21<sup>st</sup> Century, the Flat Earth Society is returning to its original scientific focus and, despite its presently diminished size, is stronger than ever. We are patient because we know that the truth will ultimately be realised. Again, from Rowbotham's preface to *Zetetic Astronomy: Earth Not a Globe:* 

In all directions there is so much truth in our favour that we can well afford to be dainty in our selection, and magnanimous and charitable towards those who simply believe, but cannot prove, that we are wrong. We need not seize upon every crude and ill-developed result which offers, or only seems to offer, the slightest chance of becoming evidence in our favour, as every theorist is obliged to do if he would have his theory clothed and fit to be seen. We can afford to patiently wait, care-fully weigh, and well consider every point advanced, in the full assurance that simple truth, and not the mere opinions of men, is destined, sooner or later, to have ascendancy.

IN VERITATE VICTORIA.

## EARLY PARALLAXIAN THEORY IN A NUTSHELL

Jul 28, 2016 JohnDavis

#### Geography

We have all seen the flat earth map. The infamous Azimuthal Equidistant Projection. Even if we don't know it, you likely know it instead as the U.N. Flag, adopted in 1946. Its history stretches all the way back to the 19th century Flatist. Nearly every single person I've talked to will agree that it is not accurate enough especially in the South, but it has been been a staunch mainstay in flat earth theory. Samuel Shenton and Charles K. Johnson ascribed to it, often mapping the route of NASA 'sputniks' to the surface of this infamous piece of cartography. It finds its place today as the most popular geographic view of the Flat Earth. And it started with Parallax, in his seminal work *Zetetic Astronomy: Earth Not A Globe.* 

It doesn't hold up to modern scrutiny. Have no doubt there. The smallest of issues, and still a large one at that, concerned travel in the South. As you receded rimward past the equator, distances appeared distorted failing to explain Southern travel times. To this complaint Rowbotham simply replied "It is one of those utterances which indicate a desperate determination to support a cause at all hazards, and without regard to any evidence but such as agrees with a foregone conclusion." He went on to point out that many can easily find instances where calculation has failed to agree with actual trips and that these locations are even found by calculation in the first place citing a few strong first hand accounts.

While we now recognize this as a legitimate issue, on the other hand, the map was a good first step in the right direction. Solving a host of issues, problems like circumnavigation and Northern travel, these were simply explained through the layout of the continents on Earth.

#### The Heavens

The geography could also be derived using one of the now most oft cited proofs of the sphere, which he spent some effort doing in his work. By placing sticks in various locations and noting the angle of the shadow, Rowbotham used this to calculate the distance to the sun and its location. A similar experiment was carried out at least twice in the past, once by early Taoist Chinese scientists and once by Eratosthenes.

In contrast to Eratosthenes of Alexandria's assumptions, he did not take it out of faith that the rays of light from the sun would be parallel, the sun be far away and massive, and that the Earth was a Globe. Instead, he took the data gathered and tried to draw conclusion from that. After all, to determine the source of a light, why wouldn't you measure the angle of its shadow - as you did with any other

source of light in all of human existence!

Apparently, unbeknownst to him, the conclusions mirrored studies the Taoist scientists did much earlier than both Eratosthenes and the Parallaxian view. Independently discovering these and incorporating them into the modern view of the world, we ended up with most common path of the sun on the flat earth. Circling above, the sun followed a path roughly around the equator. Not only did this explain time-zones - as the area the Earth shone on was limited any time of day - but it also revealed to us the Universe was rather small. The stars but 'motes' close to the surface of the earth. The Sun then could be calculated in diameter to be 32 miles wide.

Rowbotham, like many modern flatists, held gravity to be a farce. This view was held both by Samuel Shenton and Charles K Johnson. Things simply fell down.

### Perspective

Another key feature of classic Parallaxian models is their unique interpretation of perspective. He uses two primary thought experiments to discuss perspective; we will start with one dealing with a rounded circle of wood with an inset hole.

This piece of wood is fastened to a pole or some similar mechanism to hold it in place. The interested experimenter then slowly walks away from the pole. As the viewer recedes away from the disk, the inset hole apparently shrinks and shrinks due to its distance until eventually the disk itself appears as a whole disk - with no hole. This might seem a bit irrelevant until you tie it in with his second experiment.

Showcasing the difference between our common misunderstanding of vanishing points, Rowbotham added the height of the viewer into inspection. We will turn our attention this time to a line of street lamps. Most people understand perspective to work much like you may have learned in a high school art class - the edges of various objects gradually approach a common vanishing point. Rowbotham refined this view and instead realized that one must also take into account the height of the viewer herself. He supplies diagrams to show us the result of this shift.

This helped to explain a great number of phenomena including the sinking ship phenomena. Just like the hole in the disk, the base appears to disappear. This was not the only explanation from Parallaxian thought concerning this though. One of particular interest is the relative wave size hypothesis. In this it is realized that the size of close-by waves are far larger visually than those waves close to a ship in the distance. Thus we see that even on a fairly calm day that the closer waves would begin to obstruct the base of the ship making it appear to sink! As was often said, of course it disappears hull first! We are attempting to look through 50 miles of waves!

#### The Moon

As with modern flatists, the average Parallaxian Zeteticist knew the moon to be self luminous. Likely this came about in both cases not only due to the inability of sun the light the moon as it does on a globe if the Earth was flat, but also because it was coherent with Christian scripture. Additionally, it was semitransparent, globular body with mountains and craters of some type. Its make up was thought to be a cold, semi-transparent crystalline mass - somewhat like a giant ball of ice. Its light was a a soft phosphorescent one.

Much of this won't cause the modern flatist to bat an eye. Of particular interest

though is that this light was dangerous and could cause madness and diseases of various kinds. To support this claim he drew on evidences stretching back to ancient knowledge that hanging fish in the sun would cause it to spoil, the increase in lunacy during the full moon, laws prohibiting sailors from sleeping in the moon and much more. He described the light of the moon as damp, cold, and sceptic - substances exposed to it soon show symptoms of decay. Most modern believers would reject this, though it is of interest that the mainstream studies concerning this are far from conclusive.

The point here seems to show that the nature of light from the moon is in fact different from that of the sun - of which there can be no doubt. This is common sense, and as he notes is evident across many cultures. The Hindu as he points out call the sun the "Creator of Heat" and the moon "The Cold". Or Nidaghakara and Sitala Hima respectively.

On a more serious note, when we talk of the moon we naturally must then progress to questioning many of the phenomena related to the moon. The most obvious phenomena that comes to mind is the lunar eclipse. Again here in Zetetic thought we see the rebirth of a very old idea. First noted in the today's studies by Eric Dubay, Vedic astronomy holds that these may be caused by Rahu, in his view a shadow moon. The parallaxians had a similar view maintaining eclipses were caused by the regular passing of a shadow object. Also semi-transparent, this moon would regularly pass between us and the proper moon luna.

Now this may seem like a quick patch to explain eclipses, but they put forth some rather notable citations towards this. Among his citations supporting, he cites a Mr. Walker who observed an eclipse on March 19th 1848 stating "The moon positively gave good light from its disc during the total eclipse," and "The whole disc of the moon being as perfect with light as if there had been no eclipse whatever!" Additionally citations can be found from Philosophical Magazine and Normal Pogson, Director of the Hartwell Observatory.

## Earth

The earth is the flat astronomical body where live numerous species of plants, animals and other beings. The North Pole is the center of the earth, and South Pole is a circunference around it.

The sun and the moon are both located circa 3,000 miles above earth's surface. They have a mutual orbit (similar to a binary system orbit), which produces day and night on earth.

The stars are small astronomical bodies located circa 3,100 miles above earth and 100 miles above sun and moon orbit.

# EINSTEIN'S RELATIVITY PROVES THE EARTH IS FLAT

May 23, 2016 JohnDavis

In this article we show how ridiculous the globe truly is by demonstrating how it in actuality describes a flat earth.

#### **Newton's Laws of Motion**

- 1. Every object in a state of uniform motion tends to remain in that state of motion unless an external force is applied to it.
- 2. The acceleration of an object as produced by a net force is directly proportional to the magnitude of the net force, in the same direction as the net force, and inversely proportional to the mass of the object. F=ma
- 3. For every action there is an equal and opposite reaction.

### **Einstein's Equivalence Principle**

Einstein was fond of a form of inquiry known as thought experiments. In a thought experiment, a premise is assumed to deduct from it the possible consequences. One of these thoughts experiments in particular involved a solitary passenger on an elevator that is alone in the universe.

When the elevator starts accelerating upwards, a pull downwards is felt by the passenger. This is due to the passengers inertia. Recall that a body at rest tends to stay at rest. Einstein hypothesised that since this pull, caused by the momentum of the passenger fighting against his acceleration, is indistinguishable from gravitational influences, it is only logical to assume that they are one and the same phenomenon. Comparatively, another pseudo-force like this arises from a rotating reference frame, say if one is on a spinning carnival ride one would presumably feel a pull away from the center.

Consider the scenario of this elevator accelerating upwards at  $9.81\ m/s/s$ . If the passenger were to jump in the elevator while it was accelerating upwards at  $9.81\ m/s/s$  (the rate at which we are pulled to the earth by gravitational forces) he would observe the same effect as if he was jumping on the earth. An initial resistance would be felt; the ground, or elevator floor, would recede away from him at 9.81m/s/s until he has traveled enough distance to expend the force given by jumping. Then the elevator floor would rise up to meet him at 9.81m/s/s. This can be seen as an observational illusion: the elevator floor can be seen to either be accelerating upwards at 9.81m/s/s or the passenger could be seen as falling towards the floor. To the passenger - its indistinguishable! Einstein's inductive leap here was the realization that perhaps the forces are indistinguishable because they are. They both are accelerating frames of reference. The idea that gravitation is a

pseudo-force arising from a naive view (which is to say taking a non-inertial frame of reference as an inertial one) is known as *the equivalence principle*.

In short, gravitational pull then is shown as an observational illusion hinging on our naive view of our frame of reference being inertial. Gravity is actually revealed as an inertial force (also known as a fictitious force).

#### A Flat Earth Theory

First let us construct a Wish List, so that we can be sure to be fair when we claim we've shown sufficient proof for our model. A simple list of things we would like to say are true if we have indeed shown a model that says the earth is flat.

#### **Our Flat Earth Theory Wishlist:**

- We would like it to be coherent with our previous interpretation or show it as an approximation
- Results from a shift in our shift in the observational language, which is to say
  we are just "looking at it wrong" and this can be disillusioned, much like the
  Einstein's Equivalence principle or Galileo's inertia.
- Show the Earth is Flat
- Based on and coherent with known laws and facts

#### What do we mean when we say the Earth is flat?

Let us remove an obvious point of confusion and simply state that we talk about flat in a broad manner - we are not discussing mountains or valleys here. In similar fashion, we are not making the ludicrous claim that the Earth is two dimensional. What we do say is that it can be transversed via a straight line through space. We would also like to say that all such traversals are straight or can be seen as straight. It can be said to satisfy this if it can be shown to be parallel to another straight line in space along all such traversals.

#### The Ferrari Effect

Let us build first from the base of Newton.

Consider a theoretical object in a perfectly stable orbit around a theoretical planet in a traditional round earth manner. Remember from Newtons laws of motion: an object in motion tends to stay in motion and in the direction it is in motion. We can certainly say that the object in orbit that it feels no experimentally verifiable difference in force or pseudo-force - which is equivalent to saying it is experimentally not accelerating (and thus not changing direction or speed.) Remember, Einstein disillusioned our naive view of space based on the equivalence principle.

Our sight would lead us to believe this might be foolish, but if space is curved (and Relativity relies on the assumption that it is) it would be silly to not question our visual representation of space since by all accounts it appears as if our observational (and theoretical) language is ill equipped to deal with description of it.

We should assume that it is indeed travelling in a straight line as its experimental evidence points us to. The issue is with our naive view of geometry and space. Likewise we take the view that it is indeed in motion and not still.

Let's interpret the ramifications of the statement: an object in orbit travels in a straight (and thus flat), line through space through further thought experiment. First, we can define our field of interest in that taking all such theoretical orbits of our planet and realize them rightly as flat, thus defining the bounding space of interest also to be flat. It follows, given any orbit of this planet to be flat, the planet itself is flat since it satisfies our definition of flatness.

Let us again venture into thought experiment: eject some pods towards the earth from one such of our imaginary satellites at regular intervals along our orbit such that they are in free fall. Again, we can assume these are straight lines extending below to a translatable location on the surface of the earth, its geolocation. We can say these lines are normal to the trajectory of the satellite and they are normal to the ground, thus making the lines parallel. Since the orbit is straight, and the orbit relates directly to the geographical locations it is above, we have come a long way to show the planet is also flat.

Now let us consider what acceleration means. Acceleration by its nature means either a change in speed or direction, which is to say a change in velocity. So when we look at the parabola formed by a ball in motion we can recognize that it is for the most part accelerating - it changes both direction and speed. Now, let us examine the path if we remove the influence of gravity from our model as well as unbound the start and end points to allow it to move freely.

If gravity was not forcing the object downwards, it would then be travelling a straight path, parallel perhaps to our imaginary satellite and in this case tangent to the apex of our balls climb.

We can see by comparison between a theoretical object in orbit and our ball at the apex of its climb that if not affected by gravity it would travel a straight line. By repeating this experiment again and again with lower apexes of our ball, various orientations, and so on we see the earth itself, not just the paths of satellites, is flat.

The effect of viewing the earth and it appearing round is known as *the Ferrari Effect*, based off of former Canadian Flat Earth Society President Leo Ferrari who first predicted this. While not a true flatist, he was a free-thinker and his unique way of thinking helped us realize this. This describes that effect.

Any honest judge will begrudgingly have to admit that I have shown that the flat earth theory directly follows from our laws of motion and coherence with relativity. Even worse is the realization that we would have been lead to relativity sooner if not for our strict faith-like belief in a round earth.

#### Sinking Ship Effect

It is proven that the ship does not sink behind a hill of water, but that it is actually perspective which hides it. This demonstrates that the earth is not a globe. There have been experiments where half-sunken ships have been restored by simply looking at them through telescopes, showing that they are not actually hiding behind "hills of water".

Main article: Sinking Ship Effect

#### The English Mechanic

From The English Mechanic, a scientific journal:

#### Bedford Canal, England. A repeat of the 1870 experiment

"A train of empty turf-boats had just entered the Canal from the river Ouse, and was about proceeding to Ramsey. I arranged with the captain to place the shallowest boat last in the train, and to take me on to Welney Bridge, a distance of six miles. A good telescope was then fixed on the lowest part of the stern of the last boat. The sluice gate of the Old Bedford Bridge was 5ft. 8in. high, the turfboat moored there was 2ft. 6in. high, and the notice board was 6ft. 6in. from the water.

The sun was shining strongly upon them in the direction of the south-southwest; the air was exceedingly still and clear, and the surface of the water smooth as a molten mirror, so that everything was favourable for observation. At 1.15 p.m. the train started for Welney. As the boats gradually receded, the sluice gate, the turfboat and the notice board continued to be visible to the naked eye for about four miles. When the sluice gate and the turf-boat (being of a dark colour) became somewhat indistinct, the notice board (which was white) was still plainly visible, and remained so to the end of six miles. But on looking through the telescope all the objects were distinctly visible throughout the whole distance. On reaching Welney Bridge I made very careful and repeated observations, and finding several men upon the banks of the canal, I called them to look through the telescope. They all saw distinctly the white notice board, the sluice gate, and the black turf-boat moored near them.

Now, as the telescope was 18in. above the water, The line of sight would touch the horizon at one mile and a half away (if the surface were convex). The curvature of the remaining four miles and a half would be 13ft. 6in. Hence the turf-boat should have been 11ft., the top of the sluice gate 7ft. 10in., and the bottom of the notice board 7ft, below the horizon.

My recent experiment affords undeniable proof of the Earth's unglobularity, because it rests not on transitory vision; but my proof remains printed on the negative of the photograph which Mr.Clifton took for me, and in my presence, on behalf of J.H.Dallmeyer, Ltd.

A photograph can not 'imagine' nor lie!"

#### The Bishop Experiment

California Monterey Bay is a relatively long bay that sits next to the Pacific Ocean. The exact distance between the extremes of the Monterey Bay, Lovers Point in Pacific Grove and Lighthouse State Beach in Santa Cruz, is 33.4 statute miles. See this map.

On a very clear and chilly day it is possible to see Lighthouse Beach from Lovers Point and vice versa. With a good telescope, laying down on the stomach at the edge of the shore on the Lovers Point beach 20 inches above the sea level it is possible to see people at the waters edge on the adjacent beach 33 miles away near the lighthouse. The entire beach is visible down to the water splashing upon the shore. Upon looking into the telescope I can see children running in and out of the water, splashing and playing. I can see people sun bathing at the shore and teenagers merrily throwing Frisbees to one another. I can see runners jogging along the water's edge with their dogs. From my vantage point the entire beach is visible.

IF the earth is a globe, and is 24,900 English statute miles in circumference, the surface of all standing water must have a certain degree of convexity--every part must be an arc of a circle. From the summit of any such arc there will exist a curvature or declination of 8 inches in the first statute mile. In the second mile the fall will be 32 inches; in the third mile, 72 inches, or 6 feet, as shown in this chart. Ergo; looking at the opposite beach 30 miles away there should be a bulge of water over 600 feet tall blocking my view. There isn't.

Suppose that the earth is a sphere with a radius of 3,963 miles. If you are at a point P on the earth's surface and move tangent to the surface a distance of 1 mile then you can form a right angled triangle as in the diagram.

Looking over a distance of 1 mile, we can use the theorem of Pythagoras:

$$a^2 = 3,963^2 + 1^2 = 15,705,370$$

and when we square root that figure we get a = 3,963.000126 miles

Thus your position is 3,963.000126 - 3,963 = 0.000126 miles above the surface of the earth

0.000126 miles = 12 in \* 5.280 ft \* 0.000126 mi = 7.98 inches

Hence after one mile the earth drops approximately 8 inches.

Ergo, looking across 30 miles the Pythagorean theorem becomes:

$$a^2 = 3963^2 + 30^2 = 15.706.269$$

and when we square root that figure we get a = 3,963.113549 miles

Thus your position is 3,963.113549 - 3,963 = 0.113549 miles above the surface of the earth

0.113549 miles = 5,280 ft \* 0.113549 mi = 599.53872 feet

Hence after 30 miles the earth drops approximately 600 feet.

There are a number of different methods to calculate the drop of the Round Earth. Go ahead and look some up try a few out. You will find that the drop while looking over 30 miles is on the order of 600 feet.

#### Faith in Science

A well-known scientist once gave a public lecture on astronomy. He described how the earth orbits around the sun and how the sun, in turn, orbits around the center of a vast collection of stars called our galaxy. At the end of the lecture, a little old lady at the back of the room got up and said:

"What you have told us is rubbish. The world is really a flat plate supported on the back of a giant tortoise."

The scientist gave a superior smile before replying, "What is the tortoise standing on?"

"You're very clever, young man, very clever," said the old lady. "But it's tortoises all the way down!"

#### Steven Hawking in A Brief History of Time

What do we mean when we talk about science and knowledge? What exactly do these terms mean - the dialogue? the process? the set of causally linked so-called facts? these ideas realized in technology? These are all important players but more important than these perhaps is the context of these linked facts, of this process and of this dialogue.

From this context we are lead to axioms we are required to take on little more than faith. Take for instance the flat earther from the tale above who asserts that "It's turtles all the way down." Is this mocked worldview really that different from the foundations behind science and knowledge? Is it not true that there are a large number of these so called turtles we rest upon the foundations of how we think? Is it not so that science rests on turtles, even if perhaps they are carried on the shoulders of giants?

The previous story taken from this a different context depicts an illusion in our language - and a very useful multileveled one at that. On the base level we have the traditional interpretation, mocking the flat earther as a fool. From the secondary context of examination, we can see her view is in essence no different from that of the scientist - she at least admits this openly. We hide our faith behind social and lingual constructs so we can be ignorant of our faith. Then, we have at least a third additional context - that ultimately the flat earther, while correctly noting the infinitely recursive nature of the justification of our knowledge, is damned. We must consider the contexts of secondary and tertiary relevance - say, William James' tell of the story as well or even infinite regression in general. We can further extend this to involve the discussion here as a yet another relationship - that between the other contexts.

Our inevitable choices of axiom and context - these guesses are now so ingrained in our culture and language that they at times will even appear to us as objectively true facts or relations of facts and shape our observational language and thought - in spite of the fact that their real worth and validity remains largely to be shown. If we don't sucuum to an infinite regression of turtles we will have to settle with a demarcation made on what can only amount to faith or convenience.

Inevitability of Faith And Demarcation

Let us qualify our statement of inevitability. First we should show the inevitable existence of

such faith based axioms in any logical system; it is realized that many who hold such axioms will be contrary to the notion that these axioms are indeed held on faith. These staunch defends have perhaps been indoctrinated to believe that science is strictly non-faith based; an association that faith is an enemy of reason and science. The unfortunate irony is that by their unknowing acceptance of faith based axioms they unwittingly despise themselves.

It has been argued in some circles that Godel's Incompleteness Theorem shows us that we must take statements on faith. As John Barrows quips "If a religion is defined to be a system of thought which requires belief in unprovable truths, then mathematics is the only religion that can prove it is a religion!"

The particular aspect that we look at now is its claim that any well made system capable of expressing elementary arithmetic cannot be both consistent and complete. This is to say that for any consistent formal theory that proves certain basic arithmetic truths, there is an arithmetical statement that is true, but not provable in the theory; this is known as the Godel Sentence of the system. This would be a quite naive view of the situation; when one looks more into the details of Godel's Theorems one sees that in actuality it just says that one can construct a paradoxical sentence in a sufficiently complex system. This is similar to the case of the Liar's Paradox - we can construct a mathematical statement that is analogous to: This sentence is false.

More subtly, we are talking about the implications of over-defining our formal systems (perhaps even the validity of formal systems in general) and the trade-off with having then the power to construct statements that are beyond our systems capability to deal with. Our system becomes powerful enough that it is able to create unruly situations, namely self-referential paradoxical statements that cannot be proven but are true.

While this does show that we must take statements on faith, at least in principle, it does not do so in a meaningful or useful way and thus is without fruit for us. The fact we can construct paradoxical statements simply shows us we are dealing with an approximation that at some venture that needs to be disillusioned. It is not accurate to say that Godel's incompleteness theorem forces us to take these axioms on faith - more instead that it forces us to view strict formalism with a skeptical view. We don't expect English to be devoid of all such internal paradoxes, and it is unreasonable to assume our mathematical language to be devoid of this type of issue at this time.

This case also tends towards an infinite regression as shown by Turing. If we aim to eliminate this issue through defining within our system these phrases of paradox we instead just push the issue to be dealt with on the next layer of abstraction. For example, if we deal with the issue of this sentence is false we would then have to deal with with the issue of the phrase: (this sentence is false) is false and so on ad infinitum. We must at some point take the matter simply on convention or faith.

Turtles anyone?

The next likely target to examine is Induction. Induction can be said to be present when we take a statement about a singular event or a series of singular events and come to a conclusion about universal truths from them. The unfortunate truth is that we have no logical validation for this methodology. This is known as the Problem of Induction.

The problem may be related as follows: If one has seen twelve black birds, and he were to use induction it would bring him to believe that all birds are black. This is obviously not the case because any day a white bird might be observed. Science relies on there existing some validity to induction as it attempts to turn experience into universal statements about the universe. Or as Ludwig Wittgenstein puts it to example: "It is an hypothesis that the sun will rise tomorrow: and this means that we do not know whether it will rise."

A principle of induction, which is to say a valid formal logical definition that supports induction as a logically sound methodology, may indeed be outside of our reach.

Thus if we try to regard [the principle of induction's] truth as known from experience, then the very same problems which occasioned its introduction will arise all over again. To justify it, we should have to employ inductive inferences; and to justify these we should have to assume an inductive principle of a higher order; and so on. Thus the attempt to base the principle of induction on experience breaks down, since it must lead to an infinite regress. Karl Popper

And even more turtles begin to show themselves!

The hope for a unifying method of science based around a purely logical inductive basis is hopeless. And so we must turn instead to a demarcation to allow us to work as logically as possible - a demarcation that can only be made on faith or perhaps faith disguised as convention.

Your coverage of induction is inadequate. Especcially seen as you delineate the fact that justification is impossible, especcially inductive ("emipirical") justification. But then you avoid actually going the full distance to rejecting justificationist accounts of knowledge completely and instead stop at "we have to have faith". No we do not; we can just as well accept that all our theories are conjectures which exist in a system of critical analysis, so that nothing is taken on faith, even the methodology and interpretation of science itself. So the problems with justification disappear. That was Popper's solution, and it is still the one that has not been fully understood, even by philosophers and scientists. They still think we need to justify or measure "likeliness of being true", which we do not. If you spend enough time reading people like David Miller and Rafe Champion, you'll come to see how Popper has been systemitically misunderstood, as either a naive falsificationist or a type of positivist, or as subtly having a type of induction in his views, but these are just justificationists clutching at straws.

The considerations of logical paradoxes etc are not entirely relevant here either.

You said that Wittgenstein says that we have a hypothesis that the sun will rise tomorrow but we don't know that it will. This is Wittgenstein falling into a trap laid by philosophical interpretations of the concept of knowledge. What he actually means is that we cannot be certain that the sun will rise tomorrow, which is trivial. We do have knowledge that it will: we have a theory that tells us it will rise and that theory (which has not been refuted) is knowledge (until shown to be false) so therefore we do know that the sun will rise tomorrow (though we cannot be certain that it will, and we don't need to be).

Logical paradoxes definitely apply, for reasons stated. My cover of induction may have been inadequate for a paper on philosophy or a book on the subject. This was neither of those things, however thanks for the criticism. I'll expand it next time it is released.

The point in my question is that the definition of knowledge is itself a matter of fierce debate among epistemologists even still. I was prodding for further context to what he meant.

Given we ignore this question, and are talking of even just a scientific knowledge of a definition we can agree upon later (thought definitely not that it is what theories are made of), one can not even then rightly justify scientific theory logically; "We" DO NOT "have a theory that tells us it *will*" -- We have a theory that tells us it *may*; this theory additionally gives us no strictly logical basis for this probability or statement of fact (if you would rather).

This all brings to mind, as it wasn't mentioned above, Popper's statement on the probabilistic view of induction and on the problem of induction itself:

#### Quote

"My own view is that the various difficulties of inductive logic here sketched are insurmountable. So also, I fear, are those inherent in the doctrine, so widely current today, that inductive inference, although 'not strictly valid', can attain some degree of 'reliability' or of 'probability'. ... At this stage I can disregard the fact that the believers in inductive logic entertain an idea of probability that I shall later reject ... I can do so because the difficulties mentioned are not even touched by an appeal to probability .... For if a certain degree of probability is to be assigned to statements based on inductive inference, then this will have to be justified by invoking a new principle of induction, appropriately modified. And this new principle in its turn will have to be justified and so on. ... in short, like every other form of inductive logic, the logic of probable inference, or probability logic, leads either to an infinite regress or a doctrine of apriorism."

Turtles yet again. There seems to be no disagreement on that. At some place we must have this demarcation, and it is oft one made on context or faith.

His solution to the problem of induction is to say it doesn't exist in practice. Its a contextual demarcation - a shift of context from one where induction is a fact to one where induction is transient and possibly non-important. So much so that he later goes on to justify his removal of induction for many reasons - one being it doesn't serve as a mark for science.

This is kinda silly, but as I said, inevitable. There is always some line of demarcation, and it lies somewhere between dialogue and experience.

#### To clarify further:

It is a hypothesis that the sun will rise tomorrow. This is because we do not \*know\* it to be true. We have a theory that predicts it may be true.

The question is in the difference between dialogue and reality. The overlap and relationships contained within dialogue and reality I would, tentatively, define as knowledge. Of course, there is knowledge of being a good family member, of being a good employee, of being spiritual, of being religious, of being scientific, of being wise, and of science itself. These are further dialogues that overlap reality in places and serve to make up knowledge.

That is a different topic, but once you arrived at your definition of knowledge then you should apply it to the definition of theory as a "body of knowledge". This is what is meant in science when speaking of "The Theory of x".

#### Frequently Asked Questions

Welcome to the Flat Earth Society, and thank you for taking the time to go through this FAQ.

It was created in light of the realization that for someone with a "round earth" background, the flat earth theory would appear, at first glance, to have some glaring holes. This thread is designed to answer some of the questions that many round earthers raise when they first arrive. Please check this page before making your first threads in the forums, as it may contain the answers to the questions on your mind.

Some of the questions here have multiple answers due to differing views of flat earth theory among some of our members.

#### General Information

#### Is this site a joke?

This site is not a joke. We are actively promoting the Flat Earth Movement worldwide. There are, admittedly, several non-serious flat earth posters, but they are fairly easy to identify.

#### What do all of these acronyms mean?

Here is a link to flat earth Terminology!

#### What evidence do you have?

The evidence for a flat earth is derived from many different facets of science and philosophy. The simplest is by relying on ones own senses to discern the true nature of the world around us. The world looks flat, the bottoms of clouds are flat, the movement of the sun; these are all examples of your senses telling you that we do not live on a spherical heliocentric world. This is using what's called an empirical approach, or an approach that relies on information from your senses. Alternatively, when using Descartes' method of Cartesian doubt ₪

to skeptically view the world around us, one quickly finds that the notion of a spherical world is the theory which has the burden of proof and not flat earth theory.

Perhaps the best example of flat earth proof is the Bedford Level Experiment. In short, this was an experiment performed many times on a six-mile stretch of water that proved the surface of the water to be flat. It did not conform to the curvature of the earth that round earth proponents teach.

Many other experiments demonstrating the lack of curvature in the earth may be found in Earth Not a Globe, by Samuel Rowbotham.

#### Is flat earth theory connected to a religion?

Flat earth theory is neither officially nor unofficially associated with any religion. Throughout the ages various religious institutions

have championed a flat earth model for the world. Unfortunately this leaves us with the vestigial thought that flat earth theory and religions are symbiotic. They are not, even though many religions today, both mainstream and otherwise, still teach its followers that the world is flat. While they are not incorrect, believing in a flat earth isn't contingent upon believing in a deity or being a part of any religion.

#### People have been into space. How have they not discovered that the earth is flat?

The most commonly accepted explanation of this is that the space agencies of the world are involved in a conspiracy faking space travel and exploration. This likely began during the Cold War's 'Space Race', in which the USSR and USA were obsessed with beating each other into space to the point that each faked their accomplishments in an attempt to keep pace with the other's supposed achievements. Since the end of the Cold War, however, the conspiracy is most likely motivated by greed rather than political gains, and using only some of their funding to continue to fake space travel saves a lot of money to embezzle for themselves.

In light of the above, please note that we are not suggesting that space agencies are aware that the earth is flat and actively covering the fact up. They depict the earth as being round simply because that is what they expect it to be.

### There are many pictures on the internet and in other media depicting the earth as being round. Why do these not disprove flat earth theory?

In general, we at the Flat Earth Society do not lend much credibility to photographic evidence. It is too easily manipulated and altered. Many of the videos posted here to "prove a round earth" by showing curvature will show no curvature or even concave curvature at parts. The sources are so inaccurate it's difficult to build an argument on them in either case. Furthermore, barrel distortion and other quirks of modern cameras will cause a picture to distort with little or no apparent altercation; especially without references within the picture. Photographs are also prone to distortion when taken through the bent glass of a pressurized cabin as well as atmospheric conditions on the outside. With this litany of problems, it's easy to see why photographic evidence is not to be trusted.

It's also worth noting that if a person were to look down at the earth from high above, they would expect to see a circular shape where the sun's spotlight was shining. This explains why high altitude photographs are generally curved to produce the illusion of a round horizon.

#### Geography and Related Phenomena

#### What does the earth look like? How is circumnavigation possible?

As seen in the diagrams above, the earth is in the form of a disk with the North Pole in the center and Antarctica as a wall around the edge. This is the generally accepted model among members of the society. In this model, circumnavigation is performed by moving in a great circle around the North Pole.

The earth is surrounded on all sides by an ice wall that holds the oceans back. This ice wall is what explorers have named Antarctica. Beyond the ice wall is a topic of great interest to the Flat Earth Society. To our knowledge, no one has been very far past the ice wall and returned to tell of their journey. What we do know is that it encircles the earth and serves to hold in our oceans and helps protect us from whatever lies beyond.

Here is picture of a proposed, but certainly not definitive, flat earth.

How do you explain day/night cycles and seasons?

Day and night cycles are easily explained on a flat earth. The sun moves in circles around the North Pole. When it is over your head, it's day. When it's not, it's night. The sun acts like a spotlight and shines downward as it moves. The picture below illustrates how the sun moves and also how seasons work on a flat earth. The apparent effect of the sun rising and setting is usually explained as a perspective effect.

- The sun's orbit at winter solstice
- The sun's orbit at equinox
- The sun's orbit at summer solstice

When the sun is further away from the North Pole, it's winter in the northern hemiplane (or hemisphere) and summer in the south. A more simplistic picture can be found below.

#### How is there a magnetic field? Magnets can't be unipolar

While it's true that unipolar magnets can't exist, this isn't a problem for the Flat Earth. This is because ring magnets, which are shaped like (you guessed it!) a flat disk, are capable of having radial magnetization. In a radial magnet, one magnetic pole is at the center and other other is at all points on the edge of the magnet. A magnet like this can be found in loudspeakers, and perfectly replicates what is found on the Earth.

#### As a passenger on an aircraft, how is it I can see the curvature of the earth?

Quite simply you cannot. It is widely stated you would need to be at a height of at least 40,000 ft to get even a hint of curvature if earth were round. Commercial aircraft are not allowed to fly this high. They are only allowed to fly just under this altitude. 36,000ft might be typical. In addition, the windows on commercial aircraft are small and heavily curved. Even if they flew high enough for a person to see curvature, it would still not be visible to passengers.

#### How is weather created in FET?

Many weather patterns are actually created my the land itself. For example - rain shadow. Rain shadow is where somewhere on the eastern side of a mountain range (because weather/clouds travel from the west generally) is deprived of rain not just once, but nearly all the time. This is because the clouds are forced upwards by the mountains blocking their path and become cooler and condense, meaning water droplets form and it rains on/before the mountains thereby not raining on the leeward side.

Other weather patterns are created by geographic position like the tropics being humid - they are surrounded by water which is constantly warmed and evaporated.

#### Why doesn't gravity pull the earth into a spherical shape?

The earth isn't pulled into a sphere because the force known as gravity doesn't exist or at least exists in a greatly diminished form than is commonly taught. The earth is constantly accelerating up at a rate of 32 feet per second squared (or 9.8 meters per second squared). This constant acceleration causes what you think of as gravity. Imagine sitting in a car that never stops speeding up. You will be forever pushed into your seat. The earth works much the same way. It is constantly accelerating upwards being pushed by a universal accelerator (UA) known as dark energy or aetheric wind.

There are also other theories of flat earth thought that maintain that the earth sits on an infinite plane, with the sun moving overhead. Gravity works much like it does in a round-earth model, and the earth will never form into a sphere because the plane is endless.

### Objects cannot exceed the speed of light. Doesn't this mean that the Earth can't accelerate forever?

Due to special relativity, this is not the case. At this point, many readers will question the validity of any answer which uses advanced, intimidating-sounding physics terms to explain a position. However, it is true. The relevant equation is v/c = tanh (at/c). One will find that in this equation, tanh(at/c) can never exceed or equal 1. This means that velocity can never reach the speed of light, regardless of how long one accelerates for and the rate of the acceleration.

See Universal Acceleration for more details

# EXTRA EARTH PROVED FLAT

Mr. and Mrs. Charles K. Johnson

Charles K. Johnson who calls himself the last Iconclast has revealed that a band of international criminals, a syndicate of science, a cartel of arch criminals Master of Deceit has almost gained complete control of the USA! Mr. Johnson, the president of Flat Earth (research) Society International of Lancaster California has revealed that detailed, factual practical research conducted by his Research Society has proved beyond any shadow of a doubt that The known world is flat, and is not a planet. He claims his Society has found earth a kind of streached out plane, that the sun is a small object 32 miles across that moves above the earth, the earth does not move, the sun does and is in fact a light to light the day on this earth, the center of the universe. That the moon is also about 32 miles across, that it does not reflect the light of the sun, but is in fact a light to light the night, giving an all together different kind of light.

## No one has been to the moon

Mr. Johnson states the "moon shots" and "space cake walks" Rover Boy's in space etc. etc. including the claimed "celestial marriage in Heaven between US and USSR space ships" were entirely fictional, simulated just as other science fiction movies are. He says the simiulated space pictures, faked pictures of earth from the moon, faked pictures of rover bots and thier jeep on the moon were concocted "as they thought it would be" if the superstitions of modern science were true.

Mr. Johnson says he personally knows, Arthur Clark the scriptwriter and science fiction writer who both wrote, directed and narated the first "moon landing" and has in fact layed out the entire "space project" that he knows earth flat and has made available to him long before the faked moon landing. Vast evidence proof of a moon landing was impossible

# Projecting Railways

Railways.

In projecting railwayson a globe, the datum line would be the arc of a circle corrospondingto the latitude of the place. The datum line for railway projections is always a horizontal line, proves that the general configuration of the world is horizontal. To support the globe theory, the gentlemen of the observatories should call upon the surveyor to prove that he allows the necessary amount for"curvature." But this is what the learned men dare not to do, as it is wellknown that the allowancefor the supposed curvature is never made. In the session of the British Parliament for 1862, Order No. 44 states:

"That the section be drawn to same horizontal scale as the plan, and to the vertical scale of not less than one inch to every one hundred feet, and shall show the surface of the ground marked on the plan, the intended level of the proposed work, the height of every embankment, and the depth of every cutting, and a datum borizontal line which shall be the same throughout the whole length of the work ....."

In the Bigmingham Weekly Mercury, of 15th Feburary, 1890, "Surveyor" writes as follows:

" 'An Engineer of thrity years standing' wrote to a magazine in 1874 quoting the following sentence as the result of his experience in the construction of railways, more especially:- 'I am throughly acquainted with the theory and pratice of civil engineering. However bigoted some of our professors may be in the theory of surveying according to the prescribed rules, yet it is well known amongst us that such theoretical measurements are incapable of any pratical illistration. All our locomotives are designed to run on what may be regarded as true levels or flats. There are, of course, partial inclines or gradients here and there, but they are always accurately defined and must be carefully traversed. But anything approaching to to eight inches in the mile, increasing as the square of the distance, could not be worked by an engine that was ever yet constructed. Taking one station with another all over England and Scotland, it may be stated that all the platforms are on the same relative level. The distance between the Eastern and Western coasts. of England may be set down as 300 miles. If the prescribed curvature was indeed as represented, the central stations at Rugby or Warwick ought to be close upon three miles higher than a chord drawn from the two extremities. If such was the case there is not a driver or stoker within the kingdom that would be found to take charge of the train ... We can only laugh at those of your readers who seriosly give us credit for such venturesome exploits, as running trains round scherical curves Horizontal curves on levelsare dangerous enough. vertical curves would be a thousand times worse, and with our rolling stock constructed as at pregent physically impossible. There are severalother reasons why such locomotion on iron rails would be as impracticable as carrying the trains through the air."

This important evidence by a pratical man, may be supplemented by the following W. Winkler, M.I.C.E., in the Earth Review for October, 1893:

"As an engineer of many years standing, I say that this absurd allowance is only permitted in school books. No engineer would dream of allowing anything of the kind. I have projected many miles of railways and many more of canals and the allowance has not even been thought of, much less allowed for. This allowance for curvature means this-that it is 8" for the first mile of the canal, and the increasing at the ratio by the square of the distance in miles; thus a small navigable canal for boats, say 30 miles long, will have, by the above rule an allowance for curvature of 600 feet. Think of that and then please credit engineers as not being quite such fools. Nothing of the sort is allaowed. I must, however, state that college astronomers have made the student engineer to think that in his method of levelling what is known as the "backsight" cancels any curvature by his "foresight", and so on. It is only a theory and if astronomers declare that our method of levelling cancels the obligation of making this allowance, we sha'nt quarrel with them-it does no damage to our projects when we get into pratice, but we no more think of allowing 600 feet for a line of 30 miles of railway or canal, than of wasting our time trying to square the

Astronomers know full well that it is no use appealing to the engineers, as their testimony is dead against the globular theory, although many of them believe in it all the same; but I never met one who said that he never made the allowance said to be necessary for projecting railways on the surface ot "our tiny globe." In "Theoretical Astronomy," page 46, the author tells us that:

Mr.J. C. Bourne, in his magnificient work called 'The History of the Great Western Railway' ...whish is more than 118 miles long....'the whole

Edmund G. Brown Jr. Governor of California has done an outstanding job in California. He is liked, admired and above all, respected by all classes of people in California. He and every phase of his life is known in California from childhood by the people, these qualities he has demonstrated: a sound balanced mind, he is pratical and logical and consistant. He has dedicated his life 24 hours a day to serving this nation. He has no other interests except to develope his spiritual undrestanding. His concept of being a christian is different to Carters, who is a Baptist. Baptists are "washed in the blood" and well qualified to stand at the right hand of God...sins and all. Brown just the reverse, seeks day and night to try to qualify by serving, doing good works...to be a servant, to be like Jesus by deeds, rather than washed in his blood. For the first time in recorded history, he got collective barging rights and dignety to what has been considered throughout recorded history as "beasts of the field" farm workers. For this one thing alone, his name will stand through the ages. If elected he would be available to all classes of people, business and labor, rich and poor and rule "fairly" for he is not self seeking, but seeking... to be our servant.

# If ... by Kipling

If you can keep your head when all about you are losing theirs and blaming it on you;

If you can trust yourself when all men doubt you, but make allowances for their doubting too;

If you can wait and not be tired by waiting, oe being lied about, dont't deal in lies.

Or being hated don't give way to hating, and yet don't look too good, nor talk too wise;

If you can dream - and not make dreams your master; If you can think - and not make thoughts your aim,

If you can meet with Triumph and Disaster and treat those two just the same;

If you can bear to hear the truth you've spoen, twisted by knaves to make a trap for fools.

Or watch the things you gave your life to, broken, and stoop to build'em up with wornout tools.

If you can make one heap of all your winnings and risk it on one turn of pitch - and - toss, And lose, and start again at your beginnings and never breathe a word about your loss; If you can force your heart and nerve and

sinew to serve your turn long after there gone, And so hold on when there is nothing in you except the will which says to them: "Hold on!"

If you can talk with crowds and keep your virtue, or walk with Kings - nor lose the common touch,

If neither foes nor loving friends can hurt you, if all men count with you, but none too much; If you can fill the unforgiving minute with sixty seconds' worth of distance run,

Yours is the earth and everything in it, and which is more you'll be a "MAN' my son!

R. Kipling, 1910

# Remain Level

It is the nature of fluids to be and remain level, and when that level is disturbed by any influence whatever, motion ensues until the level is resumed

Professor Airy tells us, in his "Six Lectures on Astromony," that "quicksilver is perfectly fluid, its surface is perfectly horizontal." We may add that all fluids are the same, for the reason given by the next writer.

Mr. W. T. Lynn, of the Royal Observatory, Greenwich, in his "First Principles of Natural Philosophy, says: "the upper surface of a fluid at rest is a horizontal plane. Because if a part of the surface were higher than the rest, those parts of the fluid which were under it would exert a greater pressure upon the surrounding parts than the receive from them. so that the motion would take place amongst the particles and continue until there were none at a higher level than the rest, that is, until the upper surface of the whole mass of fluid became a horizontal plane,"

The Enflish mechanic of June, 1896, says:

"Since any given body of water .... must have a level sirface, i.e., no one part higher than another, and seeing that all our oceans (a few inland seas excepted) are connected together, it follows, that they are all virtually of the same level."

In March, 1870, the Bedford Canal was chosen to experiment upon with a view of determining whether water was horizontal or convex.

The following argument is taken from the report as printed in the Field for 26th March, 1870, and is considered to be sufficient an unanswerable:-

The stations appeared, to all intents and purposes, equidistant in the field of view, and also in a regular series; first, the distant bridge; secondly, the central signal; and, thirdly, the horizonttal cross-hair marking the point of observation; showing that the central disc 13 ft. 4 in, high does not depart from a straight line taken from end to end of the six miles in any way whatever, laterally or vertically. For, if so and (as in the case of the disc 9 ft. 4 in, high) it it were lower or nearer the water, it would appear, as that disc does, nearer to the distant bridge. If it were higher, it would appear in the

# Why do you still Sacrifice?

Sacrifices are finnished, as Jesus thought, he personally entered the temple and stopped them. Why do you still sacrifice and kill animals to eat? Why do you profess to follow Jesus when you don't have compassion on the helpless animals? Why don't you keep the 10 commandments, stop sinning, sin is the transgression of the law? Why do you get pleasure out of killing the innocent? There is plenty of food to eat, the food you were created to eat. Why must you kill the innocent to satisfy your blood lust? Why don't you do as the Creator and Jesus told you, perhaps you will find you will not be cursed...with the sickness and disease. But I tell you don't do it just to "help yourself" try to have a heart of flesh not stone, think of how terrable it is to kill just for your blood lust. To eat him. You should think to do unto others as you would have them to do unto you. We are all beasts... Ecclesiastes 3;18. Maybe if you thought on this wise...you would have a different heart toward life...Marjory Waugh Johnson

Both Marjory and I, the wittnesses of the old and the New Covenants "Gen. 9;16" and God said "I have made an everlasting covenant between me and every liveing creature of all flesh upon this Flat Earth", "and it shall be told for a witness in all the world...and then shall the end come", have you do and will continue to live in poverty. But this work, getting this wittness out, needs money DESPERTLY, lots of money. If you can hear...this drum beat...don't hesitate, send all the money you can to it. The mysterious unsearchable mystic God of this whole existance will bless you.

The monsterous depraved insane demented "world of science fiction" that exists to-day and must be destroyed, is primarly Protstant-Christian...the RE-Forming of the universe...nearer to their own hearts desire. opposite direction nearer the horizontal crosshair which marks the point of observation. As the disc 4 ft, lower appears near to the distant bridge, so a disc to be really 5 ft, higher would have to appear still nearer to the horizontal

cross-hair of the telescope. And therefore it is shown that a straight line from one point to the other passes through the central point in its course, and that a curved surface of water has not been demonstrated."

In "Theoretical Astrnomy," page 47, it is stated:

"On the Royal Observatory wall at Greenwhich is a brass plate, which states that a certain horizontal mark is 154 feet above mean mean water at Greenwhich and 155.7 feet above mean water at Liverpool."

The difference of the level between Liverpool and Greenwhich is thus shown to be only 1.7 feet. If the world were a globe, the difference of level would be many thousands of feet. It is a common saying that water will find its level, and it is true. If water be damned back, it will, as soon as released, take the easiest course to where it can find its level. The following from Natal Mercury of 24th of October, 1898, fully illustrates this point:

A Mountain of Water.

London, Oct. 19 (diggers' News Special).— The streamer Blanche Rock, whilst entering the Morpeth Dock, Birkenhead, burst the dock gates. The water inside, which was 8 ft. higher than the level of the river, rushed out with tremendous force. The swirling mass of water damaged the shipping, and beached and sank a number of targes. Two lives were lost

As soon as the water got to the level of the river, its power would cease.

C. Darwin, in his "Voyage of a Naturalist," page 328, tells us:

"I was reminded of the Pampas of Buenos Ayres, by seeing the disc of the rising sun, intersectedby an horizon level as that of the ocean."

A globe with level oceans would be a new thing in geography!

All photographs pretending to showa "curved horizon" are faked. A facmelie of the world famous Bedford experiment by DR. Samuel B. Rowbotham on our membership cards. There are thousands of other experiments but only this one was needed to prove once and for all time, earth is not a globe.

Charles K. Johnson the last Iconclast

Copernecious explaned in person to Pope Paul 3 exactly how step-by-step he concocted his hypothesis explained that it was just an excersise in "science fiction" not written to be believed, but for entertainment. No basis of any facts what so ever! Galieo, later a degenerate deciever, pretended to "believe the fiction was true" and teach others. All records are still available, every Pope from Simon Peter to present must know earth flat. In later issues will be given a table of supposed curve of earth 25,000 miles around, so you can check for yourself and know earth is flat.

# Earth is Center of Universe

March 1616 Rome. "They claim this earth is not the center of the universe and that it is a spinning ball, whirling around the sun, is absurd, is scientificly false (proved by practical demonstration to be false) and formaly heretical and is expressly contrary to the Holy Scriptures" end of quote. This from the committee of Cardinals called the "Holy Congregation." The Congregation of the Index 1616 Rome.

Moses said the same identical thing, All the Prophets of Israel and also Juda. Jesus said the same identical thing (the hethans in power in Jerusalem believed the same spin-in-ball hoax as to-day). All the Aposteles including Simon Johnson, (or Simon son of John, called Simon Peter). Charles Johnson in 1976 says every word on the statement by the Holy Congregation was and is True.

Pope Paul 6th in the Vatican Europe has proved he is a friend and exponant of the truth. He is being crucified to-day by monstrous demented friends of hell athiest spinning ball communist, why? Because he has ruled adultry (masterbation) fornication sodemy and murder of unborn children to be "sin" or transgression of the Divine Law. It is also a proved flat earth fact that these things, when accepted and treated as "legal and right" will and has destroyed all people and nations who have tried it. Therefore, the patricarch called some "Pope" both words mean the same thing, fulfilling the same commission as had Moses and Jesus "has lifted up his voice" and "warned the people".

To those who have ears to hear .. hear...

Both the statements, Holy Congregation 1616 and the quoted ruleing of Pope Paul 6th are true. Both are inspired by God's statements and also demonstrated in logical, reasonable proved FACTS.

Sun

# Worship

Sun Worship the present day claim the "sun" is the center of our universe, is the same pagan hethen sun worship Israel of Old was warned against and cursed for practicing or "believing"! This demented idea came from India,

Let an observer stand by night directly under a lamp-post: the light above him will cast no side shadow. If he moves northwards his shadow will fall to wards the north; and if he goes south his shadow will fall southwards. If the light were extended by a number of gas jets above his head, say for ten feet, then an observer moving that distance underneath he would still see no shadow. That is, the vertical rays of the light would cast no shadow for a distance equal to its own extent. Now apply this reasoning to the shadows of vertical objects cast by the sun's rays.

In nothern latitudes the shadows falls towards the north; and in the southern towards the

south. The declination of the sun varies from the tropic of cancer, 231/2 degrees N., to an equal declination south of the equator, the tropic of Capricorn. Between these extremes the sun is always, at noon, directly overhead in places with altitudes equal to his declination, the variation in which is the cause of the varying seasons. In these places on land, or at sea, the sun casts no shadow at noon; and it has been found that this phenomenon extends for 32 miles. So that the column of the sun's vertical rays is 32 miles across in every direction—a distance equal to the length of the solar diameter! And whether we take the surface of the sea as curved or horizontal, there would make little difference to the diameter, as may be seen an referring to Fig. 20.

This one proof of the suns size observed by a medical gentleman, Dr. Robertson, with British troops during Boer War.

# Moon a piece of Earth?

According to current science the moon was once a piece of molton rock fractured off from the earth, when the earth was in a soft or plastic condition. Its origin is thus stated by Sir R. Ball, in the "Story of the Heavens," page 520:

"There is the gravest reason to believe that the moon was at some very early period, fractured off from the earth, when the earth was in a soft or plastic condition ...... at this epoch the earth rotated 29 times on its axis, while the moon completed one circuit ..... but whether it (the epoch) is to reckoned in hundreds and thousands of years, in millions of years, or in tens of millions of years, must be left in great degree to conjecture."

Conjecture, in this case, has to chose between hundreds of thousands and tens of millions of years. Ample score one must admit! In the same volume, page 52, the insignificant size of the moon as compared to the stars is set forth';

Every one of the thousands of stars that can be seen with the the unaided eye, is enormously larger than our satellite."

In "Wonders of the Sun, Moon, and Stars," the same idea is announced thus:

"The luminary which appears to us next in importance to the sun is the moon, and for pratical purposes. It, of course, is so; but, consider from a broad astronomical point of view, the moon is exceedingly insignificant, being the smallest of all the luminaries visible to us with the naked eye, the diameter of the moon is only 2,160 miles."

The moon is said to be a reflector of the sun's light, and to have no light of her own, as the following shows. Sir R. Rall, in his "Story of the Heavens," pages 50 and 56, says:

"The brilliancy of the moon arises solely from the light of the sun which falls on the not self-luminous substance of the moon."

"The sunlight will thus pass over the earth to the moon, and the moon will be illuminated."

The speculation regarding the origin of the "lesser light that rules the night" is in keeping with the other impossible notion concerning the earth being shot off from the sun in remote ages. It is so purely nonsensical that it may well be relegated to oblivion without further ado.

As to size, the moon is next in importance to the sun, if, indeed, she is not quite as large; and many times larger than any star in the heavens, including all the planets ever seen by the eye of man.

Both the distance and size of most of the objects in the heavens may be measured with a high degree of acuracy. It only requires to be known that the object is vertical to a certain part of the world at a certain time, when the observer must take position - which could be ascertained by previous experiment where the angular distance of the object is 45°. A base line measured form that position to the point at which the object was vertical at the moment of observation, will be the same length as the distance of the object from the earth's surface.

Size, except in the case of very small stars, may be as easily determined. Let the instrument with which the angular distance was taken to be graduated to degrees, minutes and seconds, the minutes and seconds corresponding to miles and sixtieths of miles on the earth's surface.

Having carefully adjusted the instrument, bring the image of the lower limb of the object to be measured down to the horizon, and note the reading on the instrument. Now bring the upper limg in contact with the horizon, and the difference of the reading will be the diameter of the object. It would, of course, require a very finely adjusted instrument, and one graduated to say the one hundredth part of a second to measure some of the smaller stars.

Instead of the diameter of the moon being 2,160 miles, as we are informed by the men of science of to-day, it is, by the above process, found to be about 32 nautical miles in diameter.

Then as to the moon being a non-luminous body, and receiving all its light from the sun, astronomy is as hopelessly wrong as in most other of its fanciful statements.

If the reader has taken notice of reflectors, he will have seen that they are either flat - where angles are involved - or concave, but never convex. A convex surface cannot concentrate and reflect light. But a concave surface does this, hence all reflectors, where angles are involved, are concave. The moon is a globe. It is convex, and therefore cannot reflect light to any extent.

Then, if the moon could reflect the light, it would also reflect the heat of the sun. But we knoe that moonlight is cold instead of warm. In Noad's "Lectures on Chemistry," it is said:

"The light of the moon, though concentrated by the most powerful burning glass, is incapable of raising the temperature of the most delicate thermometer." "The Lancet" says:

"The moon's rays when concetrated, actually reduce the temperature upon a thermomter more than 8°."

When light and heat are received by a reflector, light and heat are reflected, as the reader may prove for himself, by testing the matter with a petroluem lamp and a reflector.

If a red light be projected on to the surface of a reflector the reflection of it is red. In fine, reflectors reflect just what they receive.

If fish be hung up to dry in the sun, they will be preserved. But if exposed to the moon, will be rendered putrid in one night. The same applies to fruits, &c., clearly providing that the light of the moon cannot be the same nature as that of the sun. And, furthermore, that of the moon shines by its own light. The nearest approach to moonlight is phosphoerscent light. And if the moon and stars be observed through a telescope, it will be noticed that starlight and moonlight, except in a few cases, are identical; the size of the star determining its brilliancy, on the principle that the larger the star the greater will its brilliancy be. "Sun, Moon, and Stars," page 57, says:

"That soft silvery light, so unlike sunlight, or gaslight or any other kind of light seen upon the earth."

The theory that moonlight is only reflected sunlight requires that the illuminated part of the moon be always next the sun. Unfortunately for the theory, however, this is not the case.

If the Moon be observed from the last quarter to new, it will be found that for a portion of one day, immediately before new moon, the dark part of the moon is turned towards the sun; and at the new moon the sun is still to the eastward of the moon, which is illuminated on its western surface.

On 10th August, 1898, at Durban, Natal, the moon rose at 1.7 a.m., and by sunrise (6.35) was high in the heavens, showing about half on her eastern surface. On 15th, moon rose 4.58 a.m. (sunrise 6.30), with a very small portion of the eastern limb illuminated, but the whole circle was distinctly visible. On 16th, moon rose 5.32 a.m. (sunrise 6.29) with the dark part towards the sun. On the 17th, moon rose 6.4 a.m. (sunrise 6.28), 24 minutes before the sun. New moon same day 0.35 p.m., the moon's illuminated western limb being turned away from the sun, which was to the eastward. On 18th, moon rose 6.36 a.m. (sunrise 6.27), and the sun was thus ahead of the moon, and on the iluminated side, having passed her between the hours of sunset on the 17th and sunrise on the 18th. Any one who cares to take the time and make the necessary observations, may satisfy himself on this point. The almanac shows that at every new moon, the sun is to the east of the moon, which is illuminated on her western surface, clearly providing that the moon is a selfluminous body, and not a reflector of sunlight.

But how about the "phases" of the mon, if she is selfluminous? If the moon be observed it will be apparent that she rotates from west to east in order to produce the various phases, each phase appearing in spite of the position of the sun. This shows that she is luminous on half her surface, athe dark half being towards us when she is invisible.

Take a wooden ball and rub its surface with a solution of phosphorous an olive oil. Place the ball in a dark room, and cause it to rotate, and in all phases, representing the moon will be manifested.

It is that the moon has been photographed and that extinct volcanoes, dry watercourses, &c.,have been found on its surface. The places were seas once were, alleged, have not only been photographed, but named, and thus there is nothing wanting to show that the moon was once inhabited - a world like ours.

We know that poets are licensed to lie," but astronemers who claim that their science is the most exact of any, and admits of demonstration, should be careful to speak the truth, surely. How then are photos of the moon abtained? Sir R. Rall shall tell us. In "The Story of the Heavens," note on page 62, says:

This sketch has been copied by permission from the very beautiful view in Messrs. Nasmyth and Carpenter's book .... So have also the other illustrations of the lunar scenery in Plates 7, 8, 9. The photographs were obtained by Mr. Nasmyth from models carefully constructed by him to illustrate the features of the moon."

So you see from the first advent of photography the CSS has constructed models and photographed them. This example is from the 19 century, NASA is still at the same fraud, present space moon program photos are obtained the same way, 1976! As the Frenchman said "the more things are different the more they are the same."

line with the exception of the inclined planes, may be regarded pratically as level."

One hundred and eighteen miles of level railway and yet the surface of which it is projected a globe? Impossible. It can not be.

Early in 1898 I met Mr. Hughes, chief of the streamer "City of Lincoln." This gentleman told me he had projected thousands of miles of level railway in South America, and never heard of any allowance for curvature being made. On one occasion he surveyed over one thousand miles of railway which was a perfect straight line all the way. It is well known that in Argentine Republic and other parts of South America, there are railways thousands of miles long without curve or gradient. In the "Cruise of the Falcon," by that intrepid traveller and navigator, E. F. Knight, it is stated in vol. 2, pages 1 and 2:

"From Tucuman to Cordova we were carried by the Government railway," "There are no curves on the way, the rails being carried in one perfectly straight line across the level plains,"

In projecting railways, the world is acknowlegded to be a plane, and if it were a globe the rules of projection have yet to be discovered. Level railways prove a level world, to the utter confusion of the globular school of impratical men with high salaries and little brains.

The news media diverts people into thinking some vague things called the Mafia and Costa Nostra are the villains of the U.S.A. The fact is these are the "good guys" compared to CSS don't cost the taxpayer anything. #### ILLUSTRATING THE LAW OF PERSPECTIVE

All extended lines converge in the horizon regardless of their relation to the observer's position.

The Sun is about 3000 miles high, is about 32 miles across. These figures not arrived at by "theory" and mythological, opium dreams, as are the Persian-Greek-Babylonian figures used by today's space program and the ancient astronomy called by the false name "modern" astronomy. But arrived at by the known practical down to earth engineering geometry as USED by engineers all over the Flat World, triangulation.

The Sun stays at same height, moves in a circular course over the Flat Earth. The spiral widening and retracing, creating the "seasons." Pure simple KNOWN by all engineers, laws of perspective make it appear to set. Strange and uncanny that in the Book of Books it is said that in the day that ISRAEL comes into its own. conforms to the Catholic or Universal Laws, given on Mt. Sinai and a One World Just Government is established, sometimes also called the Kingdom of God by the Israel-ite Prophet Joshua, called by Greeks "Jesus." It is said that near that day, it would be "revealed" that the SUN DOES NOT SET!

In a news conference held at the Greater Los Angeles Press Club, located in Hollywood in 1975, before NBC, CBS ABC TV and most others news media, I announced, it is now revealed THE SUN DOES NOT SET! I also entered the doors of Jewish Zionist Headquarters located near there also and announced this news. You are reading it now, the fulfillment of this Israelite Prophet from long ago. This is the Hour. This is the Day, for you to hear this information. This Day THE SUN DOES NOT SET!

Whether you "believe" it or not makes no difference to me or anyone else. The Fact has been Declared. SHIPS DISAPPEARING OVER THE HORIZON, simply CONFORM to the known laws of perspective. The mist, etc., near the surface of water also influence and add to the optical illusion. Much more sure than death and taxes is the simple elemental law of physics--water will and does lay LEVEL and FLAT.

Many people foolishly imagine that ships can sail in a straight line due E. or W.; but if a line be drawn all round a sphere, it would make a circle, a chalk mark round a football for instance.

In the above figure the magnetic north "pole" is represented at N.; and if a ship, sailing round the outer circumference, keeps the point of the compass always towards N. and steers at right-angles to it, the course described will be a circle.

A small flat island could be circumnavigated in the same way, with a powerful magnet in the middle of the island; the ship thus describing a circle. But if a vessel took a straight line course from A, it would sail in the south-westerly direction towards S.W.

We have many times pointed out this fact in our literature, and as a result one professor has had the honesty to make the following confession:

"The earth has been circumnavigated a great many times...We can (we could?) journey round the globe, sometimes travelling on land, and sometimes on the sea. This would appear to be a certain proof that the earth's surface is curved. Nevertheless it has been pointed out that circumnavigation would be possible if the earth had a FLAT SURFACE with the north magnetic pole at its centre. A compass needle then, would always point to the centre of the surface, and so a ship might sail due east and west, as indicated by the compass, and eventually return to the same point by describing a circle." (Caps ours).—Prof. R.A. Gregory, F.R.A.S., Elementary Physiography.

Yet thoughtless teachers still refer to the schoolboy proof that circumnavigation proves the earth a globe!

THE EARTH'S supposed ELLIPTICAL ORBIT

The form of an ellipse is taken from the circumference of a conic section cut obliquely, by a plane passing through both sides of the cone, and not parallel to the circular base. If cut parallel to the base it makes, of course, a circle, which decreases in size as it approaches the top point of the cone.

The ellipse is something like a circle which has been more or less flattened on opposite sides; but it is not like the circle, which has only one centre, for it has two points or foci in the longer diameter, from which it can be constructed. Each of these points is at an equal distance from the centre of the figure.

The ellipse since Kepler's time has long been supposed to represent the earth's annual orbit round the sun; and though the latest astronomy has broken open Kepler's closed ellipse, yet astronomers keep up the fiction of "elliptical orbits," rather than openly confess the great change which has taken place in their views of planetary motion. The German astronomer Kepler was born in the year 1571 A.D., and he formulated his Laws of Motion between 1609 A.D. and 1618 A.D. He taught that the earth's orbit was an ellipse, with the sun in "one of the foci, and a little over twelve millions of miles from the earth. The other focus was left empty, and it has been "to let" ever since! Modern astronomers have lengthened the sun's distance by nearly a hundred millions of miles, which has necessarily increased the earth's supposed orbit more than three hundred millions of miles! But this extreme alteration is neither acknowledged nor permitted to detract from the great name of Kepler, lest it might also reflect upon the "science" of astronomy; for in this exact "science" the alteration of millions of miles is "a mere detail!"

Sir Robert Ball, in his <u>Story of the Heavens</u>, says of of this problem, that <u>Kepler</u> "to his immortal glory succeeded in solving and proving it to demonstration"!

Further on, Sir Robert says that "Kepler's discovery of the true shape of the planetary orbits stands out as one of the most conspicuous events in the history of astronomy." So say all of us! He further adds:

"Kepler found that the movement (movements?) of the planets could be explained by SUPPOSING that the path in which each one moved (moves?) was (is?) an ellipse. This (supposition) in itself was a discovery of the most commanding importance." (Italics and parentheses ours). Story of the Heavens, p. 110.

The above confession refutes itself; but we would point out that his teaching is based on four suppositions or hypotheses: (1) That the sea-earth is globular; (2) That this sea-earth ball is a planet, or wandering star, amongst "other" heavenly bodies; (3) that the sun is stationary in "one of the foci"; and (4) that the orbit of the earth annually round the sun makes a closed ellipse!

Assumption after assumption; and the fourth one spoiled and quietly discarded by later astronomers, as we show later on! But let us here refer to the above diagram (Fig. 17).

The thick line A D B E represents an intact ellipse, and S the place of the sun in the one of foci of the longer diameter. The heavier dots on the ellipse shew the earth's hypothetical positions for the different months of the year. Now astronomers admit that the moon travels round the earth once a month, while the globe is going round the sun. What then should be the path of the moon? Neither a circle nor an ellipse; but a series of cycloidal curves, a sinuosity like the track of the serpent!

Look at the curve and study it, and you will find out some curious phenomena which the moon ought to manifest if their theories were true; but which she, in spite of her supposed fickleness, refuses to manifest. Trace out the path of the moon through the various signs of the zodiac, in relation to the sun's fixed position. The moon would sometimes be very slow-sometimes very swift--sometimes stationary--and sometimes actually disappearing retrograde!

Yet the daily speed of the moon never varies more than two or three degrees, and the moon's motion is always "direct" through the twelve signs—justifying the inspired statement of the Psalmist that the moon is "the faithful witness in the sky" (Psa lxxxix., 37).

In this case the moon would never really travel round the earth at all, neither in a circle, nor in a spiral, nor an ellipse; but its movements would manifest a series of serpent-like sinuosities, as found below in Fig. 19. Thus again we find that the lunar orbit, under this extravagant theory, would be most unnatural and erratic.

Yet the moon's actual movements, as given in a practical almanac like the Nautical Almanac, are fairly regular and uniform, again proving the discrepancy which exists between practical astronomy as used by navigators, and theoretical astronomy as taught to landsmen in the schools and colleges.

The absurd, childish drivel and TV movies showing NASA's space ships, moon shots, pictures of a ball earth, etc., etc., is so outrageous and an insult to a grown man's mind. It is an irreputable, absolute, proven FACT, the known world is Flat; there is no known edge or sides; it is NOT a planet and it does not move. Just the example given in this issue all by themselves totally discredit the entire opium dream called the "Spinning, Whirling, Gyrating Globe World." Not to mention vast other proofs.

But if you prefer the Monk's Opium Dream, go right on. If you prefer myths to Facts, it's your business and we don't care. Our job is just to "tell you." Then it's up to you.

#### THE WORD FROM MARJORY

Seems like most people have lost their rightful way in life. Women wanting to be man and take man's place in life. Also men wanting to be women and to take women's place in life. How abominable in the sight of the Creator of both men and women! No one can communicate with each other any more, and then they sit and wonder why the children have gone astray! A strange people that cannot learn from experience...or is it they have forgotten there is an Almighty God, the Creator and in the blind emptiness of this forgetful mind, become insane? Forgetting that the Creator created "each after his own kind" this is the way it is. The very Beginning of Wisdom is to fear God and keep his commandments.

Women are supposed to be a helpmate to their husbands in their work and living, and their husbands are supposed to love and cherish them for so doing, and they both teach their children the same. Most people want to be famous or great, honored and loved in this life. Well, by each person taking his rightful place in life, all these things come about. Until we all learn to live by these living and proved Laws of Gld and stop suffering and misery to all, yourself and all those around you, there will be no peace. No one can give you peace until all come to the knowledge of what they were created for. No women's liberation, no sex pervert, freak sodomite movement can save or help you. Children are to honor their parents. If we would all try living as we should, I am sure the world would be a much happier and peaceful place for us all. And it is so very easy for us to do...if we want to.

In being a helpmate to my husband, my life is most gratifying, pleasant and happy. But I could not have any of these things unless I was a helpmate to my husband. I know that in order to have peace and be happy, I must live in obedience to the Living Law.

Mrs. Marjory Waugh Johnson

Two views; take your choice. But KNOW this Earth is FLAT. Strive to do unto others as you would have them do unto you. FEAR God and keep his commandments and all will be well with YOU, no matter what happens. To know Moses World Flat is true after all, is to start you on the road to know as learned King Nebuchanezzer of Babylon: The God of Denial, the God of the Hebrews, is a God who takes a hand in the affairs of man.

#### TWO VIEWS--TWO WORLDS

1. View: Based on the opium (nowadays called morphine or heroin) and other drugs the crazed madman Copernicus dusted off the 3000 year old Asiatic drug induced delusions of a spinning ball world. No doubt with a touch of the newly discovered cocain from Peru, he set the whole universe to spinning. For so long was it known that the "cosmos" outlook was a dope head's dream, that the delusions of the dope induced "dreams" was called the "music of the spheres" for many years. In other words, only a dope head can really appreciate and love the delirium of lunacy called the Ball Bearing World or the universe of spinning spheres. Martin Luther's gang took up this dope fiend's dream of spinning spheres as Pure Gospel. A known dope head, witch, astrologer, caster of horoscopes, fortune teller and Dr. Feelgood, a sorcerer, a wealthy man through telling fortunes through Astrology and Sorcery (drugs) through Jesuit intrigue this fortune teller was made assistant to the official Astronomer to the Holy Roman Empire (Keppler was his name, a Lutheran Christian). The Official Astronomer, a decent regular astronomer, a Dane, died shortly thereafter, and the Sorcerer-Astrologer was made Official Astronomer as well as Astrologer. Through his dope fiend, fortune telling connections he was Copernican or psuedo-astronomer, and so the Holy Roman Empire was subverted to the spinning balls; this in 1600. In England, several years before this, under King Henry VIII, the Church-State of England was established, was declared God was an Englishman. Henry and his successors. Reason was abolished; the number I dogma established then and holds to this very day of this Church-State was the Junkie Junkers Dream, earth a spinning ball and a universe of spinning balls. Jesus was God and he was DEAD; so long live the King of England who rules in his stead. No God but the State. Our Revolution in 1776 was to ESCAPE the delusions of the ball world and the English-Prussian delusion that the STATE was God. Common sense was outcry; let us abandon the spinning ball idiocy of dope fiends and establish a New World Order where common sense, reason, logic, experience and the consulting of the people is the order of the day. The new English buggy balls science was and is, of course, the total abandoning of reason, logic and common sense. We tried and failed; the English subversives within our midst, through the Church of England which was and IS the ruling body in Babylon-England, changed its name to Episcopal and through its "science" broke our rule to keep Church or Religion separate from State. So today in USA, the Babylon-English RELIGION is what is taught in our public schools...God is dead...no god but State and universe of spinning balls. US is today "set up" by England to be "main Babylon" with the towers-silos same as Babel of old to try to reach Heaven and attack it with rockets and pretending to succeed--"lying wonders" prophesised to be brought down by "force and violence" in the last book of the Bible. So in this view, the Prussian-English people who have deceived the world with the globe world are human devils and will cause the USA to be destroyed, brought down never to rise again by "force and violence"...and the time grows near.

2. View: The so-called human beast is the most depraved, evil, monstrous beast on earth--deceitful, bloodthirty, treacherous monster, blind and unreasoning, illogical and crazed, destroying and tormenting the world and all that is in it. That this two-legged beast is the very Devil himself and as such must be captured, even if tricked and deceived to chain him by drugs and drug dreams, theory, indoctrination and any way at all, to capture him and find ways to "program" him by Pavlov or any other methods, into being tame and harmless, to try to civilize him and train him to be sane and logical, to in the end save the very Devil himself, the human race, especially the White Anglo Saxon Protestant. This to be done \*\* a small, "elite or elect" real humans called chosen and faithful to God.

Paris, France 1848. The terror of the French Revolution was on, at the end of which was declared the First Godless Atheist State, the Bible destroyed as a hateful thing. The French beasts declared there was no God but them in a Ball Bearing Universe, the world a ball bearing spinning around the sun; the SUN was God, and they were his children. Freedom, they cried, freedom from the laws, God, no laws just balls and all of them spinning. Scientists are our priests. Paris declared the Lesbian and Sodomite capital of the Universe. Perversion is the true light, and Paris the City of Light, the use of drugs is the true way, our music is the music of the spheres, the Junky's Heaven.

London, England 1848. Same year Dr. Samuel B.

London, England 1848. Same year Dr. Samuel B. Rowebothan, after years of logical, reasonable, investigations declared the old opium crazed spinning ball world was totally disproved. Earth proved flat, by Zetetic methods; that is, by "searching out the FACTS", leaving behind the dreams of theories. He proved and DEMONSTRATED in this year that the known world was flat. No one to this DAY has been able to discredit his truly scientific work. He showed the atheistic idiocies of "modern science" (oh yeah, it was called modern then also; atheistic sunworship ball world has been called modern for 4000 years) was nonsense and absurd. He declared the Age of Reason in effect, to seek out and check, rather than reject or accept on blind faith as do modern atheist christian scientists. He proved the Moses, Elijah, Jesus flat world was...true after all. Age of Reason.

Jerusalem, Israel 1948. Israel declared a STATE; Jerusalem its capitol. Harry Soloman Truman, President of US, first to "recognize" the new state. Jews mainly migrate there, as well as some of the scattered lost Isralites. Both Jews and scattered ten tribes, lost Israel, have only one claim to the "Holy Land," the Bible. The Bible is a Flat Earth book; to reject the Flat Earth is to reject the Bible...and the God of the Bible.

If US and UN to be ZION and Jerusalem to be Jerusalem of the Prophesy "the law to go forth of Zion the World of the Lord from Jerusalem" then either US and UN and Jerusalem must declare for the Flat Earth Society of only an "elect" perhaps 144,000 to be Flat Earthers, the rest to live on the dream world spinning around the sun-perhaps the World Animal Farm. In any event, then will perhaps be fulfilled the words spoken when the Star of David stood over and pointed to where the Joshua or Jesus was born, "Peace on Earth...good will among men. Who knows if Now is the Time or what??

"Cnly God knows the beginning from the end" or so said wiser than me.

CHARLES K. JOHNSON and his wife, Marjory, outside their home in Lancaster. —AP Laserphoto

Funny, Jesus Christ himself always implied or said out right to his Disciples that "man himself" was the Devil.

This then explains why it is the Society of Jesus and Christians, etc., who from the start operate the spinning ball science hoax that keeps the world going round. An effort to knock King Kong down and chain him for 1000 years, use him for peaceful purposes and prevent him from destroying and tormenting the rest of the creation. The tangling of his brain with scientific theories that are idiotic and stupid, like the claim earth is a "globe" and the other illogical theories helps confuse him, and while he is confused by the tangled web of theories and drooling and dreaming of attacking with rocket ships Heaven itself and killing and eating the inhabitants and enslaving the rest and taking their lands, colonizing the Heavens with Star Wars, while he is yet in this mad and depraved dream, as the youth of America are TODAY ... the Jesus People will lock the chains in place, disarm him, and kicking and demanding to be able to blow up Heaven itself, he will be put to work on the Animal Farm, described by Moses in Genesis, and the Faithful of Israel-Jesus will "have dominion over the whole creation" and in the end fully justify and prove the Flat Earth Society, with its holding to Moses-Jesus and the simple facts, were right after all. For the Real World is the Flat World, and it is an amimal farm. But the animals have gone berserk...and do NEED CHAINS.

And so by this view, all is for a good cause; "the end justifies the means;" the aim of the Spinning Ball Religion is to ESTABLISH the FLAT EARTH SOCIETY OF Moses, Elijah and Jesus. And so as Paul the Jew Man said, "all things work together for the good, for those who love the Lord, and are called, according to the PURPOSE."

# Perspective Dissappearance of Ships at Sea

In the 1800's, the Horse and Buggy Days, Darwin, as mental exercise, wrote a "science fiction" story about how things came about. Like all science fiction, absurd in the extreme, Darwin so stated. But a low caste opportunist, Huxley, saw his chance, spent his life "touting" this science fiction as "pure gospel." Much as did Galileo the opium dream science fiction of Copernicus. All who now believe in evolution owe it to Huxley. From his name comes the word "Huckster." Steps into insanity: 1. The Spinning Ball World; 2. Evolution, that is to "believe it" NOT tell it, Huxley was not insane himself, only a Carnie Huckster, peddling "Jibberish" to the "Marks." Hux the Hustling Huckster also gets 90 per cent of the credit for converting England to the Spinning Grease Ball concept of the universe. This Great Learmed Honored Giant among Glorious Scientists, this Science God, Professor Huxley had to resort to assumption to account for the disappearance of ships at sea, although had he known the truth of the matter, or taken the trouble to enquire, his unwarranted assumptions would have been totally unnecessary.

He says:

"We assume the convexity of the water, because we know of no other way to explain the appearance and disappearance of ships at sea."

other way to explain the appearance and disappearance of ships at sea."
What learning! What profound wisdom! If we "know of no other way" it
is better to admit the fact and wait until we "have found out some other way"
to explain the difficulty, if there is any. Knowledge is gained by practical
investigation and experience, and has no need of the assistance of assumption
to provide an excuse for ignorance. If water could be proved to be convex,
there would be no need to assume it to be so. We should have many proofs
and abundant evidence of the fact. But the fact that water has been proved to
be level, hundreds of times, makes it necessary for those who refuse to believe
proved facts which tell against their theory, to resort to assumption to maintain their unreasoning position. And yet this same Professor, in his book

'Science and Culture' says:

"the assertion which outstrips evidence is not only a blunder, but a crime."

The assertion, therefore, that water is convex against proof furnished many times over that it is level, is not only a blunder, but a crime.

# Perspective, True and False

Some of the Laws of Perspective are given in the last Flat Earth News, so that we need not here enlarge thereon; but as they are important, we briefly recapitulate them

(1) All parallel lines, like those of a railway, seem to approach, and finally

(2) Straight lines above the eye of the spectator appear to descend to the eye-line.

(3) The horizontal, or eye-line, is a straight line on a level with the eye,

at whatever elevation the spectator may be.

(4) Lines, or objects, below the eye-line, remaining at the same level, seem to rise as they recede, until they vanish in the eye-line.

(5) Similarly, lines or objects above the height of spectator, and maintaining a constant altitude, appear to descend until they are lost in the

(6) Objects, or lines, do not all vanish at the same point in the horizontal line, but the nearer they are to that line, the sooner they vanish in it, because

of the smaller angle they make with it.

(7) The distant horizon being always on a level with the eye, whatever be the altitude of the observer, it seems to rise, or to fall, with the observer;

but he never has to depress his vision to look downwards towards it, nor raise his line of sight upwards to it.

Now let us apply these rules, which are the Laws of true Perspective, to the disappearance of ships at sea, as illustrated in zetetic diagrams, and violated in those of the globularist. Fig. 10 on the title page. The intelligent reader will soon see that this diagram harmonizes with and illustrates, the first six rules above given. The hull of the vessel, being nearer the eye-line, vanishes according to rule six, before the flags and upper sail which are farther from it, because the lower angle is the lesser. Further, the hull rides on a dark background of water, while the upper masts and sails are often against a bright sky! But the ship never goes over, and then down on the further side of a bulge, or a hill of water; for in clear weather a good telescope, which magnifies the distant angle of vision, brings again the ship's hull in sight. Had magnines the distant angle of vision, brings again the sing's null in sight, riad the ship gone over and beyond the supposed dip, or curvature, no telescope could fetch it back again; and when on the crest of the supposed hill of water the hull itself should become visible against the background of clear sky! But in harmony with rule 4, ships never so disappear, because there is no real rise or protruberance in a calm sea, which can be abundantly shown is everywhere level or horizontal.

## False Perspective of the Schools

Figure 11

Let us now turn to the false perspective sometimes given in globite diagrams, and geographical works.

Our figure 11 is taken from a school book; and in Scott's Astronomy there is another on the same principal, or rather, on the same lack of principal. This diagram violates every law of true perspective. The observer at A is made to look down to his distant horizon, and so is the one at B, though in the diagram he appears to look up. This is a double violation of rule 7 as given above. And, further, the reader will notice how the line of the observer is not pointing towards the centre, as it should be if the earth be globular. The diagram is inaccurate and false.

Suppose the observer at A week to hum mund and to look downwards.

The diagram is inaccurate and faise.

Suppose the observer at A were to turn round and to look downwards in the opposite direction towards G, what would he see? An awful chasm at which the stoutest heart would quail! The thing, and ideas it represents, are a disgrace to modern education! Is it any wonder, therefore, that a famous writer like Goethe should say, "I curse this modern theory of Cosmogony, and hope that perchance there may appear some strong scientists of genius who will take up courage to upset this universally disseminated delirum of lunatics." — (The Scientific American, April 27th, 1878.)

#### Ships Climbing Both Ways

Figure 12

In figure 11 we have shown an illustration used to support the false perspective, and false teachings, of the schools; but while some of the higher class astronomical books do not disgrace their pages with such a palpable monstrosity, their teachings are in agreement therewith, and some of their

diagrams equally faulty.

Let an observer be placed on some small island in mid-ocean, as represented in figure 12, where he can watch ships sail away from him in opposite directions; now if figure 11 be a true picture of the surface shape of the sea, and the observer on turning round sees a similar rise of the water on opposite sides, then the surface of the ocean would consist of a series of bulges, continued ad infinitum, as indicated by figure 12!

Nothing said in this paper concerning "Israel" or its location, precludes or Excludes the old Land of Cannen, given to Children of Israel to have and to hold. . . if and when they uphold the Laws of God. especially the 10 Commandments. Nor excludes Jews from being a Part of Israel. Many say they are a part of Juda-Benjamin. The prophesy says "The Law (Power?) to go forth of Zion and the Word of the Eternal from Jerusalem." My opinion: US-UN ZION, Jerusalem is Jerusalem. Will the Communists force the POPE to move to JERU-SALEM? God knows the answer to all. . . I don't. Thy will be done.

#### Still Mounting Upwards

Figure 13

Now let there be a series of observers, as implied in figure 13; the first observer on the right sees the vessel mount hill nimber one. At this point let there be another observer watching the same ship going in the same direction; he should see it mount hill number two. And a third observer, similarly placed, should see the vessel still mounting up hill number three; and so on, up towards the moon! This would agree with the theory that the moon temporally attracts the waters of the ocean that who would trust himself to porarily attracts the waters of the ocean — but who would trust himself to that theory to make the voyage!

We may well leave the theory of a globular sea to the reprobation of all honest thinkers. Yet Sir Robert Ball in common with some other astronomers, maintains that an observer on the seashore, in watching a receding vessel, actually sees it mounting a hill, or a "protruberant" part of the ocean, until it reaches the horizon, when it begins to descend! If the sea-earth were a globe, the observer should always be placed on the top, near the sea-level; and the receding object should at once begin to descend. But as perspective requires objects below the eye-line to appear to rise in the distance, the globularist is thus unconsciously constrained to yield this testimony as a concession to truth!

The Flat Earth Society says "science" itself, based on spinning, whirling, gyrating balls, is not only "untrue" but insane.

#### Flat Earth Brain Wash. . . And the Rains Came

1844-45 was predicted to be the beginning of the "cleansing of the Temple" which many took to mean the "end of the world" and it really was the "end of the world that was." By the time '44 came around, the Millerites in USA and others in all the Christian world had everybody agitated about the "end."
People will say haha they are always saying the end of the world is about here, etc. Not so, only two times or three has there been predicted, is about here, etc. Not so, only two times or three has there been predicted, to untold nillions of people: I The vast movement based on prophesy in Daniel and Revelation headed by Miller in US, out of which grew through Ellen Gould (White) the 7th Day Adventist Church, the claim 1844 to be the "cleansing of the Temple." Next 2, Jehovahs Witness, predicted by prophesy the end of the world (age) for 1914. Next 3, Jehovahs Witness along with Herbert W. Armstrong predict the end in 1975. EACH CAME TO PASSI 1844-45 Cleansing of the Temple: Communist Manifestol French Revolution. Samuel B. 1844-45 Cleansing of the Temple: Communist Manifestol French Revolution. Samuel B. Rowebothan in England announced the Foundation of the New Age, Earth Flat, unmoving center of the universe just as Moses, Elijah and Jesus had said. He, Flat Earth Rowebothan, announced the beginning of the Age of Reason. In this fateful year ... the law was changed in Turkey (whole Middle East was Turkey then) so that a Jew could buy LAND in Jerusalem! A plot was bought in Jerusalem by some Jews through a member of the Millerites (now days called rth Day Adventists). the cleansing of the Temple! VAST movement began to change people's DIET, no flesh eating. ... put lorth. . Kellog Ellen Gould and many others. .. people urged if must eat dead bodies, eat only the proper or Kosher flesh, best none. Remember CLEAN-ING of the Temple (Body). The Sociologists all over began what they said was cleaning people's MIND, getting rid of "false" religion, they said (brainwash) washing brains. .. cleansing the temple, mind. All this between 1844-48. 1914. .. End of the World. .. it came World War I, the world that was is now Gone With the Wind, Turkey, cut up like a turkey, by England, Australia and US, homeland established for the Jews. Holy Land administrated by England. Vast Russia, or Union of Socialist Republic, established by Bolshevists. Yea, verily, it WAS the total END of the World that Was! 1975: predicted by Armstrong all over the world and by Jehovas Witnesses one of the largest, most influential organizations on earth, the End of the World that is. When 1975 came, none said anything, just quibbled, not knowing WHAT to say. They did not know what "the Sign of the Time Was."

In May 21, 1975 I called a press conference in Greater Los Angeles Press Club, located in Hollywood, before NBC, CBS, ABC, TV and radio and about forty other newsmen I announced the End of the World that was, EARTH 15 FLAT, and this day the sun does not set, prophesy infililed in Isiah, etc.

FLAT, and this day the sun does not set, prophesy fulfilled in Islah, etc. To the Jewish Zionist headquarters located across the street, same announcement. Islah 66:22... for as the New Heavens and New Earth which I will "REVEAL"... (mistranslated make).

Both Moses and Joshua (called Jesus by Greeks) stated this immutable LAW: an eye for an eye a tooth for a tooth! Yahshua-Joshua-Jesus and disciples stated and restated this same identical LAW! Do unto OTHERS as you would have them do unto YOU, FOR as you render to others so shall it be rendered to you again. . .heaped up, shaken down and running over. Lesson: don't knock anybody's eye out, don't knock his tooth out, don't PREY on him, don't deceive him, don't commit adultery, honor your father and mother, don't envy others, for as Moses-Joshua said as YOU do it to OTHERS so shall it be done unto YOU. VENGEANCE is mine, sayeth the Eternal.

#### Witness to All the World

Greetings to all members. Thanks to the several stalwart members who have way in advance renewed their yearly dues and sent contributions above and beyond. And to the many, many new members who have joined in 1977. You are now possibly, de-pending on your attitude, among the elect or elite on earth. Daniel the He-brew Child said, "The wise will understand, but none of the wicked shall understand. The Flat Earth Society is beginning to rise and to shine.

The light is coming.

A scripture somewhere in the Bible says about the mysterious power and ways of the Creator, the Eternal Cod: He can and will take a man off the dunghill and make him to stand like a prince. Your humble servant has been made to stand, since 1972 especially since 1975, and to prevail in 1977! In fulfilling the prognostications from long ago, this Gospel or News has been published as a "witness" in all the world! We reached by the mysterious power of God somewhere upwards of 400,000,000 people, perhaps to 8 hundred millions: With the message, The Sun Does Not Set in This Age, the seed and promise

of Israel Joshua-Jesus is not cast away Basic science of Bible is True. Earth is flat, center of the Universe and future place for Peace on Earth and Cood Will among men. This by news articles, TV and radio. Even Hugh Rudd on CBS Morning News nation-wide told our story. All these people reached JUST in 1977. Vast coverage in Germany and all German-speaking lands, Scandanavia, even Finland, some China, over in Africa, and who knows where else. The number reached could be far in excess of I billion people! How could this come about? people! How could this come about? I'll guarantee you it's not because I'm so smart or great or even so righteous, but SOLELY because it is Cod's will for this news of the New World Order to go out, has it gone out. Associated Press in L.A. writer wrote a story that went to the WHOLE WORLD, as did Chicago Tribune News Service. TWA Airlines, in their magazine Ambassador, covered us. magazine Ambassador, covered us. And other independent writers, papers, encyclopedias, magazines, vast number of radio talk shows, etc.

All these people, some without their knowledge, have helped fulfill the prognostications-prophesies con-

#### That Was the End My Friend

. You thought those days would never end. The end came like a thief in the night. ...many were too busy. ...buying, selling, eating and drinking. Joshua Jesus said the end would come like a thief in the night. So watch, let your deeds be such you would not be ashamed. Daniel said afterwards... let your deeds be such you would not be ashamed. Daruel said afterwards. let the micked remain wicked, let the righteous remain righteous. maybe all are now set in their mold! To those that have more shall be given; to those that have not the little that he has shall be taken. Jesus said this was a "law." As the "end" continues, those who already have some "understanding seriously doubt the Christian spinning balls do already believe there is "right and wrong" are not offended by being told, the 10 Commandments, a Catholic or Universal Law, etc., to these who have already washed their brains somewhat, are ready to have them fully washed. To have their Temple Body what, are ready to have them fully washed. To have their Temple Body and Mind made Clean. More and more understanding will come to this Elect. To the rest, who have received the "mark of the Beast," that is, have marked themselves as "beasts" neither knowing or caring or seeking for True, Proper, Clean, Upright things, scoffing at those who do, their destiny is to be "beasts" on this World Animal Farm. As beasts, they MUST not be violent, nor lord it over other beasts, must get along with all the other beasts, like a farmyard all must get along, integrate, and produce. You acted like a Beast, you SAID you were a Beast. You confessed you were a wild cannibal beast of prey. Now you are given over to be a beast, but now "captured." (I'm not talking about Flat Earth members but those who scoff at our claim Eart flat and 10 Commandments the Law of the Land.)

Members: Strive daily to have your brains further washed, the cleaner

Members: Strive daily to have your brains further washed, the cleaner they become, can think better. Cleanse the Temple. Under no conditions eat any dead body, except it be kosher or proper. Best and the Final Solution is do not eat any dead body, do not murder and eat victims. Those who kill and eat hogs, for instance, are cannibals, eating ANOTHER beast of prey. If you must be a beast of prey, don't prey on your own KIND, like swine, wolf, hyena. This is form of "honor" not at least to kill and eat your own kind. From that basis, could step UP a notch and not kill and eat another KIND.

Fact: The Fantastic Plagues which overspread this land is as bad as in plague days in Bible. Cancer, etc., etc., people sick in mind and body. No plague will come near you, IF...your physical temple is cleansed. . by your DIET and your mind cleansed, by first fearing God and striving to keep the Commandments.

## Silver Lining

Sometimes we hear people complaining how very bad everything is these days. Well, that's so right in many ways. On the other hand, how very good many things are. At times when I see the good things that are happening in this country, it makes me give thanks to the Almighty Creator, to see that the government has such compassion to Almighty Creator, to see that the government has such compassion to help the blind, deaf, the sick and needy people. Seems to me they are fulfilling what Jesus Christ told us to do, to love thy neighbor as thyself! Surely, the millions so helped much appreciate the government doing what Moses, the prophets, and Jesus Christ said to do, and all Americans should be proud of the government policy of aiding its citizens and even non-citizens. Oh, yes, there are many wrong and bad ways people could drift into or take in life, but God-fearing seconds who desire to be giveney. people who desire to be righteous (right) know how to stay from wrong doings. Maybe it's the time to spearate the tares from the wheat. But one thing we should all remember: that we must reap what we sow. Hosea 5:7 (Holy Scriptures) . . . for they that have sown the wind. . . shall reap the whirlwind. . .

In 1978, as the ball of twine unrolls, we want no members-subscribers who will not fill in the application, especially the part about NOT

to damage, defame or degrade or be enemy at all of this Society. As you all should know, we don't proselytize or try to talk people into believing anything we say. # Is the Flat Earth Religious?

No, the flat earth is just flat, just a flat fact. You can never have heard of the Bible and still, in fact can understand even better, the simple elementary self-evident demonstra-ble fact the known world is flat. I say you can know it even better, because the Judo or Jewish-Christian faith since 1600 forcibly brainwashed most of our people into thinking earth a speck of dust spinning around the sun! So just telling it as it is today, it is the Christians who claim the Grease Ball Hoax is fact! It is un or anti-Christian to state the fact earth flat or the fact the Bible is flat earth book! In the strange tangled wire age of deceit, where weird, upside down semantics-semitics prevents most from even knowing "which way prevents s up" it is anti-Christ to believe 'Christ" when he said in various ways and actions, earth is flat. So if you "believe Christ" you are "anti-Christ" and if you reject Christ, his science, his teachings, say he was either stupid and or a liar then you are a "good Judo or Christian," Well, we can't waste time talking about what pretzel tangles most people are in. In this Valley of decision, in this short span of time we spend in this vale of sorrow, we ARE accountable for our deeds and our opinions, so better think carefully about just "who" you're going to believe; if you believe anybody think carefully, reasonably based on what experience and information you have, you CAN trust the herd of beasts, trust them to be wrong.

1. The concept of the ball bearing universe first declares there is no up and down! You must remember this, no UP no DOWN. This is the first principle of the Grease Ball Religion (ball concept from Grease). Just this one BASIC principle of grease balls, RULES OUT THE ENTIRE BIBLE! Entire concept of Hebrew Scriptures is one way UP, Heaven ABOVE, earth is below and beneath. The great Flat Earther now deceased, Winston Churchill, former Prime Minister of Great Britain said about WW2 and also meaning WWI and other events English speaking peoples engaged in: Unlike 18 year old college students, he knew God existed and a plan was in existance. He said, "We have the privilege to be a part of the Great Plan being worked out "here below." Below what? Unlimited space? No. he said he meant here Below Heaven which is ABOVE. Are you surprised Winston Churchill was a Flat Earther? Don't be. Even George Bernard Shaw, the world shaker and quaker, Shaw, the word shaker and quaker, leader of Fabian Socialism, who final-ly turned England that way, was also a Flat Earther! The Right and the Left both Flat Earthers. You see, Facts are separate from all ideas or methods of accomplishing some ideal society, a Fact is a Fact and that's that, as Kipling would say, another famous Flat Earther, by the way. A Fact is Truth, and Truth is a Fact. Ten thousand pipes of opium can be smoked. Ten thousand books written with clever subterfuges and sophistry Greek type arguments, gravy gravity, relatives or relative jibberish cannot change the Fact the known earth is Flat, is not three dimensional nor two but one dimension known, the

well, I started out to give some scriptures, etc., to show Bible was Flat Earth and to state you don't necessarily have to be a Bible be-liever to be sane enough to know simple facts prove earth is flat. But for this time will just give one scripture quotation, plus tell you to think about hat I've said about up and down. Bible is up and down book, whole sixty-six books. Creasy Spoon Science says about this, "that's absurd," to think one way is up, another is down there's no up and no down no NOTH-ING but Grease Balls and all of them spinning. Why they say there are forty-five quadrillion spinning balls (atoms) on the head of every PIN on earth. AND vast space between each BALL! Now I'm coming more and more not to condemn the Carnies who tell this

insane tale, but to condemn the lievers," of such insane rubbish, such utter sophistry, drivel. the supply. Surely a person, 'creates' a grown person that is over thirty, to really "believe" such rubbish hocus pocus, must be subhuman, in short a "beast" and not to be counted among people who stand upright and are reasonable.

Let me say that today what mean-ing what "point" what "science" what wisdom what history in fact most anything at all of value concerning the Bible has been lost and-or perverted, twisted sideways, back-wards and upside down by Christian nations. In fact, strange fact that Bible believing people such as Bap-tists are just the ones who have and DO REJECT the entire Bible. Like their predecessors before them the Pharisees, they are filled with hypocrisy. On the other hand, many that "seem" to discount or don't "claim" to believe the Bible, like many communists and others, do really seem to believe or KNOW the "point" of the Bible. Like Simon Johnson, called Peter, says in the Bible, "to help the widow and the orphan in their distress" . . is PURE UNDEFILED religion. . .note DEEDS WORKS, not rituals word, or blood baths. Anyway the whole point of the Grease Ball science since 1600 is to do away with "all the people of the book" and the sane, upright outlook that is contained in this book. Like: Science claims to

just how far to each star and planet, as they call hem. AND above all the Cainenite them' Rosecrusian Christian preacher Newton claimed to have "discovered the FOUNDATION of the world." Foundation is what "holds something up ation is what "holds something up" supports it, etc., etc. Gravity, the Rosey Cross Christian Church of England idiot said, is the FOUNDATION OF THE WORLD. O.K., now I'll show you WHY he said this. His AIM and purpose for such a preposerous hocus pocus doctrine: Jeremiah 32:37, "If the Heavens ABOVE can be measured and if the Foundation be measured, and if the Foundation of the earth found. THEN, THEN will I cast off the seed of Israel. will I cast off the seed of Island.

for all the sins they have done. The
"meaning" of this statement is it is
"impossible." So, science says it has
"measured" the Heavens and HAS FOUND the foundation of the earth! So science says. . Israel and all that Bible and morals stuff is through those old Laws against adultery, SODOMY, bearing false witness, murder, torture of innocent, etc., are all "done away with."

Whether you are a Bible person or not, must confess Bible is Flat Earth and a FACT-TRUTH. Science is proved to be not only wrong but to be lunatics. But the Flat Earth stand is independent of Bible or anything. . and remains todays as has always been a Mystery. Only one thing KNOWN, one scientific FACT know, that is Earth is Flat.

LAND is the modern Holy Land. .. the Land of Israel. Angio Saxon, Cettic and kindred related and proselyte the tribes of Israel. William Gladstone, one of the greatest names in the English language, four times Prime Minister of England from 1868 through 1894. He invented the voting by ballot, extended voting rights to many. He carried through many far reaching reforms in England but could not stop the spinning ball hoax! said about this Flat Earth New Holy Land with its Constitution. This documents the American Dream concept. Was the greatest concept and constitution EVER devised by MAN in all recorded history! George Washington took his OATH on the open BIBLE! In 1888 Alexander Dowie arrived in San Francisco from Australia, declared y many to be in the "spirit or office of Elijah" said Earth is Flat, ZION is now being ESTABLISHED. . right HERE in USA. Went on to Chicago. where he was declared ZION, that is "the Law, Power to go forth of ZION and the word of the Lord from Jerusalem" in other words he said, the WORLD to be ruled from right here in this modern Holy Land! 1945-6 United Nations Covenant drawn up in San Francisco, same place where Dowie first DE-CLARED. . world to be ruled from this land. Few years before the so-called "atom bomb" invented in Chicago, remember Flat Earth Dowies next stop, that has forced the world through fear to . . peace. Now in New York, named after English town (from England concept Parliament of Man), is located the United Nations. What does it mean? UNITED STATES, State and Nation one and the same. #### The Revelation of the cause of sunrise and sunset

Although the sun is at all times above the earth's surface, it appears Although the sun is at all times above the earth's surface, it appears in the morning to ascend from the north-east to the noon-day position, and thence to descend and disappear, or set, in the north-west. This phenomenon arises from the operation of a simple and everywhere visible law of perspective. A flock of birds, when passing over a flat or marshy country, always appears to descend as it recedes; and if the flock is extensive, the first bird appears lower or nearer the horizon than the last, although they are at the same actual altitude above the earth immediately beneath them. When a balloon sails away from an observer, without increasing or decreasing its altitude, it appears to gradually approach the horizon. In a long row of lamps, the second — supposing the observer to stand at the beginning of lamps, the second — supposing the observer to stand at the beginning of the series — will appear lower than the first; the third lower than the second; and so on to the end of the row; the farthest away always appearing the lowest, although each one has the same altitude; and if such a straight line of lamps could be continued far enough, the lights would at length descend, apparently, to the horizon, or to a level with the eye of the observer, as shown in the following diagram, fig. 63.

CHARLES K. JOHNSON and his wife, Marjory, outside their home in Lancas--AP Laserphoto

reasonable laws of Physics, such as Law against Gays, also called Sodomy.) This for the Jews and Christians, also called Juda and Israel. Jeremiah 31: 28-33.

Let A, B, represent the altitude throughout of a long row of lamps, standing on the horizontal ground E, D; and C, H, the line of sight of an observer at C. The ordinary principles of perspective will cause an apparent rising of the ground E, D, to the eye-line C, H, meeting it at H; and an apparent descent of each subsequent lamp, from A, to H, towards the same eye-line, also meeting at H. The point H, is the horizon, although it has really the altitude D, Bwill disappear.

Bearing in mind the above phenomena it will easily be seen how the sun, although always above and parallel to the earth's surface, must appear to ascend from the morning horizon to the noonday or meridian position; and thence to descend to the evening horizon.

and thence to descend to the evening horizon.

In the diagram, fig. 64, let the line E, D, represent the surface of the earth; H, H, the morning and evening horizon; and A, S, B, a portion of the true path of the sun. An observer at O, looking to the east, will first see the true path of the sun. An observer at O. looking to the east, will first see the sun in the morning, not at A, its true position, but at its apparent position, H, just emerging from the "vanishing point" or the morning horizon. At nine o'clock, the sun will have the apparent position, I, gradually appearing to ascend the line H, I, S; the point S, being the meridian or noonday position. From S, the sun will be seen to gradually descend the line S, 2, H, until he reaches the horizon, H, and entering the "vanishing point," disappears, to an observer in England, in the west, beyond the continent of North America, as in the morning he is seen to rise from the direction of Northern Asia. An excellent illustration of this "rising" and "setting" of the sun may be seen in a long tunnel, as shown in diagram, fig. 65. The top of the tunnel, 1, 2, and, the bottom, 3, 4, although really equi-distant throughout the whole length, would, to an observer in the centre, C, appear to approach each other, and converge at the points, H, H; and a lamp, or light of any kind, brought in, and carried along the top, close to the upper surface, 1, 2, would, when really going along the line, 1, S, 2, appear to ascend the inclined plane H, S, to the centre, S, and after passing the centre, to descend the plane S, H; and if the tunnel were sufficiently long, the phenomena of sunrise and of sunset would be perfectly imitated.

A very striking illustration of the convergence of the top and bottom, as well as the sides, of a long tunnel, has been observed in that of Mont Cenis. M. de Porville, when in the centre of the tunnel, noticed that the entrance had apparently become so small that the daylight beyond it seemed like a bright star. 'Before us, at an apparently prodigious distance, we beheld a small star at the entrance of the gallery. Its vivid light contrasted strangely with the red glare of the lamps. Its brightness increased as the horses dashed on the way. In a short time its proportions were more clearly defined, and its volume increased. The illusion was quickly dispelled as we got over some kilometres. This soft white light is the extremity of the gallery."

We have seen that "sunrise" and "sunset" are phenomena dependent entirely upon the fact that horizontal lines, parallel to each other, appear

to approach or converge in the distance. The surface of the earth being horizontal, and the line of sight of the observer and the sun's path being over and parallel with it, the rising and setting of the moving sun over the immovable earth are simply phenomena arising necessarily from the laws of perspective.

Members and Readers, THIS DAY the New Heavens and New Earth (the new Concept, since nothing real changes) are being . . . REVEALED. . .

#### **Gravitation or Hocus Pocus**

The "law of gravitation" is said by the advocates of the Newtonian system of astronomy, to be the greatest discovery of science, and the foundation of the whole of modern astronomy. If, therefore, it can be shown that gravitation is a pure assumption, and an imagination of the mind only, that it has no existance outside of the brains of its expounders and advocates, the whole of the hypotheses of this modern so-called science fall to the ground as flat as the surface of the ocean, and this "most exact of all the sciences," this wonderful "feat of the intellect" becomes at once the most ridiculous superstition and the most gigantic imposture to which ig-

In the "Story of the Heavens," by Sir R. Ball, it is stated on page 82:
"The law of gravitation, THE GREATEST DISCOVERY that science

has yet witnessed."

"The law of gravitation WHICH UNDERLIES THE WHOLE OF ASTRONOMY."

Page 101: "The law of gravitation announces that every body in the uni-

verse attracts every other body with a force which varies inversely with the square of the distance."
"Popular Science Recreations," by G. Tissandier, pages 486 and 487, contains the following: "Gravitation is the force which keeps the planets in

Every object in the world tends to attract every other object in pro-

Every object in the world tends to attract every other object in proportion to the quantity of matter of which each consists."

Professor W. B. Carpenter, in his work "Nature and Man," says: "The laws of light and gravitation, wrote Mr. Atkinson to Harriet Martineau, 30 years ago, 'extend over the universe, and explain whole classes of phenomena, and this explanation, according to the same writer, is all-sufficient, "Philosophy finding no God in nature, NOR SEEING THE WANT OF ANY."

C. Vernon Boys, F.R.S., A.R.S.M., M.R.I., in his paper, "The Newtonian Constant of Gravitation," says: "G, represents that mighty principle under the influence of which every say, planet and satellite in the universe pursues

Constant of Gravitation," says: "G, represents that mighty principle under the influence of which every star, planet and satellite in the universe pursues its alloted course. Unlike any other known physical influence, it is independent of medium, it knows no refraction, it cannot cast a shadow. It is a mysterious power which NO MAN CAN EXPLAIN, OF ITS PROPAGATION THROUGH SPACE, ALL MEN ARE IGNORANT. . . . . I cannot contemplate this mystery, at which we ignorantly wonder, without thinking of the altar on Mars' hill. When will a St. Paul arise able to declare it unto us? Or is gravitation, like life, a mystery that can never be solved?" — Proceedings of the Royal Institution of Great Britain.

Or in other words, This Highest Aurthery of Science confesses, "Gravity" the glue of the entire spinning ball jibberish, is Entirely a religious Dogma, can Only be believed on "blind faith" since it is entirely unreasonable, unproved, and unprovable and simply "absurd." (Keep in mind the 10 Commandments we hold for is not "religious" not unreasonable but common

Professor W. B. Carpenter, in a paper "Nature and Law," published in Professor W. B. Carpenter, in a paper Nature and Law, published in he "Modern Review" says: "The first of the great achievements of Newton in relation to our present subject, was a piece of purely Geometrical reasoning. ASSUMING two forces to act on a body, of which one should be capable of imparting to it uniform motion in a straight line, whilst the other should attract it towards a fixed point in accordance with Galileo's law of gravity, he demonstrated that the path of the body would be deflected into a curve. . . . The idea of continuous onward motion in a straight line, as the result of an ordinal impulsive force not appropriate or affected by as the result of an original impulsive force not antagonized or affected by any other - formularised by Newton as his first 'law of motion' - is not borne out by any acquired experience, and does not seem likely to be ever thus verified. For in no experiment we have it in our power to make, can we entirely eliminate the antagonizing effects of friction and atmospheric resistance; and thus all movement that is subject to this retardation, and is not sustained by any fresh action of the impelling force, must come to an of sustained by any tresh action of the impelling force, must come to an end. Hence the conviction commonly entertained that Newton's first 'law' of motion must be true, cannot be philosophically admitted to be anything more than a probability. . . WE HAVE NO PROOF, AND IN THE NATURE OF THINGS CAN NEVER CET ONE, OF THE ASSUMPTION OF THE ATTRACTIVE FORCE EXERTED BY THE EARTH, OR BY ANY OF THE BODIES OF THE SOLAR SYSTEM, UPON BODIES AT A DISTANCE. Newton himself strongly felt that the impossibility of rationally accounting for action at a distance through an intervening vacuum, was the weak point of HIS system. All that we can be said to know is that which we learn of HIS system. All that we can be said to know is that which we learn from our own experience. Now, in regard to the Sun's attraction for the Earth and Planets, WE HAVE NO CERTAIN EXPERIENCE AT ALL. Unless we could be transported to his surface, we have no means of experimentally comparing Solar gravity with Terrestrial gravity; and if we could ascertain this, we should be no nearer the determination of his attraction for bodies at a distance. THE DOCTRINE OF UNIVERSAL GRAVITATION THEN, IS A PURE ASSUMPTION."

## Which way is up?

"In ascending a hill we experience a hard struggle, and feel more fatigued than when walking on level ground. Why is this? The Newtonian attributes this to the attraction of gravitation of the earth, against the pull of which we have to contend; but if he would be consistent with his theory that the attraction of gravitation diminishes inversely as the square of the distance from the center of the earth, we ought, in defiance of experience, to feel it to be less laborious to ascend a hill than to promenade the same distance on level ground, because as we ascend we recede from the center of the earth; therefore the force of gravitation ought to diminish in a corresor the earth; therefore the force of gastration ought to diffinish in a corresponding degree. The Newtonian can only get over this difficulty by a species of scientific quibbling. According to the definition of weight I have given, the solution of the problem is perfectly simple. In ascending a hill, a man comes in contact with the law that the natural tendency of any body is to seek the easiest and shortest route to its level of stability. He chooses the very reverse, and must therefore endure the consequences of acting in opposition to this law. At every step he has to lift his own weight, and the higher he mounts the more he feels the influence of the law which he defies. His easiest and more direct course to obey the law of weight is to remain where he is; the next is to descend to a lower level.

"The attraction of gravitation is siad to be stronger at the surface of the earth than at a distance from it. Is it so? If I spring upwards perpendicularly I cannot with all my might ascend more than four feet from the ground; but if I jump in a curve with a low trajectory, keeping my highest elevation about three feet, I might clear at a bound a space above the earth of about eighteen feet; so that practically I can overcome the so-called force (pull) at the distance of four feet, in the proportion of 18 to 4, being the very reverse of what I ought to be able to do according to the Newtonian

'Again, take the case of a shot propelled from a cannon. By the force of the explosion and the influence of the reputed action of gravitation, the or the explosion and the influence of the reputed action of gravitation, the shot forms a parbolic curve, and finally falls to the earth. Here we may ask, why — if the forces are the same, viz., direct impulse and gravitation — does not the shot form an orbit like that of a planet and revolve round the earth? The Newtonian may reply, because the impulse which propelled the shot is temporary and the impulse which propelled the planet is permanent. Precisely so: but why is the impulse permanent in the case of the planet revolving round the sun? What is the cause of this permanence?

#### Goodbye Mr. Newton...

"We are asked by the Newtonian to believe that the action of gravitation, which we can easily overcome by the slightest exercise of volition in raising a hand or a foot, is so overwhelmingly violent when we lose our balance endfall a distance of a few feet, that this force, which is imperceptible under usual conditions, may, under extraordinary circumstances, cause the fracture of every limb we possess? Common sense must reject this interpretation. Gravitation does not furnish a satisfactory definition of weight already given does, for a body seeking in the readiest manner its level of stability would produce precisely the results experienced. If the influence which kept us securely attached to this earth were identical with that which is powerful us securely attached to this earth were identical with that which is powerful enough to disturb a distant planet in its orbit, we should be more immediately conscious of its masterful presence and potency; whereas this influence is so impotent in the very spot where it is supposed to be most dominant that we find an insurmountable difficulty in accepting the idea of its exist-

that we find an insurmountable difficulty in accepting the idea of its existence. Fortunately for our faculty of locomotion, the Newtonian hypothesis may be rejected as a snare and a delusion.

"It is quite amusing to watch Newtonians and Darwinians floundering about in their attempts to expound the mysteries of creation. Their theories are as ridiculous as the fashion which once prevailed for Della-Gruscan poetry, and they ought to be treated with equal severity.

"It seems quite possible that during the last three hundred years we have been living in a sort of scientific fool's paradise, and that universal gravitation is a gizantic Newtonian mare's nest.

"As a theoretical scientific guide we must give up Sir Isaac Newton as useless and misleading, and allow his reputation to retire into private life."

useless and misleading, and allow his reputation to retire into private life,

#### The way they were...

I have quoted at length on this important matter, and the evidence here produced, besides very much more in the same direction, for which I have not the space here, shows clearly that THERE IS NO SUCH FORCE AS GRAVITATION IN EXISTENCE ANYWHERE.

One of the world's so-called great thinkers, J. S. Mill, is quoted in Professor Carpenter's "Nature and Man," page 385, as saying: "Although we speak of a man's fall as caused by the slipping of his foot, or the breaking of a rung (as the case may be) the efficient cause IS THE ATTRACTIVE FORCE OF THE EARTH, which the loss of support to the man's foot brings into operation."

If a man is not "deeper" than to believe what this "deep" thinker has left on record in this matter; if he has no more brain power to accept the foregoing statement, I would strongly advise him to cease thinking altogether.

gether, and thus save the few brains he has. It is simply astounding that gether, and thus save the few grams he has a company and as dull as bricks and men, who in business matters are sharp enough, are as dull as bricks and a company as children when the awe-inspiring subject of gravitation, "that as credulous as children when the awe-inspiring subject of gravitation, "that grand masterpiece of astronomy," is the theme. To ask the reason why, or to venture to suggest that the assumptions of the "learned" require some sort of proof to back them up, never seems to strike moderns who believe in this monstrous humbug. A. Giberne, in "Sun, Moon, and Stars," page 27, says: "If the sun is pulling with such power at the earth and all her sister planets, why do they not fall down upon him?"

A very proper question, truly. And when this question is propounded to astronomers, they cannot give an answer worth recording. They simply do

#### Canada to have dominion of American continent?

I've said before and say again in the First Nation or World Power (Vatican, etc., etc.) to Officially Declare Earth Flat...10 Commandments the Law of the Land will rule the WORLD!

I have been invited by CBC Canadian Broadcasting, equivalent to CBS, NBC, ABC all rolled into one to appear on a TV show Nationwide to Refute the insane witchcraft of Christian-Science the Spinning Ball Globe Planet the insane witcheraft of Christian-Science the Spinning Ball Globe Planet hoax! American TV network live in fear and dread of the day I appear on Nationwide TV and that DAY end the present crazed mania cultic dark ages Superstition called the "spinning balls concept of earth and the universe." And forever end the comicstrip science fiction fiction that "the rover boys landed on the moon" or that Nazi-Commie spook-nick orbited the earth and thereby "proved" the earth a "globe." Forever end the present fiction that Russians are "orbiting earth" with little bags of split up Adams (atoms). Will prove NO ONE has or Will EVER orbit earth as it is impossible. Will prove NO ONE has or Will EVER orbit earth as it is impossible. Earth is all there is is no doubt infinite in size, has ONE dimension, the surface. Moon is 2500 miles up as is sun, much CLOSER than Lancaster is from Montreal, Canada, the Paris of the West. I just remembered, Old Paris was called the City of Light, but it was the light that failed. Perhaps New Paris MONTREAL is the New City of Light? I hope so, negotiations are now underway for Marjory and I to go to Montreal. . and Refute the wierd occult dark middle age superstition "earth is just a tiny speck of dust spinning around the sun" (the old 2000 year old Cainite sun worship). Perhaps before next issue of this paper June 1, I will have given Canada. . a Chance. . . to whom much is given . . . much is expected. . . . J.C.

#### Backward is forward or this Flat Earth is a spinning ball

a Chance. . . . to whom much is given. . . much is expected. . . . J.C.

Note to those who have read George Orwell's 1984. In it Winston kept claiming that 2 plus 2 were always four. . . just as sure as the world was a speck of dust whirling around the sun and that there was no God and that he, Winston, was a "Man." Obrian, the Demecratic Party Leader the Nuclear Engineer of the Society took Winston to room 101 and with Party Aids (everything found in a Mental Health Clinic, electric shock, Drugs, and a feigned sweet luv) tried to "explain" the Christian-Science or Einstien or The New Clear Way of Truth. I'll give you an example of Christian or Einstien or Harvard Scientific Thought, also known as "The Rockeyfeller Got It Baptist Religion." 1. The Panange Canal Zone has always belonged to the U.S. of A. It is now and has always been a part of us, created by the USA, built by the blood and sweat and tears and money of USA. Created out of worthless swamp in Columbia. It is to our best interest to keep it, it is Gate Against our Enemies. 2. US has never and does not now own the Canal, have nothing to do with the Canal, are evil Gringo Dogs for even wanting to "use their canal." We best give it back to the Glorious Noblemen we stole it from also give them our money marbles and chalk and promise to send more by return mail and flee for our lives. Note to those who have read George Orwell's 1984. In it Winston kept send more by return mail and flee for our lives.

Now when a person is Born Again into Double Think, also called Christian Science, he can and does Believe both stories are TRUE at THE SAME TIME!

Now in this most fantastically depressing sad and pathetic book, poor Winston never did "get it" or "got it" Or I should say he got it in the end. The ONE sole reason for Winston's trouble was in childhood in Public Schools and Church of England he was taught Earth a Ball, no Cod, no IO Commandments, the Flat Earth of Bible a Myth. This corruption of the child's mind with Grease Balls and Greasy Spoon Science, made him Truely INSANE and void of all understanding. O'Brian could and DID with him as he pleased. . . why? Because Winston CONFESSED (when he said there was no Cod, earth a ball, and swore alligiance to the party) that he was a Mark no God, earth a ball, and swore alliginance to the party) that he was a Mark and of the Beasts. O'Brian tried him and found him guilty. Had Winston known the Truth. . he would have been Free, Free to keep the Commandments and serve the God of TRUTH. Jesus said the TRUTH WILL make you Free. But a buggy ball beast. . Will Never Be Free.

Mr. Charles K. Johnson President International Flat Earth Research Society Lancaster, California

#### Freedom is just another word meaning nothing left to lose

We are always hearing reports on the so-called "women's liberation movement or Abortion (the right of women to kill their own children). More rights for women to take men's roles. Now they demand the "right" to fight on the front lines of wars! RIDICULOUS.

I would like to speak out for the right and decent women, who take their rightful place in life and are a credit to womenhood in

this day.

First, my wonderful dear mother. My wonderful dear mother-inlaw. What couragious Women, God-fearing rightious Ladies. How do I wish that all women had had the opportunity as I have had to learn from these two ladies. But no doubt there are an untold number of God-fearing Ladies, women in the world I have never even heard of.

There are some women in the news that I would like to speak highly of. Phyllis Schaffley, Anita Bryant, Mary Crisp and of course many others. I think these Women should be praised to High Heaven instead of some always trying to find fault in these good and rightful

ways for women.

I will say again, GOOD WORK Phyllis Schaffley, as any women who wants to "give up" her present and traditional position on a who wants to "give up her present and traditional position on a Pedistal, chaste upright moral men considering us to be all they love and respect, most men ready willing and able to lay down their very lives for us, protected, Cherished with tender loving kindness by our menfolk, to "give this up"... for freedom to be men, freedom to attract and ridicule the tender loving-kindness of our men, freedom to wallow in the muck and mire, freedom to be NOTHING but a female-male... is Freedom to be a Slave.

#### THE WAY... Continued from page 2

not know how to answer the question without stultifying their common-sense. But the above writer thinks it can be answered, so says: "Did you ever tie a ball to a string and swing it rapidly round and round your head? If you did, YOU MUST HAVE NOTICED THE STEADY OUTWARD PULL OF

THE BALL."

The "steady outward pull of the ball" clearly implies that the ball has intelligence, and knows just what to do so as to prevent its hitting the head of the operator. The "outward pull" of a ball which is fastened to the hand of the operator by a string, is clearly impossible. If the operator ceased to ceased to impel it round and round his head by the mechanical attachment ceased to impel it round and round his head by the mechanical attachment and the power he exerts in swinging it round, the ball would seek its level of stability and fall to the ground. And, as this illustration is used to teach what gravitation is, and how it acts, we shall just follow the illustration to its logical issue, and see where the theory is. The illustration implies that BETWEEN ALL THE BODIES IN THE UNIVERSE. THERE IS A CONNECTING LINK, which keeps the "body" that attracts attached to the "body" that is attracted. This connecting link, in the case of the ball, is the string. Now, we could readily understand gravitation if this illustration conveyed to us by the ball and the string were a correct representation of fact. But, we very naturally ask, what is the connecting link? Of what does it consist? And of what do all the connecting links between the sun and the myriad orbs of heaven consist? Would not the "strings" get somewhat entangled? Has this connecting link ever been observed anywhere? The answer to these pertinent questions is that THERE IS NO CONNECTING LINK in existence. When the "missing link" is produced, we are prepared to admit all the gravitation theorists teach on the subject. Until then we shall continue to regard it as the myth it undoubtedly is. But we are not done with the illustration yet. The "ball and string" device sets forth that the "body" that attracts is not only connected with the "body" attracted, but that the former IS THE MOTIVE POWER OF THE LATTER — that the sun is the power which compels the earth to revolve round it, even as the motive power of the ball is the exertion of the hand of the operator. Without the the string. Now, we could readily understand gravitation if this illustration power of the ball is the exertion of the hand of the operator. Without the connecting link the earth would fall (according to the astronomers) in a rectilinear path for ever. But what these wise men do not see, and which is a necessary part of the theory, as represented by the ball and string idea, is that the motive power also must come from the sun. Without this motive power and the connecting link, the whole of the theory falls to pieces. THERE IS NO MOTIVE POWER IN THE SUN TO CAUSE THE EARTH TO REVOLVE AROUND IT, AND THERE IS NO CONNECTING LINK BETWEEN THE SUN AND THE EARTH TO KEEP THE LATTER IN ITS POSITION, consequently the theory of universal gravitation has no existence in fact. A Compass Always Points North

#### Graphic Proof that the Earth is Not a Globe

A Mariner's compass must be level or it will not operate accurately. For this reason, various means of suspension are used to keep this instru-ment level. When not disturb-ed by local influences, the positive endof the magnetic needle always points north.

The accompaning drawing will serve a double purpose, showing ship A on a flat earth, and ship B on a globe. Notice that the position of the North

Pole is on top of the globe, and at the center of the flat earth. Ship B is represented at about 45 degrees south latitude on a globe, and shows how impossible it is for the compass needle on this ship to point north, for a compass never indicates north to be down in

the ground.

Ship A is represented in about the same latitude, but on a plane earth, and shows how the compass needle on

this ship can point north without any contortions whatever, since it is constantly on the

same plane.

Ship C represents an impossible position in space which, if the North Pole is on top of the drawing as on a

top of the drawing as on a globe, must be occupied by any ship that is hundreds of miles from the Pole, and still the compass needle pointing north, from the level position.

If the earth were a globe, the needle of the compass on ship B would point out into space, as shown by the dotted arrow. The black arrow at ship B, shows the direction the com-B, shows the direction the com-B, shows the direction the compass needle must point, if it

Loss of freedom, gross suffering and painful death are all too often judged necessary for "human progress," in the form of better health, military strategy, weapons development, nutrition, fur apparel, entertainment and hunting, specimens for exhibition, amusing exotic pets, safe cosmetics, safe household products - where will it end? How materialistic can we get before we destroy a large part of God's creation - our own lesser brothers?

#### **Gravity motion**

In previous issues of F.E.N. we have utterly destroyed the potency of five of the most popular so-called proofs that the earth is a whirling globe. We will now again discuss the theory of gravity and earth motion. In order that one may grasp the full meaning of the term "whirling globe", let us recount the figures. According to Elements of Astronomy, the earth is traveling through space at the rate of 66,600 miles an hour in one direction (orbital motion) and according to Astronomy to Elements of Astronomy, the earth is traveling through space at the rate of 66,600 miles an hour in one direction (orbital motion) and according to Astronomy for Everybody, the entire solar system is flying toward the constellation Lyra at the rate of 36,000 miles an hour entirely independent of orbital motion; then add to this 1,000 miles an hour diurnal motion: plus the wobbling motion known as the precessional movement (See motion; plus the wobbling motion known as the precessional movement (See Scientific American, Sept. 1929, pp 204), all of which motions make a total speed of more than 11,716 miles a minute, at which we are supposed to be traveling through space.

speed of more than 11,716 miles a minute, at which we are supposed to be traveling through space.

No sane person not deluded by special training, but possessed of ordinary power of perception, could be induced to seriously entertain such a preposterous notion. Many attempts have been made to prove the earth's motion, and every singled experiment made for this purpose has proved exactly the opposite thing, that the earth is at rest and positively stable. If there were any real proof of the earth's motion everyone would know of it, for the fact would be heralded far and wide. There is no such proof.

We have many letters from writers who state that they believe the earth to be a globe because the law of gravity proves it. We have given above a brief statement of the earth motion necessary to support the so-called law of gravity. Since this necessary motion is entirely lacking, we will pass to the next phase of the question—attraction. We will show what grotesque assumptions are necessary to support the theory of attraction. Newton himself did not believe that the so-called force of gravity could influence remote bodies, from his own writings which were quoted in previous issues of Flat Earth News.

The modern conception of the theory of universal attraction involves an endless chain of worlds, each attended by it solar system and each millions of diameters larger than its dependent. Our sun, according to this conception, is 1,300,000 times larger than the earth, and is the center of our universe. It is holding the earth, moon, and planets in positions by its powerful arm of gravity. But the sun is not at rest: it is racing wildly toward Lyra, and it constitutes a small part of another still more rigiantic system and so on ad infinitum. In theory, it is necessary to have each successive system millions of times greater than its dependent, in order that its gravitational power would be sufficient to hold its dependent system. Our sun is, according to the modern conception, only one of the stars, and the very small

There is evidence that some of the most distant stars may be as much as 1,000,000 light years away". One million light years represent 5,382,326,640, 000,000,000 miles into space. This is nothing but a row of digits and ciphers, and has no meaning which is intelligible to men and women, regardless of

and has no meaning which is intelligible to men and women, regardless of their education and training.

There is no such a distance so far as this world is concerned. Every human experience and all the powers of reason cry out against such phantasy. Who that knows the logical conclusion that must follow such a train of reasoning, as we have outlined above, can stand upright and look one in the face, and declare that he believes in such a system? The unthinking mass believe it because they do not know what is involved. They forget that the system is supported by theories only, and that those who oppose it have all the facts on their side, together with their reason and the Plain Teaching of The Bible.

A thing falls because it is heavier than the air it displaces, or it floats away in space because it is lighter than air. The theory of universal attraction is a myth. There is no law of gravity.

Good bye, again, Mr. Newton

these days. Well I must say until we all come to the knowledge as the above picture and the words reveal to us, there shall be no peace. Since a very small child I have felt this very way....to have concern and feelings for the poor dumb beasts. They are Cod's creatures. The same as we are. And truly they all can be so gentled and such a true friend....when treated with kindness and feeling. Which brings me to mention two wonderful people, which the 'spirit of God is working through', Mr. Owen B. Hunt of the AV Society of Philadelphia and Mr. C. Richard Calore of the National Cat Protection Society, Long Beach. Putting all their time into this work, crying out to people...be kind to all animals and to help take care of them. If we could all come to this knowledge...then...there would be peace in the valley... and Peace all across this FLAT EARTH. Do away with the Slaughter Houses, the House of Carnage. As the Prince of Peace has said...do unto others...as you would have them do unto you...then truly can come about...."and the Lion will lay down with the Lamb....and none shall be made afraid". I would recommend a TV Show to watch to get an idea of how it would be between people and the dumb beasts. GRIZZLEY ADAMS, on NBC network.

#### Sun Worship

Much ado is made by astronomers about the marvelous magnitude of the

Much ado is made by astronomers about the marvelous magnitude of the sun. In Astronomy for Everybody, we are told the sun is more than a million times larger than the earth; it is the center of our solar system, and the great guiding force of the Universe. We do not believe any such stuff! We do not worship the sun, as did Pythagoras, the originator of this great sun idea, and so we do not find it as easy to exaggerate its importance. When we admit the evidence of our senses we are forced to confess that the sun looks like a comparatively small body, and when we add the findings of our experience we become convinced the sun is not a very large body. Some January day when the weather has been really cold in Chicago, zero or below nick up a newspaper and read the story of the balmy summer. body. Some January day when the weather has been really cold in Chicago, zero or below, pick up a newspaper and read the story of the balmy summer weather enjoyed along the Gulf coast or in Florida, yet what possible difference could a mere 1,000 miles toward or from the sun make, if it is really so massive and so very far away? If the sun is 93,000,000 miles high as it is taught by astronomers, how much closer to it would you really be in Florida than in Chicago? Scarcely any, certainly not enough closer to affect the temperature. Therefore, we see the sun is not so far away, hence must be small in comparison with the earth.

Now what about the diameter of the sun? 865,000 miles according to the statements of astronomers. It is never north of the tropic of Capricorn and the distance between these two points is a little over 3,000 miles. The sun moves north or south according to its declination, at the rate of approximately seventeen miles a day, and it takes six months at that rate traveling in a circuitous route above the earth to go from one tropic to the other, and only one day of that whole time is found over the equator.

"The diameter of the sun is no less than \$50,000 miles". —A. Giberne

"The diameter of the sun is no less than 850,000 miles".

"The diameter of the sun is no less than 850,000 miles". —A. Giberne
"The true diameter of the sun is 866,000 miles."
—From the Story of the Solar System
These wise (?) astronomers, therefore—as you will see from an examination of the above figures—differ 32,000 miles as to the sun's diameter.

Let the reader study carefully the following facts—they are facts, not guesswork -

The sun never goes farther north than the tropic of Cancer. It never ne sun never goes fartner north than the tropic of Cancer. It never goes farther south than the tropic of Capricorn. It is generally agreed that the distance between the tropic of Capricorn It is generally agreed that the distance between the tropic of Cancer and tropic of Capricorn is less than 3,000 miles, and yet the sun, which these wise (?) astronomers say has has a diameter of 866,000 miles, moves between the two tropics, and never goes north of the one or south of the other. How could this be? If the sun

has any such diameter as these astronomers say that it has?

Another fact is the sun, while moving between the two tropics—a space

Another fact is the sun, while moving between the two tropics—a space less than 3,000 miles—is not large enough to light or to heat the entire area at any one time. When the sun reaches the tropic of Cancer, then we have in the United States our longest day and our shortest night—June 21; on June 21 in Australia they have their shortest day and long night and it is the winter solstice. Then on December 21, we have our shortest day and longest night, and the date is known as the winter solstice; while in Australia they have the longest day and the shortest night, and it is known as the summer solstice. When the sun is approaching the tropic of Capricorn, we then have our coldest weather, because the sun is too far away from us to heat the portion of the earth where we live, or to light it, except for a short time. short time

short time.

If this earth is the size of a navy bean and the sun is one million or more times as large as the earth, how does it happen that the little navy bean of an earth has so much night and so much cold weather? The wise (?) astronomers, of course, will answer this question by saying that the sun's great distance from the earth explains it. This is all "bunk".

As to the distance of the sun from the earth according to these wise (?) astronomers, we again call your attention to the wide variance in the figures already given in this article.

The sun could not be \$65,000 miles in diameter and stay over the torid zone constantly, as we know it to do, and not be seen over the equator at noon every day the year aroun.

noon every day the year aroun.

Here is the question. How can you keep an \$65,000 mile sun in a 3,000 mile space and have thousands of miles to spare? It cannot be done!

Now let us consider the size of the sun in reference to the amount of light it gives. If the sun were such a tremendously large thing, heat and light would be so well diffused in every direction that we would have no winter at all, and no darkness, day or night. With this sun and the millions of other

suns said to exist, some of which are thought to be a million times larger than ours, and distributed everywhere in space, it would be impossible even to cast a shadow out in the open, to say nothing of having darkness over half the earth.

over half the earth.

We know that the sun does not cover all the earth with light at once, but only a part of it. A larger part is covered at once than would be possible if the earth were globe shaped, so that is not the reason for the limited area of sunlight, but the sun being only thirty-two miles in diameter, has a limited interest. limited influence. By an application of the same tests, the same senses, the same judgment and intelligence we would give to the other problems of life, we conclude that the sun is a small body; that it was created, as recorded in Genesis, to divide the day from the night and for signs and for seasons.

#### The blowtorch in the sky or Gods of Pasadena speak:

PASADENA (AP)—Scientists at California Institute of Technology have discovered a cosmic "blowtorch" that has as much energy as 10 billion suns and spews out a cloud of gas 36 trillion miles long.

Caltech spokesman Dennis Meredith said Saturday the findings were published in the March 9 issue of Nature Magazine.

"There's an object that spew matter out in a long, tight jet, like a blowtorch." Meredith said

ch, Meredith said. He said the jet is six light years long. A light-year is the distance light

travels in a year, about 6 trillion miles.

"Astronomers are discovering more and more that galaxies are not just quiet collections of stars, but in some galaxies there are extremely violent processes going on in the center", Meredith said. "There are about a dozen of these huge jets known in other galaxies, but this is the mapped one so far"

He said the newly discovered object is in a galaxy that already has another such "blowtorch" 100,000 times larger. The larger object was discovered last year.

He said the galaxy is about 400 million light years from Earth in the constellation Ursa Minor.

The two jets together supply energy to a huge cloud of gas, which lies outside the galaxy itself, Meredith said. The cloud, in turn, gives off radiation at radio frequencies.

These retired cats seem to be much better taken care, and free and confident in the mind "happy" than any old Peoples home I've ever seen!

#### The Smithsonian Spiritualist

In the April issue of the SMITHSONIAN, Washington, D.C. a magazine published for The Smithsonian Institute, Science Headquarters for the US was an article about a Spiritualist Medium in England. A man who walked and talked with Chosts. As most all the Original Scientists of England were, he was a living Cin Tank, carries a little box from which he snuffs Coke, wasn't adverse to an Opiem Pipe of an evening. Little wonder this Willie the Weeper Creep, oh yeah, he confessed to all who would listen that his Great Great Grandfather....hatched out of some mysterious hot slime down in the swamp, after a big bang, came "creeping out". His name was Alfred Russel Wallace. Since he heard voices and saw visions and ghosts at night, he claimed he could hear the "music of the spheres"....floating in good London Cin and greased by pure organic oil of opiem, He was a man who loved to tell and write about the wirerd occult dreams of spinning whirling musical greased balls. His ancestors had no mother, so was nonhuman he was in other words an English Scientist. Was the days before the government subs dized these Scientists kind of creeps, so he always needed money. He hit on a plan to use a confederate creep and so bilk a Flat Earther one of the Creat Names and from a Great family of REAL Britians, John Hampton. Being a honest upright Human Being, Mr. Hampton had offered a 500 pound reward to anyone who could disprove earth flat, at Bedford Canal. Of course no honest human would accept its challenge, as Bedford Canal with, is 6 miles had been and has been fully established as proved flat. But Gin Tank Wallace as he was called by many, as Conmen have since time began got a confederate and made a plan to rob Mr. Hampton, to steal his 500 pounds and he did. Our Flat Earth Man, dauntless, after much trouble finally in court had it established that he, Mr. John Hampton had PROVED Bedford flat. And so Coke Box Wallace was ordered to give the money back. Like his kind, he never did pay it back. Anyway, just thought would say a few word

This experiment has been proved hundreds of times before the man who talked to ghosts, Alfred Russel Wallace, came along and proved hundreds of time after this Greep returned to the Swamp from Whence He Came.

Anyway, we have many experiments never published, have a few aces in the hole. But next issue, Sept.1, i will give one late experiment, never published or done before. It goes without saying, the flat Beford Canal Drawing is the Picture of THE WAY IT WAS.

Dear Mr. Johnson:

Saw a write up with a picture of you and your wife in yesterdays Buffalo,

New York, Evening News.

I am glad to see that there are a few people who still have some common sense! From reading the Bible, in 1919, I reached the conclusion was not around floating in space and turning around and around at a rapid pace.

Although I did wonder what made most folks so dizzy.

Even all the Christians think I am crazy when I tell them earth is flat.

I am enclosing 3 articles I have written for your consideration. I am 37

years old and have been going down hill skiing for 15 years.

L.R., Ontario, Canada

Ed-Thanks very much for the articles about your experiences and views. May print excerpts later.

Since the dawn of time, man has considered the Earth to be flat. As Since the dawn of time, man has considered the Earth to be flat. As we're all too aware, the recent activity of certain fringe groups in society has lead a large number of people to the bizarre conclusion that the world is round. It is my concern over this rather shocking state of affairs which compels me to write this letter.

As a scientist, I strive to find order in Nature's apparent disarray. As a human being, I know that mankind can progress only when it has the knowledge. My search for this knowledge has lead me into an area which

hopefully put the round Earth theory to sleep and put Modern Science

back on its feet.

You are probably aware of the current research in the field of particle physics and the rapid proliferation of new subatomic particles predicted by this research. The particles (or quarks, as they are known) have many quantum properties: spin, color, and charm among them. Through arguments of symmetry, my studies have shown unequivocally that a new and fundamental property of matter must exist: a property which I have chosen to call "Flatness". In simple terms the equations predict that all matter (space and time as well) is inherently flat, and that energy must be expended to make it otherwise.

Consider a mountain for instance-only flat land would exist if Nature hadn't provided the prodigious amount of energy necessary for its formation.

Consider also, a piece of glass—when a bending force is applied, the molecular structure becomes unstable and the glass shatters.

That these everyday examples are borne cut by theory is solid evidence that matter is most stable in its flat form. It can further be shown mathematically that anybody beyond a certain critical size (about on tenth the size of the earth) will remain in its flat state regardless of the amount of deforming force applied. In the light of this discovery, there can be no doubt that the Earth is indeed flat.

The body of evidence supporting the existence of a flat Earth is over-whelming and I submit that your Society has made a valuable contribution to the enlightenment of mankind. Please consider this letter an application

for admittance into your honorable Society.

Mr. K. McGill University Montreal, Canada Dear Mr. Johnson:

Enclosed please find my application for membership in the International Flat Earth Research Society. Also there is enclosed the application of Mr. Bob dates of El Paso, Texas, a very close personal friend and my source of inspiration for my most intellectual thoughts.

of inspiration for my most intellectual thoughts.

I sincerely wish to join those far sighted folks who, at long last, are standing up to the masses of "academic types" who learned everything they know from reading books rather than developing their own original ideas as all of mankind's greatest thinkers have done.

As you know, once some idea, regardless of whether its true or not, is written in a school text book. It is then passed off from generation to gengeneration as a proven fact. Such is the case with the basketball theory of world form. The whole gag has been sustained by the academitian's general philosophy of "we don't change nothing."

No one could possibly suspect that the world was round if they had ever been to Lubbock, Texas. Near Lubbock it is immediately obvious to anyone, except the near-sighted, that the surface of the earth is a plane stretching hundreds of miles in all directions. To verify this, I suggest taking a second observation near Omaha, Nebraska.

I look forward to an active and fulfilling association with The International Flat Earth Research Society.

Flat Earth Research Society.

Additionally, please find enclosed a photograph appearing recently in the Houston Post. The picture is readily identifiable as the surface of the moon as seen from one of the lunar orbiter spacecraft. But alas, the observer is duped. The photo is not of the lunar landscape, but of the head of a common ball point pen!

I view this as yet another example of proof that the Federal government has totally fabricated the entire space program as an elaborate cover-up of billions of dollars which were squandered and which the Feds cannot account for. (Probably for limousines and private potties in their orfices!) It is also curious that most of the staff at NASA was sort of "let go" after the last trip to hit golf balls on the moon. Come to think of it, the moon in those telecasts looks remarkably like a sand trap I was in for seven strokes in a tournament at Los Creek Country Club in Austin, Texas last year.

Anyway, I hope you find this news clipping of interest. D.C., Houston

Dear Mr. & Mrs. Charles Johnson:

I am writing to obtain an application form for your research society, which I would like to join. I do have a number of interesting postulates which go along with your position.

Thanking you in advance for the application form.

D. M.D. Providence, R. Island

Dear Sirs:

I have recently learned about your society, and am most impressed about your beliefs. Having felt helpless in the face of the so-called "scientists" of today, with their lies and trickery. I had begun to resign myists" of today, with their lies and trickery, I had begun to resign my-to the idea that myself and my race would forever wallow in the falseself to the idea that myself and my race would forever wallow in the false-hoods forever being spewed out by these omnipotent and supposedly all-knowing demigods. For how could all the people who ever lived ever hope to understand the smallest portion of the true nature of the world? And yet, these dictators boast that they know everything about everything, even the universe, which is plain to see: but rather is no more than a tiny round dust speck floating in an infinite immensity, an idea which makes no sense at all. I had been sobered by the thought that out of all humanity. I might be the only one who truly understood the consequences of having given credence to those post-Aristolean "scientists" who have so plagued the world ever since their first dark days in the sun. ever since their first dark days in the sun.

What a joy it was, then, to find a working organization who's member's ideas agreed with my own! Certainly a lone individual such as myself has ideas agreed with my own! Certainly a lone individual such as myself has little power in destroying modern astronomy and replacing it with truth, but to a large enough, dedicated group, nothing is impossible. The task before us is enormous, and it may take hundreds or even thousands of years, but if no true believers take initiative, the job would never be done and that would be the greatest of tragedies. Unbeknown to its practicioners, modern day "science" is a dying dinosaur, and I am eager to help deliver the proper flatness of the world we inhabit. For all those reasons listed above, I wish to join the flat Farth Research Socient.

to join the Flat Earth Research Society.

# WATERISFLAT EARTH SFLAT

#### Water is Level

I mentioned in the last issue that we would include a new experiment or but have decided to further pursue the Bedford affair instead. First, because I don't want us to lose track of, nor hold back credit to, some of our Original Zetetic Flat Earth Experiments, and second, because the Father Church of Christian Science, known also as Smith-sonian Institute in Washington, D.C., chose to print, in the April 78 issue, a twisted, distorted tale about the Bed-

ford Experiment.
Dr. Samuel B. Rowebothan, M.D., may his tribe increase and his name live forever, did so mych of the work of the UNIVERSAL ZETETIC SOCIETY OF AMERICA AND GREAT BRITIAN OF AMERICA AND GREAT BRITIAN before we changed, and added the name INTERNATIONAL FLAT EARTH RESEARCH SOCIETY. This is our shortest experiment, but it is "classic" in its perfection...and all by ITSELF...FOREVER ended the Crazed Drivel, the Greasy Spoon Scientific Superstition, claiming "earth a ball"!

The term ZETETIC as defined and used by us for lo these many years is: "Zetetic': derived from the Greek verb ZETO. which means to Search, to trace

ZETO, which means to Search, to trace out. to examine, to "prove things". This term we use in contradistinction

to the work "theoretic"...which means IMAGINARY, GUESSING, HOPING, SUPPOSING, but NOT proving.

We've used this type of experiment in FLAT EARTH NEWS in past years, but not since we started using the present format. Let me say before we go any further, the present generation has had their brains so addled by drugs and he externation scientific Payloy progo any further, the present generation has had their brains so addled by drugs and by systematic scientific Pavlov programming, not only the "ability", but the very "will" or "desire" to know the truth of things is gone. In its place is a sick, depraved, warped little beast brain ...who knows nothing and cares even less...one thing he "desires" is to "be just like all the other beasts", and hates for any body to cast any doubt on any of his mad, crazed delusions...the spaced out...dream world of "more drugs, more sex, more money" and he thinks as his Priests of Science tell him, in just a few days...he will be able to put on a plastic body and live forever and "go to Heaven in a Rocket Ship". So this kind cannot and WILL NOT... Understand that this experiment...ENDS that spaced out delusion and ENDS forever and entirely the VERY FOUNDATION of that Two-Bit Carmie Razzle Dazzle Jibberish called Bit Carnie Razzle Dazzle Jibberish called Science. Dr. Samuel B. Rowebothan's Bedford Proof, Earth Flat.

Mr. and Mrs. Charles K. Johnson

#### **Water Level**

If the sea-earth be a Globe, or the oblate spheroid of scientific belief, the curvature of its surface would be seen from suitable elevations, in long distance, with the naked eye; and it could not fail to be detected in short distances by the aid of a telescope. As, therefore, the surface of water is experimentally found to be level, and as it would be impossible to have level water on or around a sphere, it follows that the whole fabric of the Globular theory is shewn to be false. Water everywhere level destroys all assumptions respecting ROTUNDITY, AXIAL, or ORBITAL motions, and even the assumption of GRAVITATION itself.

"In the county of Cambridge, there is an artificial river or canal called the "Old Bedford". It is upwards of twenty miles in length, andpasses ina straight line through that part of the Fens called the "Bedford Level." The water is nearly stationary, often completely so, and throughout its entire length it has no interruption from locks or water-gates of any kind; so that it is, in every respect, well adapted for ascertaining whether any, amount of, convexity really exists.

#### Experiment 1.

"A boat, with a flag-staff, the top of the flag being five feet above the surface of the water, was directed to sail from a place called Welche's Dam (a well-known ferry passage), to another called Welney Bridge. These two points are six statute miles apart. Dr. Rowebothan, with a good telescope, went into the water; and with the eye about eight inches above the surface, observed the receding boat during the whole period required to sail to Welney Bridge. The flag and the whole of the boat were distinctly visible throughout the entire distance. There could be no mistake as to the distance passed over, as the man in charge of the boat had intructions to lift one of his oars to the top of the arch the moment he reached the bridge. The experiment commenced about three o'clock in the afternoon of a summer's day, and the sun was shining brightly and nearly behind or against the boat during the whole of its passage. Every necessary condition had been fulfilled, and the result was to the last degree definite and satisfactory. The conclusion was unabolidable that the surface of the water for a length of six miles did not to any appreciable extent decline or curvate downwards from the line of sight. But if the earth is a globe, the surface of the six miles elength of water would have been six feet higher in the centre than at the two extremities, as shown in diagram (Fig. 1); but as the telescope was only eight inches above the water, the highest point of the surface would have been at one mile from the place of observation; and below this point the surface of the water at the end of the remaining five miles would have been sixteen feet." sixteen feet.

Let A. B. represent the arc of water six miles long, and A.C. the line of sight. The point of contact with the arc would be a D, a distance of one mile from the observer at A. From D. to the bridge at B. would be five miles, and the curvative from D. to B. would be sixteen feet eight inches. The top of the flag was five feet high, and it would have been eleven feet eight inches below the horizon at D., and altogether out of sight. Such a condition was not observed; but the following diagram (Fig. 2) exhibits the true state of the case—A.B. the line of sight equi-distant from and parallel with the surface of the water throughout the whole distance of six miles. with the surface of the water throughout the whole distance of six miles. "From which it is concluded that the surface of standing water is NOT CONVEX, but absolutely HORIZONTAL".

Cont. on page 2

Fra. 2.

#### Experiment 2.

"Along the edge of the water, in the same canal, six flages were placed, one statute mile from each other, and so arranged that the top of each flag was five feet above the surface of the water. Close to the last flag of the series a longer staff was fixed, bearing a flag three feet square, the top of which was eight feet above the surface of the water and the bottom in a line with the tops of the other intervening flags, as shown in the following dia-

with the tops of the other intervening flags, as shown in the following chagram. (Fig. 3)

"On looking wit a good telescope over and along the flags from A to B, the line of sight fell on the lower part of the larger flage at B. The altitude of the bottom of B above the water at D was five feet, and the altitude of the telescope at A abover the water at C was five feet; and each intervening flag had the same altitude. Hence the surface of the water C, D, was equi-distant from the line of sight A, B; and as A, B, was a right line, C, D, being parallel, was also a right line; or, in other words, the surface of the water, C, D, for six miles was absolutely horizontal.

If the earth is a globe, the series of flags in the last experiment would have had the form, and shewn results as represented in the diagram" (Fig. 4).

if the earth is a globe, the series of flags in the last experiment would have had the form, and shewn results as represented in the diagram. (Fig. 4).

"The water curvating from C to D, each flag would have been a given amount below the line, A, B. The first and second flags would have determined the direction of the line of sight from A to B, and the third flag would have been eight inches below the second; the fourth flag, thirty-two inches; the fifth, six feet; and the seventh, sixteen feet eight inches; but the top of the last and largest flag, being three feet highter than the smaller ones, would have been thirteen feet eight inches below the line of sight at the point.

B. The rotundity of the earth would necessitate the above contritions; but as would have been thirteen teet eight inches below the line of sight at the point B. The rotundity of the earth would necessitate the above contitions; but as they cannot be found to exist, the doctrine must be pronounced as only simply a theory, having no foundation in fact, but a pure invention of misdirected genius; splendid in its comprehensiveness and bearing upon natural phenomena; nevertheless, mathematical and logical necessities compel its denunciation as an absolute falsehood." The total amount of curvature for six miles would be twenty-four feet!

The experiments quoted abover are only two out of a series of experiments conducted by Samuel B. Rowebothan, M.D. This consistent investigator lived for nine successive months on the banks of the canal referred to; and all his observations, he states, led him to the same unvarying conclusion, namely, that THE SURFACE OF STILL WATER IS ABSOLUTELY

#### **Enough Already**

The December issue of FLAT EARTH NEWS will include a late experine December Issue of FLAI EARTH NEWS will include a late experiment conducted by Marjory and I. But you know and I know, once you think about it, really there is no need to endlessly conduct "experiments", once is enough, water is the same everywhere! Before I was 12 years old I had sighted and termined that both Lake Nasworthy in San Angleo Texas, and the Concho River were flat. This is in 1936. Later, in '43, at Lake Worth at Ft. Worth Daller. Ft. Worth-Dallas.

Ft. Worth-Dallas.

Anyway, Each of you KNOW right now neither Marjory, nor I, nor Dr. Rowebothan would waste our or your time telling you we'd proven earth flat by proving water flat, if it were not so! In the First Place, we, and ALL Zetetic Flat Earthers before us, have had one thing in common — we HATE all liars, pretenders, all humbug. We desire to "hear the truth" and to "tell the truth". What a pity, what a commentary of the "world", that when someone just using plain common sense, also called "sanity", disproves the Liars and Humbugs and tells the truth...then the "Party" and all "party liners", also the Religion of the Land...goes berserk and filled with anger and hatred at ANYONE who Dares...to tell the simple Truth, Earth is Flat.

# **NEWS BULLETINS:**

#### Flat Earth Map

The FLAT EARTH MAP is now available on parchment type paper. It is about 11X16, part map, and part words. It is sent in a cardboard tube, for \$2, or whatever contribution you may want to give. In the December issue we will announce a new, color Membership certificate suitable for framing, and new dated membership cards to all who send in their '79 Dues in December. Now we have over 1600 "Members", but don't think they are keeping up with their dues; they are not. We don't have any system of keepat members, proding them, etc., etc., so there is just a Hard Core of Stalwarts who make it possible for the FLAT EARTH NEWS to go forth. Dues are used to answer the thousands of letters that come in, also, so you who keep payed up are also "Missionaries", and it is YOU that make possible the Enlightment of the Country and World! Thomas Jefferson said this country is to be ruled or guided by the "Majority"...this he said, can be One Man with a strong mind, will and opinion, or just a "few". Our Independence from the Babylon Church-State Buggy Ball England...came about from "Just a Few Stalwarts"! THANKS to the 3 members who in 1978 sent in contributions over and above Dues!

#### Rome and Moscow?

Word has come to us from where the Double Cross Flag flies — Newton's Spinning Ball England says that Moscow and Rome are about to Unite! I wonder if it will be a 3 way marriage? Old Babylonia, the Middle East...AMember of the Wedding? In Orwell's 34, after the "War" something like this came to pass, then the "West" or "Free" world began at the Channel. The three Balls, or three Spheres system was fully established on a Globe. That's the Plan, anyway.

#### George Washington and the Final Solution

Ceorge Washington, the Father of our country, (a believer in God who took his oath on the open Bible) had a "Dream" or a "Prophecy" in which he "saw" or predicted the Destiny or future of this REPUBLIC! He predicted the war between the States, the World Wars — as the enemies without and within seek to bring down this Createst, most Clorious, the most Noble attempt in all recorded history, to bring forth the Desire of the Ages, the Ideal of the Bible to be THAT NATION...]esus-Joshua spoke of that which brings forth the Fruit, the Blossoming of a World that Seeks the Truth, Justice, Mercy, and Right. Anyway, he predicted...at last from a conspiracy of all our combined Enemies, within and without, from the Prince of Evil himself...a Last Creat War...it seems it could be with Russia and perhaps Europe..? in which ALL the odds are against us, in which time our people are weakened and corrupted, our strength sapped...just as today! As I recall this Prophecy, USA...invaded! (this too has already happened) (a 12 million standing army of enemy? aliens has entered from our Southern border...alone) Hundreds of thousands killed in this conflict...seems all is Lost for this Noble Experiment. United States...then the People, repent...and come to understand...God and GOOD...has been our strength in past, so our People return to this...and there is Intervention from God Himself...to Save us:

And we win...for GOD WAS ON OUR SIDE! Them...George Washington said:...I saw the USA as the focus and center of a New Age, a Peaceful World...all the Nations of Earth declared to be on ONE STRETCHED-OUT PLANE...ONE FLAT WORLD!!!!! The United States...with God administrating a Common-Sense World Order...a world that seeks and Finds the Truth our guideline...the 10 commandments, and other common sense, down to earth Laws, Statutes, Ordinances, and Judgments (we come to the FULL understanding of what the Frenchman from France said, who came here years ago to find out just WHY the USA has surpassed the whole world and ALL RECORDED HISTORY in Greatness, in just a few years. After a long and deep analysis, this Wise Frenchman said: "AMERICA IS GREAT BE-CAUSE IT IS GOOD"!...and "WHEN AND IF IT EVER STOPS BEING GOOD...IT WILL CEASE TO BE GREAT")

George Washington, the Father of this Country, said, in the End he said, in effect: The UNITED STATES will be the HEAD OF THE INTERNATIONAL FLAT EARTH RESEARCH SOCIETY, The New Order of the Ages, this he said is: THE FINAL SOLUTION!

#### The Light that is Darkness...

"Merv Criffin...He Maketh the Stars to Shine!" Giant billboards proclaim this Show Biz Scientific fact here in Southern Cal. Merv conducts an "interview show" with entertainers, such as: Zsa Zsa Gabor, Billy Graham, Jane Fonda, Hot Rock Singers, etc., etc., Bob Hope and other Stand-up Comedians...Both inside and outside carmies, in other words. A while back he had the HO HO Modeling Agency on, the Madame trotted out her too "money making" HO's, both male and female. They said they'd go anywhere and do anything. Many of his shows are done from gambling Casinos in Las Vegas. The show is seen nationwide. He has L. Gordon Cooper on regularly. Remember he was a "Star" in the Disney Production, Apollo something, think it was, a Sci-Fi Flick about golf games on the moon, real hick, carnie stuff, but still he was a "Star", and Merv made him to shine. Well, the other night Merv had Astronaut Cooper (he now runs a moon shot ride at a Carnival in Orange County, Disneyland) and Idiot G. K.O'Neill, the Princeton University Representative who is asking Government for "all the money they got", so he and LSD Tim O'Leary, Harvard University's Official Representative, can build in orbit a City in the Sky, to be shaped like a Giant Pork Barrel with wheels at each end to spin it, so it will have earth gravity. Also in the same show, a No. 1 Caliber Scientist Researcher Durk Pearson, said they could use chewing gum wrappers to help build it (alumium foil) and help the ecology and save money, and Mr. George Jeffs, head of West Coast Rockwell International, a Carnie Company who builds glunk and slurp for carnival operations, such as "spaced out shuttles". Idiot O'Neill is really smart, like all Princeton men, he said they were all so lucky Columbus proved earth a ball as the Catholic Court hated him for proving earth Flat. Merv really picked up on that! Merv is really scared about the FLAT EARTH SOCIETY, so has these carnies on very often. He hopes with his "Judo-Christian Science Religion" he can "make the real world go away." Can y

FLY TWA ALL THE WAY! This is no doubt the finest Airline in the world. High Class, top drawer People. You can always be sure their Top Navivators keep the Planes flying on a Plane Level. TWA people all know that an Air-PLANE must fly on a Plane, and since the world is a Plane it all comes out even. TWA flies all its Planes over this FLAT PLANE EARTH, and don't allow their Navigators to contaminate their minds... with absurd "globe theories". So Fly the Flat Earth Airline, TWA all the way.

#### Capricorn I

CAPRICORN 1, a movie, one of the results of our FLAT EARTH WORK. Fact is the Space Hoax is NOT American! This first alledged "proof earth a ball" in all recorded history, began in Nazi-Russia! They, the Nazis, there began it with "Spooknick" done in league with the Nazi-Commie phoneys in England, called Jodrel Bank. The English subversives claimed to "track and confirm the Nazi-Russians were "really proving versives claimed to track and confirm the Nazi-Russians were "really proving earth a ball"...oh yeah...that's the main "point" of the hoax, to Stop the FLAT EARTH SOCIETY! IF the Phoney Nazi or Russia-England had not pulled this Hoax, could well be USA would have Hoax, could well be USA would have already declared world-wide the New Age, Earth Flat. In 1945, or '16, MANY College Professors here in USA were alerted to fact...THAT or NEXT year the "globes may have to be thrown away! In 45 or so United Nations adopted the FLAT EARTH MAP as "Its" symbol! From Spooknick, Mr. Samuel Shenton (former head of I.F.E.R.S.) in England came forth and declared it was a Fake, from that time tonow ZETETIC a Fake, from that time to now ZETETIC has come to mean just this WAR to the END...EARTH IS FLAT and we have used nothing but that name since, FLAT EARTH SOCIETY. CAPRICORN 17 shows up the so-called "Moon Landing" as utterly FAKED" and much of it not very far from where we LIVE! Also shows up CRAZY VON BRAUM as the human Devil the Nazi Beast he more titled by the social shows up CRAZY VON BRAUM. as the human Devil the Nazi Beast he was. Like all Phoney Scientists, pretend to be so "honest and seeking to help mankind", next second out of other side of mouth...ordering the Death of all and any who oppose or EXPOSE him! The niovie was made very near where we live, here in the Antelope Valley, edge of the Mojave Desert. Many, many "science, movies made here like 10or the Mojave Desert. Many, many, many "science" movies made here, like LO-GAN'S RUN, etc., etc. This Movie is like the Bible, the Truth is there, YOU must use your head...to understand... this movie CAPRICORN 1 tells you as this movie CAPRICORN 1 tells you as our Society has told you from the start, the Nazi-Commie Space Program is a FAKE! As Daniel says: The Wise Will Understand. Warner Brs. Release, Sir Lew Grade Presentation, Director Peter Hyams, Producer Paul N. Lazarus 3d. Last scenes of the picture show, that part of the Covernment subverted by the Monstrous Scientists' Hoax...trying to Murder the man on his way to Expose the Fake Landing on moon and the Space Program and Von Braum... AND THAT DONE RICHT NEAR HERE ON THIS LONELY MOJAVE DESERT...I Could say lots about... this...but won't (killer squads not now in operation, don't think). American Free Press and Speech have Prevailed. In Russia Against the Law to tell earth FLAT! Very Last Scene shows the TWO WITNESSES...just about to...Reach the PRESS and PEOPLE and expose the FAKE SPACE PROGRAM. Funny, Marjory and I are Two Witnesses, and we Have and Do expose...Earth Flat...SO entire Russian-Nazi Space program a FAKE. What God is doing, let no man Try to stop.

#### Tobacco: God's Gift to Man

As I've said so many times, the "Ball" world is a religious dogma, not related in any way at all to the Facts. For 13 or 14 hundred years the Christian Greek Dogma was a "Still Ball". Then the Monk Copernicus and his Then the Monk Copernicus and his successors set the whole shebang to spinning, whirling, and gyrating, and Newton, Preacher-theologian dopeditall with glue, but same BALL still a RE-LIGIOUS dogma. Ditto with the "Hate Tobacco" campaign. King James of England started the whole thing. He authorized the "BIBLE" and "HE" set the dogma "no smoking tobacco", or using it in any way. His "Cannon" or "Law Dogma" was called "counter blast to tobacco". So the Protestant religion, from the mighty oen of Himself. James from the mighty pen of Himself, James the First of England, James the 4th of scotland comes the PRESENT DAY CAMPAIGN against "smoking tobacco"! CAMPAIGN against "smoking tobacco"! James Gang was and is also called Jacobites. Young people may think the present campaign is some "new discovery of glorious modern science"...bunk! When I was a child in 20's and 30's, people handed out "tracts" on the corner "blasting tobacco" as the very work of the devil himself, then as today no LIE too great, no dire evil too mon strous to blame on Tobacco! Untold hundreds of thousands of MILLIONS of Sermons words written from the Proservice. nundreds of thousands of MILLIONS of Sermons words written from the Pro-testant Church against the Very Devil Himself, Tobaccol In fact, for hundreds of years among the strict "holyness churches" no smoking is the Nol the churches" no smoking is the Nol the main RELIGION! I attended the Nazarene Church as a youth, in later years, thinking back could find all they had taught me was "tobacco is a sin"! Most Protestant churches from time of HIMSELF, James the Great, to this VERY HOUR, have taught...just fine to use morphene, heroin, cocaine, mari-juana, snake root, and you name it... but no, NO Never "tobacco"! Tiday the Government-Church is still at the same old game...use any mind-body destroying bloodcell-eating drug such as bar-bituates, which utterly DESTROYS the VERY CELLS of your brain and body, makes you MINDLESS and moronic... oh yeah, and any opium-based drug and etc., etc., (as long as obtained legally) but a day and night campaign against... TOBACCO! WHY? Because the great Blessing from God Himself, tobacco, was

"Prophesied" by a native Briton Madame Shippley (not related to the hated Pommie English) to come to British people and to mankind...a "food for man's SOUL". And so it Camel Discovered here in AMERICA! When our people began to use it...our strength was doubled, we took heart, and...in short time...raised up and drove out these hated Oppressors and so began the REVOLUTION that still goes on...against the oppressors, the strong desire for freedom to Think, to Talk, to Move about. Well pity I just can't get anything said in a few words, and we have such little space to get into these things, but anyway, TOBACCO was found to be a "panacea" all men's HEALTH improved at once, most of our old ills disappeared, found to cure and prevent many infections and above all to be the LACKING and NEEDED thing in our diet! It perked us up, made us able to bear up to life in this miserable vale of sorrows. After all the "human condition" is so tragic, so pitiful, so filled with sorrow, heartache, and tears...so vain and void of any meaning. Tobacco was found to bring a measure of Peace, a person could "stand anything"...if one could look forward to a pipe of tobacco every now and then, or a cigerette, or a chew, or a dip. I'll tell you this without tobacco...the West would never have been won! Tobacco with Coffee and the Flat Earth are AMERICA'S great contributions to Cod's Kingdom and with plenty of SUGAR, nothing can stop us!

Jesus Christ, the story of His life and death in this world, and His words at John 3: 13, where He assured us of "ultimate Survival"...we, our spirit "came down from Heaven Above and at death RETURNS TO Heaven and to God

Jesus Christ, the story of His life and death in this world. and His words at John 3: 13, where He assured us of "ultimate Survival"...we, our spirit "came down from Heaven Above and at death RETURNS To Heaven and to God from Whom we came...and His assurance that God the Creator was merciful and forgiving as a human father, telling us to do unto others as we would have them do unto us, etc...this Assurance... this taking away of the most awful and dreaded FEAR, Death...as He said... from henceforth...oh Death where is thy sting? It was gone! So this is the Greatest Thing in Life! Next is a person's Mate and/or family, next in this trinity is TOBACCO! and with Coffee...life is

is TOBACCO! and with Coffee...life is not altogether near as bad as would be. REAL tobacco is good for you! In Russia, in that section where the Caucasians live up to over 130 years old... THEY RAISE AND USE TOBACCO! The Surgeon General lies not when he puts on cig packs: Warning, may be harmful if smoked. WHY? because there is little if ANY "tobacco" in today's cigs! Oh yeah, imitation, and HARMFUL! I too, say don't smoke cigarettes. But it's up to you to find some real tobacco, if you have to send to Kentucky or whatever. Check your cig package! Nowhere does it even say there is ANY TOBACCO in that pack of cigs. Some pipe cans of tobacco still have at least SOME tobacco in them. I say, don't smoke cigs — it may be harmful! But if you can get real tobacco, even raise it will be good for most, not all. That is, if you are of legal age to use it. (DON'T smoke anything around ANY poisonous fumes, like around factories, this is deadly.)

#### Look Down That Lonesome Road... Before You Travel On...

In this world of Perplexity and Confusion it does seem a very hard place to live our lives. Especially if we don't get it set in the heart to do the right and good way from the beginning. As we are told by our Great Creator, Choose Life, as the wages or result of sin is to be dead while you yet live. Sin is explained as the "transgression of the Law". There are always silly wicked devises put forth in this world but if we would only ignore them and not take any part in them...they would have to go away. I think we must do a little Thinking for ourselves, to see what is right and wrong, with one thing in mind that our Duty is to live by the Ten Laws, in doing that we

can't be entrapped by the wicked devises. Then the Freedom comes that all want. Free from Sin or Error Free from the ways of destruction. Heart-Breaking to hear the report of all the people both young and old...such Slaves to sin and misery. If only the teachers of the people could or would tell them their first Duty is to Live by the 10 Laws or Commandments... the blind and miserable people might find the right Way of Life. How are they to know unless they are taught? This is why in this present world YOU must Seek to Know the Truth iro Yourself, for most teachers have become Void of understanding. And when you Find it, share it with another...

Dear Mr. & Mrs. Johnson,

Dear Mr. & Mrs. Johnson,

I saw your article in "Grit" so just add another flat earth believer to your list. I think a fly on the ceiling has sense enough to know it is upside down and if the nuts that try to make us believe the earth is round would look at it through a square telescope, instead of a round lens, they would see differently the Bible "and that is what I go by" teacher, the earth is not round, it tells us in Revelation that angels stood on the four corners of the earth holding the 4 winds. It also says God set the greater light which is the sun to rule the day and the lesser lights to rule the night, which are the moon and stars, and no one, but no one can make me believe anyone can set their foot or any thing else on a light. This space stuff—the junk is the most crazy expensive thing man ever invented. I think they landed on some uninhabited place across the waters and try to say it was the moon. Neither do I believe they go up as high as they say they do, nor do I believe the un-manned junk is flying around up there by itself. I think it would fall to earth. But these big shots that never read the Bible can make some people believe any thing. some people believe any thing.

Sincerely, Mrs. W.F., Missouri

Dear Johnson Friends:

Your very nice letter and pamphlets rec'd in today's mail. Thanks very much for all of it. Hope this letter finds you both well and happy.

I am sending my membership Application (completed) along with my \$7.00 check for "dues" coverage.
Yes, Charles, I believe you are correct as regards the gigantic hoax called

The Space Program.

The true empty void is that which is located between the ears of every U.S. Income Tax-Paying laboring person...that is, Empty Space if ever any

existed.

To support this contention we need examine some basic facts which the "Scientists" (?) seem to wish to ignore and disregard.

Let us first consider a few failacies:

Ever since King Alfred sat in front of a large fire in a brick-stone fireplace while his chestnuts burned to a crisp (daydreaming, I guess), the socalled "Scientists", known as Astronomers, have persisted in trying to palmoff a pet theory on The General Public:

To Wit: "The 'Sun' is burning!"

Absurd. Absolutely Ridiculous, says I!

Nothing can "burn" ("oxidize") in the complete absence of the element
"Oxygen."

("radiation") the optical illusion occurs: the "Sun appears to be down something.

There is no photograph of the 'Sun' in esistence which was taken above the earth's atmosphere in a telescope — no scope was ever there and no light exists there by which a picture can be a reality. "Oxygen" & "Hydrogen" do not exist anywhere beyond the atmosphere of Earth.

You say the air temperature is above 100 degrees F. there?

it does no such thing. It may exapnd about 1/2 inch in length, but that's all. It is an optical illusion — the human eye is deceived.

The Deceivers (the 1945 Space Age Promotors) of Human Good Judgment and Common Sense were all brought here from Germany. As Enemy Aliens they were allowed to contract with the U.S. Covernment in a Time of War — the Huntsville, Alabama, Conglomerate got ist "beginning" — its hands inside the Purse strings of the U.S. Treasury using the Stock Market as the instrument to effect the Theft, You think not so? Why is the U.S. Federal Debt more than 10 times 1940's?

Ever since The Republican-controled Congress 1946-1950, The Pentagon has controlled the U.S. Common Public just as the Krupp, sponsored Adolph Hitler Nazi Party ruled over the German People — The Pentagon and its Civilian Industrial Republican Complex (Rockefeller controlled) has led The U.S. Public to Government Fiscal Bankruptcy —

While, at the same time, 1946-1978, Germany has all rebuilt — "new" industry, "strong" banks & money, repopulated itself and is Europe's No. I Power. "Young" Arndt Krupp can write a Billion Dollar Check any day OF THE WEEK — thanks to the stupidity of the American Public.

In Two "World Wars", the Germans lost The Battles...but, they won the Wars.

Wars.
What "profit" has ever come to the average American Public? Nothing.
Why not? Because of that "Empty Space".

RESTORING THE WORLD TO SANITY

Charles K. Johnson, President

Marjory Waugh Johnson, Secretary

DECEMBER 1978

# SUNISALIGHT .... 1:16 32 MILES ACROSS

Dr. Robertson, one of our British Members, made the discovery and conducted this experiment to prove from a Practical Common Sense Demonstrated and Demonstratable experiment the Sun is 32 miles across. See the difference in our methods to the absurd childish games of Theoretical physics the crude burlesque Comedy sattre on sanity called Eienstein or Fairy Tale Fable physics. In Fable Physics, also called 'science', you discard 'mere facts' and just say anything... 'truth' is whatever you want it to be; 2 plus 2 can be 7 or nothing, so they can say the sun is one million times larger than earth or say 10 billion times, makes no difference, as NOT A WORD of modern astronomy is true!

It is DEMONSTRATED by the sun's rays it is 32 miles across. Also, the NAUTICAL ALMANAC bears out the FACT the sun is very small compared to earth but very Large compared with the tiny Planets.

In books on astronomy we are gravely told that the sun is more than a million times larger than the sea-earth globe. The writers who make these extravagant assertions do not attempt to give us any good practical evidence in proof thereof. Their authoritative assertions are supposed to be sufficient, in spite of good authorities against them, and the oppositions of "science" against "science."

Let an observer stand by night directly under a lamppost: the light above him will cast no side shadow. If he moves northwards his shadow will fall towards the north; and if he goes south his shadow will fall southwards. If the light were extended by a number of feet above his head, say for ten feet, then on the observer moving that distance underneath he would still see no shadow. That is,

the vertical rays of light would cast no shadow for a distance equal to its own extent. Now apply this reasoning to the shadows of vertical objects cast by the sun's rays.

In northern latitudes the shadows fall towards the north; and in southern, towards the south. The declination of the sun varies from the tropic of Cancer, 23½ degrees N., to an equal declination south of the equator, the tropic of Capricorn. Between these extremes the sun is always, at noon, directly overhead in places with altitudes equal to his declination, the variation in which is the cause of the varying seasons. In these places on land, or at sea, the sun casts no side shadow at noon; and it has been found that this phenomenon extends for 32 miles. So that the column of the sun's vertical rays is 32 miles across in every direction — a distance equal to the length of the solar dia-

meter! And whether we take the surface of the sea as curved or horizontal, there would make little difference to the diameter, as may be seen on referring to Fig. 20.

Diagrams and arguments demonstrate that the diameter of the sun is a small body as compared with the size of the earth; yet as compared with the planets it is a giant, and, as the Psalmist says, "a giant rejoicing to run his race!" (Psa. XIX., 5).

The Nautical Almanac bears out the truth of the sun's comparatively small size: it gives the sun's semi-diameter as 16 minutes of a degree. One degree of latitude is equal to 60 miles: and as there are 60 "minutes must be equal to 32 miles, the sun's diameter by no less an authority than that of the navigator's chief almanac!

# Time of the Harvest

We all know what is taking place in the world today. Our Political-Religious leaders fighting and trying to pass Bills for things that are against all righteousness and an abomination before God. Men and Women being made sterile. .the women saying it may interfere with their career. .they haven t got time for children. What's in it for me, selfish all the way. If women and men after deciding the world too evil to bring in another helpless pawn to be made victims by the Public school teachers to being drugged and programmed into idiocy, if on this basis she said I REFUSE to produce Victims, them perhaps would be justified, perhaps fulfilled what Jesus said about the Last Days ... people will say. ... blessed be the paps that never gave suck, because of the horror of the days.

Women and men should stand

Women and men should stand up for the Politicians and Preachers who do work for good and righteous things. Freedom is just a silly WORD...has no real meaning, especially for good. When you take it to mean...to be selfish and opinionated, contest all good ways, to think only of yourself, to let yourself stop being a HUMAN and be an animal in sex and pleasure of life...freedom to lie, cheat, be untrue. Freedom to go be a Slave on a Job...to OTHER

men...than your Lord and Master, your HUSBAND...see? This Freedom is just madness...self destructing. Women were not MADE to be free from their husbands, nor husbands made to be free of their other HALF, their Wife. GOD gave us this NATURE, otherwise is perversion of God's Nature, and won't work to produce Peace or any happyness at all. God's Word says in these Last Days...the wicked will do wickedly and the righteous remain righteous. The Ten Laws kept in the Spirit and Intent as Jesus Christ taught is the channel of righteousness, the roadbed through which Love can be expressed to all. Jesus says...if you want to enter into LIFE...keep the Commandments. Freedom to serve selfish lusts or desires is Bondage to sorrow, suffering, and heartbreak...corruption and the life of an animal. Bondage to the Ten Laws is FREEDOM...to Live, stand upright, be the Human Being God Created you to be. Bondage to your Husband makes you free to be a Queen, loved and honored. Bondage to your Wife makes you free to be a KING, loved and honored. God says...come, let us Reason together...why would you die, keep the Law and Live.

This snapshot was taken just a few miles from the Sea of Mecca, we are standing over 200 feet below Sea LEVEL. Next issue, Ides of March or March 1, 1979...we will show and explain how we prove the SEA OF MECCA is flat and level as is ALL the Seas of the World!

# Mississippi Proof

Astronomers assume the earth is a globe, and they also assume it is flattened at the poles, somewhat like an orange. This Polar depression they further assume, is accompanied by a

corresponding bulge at the equator of thirteen miles all round. Such is their theory: let us see what is the fact. The Missippi River, N.A., flows from North to South, a distance of about 3,000 miles towards the Equator. According to the accepted theory it must therefore be continually ascending this bulge as it nears the equatorial line; until, by the time it reaches the Gulf of Mexico it will have climbed a hill something like eight miles high! It is contrary to the nature of water to run up hill, but we know that it will always seek a falling route down to its level in the sea. All the rivers of earth flow down to the Sea, which is LEVEL.

# When the Light went out in England

In December of 1974, the Last of the True Nobility of England, the most Gallant Lady in all the British Commonwealth...passed out of the vale of sorrow...and went on to her Great Reward In HEAVEN ABOVE, I'm speaking of Mrs. Lillian J. Shenton, From the time of the passing of Wilber Clen Voliva, Head of the Flat Earth Society, then located at ZION III, USA, in 1942, Mr. Samuel Shenton, F.R.A.S., F.R.C.S., of Dover, England, along with some other stalwarts kept the Light aflame on earth. From the time of the first claim of the Demented Degenerate Pathological Liars of Russia that they had "orbited earth" and thereby proved at last after 2500 years, proved earth a ball and the Bible and Facts done away with. Mr. Samuel Shenton threw down the gauntlet...to the Entire World of Deceit the assembled forces of Money Power...Declared he would fight them to the end of his life. He DID, wore out his body... facing the howling mobs of Atheist Communist Monsters of England, oh yeah the Nazi Communist took over England in 1945! NEVER was one good word written about him in the Pansy Press of England. It is a police state, laws on the books against anyone saying anything that might "disturb the beasts"...the people! Mr. Shenton fought he Buggy Ball Establishment to a standstill. He departed for Heaven Above in 1971... I took the Mantle...to see if the New Prophet...could make the grade and to help. Her Life was her Dear Husband, She was The Wife as described by God in the Bible a Wonderful thing! She told me and

Marjory Mr. Shenton has said before he departed the Flat Earth Concept CAME from America...and to THERE it MUST RETURN for FULFILLMENTI With her a lone widow, still the Degenerate Devils manifested in human form, called the Press-Establishment in England made fun of Mr. Shenton's work...this hurt Lillian! With Samuel alive she could stand anything...she could stand anything...she couldn't take it alone. I have a bundle of letters from Lillian, Mrs. Samuel Shenton, can't bear to even look at them for when I do, the tear drops flow.

From the passing of Mr. Shenton in 1971 to December of 1974, SHE stood ALONE in that Den of Serpants. England, the vipers the Press Establishment, BBC, etc. kept up their attack on Mr. Shenton and the Flat Earth. Where was the Queen when all this went on? Whatever happened to fair play? WHERE was the Church of England? Oh yeah, they were all there! England was NOT WORTHY OF HER or Mr. Shenton, Cursed in this life and the Life to Come... Because of their treatment of the FLAT EARTH SOCIETY when it was there... they had their visitation...now the time is far spent!... the night cometh... for England.

Good Night Sweet Prince...and Good Night Sweet Princess, Samuel and Lillian. To the Queen, to the Parliament, to the English people, to the Church of England...I say... REPENT, REPENT...your Time is up.

The Last Iconclast

Note: Perhaps I have been raving too much against England! English and British Isles have contributed so Much of Value to this earth...the world MUST be grateful. It's just that since the Nazi, also known as Labor Party, took over England in 1945 that the "seum" has risen to the top...it's the degenerate dopehead seum, in and out of the CHURCH and Covernment that we mean to "cuss." Here in California in November Christian and Jew Communities with many in Government got a LAW passed that SODIMITES and LESBIANS can be PUBLIC SCHOOL TEACHERS! It's this Seum, we cuss...no matter where they are.

The UNITED NATIONS is seeking to take the Place of the UNITED STATES...in the fulfillment of the Bible and George Washington's Dream. A ONE WORLD COVERN-MENT basis of which is THIS FLAT EARTH. The UN has taken our Flat Earth Society Map...as its SYMBOL! One Flat World! It IS located here in the US! UNICEF's aim is to help the World's Children. You can write for their paper. Since the Founders of the UN ALL knew earth Flat OUR Map is still used...it IS "A" flat earth organization. Yet it will NOT confess this fact. Double Think. Many monstrously evil "Groupes" are members of UNICEF enemies to COD and MAN and the UNITED STATES. Also many good People, can they all be "homoginized"? Perhaps the evil to be overcome by the good. At Present UN avoiding recognizing the I.F.E.R.S.

# Flat Earth Society dispels 'round' myth

by S. J. COOPER

Smiling to myself and prepared for a good laugh, I dialed the number of Charles Johnson, president of the International Flat Earth Society. Columbus Day was approaching and Johnson had proclaimed him as one of the organization's heroes, stating,
"If the earth was round, Columbus
would have fallen off. The fact that
he didn't proves the earth is flat."

An interesting concept, I thought on hearing it, because if you think about it, the fact that Columbus didn't about it, the fact that Columous dian to plummet over any edge on his journey to America doesn't really prove anything, other than that he made it. Of course, there were other factors, like gravity, which Mr. Johnson seemingly ignored, and therefore I imagined

the whole thing a joke.

In the first minute of conversa-tion though, I realized that it was not a joke, especially to Johnson. Not only did he believe the earth was flat, Johnson set out to prove it which, he said, was "simple." Using survey-ing equipment to calculate the curve of the earth's surface, and backed by a belief that the oceans do not curve,

or the earth's surface, and backed by a belief that the oceans do not curve, he stated that it was absolutely impossible for the earth to be round. When asked about satellite pictures portraying the earth as a ball, Johnson stated that they were on the same level as "Buck Rogers and Star Wars. They've been fabricated to fool the people of the world."

"It started after World War II," Johnson related, "when half of the Nazi scientists went to Russia, and the other half came to the United States." Tivis "gang of scientists," as Johnson cells them, are following in the footsteps of Copernicus, and through the universities of the world, they are spreading the myth of a they are spreading the myth of a round earth.

He compares the university system of today to the superstitious dark ages, saying that universities are "programming people with the dogma of gravity and a round earth."

Johnson does not blame our government though, as "the politicians don't know any more than anyone else."

When asked about where his members come from. Johnson said.

members come from, Johnson said,
"There are those who feel the earth

forward with their views." This is changing, he said, referring to a "lurk-ing sanity in the American spirit," and he stated that some 1500 persons have joined his cause. Their motto being "Think for Yourself," they have established a quarterly paper to present their views and recruit new mem-bers. Articles in the paper prove be-yond any doubt that the earth is flat and that gravity is a myth, according

"We are trying to get people back to thinking for themselves," Johnson said. He referred to the "morons" that our universities are producing, "little monkeys" as he calls them, and expressed his wish that everyone will eventually see the truth.

Completely undaunted by the

volume of contrary information, Charles Johnson is to be admired for Charles Johnson is to be admired for his absolute disregard for influences opposing his position. Wishing Mr. Johnson continued success in his campaign I ended our conversation wondering how I was going to break the news to my friends. I finally consoled myself with the fact that no one believed Copernicus at first, or for that matter, Columbus either.

In fact, one of the group's super heroes is Christopher Columbus, whose day it is on the calendar today. "Contrary to the history books, we claim Columbus proved the world flat," Johnson said from his five-acre Mojave Desert ranch.

"At the time Columbus made his voyage everyone believed the world was a ball, except for Columbus. He was not one of them. They were afraid they would fall off the edge of the earth because it was round, not flat. "Columbus is one of our heroes

# Letters

Dear President Johnson:

I believe we are missing a vast field of endeavor within the framework of the Society. I noticed in the latest newsletter that many people have sent in Biblical quotations. to support the ideals set forth by the Flat Earth Society.

Why do we not ask our members to write us and give us as many "strong quotations" from the Good Book as they can. One entire newsletter could be devoted just to this

Believe me when I say I am convinced that each and every single copy of that Flat Earth Paper will fall into the hands of a good Christ-ian hopefully a fundamentalist. You ian hopefully a fundamentalist. You will have numerous requests for more copies. Our membership will increase from 1600 to 3500 overnight.

One quotation comes to mind already—"God has placed this earth on its Foundations and it shall not be moved forever."

Pray-how could any good be-

Pray-how could any good be-liever go to church on Sunday Morning and not join the Society that afternoon?

Thanks for this idea. We'll do it. An issue devoted to proving the BIBLE is 100% Flat Earth and unmoving, MEMBERS INVITED TO WRITE. I will also show and prove that the Spinning Ball Hoax and the Atheist Communist Space Program is brought about for the SOLE purpose of enslaving the entire world in a Godless Atheist System where it is against the Law to even SAY Jesus Christ in Public! And the Bible is Banned.. Sodomites and Lesbians as Public School Teachers This "System" is right NOW...even at the door... at the door...

During my professional career of many thousands of hours in the air on both domestic and international operations, I was lost so many times that I finally arrived at my own conclusion that the navigation theory taught relative to the earth being round etc had to be incorrect. The Flat Earth Theory, I believe will export me from the lieve, will exonerate me from the everlasting humiliation and snickering from otherwise honorable crewmembers who helped me find my way so often in the past.

Thanks in advance, Sincerely, Name Withheld, California

Dear Mr. Johnson:

I have recently heard your in-terview with Caroline Jones on the radio, here in Sydney, and I was interested to know your views that the world is a Flat Plane. After hearing the interview, I had a long think, and now I realize that a Flat Earth makes sense. I would like to know more about it, may even consider joining.

sider joining.

Ever since my first years at school I have been brainwashed about the earth's shape. I have never really believed the earth could be a Ball spinning in space. The idea of a Flat Earth coincides with God's Word that the earth is the center of the universe. I also admit that, living in Australia, I HAVE NEVER BEEN HANGING by MY FEET! So I ask you, would you please send me some pamphlets etc on the Flat earth. on the Flat earth.

Dear Mr. Johnson:

My husband has been interested in the Flat Earth Society ever since in the Fist Earth Society ever since he first saw a reference to it several years ago. He thought it was based in England. Dear Mrs. Johnson:

I am very interested in your theory, earth being flat as a pan-cake. I would be very very happy if you kindly could send me some

if you kindly could send me some materials about this.

I have been for quite a long time, thinking that there must be something wrong about the idea the earth is round. It would be ridiculous to think that people, for example in Australia live always are the termostible. I upside down, that is impossible. I think that earth simply must be flat. That's the only reasonalbe explana-

tion.

When I saw an article about your Flat Earth Society here in a FINNISH magazine, I said to myseif, "Name Withheld" if you are ever going to find peace in your mind, you will find it there! So here I am, writing to you. I especially admire your courage, Whole world thinks you are crazy (I have noticed it myself when I have tried to talk about this to somebody) but to talk about this to somebody) but you don't care. You know you are right and your faith is strong, that's

really admirable.

Would you really be so kind and please send me some material?

# SEA OF MEGGAS FLAT

The Sea of Mecca located at the town of MECCA, California, between India or Indio and Mexicali, is experimentally found to be FLAT. Many hundreds of square miles around this area of both upper California and lower California are very similar to Arabia and other parts of Old Babylonia. In the old part of MECCA, if you didn't know any better, you would think you were in some strange middle east or far east India, from the people and their middle east ways. Of course they speak "Spanish," but that is too long of a story to go into now. But a Vast number of Middle East or Arabic-Indian Aryan type of people populate MEXICO. Here in this town did their real race come out. It did so in the name they chose; MECCA the BABEL, or gateway to Heavan located in Arabia. Anyway, after the flood this part of the Pacific Ocean was cut-off, and is still today, a small independant Sea of its own. It is very saity, and in fact, has been called "Saity Sea" or "Salton Sea."

In the past years the Real Identity of these brown skin Aryan-Semitic people was kept concealed by calling attention to the Sea by calling it the Sea Of Mecca. Oh yeah, most middle east people call themselves, "Semitic," including the Sadat of Eygpt.

INDIA (more Aryan-people came from INDIA) IRAN, 'means' Land of the ARYANS. This was changed to INDIO, but as Shakey says...''what's in a name?''...A Rose by any other name would smell as sweet...also the Asiatic middle and far east Aryan.. is still the same no matter if called Mexican or Californian, or what-ever. This Sea is over thirty miles long and over ten miles wide. Marjory

and I examined this Sea from all sides, plenty of boats available, and a good dock area. We sighted it with a powerful telescope by naked eye, using markers and above all common sense and observation. We hereby pronunce this Sea Flat!

nounce this Sea Flat!

If earth were a globe planet as claimed by the cunning devisers of Fables, then this SEA would have 66 FEET of "curve" across the width and over 660 FEET of "curve" in the length! Quite a "HUMP" would exist in either direction! As you can see in the pictures we took.

each scene showing miles of water... the water is FLAT, no hump. This sea is 234 feet below the LEVEL of the Pacific Sea, get that, below the LEVEL of PACIFIC OCEAN! Both are LEVEL, that is FLAT one is a lower LEVEL! If a connection could be made between it and the Pacific its LEVEL would RISE to the LEVEL of the Pacific, mind you still LEVEL or FLAT and also cover both MECCA EL BABEL India, Indio and the whole fantastic and weird desolations of that Imperial Valley.

Like all the WATER on this flat earth, water in MECCA Arabia, water in LEYGPT, water in Jerusalem, the water in YOUR BATHTUB...
WATER IS FLAT! It is a LAW OF COD! You can't do away with any true LAW, a LAW is forever, no amount of jibberish talk, no amount of cunningly devised FABLES., No movies, whether or not it is the Three Stooges on Venius or Buck Rogers or Flash Gordon on the Moon. No matter how many movies saying ARMSTRONG IS ON THE MOON, no matter what person calling himself Jew, Christian, Israelite, Islam or even the Asiatic Aryan (who claims to be God's Superman) it makes no difference at all, who says it. NOTHING existing in the universe can do away with a LAW! Physics' means "GOD" of "NATURE" or "THE REAL FACTS". So the study of Physics is the study of God's Laws. One of the few KNOWN laws of Physics is "water seeks its own LEVEL and lays FLATI"

If all the Idiots of Russia Europe

If all the Idiots of Russia Europe and Asia join hand in hand, and chant day and night "earth is a spinning ball"...they CANNOT change the Fact, Earth is FLAT and this Fact has been proclaimed from the Greatest Nation ever to rise on earth, the United States of America... from 1777!
Our Land is the very first nation

Our Land is the very first nation in recorded history to proclaim we are THE FLAT EARTH NATION..... God's Country, the Land of the Free and the Hone of the Brave. The sooner we all accept this fact and UNDERSTAND that This Nation is God's Chosen Nation...Israel full-filled.. Christianity fullfilled. And stand up and defend OUR COUNTRY against the forces of Darkness that exist here and in most other countries on this Flat Earth!

# is the earth a whirling globe?

This is part of a talk given by the former holder of the Mantle, Head of the International Flat Earth Society: The Learned Elder of Zion, Wilber Glenn Voliva, This Protocal was given at Orchestra Hall, in Chicago.

Let the words of my mouth and the meditation of my heart be acceptable in Thy sight and in the Name of the Lord Jesus Christ, in the power of the Holy Spirit be blessed unto all listeners. O Lord, my Strength and my Redeemer. Amen.

#### **PRELUDE**

Ladies and gentlemen, I am grateful for this privilege of looking into your happy faces, and I trust before this Address is over that I shall have the privilege of looking in a mea-sure into your minds and hearts, and the satisfaction of knowing that I am imparting information and funda-mental knowledge that will be a help to you as you travel life's journey. I have announced the Prelude to

my Address in the form of a question. my Address in the form of a question.
Generally, I state my subjects in the form of a declaration. However, I thought it best to state this Prelude in the form of a question: "Is the in the form of a question: "Is the Earth a Whirling Globe, as Taught in the Schools (the primary schools, the junior schools, the high schools, the colleges, and the universities); or, is it a Stationary Plane." a Stationary Plane?

You may wonder why I discuss this subject, and therefore, I will answer your question.

#### Modern Astronomy Challenges the Inspiration of the Bible

Modern Astronomy, known as the Pythagorean - Copernican - New-tonian system, challenges the inspitonian system, challenges the inspiration, inerrancy, accuracy, and reliaability of the Bible, which I accept
as the Inspired Word of God. This
challenge has been sent forth by
Blatchford of England, by "Tom"
Paine, by Ingersoll, and by many
other world-renowned celebrities; and what kind of minister of the Gospel of the Lord Jesus Christ would I be to remain silent and allow this challenge to remain unnoticed and un-answered?

Among the many remarkable statements in "Tom" Paine's "Age of Reason," is the following, "He who thinks he believes the Bible and Modem Astronomy knows very little of either, for the two beliefs cannot be

Ingersoll, whom I willingly concede was one of the most brilliant intellects, one of the greatest rhetoricians, and one of the most superb orators of his time, challenged the Word of God, turned upon it his most powerful weapon, ridicule, and sought

Wilbur Glen Voliva, Head of Flat Earth Society for 40 years. This learned Elder at Zion, USA passed to his Great Reward in Heaven Above dur-ing World War No. 2.

to laugh it entirely out of court, alleging, among other things, that Moses, who wrote the Rentateuch, was an ignoramus, and that he knew nothing about astronomy or the cre-ation of the earth. When you and I were little, in-

nocent, inoffensive, helpless children. we were told by the man or woman acting in the capacity of teacher that flattened at the poles and bulged at the center or the Equator. In other words, we were told that the Equator is thirteen miles farther form center of the earth than the poles. We were told that the earth rotates upon its axis once every twenty-four hours, and that it revolves in its orbit at the tremendous speed of more than one million miles a day. Like than one minimum as a day. Little birds, or fish, not knowing any better, we opened our intellectual mouths and swallowed the astronomical worm. Don't you get tired of the Diet of Worms? We were like the the Diet of worms: we were like the little boy, who, after he had gone to school the first day, came home at night and said, "Mother our teacher is the smartest woman who ever lived."

#### Sailing Around the Earth is no Proof of Globularity

They told us that the earth is a globe because men have sailed around it.

Men can sail a boat around an island. Does that prove that the island is a globe? If Orchestra Hall were a mile out in Lake Michigan, they could sail a boat around it, but would that prove it is a globe?

How can men and women of any intelligence make the statement that sailing around the earth is proof that

it is a globe?
We were told that the earth is a globe because a vessel can be sailed due west around the earth. Who ever heard tell about sailing a vessel duewest around the earth? The only way I know of, to take a vessel due west in this latitude is to load it on a flat car when you reach New York from Liverpool, and take it across country to San Francisco. No vessel ever sailed around the earth keeping a course of

due west! We were told that the fact a person could start at a given point and travel due west or east and come back to the point of departure proved that the earth is a globe.

There is not a scintilla of truth in any of the statements of which I have quoted, and yet you will find them in every Geography book, and every primary teacher repeats them like a parrot. I decline to be a parrot, and I

hope there are no parrots here this afternoon. A parrot is a man who never thinks for himself, but repeats what he hears with no questions as to why or wherefore.

why or wherefore.

People talk about Voliva believing in the "flat earth." Now you may be permitted to use that expression if it will help you to visualize, but what Voliva believes in is what the Bible teaches, and what he can prove beyond any possibility of successful contradiction, and that is that the earth is a STATIONARY PLANE, a series

#### The Sun Moves Over the Earth in a Circuitous Route

What do we mean by east and! west?

If one were to go into the average to he were to go into the average college and ask a class in Astronomy to define east and west, they would not be able to answer. The teacher before them hands out a few old astonomical worms covered with the dust of centuries, because he never has an original thought, nor thinks into anything.

The center of the earth on a sta-tionary plane is the North Pole, which is supposed to be relatively under-neath Polaris, or the north polar star, which is a fixed, stationary star. You can put a gas pipe on a post, out in your back yard, bring the north polar star within the field of your pipe, go away and return in thirty days, and the polar star will still be within the field of the pipe. North is toward the North Center.

There is but one absolute direction. In other words, north is the only direction in which a man can travel and reach a point where he cannot go any farther in the direction of the north. East, west, and south, are not absolute directions: They are only relative directions with reference to north. East and west are points at right angles to north and south.

Suppose that we put an observer Suppose that we put an observer on the Tropic of Capricorn on the above diagram, and tell him to travel due east until he comes back to the point of departure. He start out with the needle of his compass pointing to the North Center, and as he travels due east the needle will continue to point there; and he will describe a complete circle and come back to the point of departure on the Tropic of Capricorn.

Is that a globe? Verily no!

If we want him to travel west, he faces west, and with the needle of the compass pointing north, he travels in a westerly direction until he comes back to the point of departure.

#### The So-Called South Pole is Any Point Ninety Degrees South

We have read a great deal about Mr. Byrd. They say that he flew over the South Pole, but there is no South Pole to fly over! The only place that the South Pole was ever discovered was in an office in the city of London. The site of the city of Zion was very carefully surveyed, and the stakes all placed. Afew months ago, our official surveyor, who's son works with him, said to his son, "Take this map and go and find this stake." His son took the map and went to the point in-dicated on the map to find the stake. He came back to his father and told him that it was not there. The father said, "It is there because that is what the map indicates." So in an office in London, they drew a map, put a point on it representing the South Pole, and sent an explorer to the point indicated on the map to find the Pole. That is the only discovery of the South Pole. that has ever been made.

Referring to the diagram you will find indicated there the Tropic of Cancer, the Tropic of Capricorn, the Equator, the Artic Circle, the Anartic Circle, and the great wall of Ice, surrounding the earth, which no man has ever crossed, or ever will cross. The South Pole is any place on the dia-gram ninety degrees south of the Equator. If Mr. Byrd had gone south nine-ty degrees from the Equator, he could have headed his airship in an easternly or westernly direction and traveled for sixty thousand miles, and he would have been flying over the South Pole all the time, just as much as he flew over it when he flew from Little America to ninety degrees south, and re-turned!

There is no such thing as the South Pole!

Scientists tell us that the sun is ninety-two million miles distant, that is eight hundred and sixty-six thousand miles in diameter, and that is one-million times larger than the earth!

#### North is the Only Direction That is Not Relative

The sun travels no farther north, than the Tropic of Cancer, and the twenty-first day of June is our sum-mer solstice and our longest day. The mer solstice and our longest day. The sun never goes farther south than the Tropic of Capricorn. In Australia (I know, for I have lived there), the twenty-first day of june is their shortest day, and their winter solstice: whereas the twenty-first day of December (our winter solstice) is their summer solstice. The sun never constitute the Tropics of Cancer. their summer solstice. The sun never goes outside the Tropics of Cancer and Capricorn. It is only three thousand miles from the Tropic of Cancer to the Tropic of Capricorn, but as you know the sun cannot light nor heat that area all at one time. When the sun is near the Tropic of Capricorn we have twenty-below zero wea-ther, nine hour day, and a fifteen hour night. The sun takes one hundred and eighty days to travel to one Tropic from the other, and it moves in a circuitous route over the earth.

There is no such thing as sunrise or sunset. The sun is just as high in the sky at what we call sunrise as it is at noonday. As you sit at the rear of a passenger train and look a mile down the track, the rails appear to come together. Or as you stand in the middle of a boulevard, the two rows of lights appear to come together in the distance, and it is this simple law of perspective, of vision, the ex-plains our so-called sunrise and sun-

#### Trans World Airlines

TRANS WORLD AIRLINES is the foremost and No. 1 Airline here on the Flat Earth. It is up to us in the Flat Earth Society to see to it that TWA dominates the Airways on all the Flat Earth. As USA the first Na-tion to declare Earth Flat, so to be the major power in the New Flat Earth Age so TWA the First airline to come out of the closet of secrecy and

pretense and to confess what every Sane Pilot and Navigator on earth should know...Airplanes fly on a Sane Flor and Navigator on earth should know. Airplanes fly on a Plane over a Plane earth earth FLAT. Even the name "TRANS-World" note that, from the founding of TWA was planned to later CONFESS earth flat. planned to later CONFESS earth flat, trans-world, or they fly ACROSS the world, not "around" it. So FLY TWA ALL THE WAY, they deserve our business the PIONEER Flat Earth A business the FIONEER Flat Earth A line on Earth. And always when you buy a ticket tell 'em you appreciate an Honest Airline that flys the flat earth and not ashamed of it!

If you believe Armstrong went to Heaven or the "Moon" whether it be Neil or Garner Ted, you should also believe Orsen Wells when he said New York City was invaded by creepy devils from outer space and O'Crady's Cow jumped over the moon! Another report is the moon is green cheese. President Carter should declare a National Holiday for the Three Stooges who explored VENUS in 1959! After all, all movies are True? Don't people say I know earth is a round ball globe...for I SAW it in the movie or read the book?

Many SCIENCE programs on TV now, like the new adventure Salvage I on ABC, junk dealer built a 'space ship' out of junk parts. .has been to the moon, hrought back a load of junk. These 'junkies' are having adventures all over the world. .one time ventures all over the world...one time went over the 'ice ring' at south so-called pole, got jungle monkies to sell to zoo (seems they found Warm land beyond the ice). The Junkies and their yard are all here in LA

Pure Flesh and Blood Dog Food Lorin Creen is also engaged in wars in Heaven...each week, ALL good Scientific adventure, all helping develop the young minds. Everybody knows all such science programs, moon landings, mars landings etc, the are all true because the "saw etc are all true, because the the pictures. Here in Californ saw Here in California, we put the Florida Carnies to shame. such Pikers. Just one or two trips to the moon. Why, here in LA County we put Flash and Buck on the moon and hundreds of other strange, far-away places, way back in 1936! Can prove it got the pictures! You can't argue with pictures... can you?

### Flat Stars **Under the Big Top**

University of Arizona and NASA's Ames Research Center at Mountain View, California, in their tangled web of deceit methods of operating shows and rides in the Carnival-Circus here in the Big Store (USA is known as The Big Store by the carnies) may be The Big Store by the carnies) may be about ready to start on the long road to "Confessing" Flat Earth Society is right earth is flat. I expect the first stage of their changeover to say earth is giant "Hying saucer", is flat but is "flying" or as the Jesus People say, this "space ship earth." Anyway, this is the beginning...FLAT STARS...now OFFICIAL!

# Noah's Sin

The Long to be remembered Johnny Mercer surely was giving us a Message when he wrote the song "Accentuate the Positive, Eliminate the Negative." Sure enough, that is what we must do in our own lives. Eliminate the Negative. Start with the Ten Laws which is good and just and true...tried and Proven. The person who keeps the Ten Supreme of Life not only benefits himself but benefits all the creation as if you just Resist Harming others...you have helped them! The Positive is Direct Good. Then you will have true Love, for all and will be safe for others to follow you. You must be all Positive not half negative, or it may kill you as "alternating current" will kill you. I know it is tough today that all is 'Love' But it does seem like their Love without the Wisdom of the Law is mixing positive with negative... which is din-o-mite. All becomes chaos and you may be electrocuted. Like the song says, eliminate the negative and don't mess with Mr. in-between. Like Noah mixed positive with Negative...he started to sacrifice

(kill and eat) the poor beasts, when Noah did this the book says: And Cod saw Noah's heart was on evil continually...little or no hope for him. and so it has been since Noah's day. Cod said: I want Obedience to my Cod said: I want Obeclience to my Law not Sacrifice which is contrary to the Law 'thou shall not murder.' So let's all try obedience Accentuate the Positive, eliminate the negative. By the way, this is why Jona was put in the belly of the whale...he was thinking negative when sent to the people of Niniva to tell THEM to people of Niniva to tell THEM to eliminate the negative. Jesus Christ said 'If you would enter into life, keep the Ten Commandments.' We as individuals as well as all in contact with us would be saved. If we think and do the Ten Positive Laws kept in the 'spirit and grent' and for the nurses intended by the creator. the purpose intended by the creator. Then as said by the Prophets of old to children of Israel. have the Law written on the Heart, then will peace come to the Flat Earth and all the world will shout SHALOM.

# LETTERS

Dear Mr. Johnson,

I recently read of the International Flat Earth Society in our Local newspaper. I have always known that the earth is flat. There is an abundance of evidence, including scriptual passages that prove the earth is absolutely flat. I have been gathering such evidence for years and I may even know some things that you don: know.

I am so happy to learn that I am not the only man with good sense and a logical mind. The world needs more men like us. Please send me more information about your organization. I want to know more. Thank

John Doe, Hilo Hawaii

Dear Mr. Johnson,

After reading the "FLAT EARTH NEWS," I am convinced that the earth is flat. Enclosed is my check for \$7. for membership for 1979.

> Dr. John Doe, Blan Research. Corporation Maryland

Dear Sir.

Enclosed 1979 dues. It is very disturbing to discover members are not paying their dues. I would be willing to take this responsibility if I had a list of names or anything else. In my profession I am Editor and find spelling and grammatical errors in the printing. Any organization as dedicated as yours should be as perfect as humanly possible. How may I help?

Sincerely, Woman, Illinois

Edd. Thanks! But our members names is a secret. When words express an idea of fact if understood, then cannot be said to be in error in grammar. Words are to talk with. There is NO SCIENCE in how to put together words. I appreciate your

Members who have received this paper and have not payed their dues and Don't want to receive FLAT EARTH NEWS, Please let us know!

A week ago I heard of your Society and I got extremely interested in your opinion about the shape of the earth. And now I hope that it is possible for you to send me some information on this subject, which is of course a very important one. Thanking you in anticipation and wishing you all the best.

Very Truly Yours, Man Holland

Dear Sir,

Enclosed my dues for FLAT EARTH NEWS for 1979. I am a re-tired wireless operator and employee of Ford Motor Co., member of the Society of wireless Pioneers. I have always been interested in scientific enterprises and what makes them go. Your newspaper intrigues me very much. You and your wife must have some kind of engineering background or some other scientific science. My wife's attitude is that both of us are nuts. From your picture in a recent issue, your appearance is somewhat of a University Professor.

Sincerely Man, Michigan

Dear Sir,

I am the secretary of the Univer-sity of name withheld, Physics Society/Astronomical Society and I am interested in making your opinions abailable to the undergraduates here. There seems to be no way to contact earth society members here in England so I wonder if you could direct me toward obtaining publications and/or possible lecturers?
Yours Sincerely, Man, England

Scientists have proven the earth is round, so why do you believe the earth is flat? Could you send mesome free information to understand why think the earth flat, because I believe the earth is round.

# ONE FLAT WORLD DOITED STATES

JOHN ALEXANDER DOWIE, came to the USA from the "ends of the earth", Australia in 1888; sailed across the Flat Sea and landed of the earth, Australia in 100s; sailed across the Flat Sea and landed in San Francisco. From there he journeyed to the almost exact Center of the United States of America, Chicago. As the Prophets of Old, especially Elijah, he shocked and terrified many; and many received him for what he was, the Messenger of Cod, the harbinger of the End. The signs and wonders he brought were many. He declared as the BIBLE has said all the time: "THE EARTH IS FLAT, sun and moon are lights to light this earth, the center of the universe and future home of Cod's Kingdom. He had the gift of Divine Healing: Cod was with him. Almost instantly he was heard all across the world, people came from far and near and from across the sea, it was

Thousands came to him and were healed of incurable diseases and afflictions. One member of present F.E.S., a CPA lived in Chicago then, one close relative was healed of a WITHERED LEC! Another close relative healed of TB of the bone. This was common place in the Min-

Chicago was then as it is now, a Democratic Stronghold, a Center of Monstrous Underworld Evil of all description. Over 10,000 WHITE SLAVES, (White women just in Chicago area alone) kept as prisoners and held in check by HEROIN, CO-CAINE, and Democratic Police (heroin is just morphise with assertice. CAINE, and Democratic Police (heroin is just morphine with ascetic acid added). This DEMOCRATIC CITY was so hideous that many wrote about it. Upton Sinclair called it in a book THE JUNGLE. THUGS, DOPE PEDDLERS, BOOZE PEDDLERS and other CRIMINALS ran the city then as now DOWIE set out to RESCUE the pittful White Women Slaves from their masters (Democrats, the Panderers, Dope Peddlers, and Booze Peddlers) and Peddlers, and Booze Peddlers) and set up houses they could flee to, where he and the Men of God sought to Save these Dear women whose Lives and very existence were truly a 'Fate Worse Than Death'. THINK

In Chicago, 1890, 10,000 WHITE WOMEN SLAVES, ALL LEGAL (continued to be legal WHITE WOMEN SLAVERY until Herbert Hoover. Republican President, attacked White Slavery in Chicago in late 20's and early 30's by going after Al Capone, LEADING DEMOCRAT in Chicago) because CHICAGO and the DEMOCRATS worshipped SATIN THE DEVIL, PIMPS, PANDERERS, DOPE FIENDS, BOOZE FIENDS, WHITE VIL. PIMPS, PANDERERS, DOPE FIENDS, BOOZE FIENDS, WHITE SLAVERS, and ELIJAH DOWIE touched the "apple of Satan's eye" when he attacked this gang. Since he was attacking the very foundations of Democratic Chicago, some way had to be found to stop him. Since he was also healing people it was de-cided to put the very SAME charge

against JESUS CHRIST (that of practicing "medicine" without a license). He was arrested over 100 times in one He was arrested over 100 times in one year, harrassed daily by the City Fathers and Police, but never charged in court. In the end the charge was declared unconstitutional. In 1889 his chief enemies (leading men in Chicago) men who didn't believe the Bible when it says ALL who lift Barking voices against a Man of God are doomed, these four carcasses fell in Chicago and the worms ate them in the damp earth. Later another Leading Citizen had Later another Leading Citizen had Later another Leading Citizen had a daughter who was crippled FROM BIRTH, unable to even WALK or STAND (so utterly crippled). He brought her to the PROPHET; he took the 2 year old child, born with curvature of the spine, her little head pulled back so she could only see the ceiling, pitiful hopeless cripple (father's name Charles J. Barnard, daughter's name Ann). He took the child, ter's name Ann). He took the child, kept her for several days, prayed and fasted, then RESTORED THE GIRL WHOLE IN PERFECT HEALTH. She was healed by a Miracle from Cod called for by the head of THE FLAT EARTH SOCIETY, JOHN ALEXANDER DOWIE! The barking deer share a way to be several to the child of the contraction of

He declared in 1988, long before Jewish/German Zionism, "ZION CHRISTIAN IS HERE IN USA!" He did this in 1888 first in San Francisco at age 41. If to began my ministry at age 41 in San Francisco) The VERY YEAR he Went UP, SAN FRANCISCO WAS DETROYED, by earthquake and Fire, 1906! The FIRST attempt for the COMMUNISTS to take Russia (Japs attacking from without, commies from within) was 1905-6! In 7 or 8 SHORT YEARS after ELIJAH, THE END OF THE WORLD CAME! 1914 the WAR BEGAN, out of it emerged the Marks of the Beast, Communism Nazism and on it goes; the END continues to this HOUR! Also the beginning has begun. DOWIE'S hand chosen successor, took the Mantle as Dowie-Elijah left, Wilbur Clen Voliva. Their headquarters came to be known as CHRISTIAN-CATHOLIC-ZION USA. War Dept. Censorship stopped the daily radio broad-

casts from ZION in 1943 which had been going on for years, in which a \$5,000 reward was offered worldwide to ANYONE ON EARTH who could to ANYONE ON EARTH who could contradict our proof that the EARTH IS ELAT! Volvia moved UP before the war restrictions could be removed and he continued broadcasts. Mr. Samuel Shenton, Fellow of the Royal Astronomical Society and Fellow of the Royal Geographical Society in England took the Mantle. Aided by his Stalward right hand Lillian J. Shenton, his Wife kept up the WITNESS TO THE NATIONS till he passed up and I took the Mantle in 1971.

And so the WORK of the COD

passed up and I took the Mantle in 1971.

And so the WORK of the GOD of TRUTH, JUSTICE, and MERCY, the Creator of Heaven and Earth, the Writer of the TEN COMMAND-MENTS, the ONE whose stated policy is "DO UNTO OTHERS AS YOU WOULD HAVE THEM DO UNTO YOU" goes on, 'no weapon formed against it will prosper, all who bless it is blessed, all who curse it is cursed'. The Beginning declared from the End of the old order, The New Heavens and The New Earth, wherein righteousness WILL dwell. Out of many, one Gods promise fulfilled the LAW (Power?) to go forth of Zion (USA) and the World of the Lord from Jerusalem! (New Jerusalem?). The message is the UNITED STATES AND THE BRITISH COMMONWEALTH, the ENGLISH SPEAKING PEOPLES, and our KINDRED, RELATED, FRIENDS AND ALLIES all over this FLAT ONE WORLD, IS THE NUCLES OF GOD'S KINGDOM ON EARTH (Beginning or preamble). # The Sun's Path

This is a matter of absolute cer-tainty; proved by what is called, in technical language, the northern and southern declination, which is simply saying that the sun's path in nearest the polar centre in sum-mer, and farthest away from it in

At noon, on the 21st of any December, let a rod be so fixed that on looking along it, the line of sight touches the lower edge of the sun. For several days this line of sight will continue nearly the same, showing that the sun's path for this period is little changed; but on the ninth or tenth day to touch the sun's lower edge, the rod will have to be lifted several degrees towards the zenith. Every day afterwards until the 22nd of June, the rod will have to be raised. On that date there will again be several days without any visible change; after which, day by day, the rod must be lowered until the 21st December. In this simple way it may be demonstrated that the sun's path gets larger every day from December 21st to June 'nd; and smaller every from June 22nd to December 21st, of every year. From a number of observations

made by the author during the last twenty-five years, it is certain that both the minumum or June path of the sun, and maximum or December path have been gradually getting farther from the northern centre. amount of expansion is very small, but easily detected; and if it has been going on for centuries, which seems going on for centuries, which seems consistent with known phenomena, it explains at once and perfectly, the fact that England as well as more northern latitudes have once been tropical. There is abundant evidence that the conditions and productions now found within the tropics, have once existed in the northern region, which is now so cold and desolute, and inimical to ordinary animal and vegetables life. Hence, it is a proper and logical conclusion that the sun s

and logical conclusion that the sun path was once very near to the earth's arctic or polar centre.

The following diagram, fig. 60, will show the sun's peculiar path, N represents the polar centre, A the sun in its path in June; which daily expands like the coils of the maintaining of a watch until it reaches spring of a watch, until it reaches the outer and larger path B, in De-cember, after which the path gradually and day by day contracts until it becomes the path A, on the again become

That such is the sun's annual course is demonstrable by actual ob-servation; but if it is asked why it traverses such a peculiarly concentric path, no practical answer can be giv-en and no theory or speculation can be tolerated. Perhaps, we may have collected sufficient matter-of-fact evidence to enable us to understand it; but until that occurs, the Zezetic process only permits us to say: peculiar motion is visible to us, but, of the cause, at present we are ig-

# Seek the Kingdom of God...

Quote From Jesus Christ

People and Countries that want to BE great and righteous, and stay great and righteous, must stay in harmony and obedience with the Almighty Father the Creator of heaven and earth. The Almighty created Man and woman and all Beings from the beginning. We must serve him as he told them from the beginning, and serve not the god of this worldly way, which is the Devil and his camal ways (the Lust to be Free from all restraints, to do as we please and to have no Laws to tell us what to do with our lives). What a mistake, to make oneself an animal and our Cod the Lust of the Flesh, never finding happiness nor peace in life, only death and destruction. Why can't we all read the Ten Commandments and

try with all ones heart to live by them, not just the letter, having a heart, and thinking it is hard to do. We should WANT to live by them and have a spirit desiring Gods Laws as a Lamp to our feet. THEN we will begin to find peace and happiness and will also be a Light and Help to others. Then we will ing unto others we would have them do unto us. Lets not wait for someone else to do it first, Let it Begin With US. Believe me, as the old West poem says, "in a real shooting match, a bluff ain't no good at all". No one can CON God; we must all reap what we have sown.

Jesus' Teaching Concerning Kindness To Animals

'It happened that the Lord went forth from the city and walked with His disciples over the mountains. And they came to a mountain, and the road which led to it was steep. There they found a man with a snmp-ter-mule. But the animal had fallen, for the burden was too heavy, and he beat it, that it bled. And Jesus came to him and said: Man, why dost thou beat thy animal? Seest thou not that it is too weak for its toou not that it is too weak for its burden, and knowest thou not that it suffers pains? But the man an-swered and said: What is that to you? I can beat it as much as I please, since it is my property, and I bought it for a good sum of money. Ask those that are with Thee, for they know me and know thereof. And some of the disciples said: 'Yea,

Lord, it is as he says. We have seen how he bought it. But the Lord said: 'Do you not notice how it bleeds, and hear you not how it la-ments and cries?' But they answered and said: 'Nay, Lord, we hear not that it laments and cries.' And the Lord was sad, and exclaimed: 'Woe to you, that ye hear not how it complains to the Creator in heaven and cries for mercy. But three times woe to him of whom it complains and cries in its distress.' And He came forth and touched the animal. And it arose and it arose and its wounds were healed. And Jesus said to the man: 'Now, go on and beat it no more, that you also may find mercy.'

# CAUSE OF DAY AND NIGHT, WINTER AND SUMMER

It is a well-established fact that light and heat radiate equally in all directions. When the sun is on the outer circle, B, fig. 60, as it is on the Oliter circle, h. ng. wd., as it is on the Ust of December, it is known that the light gradually diminishes, until at or about 20 degrees from the northern centre, it shades almost imperceptibly into twilight and darkness. If, then, we take from B (fig. 60), to the arctic circle, 1, 2, 3, as radius, and describe the circle 4, 5, 6, we have represented the whole extent of sun or daylight at a given moment on the shortest day. When, as on the 21st of June, the sun by gradually. contracting its path, has arrived at the inner circle, A, the same length of radius will produce the circle 7, 8, which represents the extent of days, which represents the extent of day-light on the longest day. It will be seen by the diagram that, on the shortest day, the light terminates at the arctic circle 1, 2, 3, leaving all beyond in darkness; and as the sun moves forward in the direction of the arrows, the edge of the circle of light continues, during the whole of its course, to fall short at this circle. Hence, although it is daylight all over the rest of the earth in twentyfour hours, the centre, N, is left in continual darkness. But when, in six months afterwards, but when, in son the inner circle, A, the light extends beyond the arctic circle, 1, 2, 3, and as it moves in its course, the centre, N, is continually illuminated. These changes will be better understood by reference to the diagrams, figs. 61 and

In fig. 61, the circle A.A,A, represents the sun's daily path on December 21st, and B,B,B, the same on June 21st; N, the northern centre; S, the sun; E, the position of Great Bri-

tain; the figures, 1, 2, 3, the arctic circle; and 4, 5, 6, the extent of sunlight at noon of that day. The sun. S, describes the circle A.A.A. on the 21st of December in one day, or twentyfour hours. Hence, in that period, mid-day and midnight, and morning and evening twilight, occur to every part of the earth except within the arctic circle, 1, 2, 3. There it is more or less in darkness for several months in succession, or until the sun, by gradually coming nearer to the inner circle, throws his light more and more over the centre. The arc of light at 4, is the advancing or morn-ing twilight, and 6, the receding or evening twilight. At every place un-derneath a line drawn across the circle of the sun's light, 4, 5, 6, through S, to N, it is noonday; and beyond the northern centre, on the same line, it is midnight.

It will now be readily understood that as the sun moves in the direction

of the arrows, or from right to left, and completes the circle, A.A.A., in twenty-four hours, it will produce in that period, and where its light reaches, morning, noon, evening and night, on all parts of the earth in succession. As the sun's path now begins to contract every day for six months, or until the 21st of June, when it becomes the circle, B,B,B, it is evident that the same extent of sunlight as that which radiates from the outer circle, A,A,A, will reach over or beyond the northern centre, N, as shown in the diagram, fig. 62; when morning, noon, evening, and night, occur as before; but the light continuing, during the daily motion of the sun, to reach over the northern centre, that centre will be continually illuminated for several months together, as before it was in constant darkness. It will be seen also by reference to the diagram that when the sun is on the outer path, A, the portion of the disc of light which

passes over England is much smaller than when it is on the inner path, B. Hence, the short days and winter season from the first position, and the longer days and summer season from the second. Thus day and night, long and short days and nights, morning and evening twilight, winter and summer, the long periods of al-ternate light and darkness at the northern or polar centre of the earth, arise from the expansion and con-traction of the sun's path, and are all a part of one and the same general phenomenon.

The whole of these explanations have reference only to the region between the sun and the northern centre. It is evident that in the great encircling oceans of the south, and the numerous islands and parts of continents, which exist beyond that part of the earth where the sun is ver-tical, cannot have their days and nights, seasons, etc. precisely like those in the northern region. The north is a centre, and the south is that centre radiated or thrown out to a vast oceanic circumference, termination in circular walls of ice, which form an impenetrable frozen barrier. Hence the phenomena referred to as existing in the north must be con-siderably modified in the south. For instance, the north being central, the light of the sun advancing and reced-ing, gives long periods of alternate light and darkness at the actual cen-tre; but in the far south, the sun, even when moving in his outer path, can only throw its light to a certain distance, beyond which there must be perpetual darkness.

## " It is He That Sitteth Upon the Circle of the Earth"

This passage of scripture is of-Inis passage or scripture is offered by many Baptists and other liars to prove that the earth is a globe. Let us put into this record the definition of a circle. Funk & Wagnalls' Standard Dictionary says: "circle, a plane figure bounded by a curved line called the circumference, which is everywhere equally distant from a point within called the center." In order to get this thoroughly fixed in one's mind, he must know what a plane is also; hence the following quotation from the same authority: 'plane, a surface such that a straight line joining any two of its points lies wholly within the surface; a flat or uncurved sur-

Therefore, a circle is primarily a plane or flat surface, and a long stretch of one's imagination is necessary to bring this statement in con-formity with the idea of a globular

The last part of the same verse (Isaiah 40:22) could not reasonably be applied to a globular earth either. that stretcheth out the heavens trace: that stretched out the newester as a curtain, and spreadeth them out as a tent to dwell in." Surely this bears the suggestion that the heavens are something definite and material, and that they are stretched over the whole arth as a covering. over the whole earth as a covering. Dr. Heaviside, an English scientist, said: "The heavens are an ionized dome." This idea is confirmed by radio engineering experiments. In fact radio engineering experiments, in fact the Hebrew word chug, which is translated circle in the above passage of Scripture, means vault or arch according to Young. We were agreeaccording to Young. We were agreeably surprised to note, in the Fulpit Commentary, the following with reference to this verse — Verse 22 of Isaiah the Fortieth Chapter:

" 'It is He that sitteth upon the circle of the earth; rather, above the vault of the earth; above the vault of sky, which seems to arch over the earth.

Certainly the heavens cannot, then, form any part of a globular earth system, for in that system the heavens are not real - they are only appearances.

# The Light of of Lucifer...

sends them Strong Delusions to believe a Lie...(second Thessalonians 2 chap.)

Last week I gave a brief and imperfect sketch of the known uni-verse...This week I shall try to compare the modern idea of the universe with the idea given in the Bible, and to show that the ancient Jewish God, Johovah, was utterly incapable of conceiving a scheme of creation so magnificent as that which science has revealed. For it is to human labor and to human science, and not to Divine inspiration, that we are in-debted for the expansion and elevation of our ideas of the universe and its Creator. The universe as revealed to us by man, contains 20 millions of living, moving, radiant suns, with all their wonderful revolving planets, comets, meteorites, and nebulae. The universe, as revealed in the Holy Scriptures, consists of a flat, immova ble earth, covered by a solid dome of sky, in which are set a small sun and moon, and a sprinkling of stars, all of which were created to give light to man. The difference between the human and the inspired conceptions of the universe is too glaring to need any comment of mine. The universe of the Bible bears about the same relation to the universe of fact as a candle to the sun. The scientific conception, moreover, is true, whilst the Bible conception is false.

The Clarion, April 24, 1923.

In Lucifer, of December 23rd, E. M. 237 (ie. 1887 A.D.) the following occurs:

We date from the first of lanuary, 1601. This era is called the Era of Man (E.M.) to distinguish it from the theological epoch that preceded it. In that epoch the earth was sup-osed to be flat, the sun was its at-tendant light revolving about it. Above was Heaven, where God ruled supreme over all potentates and pow-ers, below was the kingdom of the Devil, hell. So taught the Bible. Then came the NEW ASTRONOMY. It demonstrated that the earth is a globe revolving about the sun; that the stars are worlds and suns; that there is no up and down in space; vanished the old heaven; vanished the old hell; the earth became the home of man. And when the modern cosmogony came, the Bible and the Church as infallible oracles had to go, for they had taught that regarding the universe which was now shown

the universe which was now show to be untrue in every particular.

Robert G. Ingersoll, perhaps the greatest infidel of his time, in his controversy with Dr. Talmage, said:

"If it shall turn out the Joshua."

was superior to La Place, that Moses knew more about geology than Humbolt, that Job as a scientist was superior to Kepler, that Isaiah knew more than Copernicus, then I will admit that infidelity must be speechless for ever.

Let those who profess to believe that the Bible is the Inspired Word of Cod, those who profess to be Christians, followers of the Lord Je-sus Christ and/or Moses. The Law and the Prophets read and reread the following from Robert G. Inger-

"The next day He made the sun and moon - the sun to rule the day and the moon to rule the night. Do you think the man who wrote that knew anything about the size of the sun? I think he thought it was about three feet in diameter, because I find in some book that the sun was stopped a whole day to give a general named Joshua time to kill a few more Amalekites; and the moon was stopped also. At another time, we read, the sun was turned ten degrees backward to convince Hezekiah that he was not going to die of a boil. The man who wrote that thought the sun was two or three feet in diameter. and could be stopped and pulled around like the sun and moon in a theater. I do not believe he knew the motion of the earth. I do not believe he knew that it was turning on its axis at the rate of one thousand

The writer then gives us the history of astronomy, and he gives it to us in five words: He made the stars also.' He came very near forgetting the stars. Do you believe that the man who wrote that knew that there are stars as much larger than this earth as the earth is larger than the apple which Adam and Eve are said to have eaten? Do you believe that he knew this world is but a speck in the shining, glittering universe of existence? I would gather from that that He made the stars after He got the world done.

"The telescope, in reading the infinite leaves of the Heaven, has ascertained that light travels at the rate of 192,000 miles per second, and it would require millions of years to come from some of the stars to the earth. Yet the beams of those stars mingle in our atmosphere so that if those distant orbs were fashioned when this world began we must have been whirling you believe the man who wrote that as a history of astronomy really knew that this world was but a speck compared with millions

Everybody talks about the Bible, and nobody reads it. That is the reason it is so generally believed."

Quoted from Ingersoll's Forty-four Lectures Complete.

all of the churches, and when a man arises who is brave enough to stand up boldly and uncompromisingly for the Word of God and condemn the insane theories of Modern Astronomy, then he is laughed at by these so-cailed Christians, and all kinds of silly stuff is written and printed in the papers. The fact of the matter is that very few, if any, of these writers have ever given the subject one moment's serious consideration, either from a Biblical standpoint or from a scien-tific standpoint.)

# Newton's Gravity

Gravity is said to be a force common to all bodies, located in the centers. Astronomers say gravity causes every particle of matter in the universe to attract every other particle, with a force which varies inversely as the square of the distance between them; and it is said to be the only law in nature which is absolutely universal and invariable in its ac-

"Who is this that darkeneth counsel by words without know-ledge?"To be sure, we have no real evidence of such a force, but suppose we assume it does exist, and for an illustration, let us try to apply this law to a loaded vessel at sea. Here is a vessel loaded to capacity, salling near the equator on the 21st of September, at noon. The sun is pulling on this vessel tending to lift it out of the water, but the earth being nearer the ship, succeeds in keep-ing it on the water. Bear in mind, in this picture we have the gravity of the sun opposing the gravity of the

The gravity of the sun is sufficiently powerful to keep the earth swinging around in a rigid course and must, therefore, be a tremendous" force. With these forces opposing each other, that is, with the pull of the sun upon it, which condition exists at noon in the case stated above, the vessel draws her of water (depth of water from the keel to the surface), and any considerable amount added to her weight would

sink her. Now let us look at this vessel at midnight, when the sun is on the opposite side of the earth from it. Sailing east, and still on the equator, does the vessel draw any more water than it did at noon? Not an inch! Is it any heavier? Not a pound! But it must be heavier if there is such a force as gravity, because now the sun has united its mighty pulling power to the attraction of the earth, which has already attracted the ves-sel with enough force to give it a weight of many thousands of tons, and certainly the sum of these two forces working together in the same direction is a greater force than either one of them working separately, or than either one could be when opposed by the other.

Yet with the mighty pull of the sun added to that of the earth, the vessel is not any heavier at midnight than it was at noon. This observation proves that the law of gravity, as commonly understood, does not exist the astronomer Newcomb said, "all other natural forces admit of being investigated, but gravitation does not." We agree to that, for when we begin to investigate the law of gravity, we find it rather illusory; and the more diligently we seek, the less we will find of it.

Sir Isaac Newton himself said, in a letter to his friend, Dr. Bently, February 25, 1692, "That gravitation should by innate and inherent in matter, so that one body can act upon another at a distance — is to me so great an absurdity that I believe no man who has, in philoso-phical matters, a competent faculty of thinking, can ever fall into it." You see from this that Newton did not consider gravitation a fact, nor did he expect anyone else to do so; but most people today are willing to declare a thing falls because the earth pulls it down.

An object falls rather because it no support; there is nothing to hold it up.

It must rest finally upon something heavier than air; therefore, the law of gravity must be without basis

'The Copernican system is that which represents the sun to be at rest in the center of the Universe, the earth and planets to move round it as a center. Many who reverence the name of Copernicus in connection with this system would be surprised to find how MUCH OF ERROR, UN-SOUND REASONING, and HAPPY CONJECTURES combined to secure for him in all times the association of the system with his name.

One of the principal works (if not the principal work) of Copernicus is entitled, De Revolutionibus Orbi-um; in fact, it is claimed by some that it was this work which made him famous. It was published not long before his departure, and it has a preface — a preface reasonably sup-posed to have been written either by himself or one of his assistants. In it, the following confession is made:

'It is not necessary that hypotheses should be true or even probable, it is sufficient that they lead to results of calculation which agree with calculation...Neither let any one, so far as hypotheses are concerned, expect anything certain from Astronsince that science can afford omy, since that science can afford nothing of the kind; lest, in case he should adopt for truth things feigned for another purpose, he should leave science more foolish than he came... The hypotheses of terrestrial MO-TION was NOTHING BUT AN HY-POTHESIS, valuable only so far as it explained phenomena, and not con-sidered with reference to absolute truth or falsehood.

Every well-informed person knows that Copernicus took the position that the sun was the center of the universe and was stationary.

If any one of these advocates of the Copernicus system of astronomy, knows of any proof that he ever presented, I shall esteem it a great favor if he will let me have it!

Doubtless many of my readers have heard of a man by the name of Herschel, another one of these wise (?) astronomers. Let it be kept in mind that Copernicus claimed the sun was the center of the universe, and was stationary. Now, Mr. Herschel claimed that the "solar system as a whole was moving towards a point in the celestial sphere not far from the star Lambda Hercules." Story of the Stars, page 87, G. F. Chambers, F.R.A.S.

It is asserted by these advocates of the Copernican system of astron-omy that it is an EXACT SCIENCE — and yet these two great men, Co-pernicus and Herschel, contradict each other, Copernicus saying that Herschel is a liar and Herschel saying Cont. on page 4

## The Earth Has No Motion

You can point a telescope to the north star tonight and then fasten it securely after getting the star in the field of the glass, and you will always find the star in your instrument, every clear night, without further hunting or adjustment. This fact proves

the earth at rest.

The north star is said to be "fixed," that is, it does not change its relative position with regard to the earth. Astronomers say the earth has three motions. Anyone of these movements, if real, would move your telescope far enough to take the star out of its field. Move your telescope only a very little in any direction and prove for yourself, you cannot see the star.

Now think of the earth traveling 64,800 miles an hour in its yearly orbit (see page 25, The Globe Handbook, Rand & McNally, Publishers), 36,000 miles an hour toward the constellation Lyra (see page 325, Astronomy for Everybody, by Newcomb),

Cont. from page 1 that Copernicus is a liar - and FLAT EARTH SOCIETY agrees that

they are both right!
Now, there are other advocates of this infidel system of astronomy who believe that the sun is moving, but they are at loggerheads with each other as to where it is going. The fact of the matter is that the theories of all these men are just so much silly, idiotic speculation, and that they know nothing about it, because they have rejected the revelation of God and have refused to accept logic reason and evidence!

1000 miles an hour in diurnal rotation, and with all these terrible motion, and with at tasse entrole mitons your telescope constantly points to one definite spot. How can this be? The above experiment will show the same result from any part of the earth's surface where the star can be

.. Some one may say that this result is found because the earth is swing-ing around the north star, but this cannot be true because we have seasons, which prove a change of position either or the earth of the sun in relation to each other. And the sun also is said to be a "fixed" body, though it moves from the field of your telescope in about three and one-half minutes.

We do not find any astronomers who claim that we travel around the north star. They do claim we travel around the sun, but how can we travel around the sun and not lose the north star from the field of our rigid-

ly secured telescope?

Will somebody kindly show us how we can place three points in line, then move any one of them in any direction forming an angle to the original line and keep the three points in line? That is what the astronomers' claims amount to in this

The incontroversible facts are: the incontroversible tacts are; the sun moves (see Joshua 10:13; II Kings 20:11), and the earth stands still (see Psalms 93:1; 96:10; 104:5). The north star stands still and all the other stars move around it.

There is no question in my mind that the earth is flat and in the center of the universe. This seems self evident, and is the belief of anyone who really takes the time to think about it. But so many of us are gullible when it comes to scientific pronouncements. I feel the need for better theoretical grounding on the sub-ject of the earth's flatness. # SKYLAB HOAX TWILIGHT OF SPACE SHUTTLE

Well the Saga of The Spook Sky-lab is over, perhaps as Elvis sings...

'Its Over' for good! Many in the Space program are pretty good ole-boys. Can't say they didn't do their bit during the reentry act for 'Sky-lab'. Never saw them put so much effort into... without just outright saying it...demonstrating that the whole thing was just a Childrens Joke. The TV networks took the hint from NASA and played it all out as the old time cliffhanger' like ZORO, or Green Hornet of Buck Rogers and Flash Gordon. NBC each day as they issued another contradictory report (NASA did this on purpose, contradicted themselves on dates etc. each and every day, part of the JOKE) called NASA reports on Skylab "Chicken Little Reports". A chap out here in LA County made up a "survival kit", a tin foil hat mainly and a flat map and dart to pin point the reentry or landing point, and a handkerchief, you put the handkerchief over the eyes and just drop the dart over the map...scientific way to do it...oh yeah, the whole thing is just as really 'scientific as all the rest of the science fiction jibberish called 'space travel' etc. Anyway all TV news gave plenty of coverage to this scientific kit. The Boys at Pasadena NASA are a 'gas' they have always made the joke obvious except to the very feeble-minded.

It goes without saying SKYLAB DID NOT EXIST, but was a "movie serial" kind of like Orsen Wells "Mars Invasion of New York City" done in the 30's. Thousands of the Deceived (oh yeah untold thousands of deceived in New York City? ran for dear life. The Way Orsen did it, was just came on the air and started decribing the events (like moon landing etc) didn't tell the Jerks is was only a "show" so they believed it. He did announce at the End it was a show, but too late... NYC in a panie! This was the Seed or Cerm Idea of the later Russian Spook' or spooknick 'orbiting earth according to Copernecious and Newton. So then our Science Fiotion Show writers and an ENGLISH one named Aurther Fabian Clarke wrote and narrated the moon landing script...and was played on both TV and Radio (note most networks covered themselves flashed on screen 'simulated' but didn't Say the words, so many to this day seem to think somebody Really did land

on the moon, not many, but a few). Many of the jerk class WANT so bad to believe such rubbish that even if the announcer told them it was all simulated, they would pretend they didn't know what the word meant and go right on and "believe it".

Remember in March FLAT EARTH NEWS, we had a message for NASA. The announced plans was to run the "Space Shuttle" Hoax Serial, starting in Oct. "9 right after public schools were re-assembled, so the programers could try to make the children think space exploration was real). Our answer, from NASA came about a month later, something like this was answer to FES and public "we confess can't send any space shuttle now, perhaps in the ...future...at least one year, then perhaps". So we are all clear on that hoax. But from Jan. "79 a very news blitz was on the skylab hoax...day and night mention of it on media

and at same time FLAT EARTH SOCIETY, by the powers that beware, keepoff the airwaves. '78 called so many times on Radio Talk Shows from all over, USA, this help get the word out and keep few shuckels coming in. So we are behind in money, this issue, Sept., Is in the Red (note last couple months few brave souls on Radio have interview me on air, so hope tide is turned. Let every member start to ponder... when you think of "contributing to something" or when dues time comes ...do you WANT the TRUTH to fail to utterly perish from off the earth, if not...what is your Duty, what ever it is, your duty...do it.

it is, your duty...do it.
Interesting to note, the Ball Idiocy came to West from around INDIA (then see to grease) Boys from Nasa in last chapter of the Skylab Serial, had it all "Fall in the Indian Ocean...in other words...the ball world jibberish was sent back...to where it came from and SUNK in the SEA, the Sea which is the

foundation of FES proof, the FLAT SEA. The Flat Sea swallowed up the INDIAN HOAX! Foiled a bit at the end though a Communist newspaper in San Francisco, offered a \$10,000 reward for pieces etc. In Australia a "set up" was made to pretend to get a 'piece of it' just Before the Flat Indian Sea. NASA balked at the Communist newspaper...entering into NASA's game...but the S.F. Examiner, somewhat. NASA..said about the Fake bits of trash presented...we DON'T say it was from Skylab, but may be, go on and pay the \$10,000 (note part of the Original Russian Spooknick deceivers who claimed to 'track Communist spook'ie were and ARE in Australia), it was THEY who arranged the phoney Aussie find, the lad may not be in on it. ## ZETETIC ASTRONOMY

Zetetic and Theorectic Defined and Compared.

The term Zetetic is derived from the term Leteric is derived from the Greek verb Zeteo; which means to search, or examine; to proceed only by inquiry; to take nothing for granted, but to trace phenomena to their immediate and demonstrable causes. It is here used in contradis-tinction from the word "theorectic," the meaning of which is, speculative -imaginary-not tangible, -schem-

ing, but not proving.

None can doubt that by making None can doubt that by making special experiments, and collecting manifest and undeniable facts, arranging them in logical order, and observing what is naturally and fairly deducible therefrom, the result must be more consistent and satisfactory then the contrary method of framing a theory or system—as-suming the existence and opertion of causes of which there is no direct and practical evidence, and which is only claimed to be "admitted for the sake of argument," and for the purpose of giving an apparent and plausible, but not necessarily truth-ful explanation of phenomena. All theories are of this character. "Supposing, instead of inquiring, imagining systems instead of learning from observation and experience the true constitution of things. Speculative men, by the force of genius may invent systems that will perhaps be greatly admired for a time; these, however, are phantoms which the force of truth will sooner or later dispel; and while we are pleased with the deceit, true philosophy with all the arts and improvements that depend upon it, suffers. The real state of things escapes our observation; it it presents itself to us, we are apt either to reject it wholly as fiction, or, hy new efforts of a vain ingenuity to interweave it with our own conceits, and labour to make it tally with our favorite schemes. Thus, by blending together parts so ill-suited, the whole comes forth an absurd composition of truth and error. • • • These have not done near so much harm as that pride and ambition which has led philosophers to think it beneath them to offer anything less to the world than a complete and finished system of Nacomplete and nusned system of Na-ture; and, in order to obtain this at once, to take the liberty of invent-ing certain principles and hypotheses from which they pretend to explain all her mysteries." all her mysteries.

Theories are things of uncertain mode. They depend, in a great measure, upon the humour and caprice of an age, which is sometimes in love with one, and sometimes with

another.

The system of Copernicus was admitted by its author to be merely an assumption, temporary and inca-pable of demonstration. The following are his words: -"It is not necessary that hypotheses should be true, or even probable; it is sufficient that they lead to results of calculation which agree with calculation. • • • Neiter let anyone, so far as hypotheses are concerned, expect anything certain from astronomy, since that science can afford nothing of the kind, lest, in case he should adopt for truth, things feigned for another purpose, he should leave this science more foolish than he came. • • • The hypothesis of the terrestrial motion was nothing but an hypothesis, valuable only so far as it explained phenomena, and not considered with reference to absolute truth or false-

The Newtonian and all other views and "systems" have the same general character as the "bypothesis of the terrestrial motion, tramed by Copernicus. The foundations or premises are always unproved; no proof is ever attempted; the necessity for it is denied; it is considered sufficient that the assumptions seem to explain the phenome-

na selected. In this way it is that theory supplants theory, and system gives way to system, often in rapid succession, as one failure after anoth-er compels opinions to change. Until the practice of theorising is universally relinquished, philosophy will con-tinue to be looked upon by the bulk of mankind as a vain and mumbling pretension, antagonistic to the highest aspirations of humanity. Let there be adopted a true and practical free-thought method, with sequence as the only test of thruth and consistency, and the philosopher may be-come the Priest of Science and the real benefactor of his species. "Hon-esty of thought is to look truth in the face, not in the side face, but in the full front; not merely to look at truth when found, but to seek it till found. There must be no tampering with conviction, no hedging or mental prevarication; no making the wish father to the thought'; no fearing to arrive at a particular result. To think honestly, then, is to think and honesty of freely; freedom thought are truly but interchangeable terms. For how can he think honestly, who dreads his being landed in this or that conclusion? Such an one has already predeter-mined in his heart how he shall think, and what he shall believe. Perfect truth, like perfect love, casteth Cont. Dec. issue

COLUMBUS PROVED

**EARTH FLAT** 

Almost everything that has happened in the past and is happening is twisted, distorted and reversed helf nelsoned and reversed again till all real events and knowledge and the truth of all things is lost. In the claim was made in Grease earth a ball, our Society's research shows this Babel idea was brought to Greek Isles from India so was an old super-stition even then. In 1492, Columbus (Many say he was Israelite, if he was a Real Israelite Hebrew he would know earth flat) determined to prove to the world that earth was NOT a Ball. Nearly every one very superstitious then, thought earth a globe that if you sailed out too far, would go down hill and fall off, which of course you would IF world is globe. So his voyage was for the Express Purpose of PROVING EARTH FLAT! He did it, proved there was no curviture on water, no danger of falling off as earth was FLAT. His great contribution to the world was that he threw old "theorworld was that he threw old "theories" of a ballworld out and set out to DEMONSTRATE, 'Zettectily' that the world was Flat...as per the Hebrew scriptures and COMMONSENSE would tell any reasonable logical Human Being. So we keep COLUMBUS DAY as he was one of us, a Zetetic FLAT EARTHER! The 'Marke' of the beat all over keep 'Marks' of the beast all over keep Columbus day never dreaming what the REAL MEANING OF THE DAY IS! as usual the herd is in Reverse.

MIDNIGHT FLYERS

#### GOING AND COMING... SAME TIME

UCLA (University of California Los Angeles) AP: 'Astronomer' Bruce Margon claims he's located a mys-terious Star that travels in reverse directions at same time. It travels at 115 millions MPH in both directions. He and a 'Team of Scientists' have been studying this star for over a year, have all the facts on it. It is exactly 60,000 Trillion miles ax is exactly 69,000 Trillion miles away, and going and coming...at 115 million mph. These "Scientists" make from \$30,000 to 60,000 per year, many from 'taxpayers' grants' of hundreds of millions given a declarate. of millions given each year to Universities and their Priests...to make these finding known to the 'Mass'. (Ain't Science Wonderful?)

#### DOOMSDAY

The upright Spike, time for utter collapse of the USA economy is set for Oct. 15, 1979, maybe earlier or later, but all set...the time has arrived D-Day approaches the Planned Downfall of USA: After doomsday your bank deposits will be worthless what you'll need is not money but

Food. Arabs will Reject the American Dollar, so no oil. Rockyfeller gang and other one world international bankers etc etc... so says E.L. An-derson, Ph.D., Government Education Foundation.

#### SPINN OFF?

Around the corner is what appears to be the final blow-off in the great inflationary cycle of the last forty years. The result, unfortunatelorry years. In result, unfortunately, will be the complete destruction of the dollar. (Jerome F. Smith, world perspective ERC pub. B.C. CANADA). (Ed. note USA in the valley of the shadow of death... enemies within and without.)

#### TONG WAR IN IRELAND

Dublin, Ireland 7-79: Over a dozen Chinese from rival gangs battled with knives, machetes, hatchets and meat cleavers in a Dublin street... as horrified bystanders looked on.
One killed, many seriously wounded. Started in a Chinese restaurant.

## RIVERS

Astronomers assume the earth is a globe, and they also assume it is flattened at the poles, somewhat like an orange. This Polar depression they further assume, is accompanied by a corresponding bulge at the equator of thirteen miles all round. Such is their theory; let us see what is the fact. The Mississippi River, flows from North to South, a distance of about 3,000 miles towards the Equator. According to the accepted theory it must therefore be contin-ually ascending this bulge as it nears the equatorial line; until, by the time it reaches the Gulf of Mexico it will have climbed a hill something like eight miles high! It is contrary to the nature of water to run up hill, but we know that it will always seek a falling route down to its level in

Again, the river NILE in its long course flows for 1,000 miles with only a fall of one foot. This would be an impossibility, if the supposed cur-vature of the earth's surface were a reality. Thus we see how irrefutable facts directly controvert the theories and assumptions of modern Astronomy, and how persistently these facts are ignored.

Before going further, it would be well to summarize the evidence

already given, so that we do not lose sight of the ground so far secured, or the logical conclusions obtained from practical observation.

We have, then-

1st: The surface of water in long distances has been experimentally found to be absolutely level.

2nd: Such a condition could not exist if the earth and sea formed a globe.

3rd: This condition could exist on a plane earth.
4th: Therefore as such does exist,

the logical conclusion of necessity is that THE EARTH IS A PLANE, and not the globe of theoretical be-

From the fact that the surface of water everywhere is proved to be level, every impartial person must see that the surface shape of the earth is bound to be horizontal; for one cannot imagine oceans with level surfaces around a spherical earth.

Our conclusion is logical, and

in no way speculative. It is obtained as the result of examining evidence and facts, which cannot be refuted. It has, therefore, none of those unreliable characteristics which result from the astronomical process of the-orising from unproved assumptions.

## Now is The Hour. . .

In this world of deceit one must have the TEN LAWS written on the fleshly tables of the HEART...to be able to get through all the trials and tests we face. God judges the reins of the heart, so our thoughts, words and deeds must be holy, just and True. Many so called Christian Preachers teach "it was all finished at the cross". Yes it was for Jesus, he came to do The Fathers Will and did do it. But not finished for us...we too must do The Fathers Will. He told and showed us the way, he said they who "Believe" in him will "do my sayings" Rev. 22:12. And when he returns...will Judge everyone by his Works.

A word of praise to the parents that serve God and teach their children to do so. Blessed are they in the eyes of God. In this world of deceit many homes are destroyed with the breaking down of the morals. Then goes the Home. Truely, Breaking

up is hard to do ...what misery it does bring unrepairable heartache and sorrow. So lets look to those parents who serve God and pray together, let them be light unto us. How other poor children are being deceived corrupted by the wicked immoral ways of this present evil world. Such abominable ways and practices they are being taught.

Another abominable practice that

Another abominable practice that is being done and allowed is the visectors experimenting, cutting hacking, poisoning, torturing the poor dumb animals in any way they wish. How I pray they could and Will be stopped. Well we are all being judged and saved or condemned by every thought, word, and deed. There is one Heaven Above and one Earth Below. God is Creator of all and the JUDGE of all.

## **ECLIPSES**

ECLIPSES.—After deciding the shape of the earth, we are generally met with the simple interrogation, "Well, if the earth is a plane, how do you account for eclipses?" As if an eclipse of the moon could determine or affect the shape of the earth! I shall not attempt at this juncture to account for eclipses; but for the sake of those who consider an eclipse of the moon is a proof of the rotundity of the earth, let us emphasise the following facts, in opposition to this idea.

lst: Water is Level, and therefore the earth is a plane. This truth has been practically demonstrated; so that however obscure and unexplainable celestial phenomena may be, they cannot in any way affect or displace an established and demonstrated fact.

2nd: Eclipses are not calculated, and subsequently predicted—as generally believed—on the theory that the earth is a globe.

3rd: Eclipses recur in cycles, and a correct knowledge of the length of an eclipse cycle is all that is necessary in order to calculate and predict future eclipses.

4th: Eclipses were calculated and

predicted by Thales-600 B.C.-long before the Copernican hypothesis was established.

Sth: Eclipses of the moon have been observed when both sun and moon, at the same time, were seen above the horizon. On such occasions, it evidently could not have been the earth's shadow obscuring the moon's face! (See McCulloch's Geography P. 85.)

Geography P. 30.7

The science of Astronomy must be in a bad way, when it has to seek lunar support; and if no more substantial evidence can be brought forward to support the sphericity of the earth than a supposed shadow on the moon's face, it is time that the theory of rotundity was renounced.

Why do not Astronomers sub-

Why do not Astronomers substantiate their hypothesis with facts, and not with mere hypotheses? If they did this their position would be unassailable, and we should have no cause to complain of their doctrines.

They shroud their "science" with such mathematical jargon, that it would seem they seek to avoid the reasonable demands of truth seekers, for irrefutable proofs of the truth of their theories; but this artifice successfully works on the credulity and the imaginations of their numerous and unsuspicious disciples.

# THIS FLAT EARTH AND DR. EINSTEIN

by Michael Becker

This is the centennial year of the birth of Albert Einstein, the man most people recognize as the greatest scientist of our century. Yet few people know what Einstein actually did. Many have heard of his theory of relativity, and some associate Dr. Einstein with the atomic bomb.

"He is responsible for the theoretical breakthrough which made the atomic bomb possible." is the way it is often described in the media. That is rather like saying that Isaac Newton was responsible for the theoretical breakthrough which made it possible for the upsidedown Australians to stop falling off the earth. This is not to belabor the relationship of Einstein to the atomic bomb, but merely to point out that experience precedes theory, and not the reverse. Or, As Dr. Einstein put it, "The only justification for our concepts and system of concepts is that they serve to represent the complex of our experiences; beyond this they have no legitimacy." (The Meaning of Relativity, 1922) Science without common sense is not science.

In this centennial year of his

In this centennial year of his birth, it is ironic that the public who toast the great scientist still cling to the old scientific theories which Einstein proved wrong, the obsolete ideas of Copernicus and Newton.

Copernican Astronomy

and Dr. Einstein

The sun is the center, said Copericus; the earth and the planets revolve around the sun. But Dr. Einstein teaches that while motion can only be described relative to a fixed point, there is no objective, scientistic way to define any point as being tixed. To choose the sun as a fixed point is an arbitrary choice which

makes no more, nor less sense than choosing the moon, or a Cadillac sized asceroid floating in space. Whatever "fixed point" is chosen, the motion of other astral bodies relative to it may be described by similar mathematical equations.

Einstein did not say that the earth is the fixed point in the universe. He said that there was no objective, scientific way to determine a point is fixed. One may assume a point is fixed by an arbitrary decision. Or one may choose a fixed point out of superstition, (the popularity of the Copernican system may have its origins in the sun worshipping cults of the ancients). One may choose a fixed point on ideological or theological grounds, (a belief that humankind is Fix frail and unimportant to deserve to live at the center of the universe, for instance). One may make his choice on Scriptural grounds, (Psalm 104:5-Thou didst set the earth on its foundations, so that it should never be moved). Or one may choose that which his experience and common sense tells him is the fixed point in the universe. ("The only justification for our concepts...is that they represent the complex of our experience," said Dr.

Einstein).

The Flat Earth Society's position, of course, is that it is the common sense, and the Bible which tell us where the fixed point in the universe is placed. It is the earth which is fixed, according to the Scriptures. It is 'the home of humankind, who are created in the image of God. It is the place where man and his creator mast in dealty Christian aversages.

meet in daily Christian experience.

The position of the Flat Earth Society, regarding the center of the universe, is thus fully compatable with Einstein's teachings and his theory of relativity. And the Copernican position has been disproved. Cont. Dec. Newtonian Physics and Dr. Einstein

Dear Mr. Johnson,
The enclosed newsletter of the
Institute for Creation Research, contains two references to the Flat Earth Society, which are critical and un-fair. The first fellow, Voorhies, com-pared the Creation Research Society, to the Flat Earth Society, as though it were something to be ashamed of.
The second one, Gish, denies that
a single member of the Creation Research Society, is also a member of
the Flat Earth Society.
He doesn't know what he is talk

ing about, as I belong to both, and I am writing to him to let him know am writing to aim to let him know that he is wrong. I joined the Creation Research Society in the first place, because they believe as I do, that God created the entire universe in six days, and that the world is less than the house of the control of the contro less than ten thousand years old. They are also opposed to evolution, as I am, but there is no justification for casting unwarranted slurs on the Flat Earth Society, because they, themselves are wrong, in believing that the sun is the center of the universe, and that the earth is a spin-ning ball that revolves around the sun, and I stressed these facts to Mr. Gish.

With best wishes to Mrs. Johnson, and yourself, Sincerely, C.J.D., Philadelphia

Mr. G.J.D. is referring to a Society nearby in San Diego who was featured with us in TWA's outstandteatured with us in IWA soutstand-ing inflight mag. AMBASSADOR a while back. I remember well when this outfit began its work, main pur-pose of which is to side track in-telligent Christian People...those who know that the absurd evolution theology is illogical and untrue...prevent them from going on to join us and learn that evolution is not the MAIN subversion of the Christian mind... but is only a Twig on the MAIN DECEIT the Hoax that puts Chris-DECEIT the Hoax that puts Christians's minds out of gear, the Crease Ball Hoax. I took a Greyhound bus up to Canada to see the Eclipse in late Feb. Before going I went into three or four Astronomy Dept's, of leading Universities, to get details. Some of the books on Eclipses were pretty complicated, but all considered earth a perfect ball and used a lot of signs

a perfect ball and used a lot of signs and equations of spherical trig.

If the earth is flat, there should be a lot of slight discrepancies, but in each instance the eclipse path went where they said it would and lasted to a second as long as it was said. I watched it from Stud Union and the study of the second as long as it was said. I watched it from Stud Union Stud Union Study of Manifolds in the Bld. of University of Manitoba in the Southern part of Winnepeg near Ramada Inn, where I missed a ride to a longer area near Brandon.

maps of previous eclipses and all the data sure seemed impres-sive as all predictions seemed to come true to the second. Will spherical trig formula work on a flat though round wheel?

Reply: Stop and THINK! Just what has the Moon or eclipse got to do with the fact we have PROVED EARTH FLAT? If some Witch told you the FLAT? It some witch told you the floor of your room was a ball, you go home to 'check' come in just look at the LICHT BULB see that it round so feel the witch PROVED your floor was round? Of course not, your floor was round? Of course not, no reason to look at the moon, (or light bulb) to find out if your floor is flat!...is that REASONABLE? One of the ORIGINAL tricks of the scientists' when still called magicians witches, jugglers, astrologers, head bump readers, etc. etc. was to tell the people...tonight the moon will be darkened at such and such a time the people...tonight the moon will be darkened at such and such a time we either Cause it or KNOW it because of our Magic Books (then as NOW filled with magic little numbers, signs, equations, etc.etc.) The people, say in 1000 B.C. would say, WOW! my my how smart are these Magicians, Sorcerers. Did Viking I land on Mars or in the Mojave Desert?  ${}^2BC = {}^{\prime\prime}Begin$  Horizontal Curve: Two feet (height)," Abbreviation painted on rocks for the construction of roads in Californial (Note: The marking (last letter) is thick, but looks more like a C than a G-2 BC.

In 1976 Viking I supposedly landed on Mars and took the first pictures of the "red planet". But instead of that - the camera caught NASA red-handed!

This article and newsphoto tell the story: about the strange markings 2 BG (or C) that showed up in the pictures "sent back from Mars" (?). pictures "sent back from Mars" (?). What are these markings and how did

they originate?

Some time ago it occured to me might be abbreviations used during the construction of roads. I'm sure you have seen them painted on rocks and boulders while traveling around the state. The abbreviation BM (Bench Mark), for example, is

fairly common.

California Highway Department
(Div. of Roads, in San Francisco has a list of the abbreviations used.

Looking down the list you will

find BC (note the capitals as on the "mars rock"). Further down you will find 4F, SF and 6F — the numeral before the letter — to denote fence height. What can be inferred from this is that the 2BC on the so-called Mars rock its nothing more as less Mars rock is nothing more or less than the abbreviations for "Begin Horizontal Curve" (BC) preceded by the numeral 2 denoting the prescribed height of two feet !!!

This is a rare photo, TIME, NEWSWEEK etc. would not use it. .007, Investigative Reporter for FLAT EARTH NEWS.

When the boys from Pasadena when the boys from rasadena pulled the Mars Landing Caper in '76, hard to explain what a joke it all was to us Californians especially Southern Californians. In particular to us in the desert regions such as to us in the desert regions such as Mojave. We all recognized the MARS scenes at once as 'our desert'. Many times the TV News Men when showing the 'Mars Landscape' would on purpose first call it the Mojave Desert, then chuckle and say pardon me, this Mars?... eh eh eh. As I've said many times before, our Boys in Pasadena. Jet Propulsion Lab are a million laughs. When they are pulling their capers, like the Mars Deal, every day they have elementary school every day they have elementary school children come in and run the controls for them and generally...try their best to let EVERYBODY KNOW that they are only playing games...for children and the feeble minded...keep em entertained. Nearly all science fiction movies are made within few miles movies are made within few miles of where we live on edge of the Mojave and Antelope Valley...including the very last picture Jac Warner made. Many of the scenes made in sight of our house ...the part about MAD DOC trying to kill the persons who were ready to kill the persons who were ready to Reveal the Fact, and just barely missed, staged car wreck and brakes

crudely painted letters "B" and "G" and the numeral "2" appear in a picture transmitted from Mars by the Viking I lander yesterday.

The Jet Propulsion Laboratory's Stan Miller said scientists were study-

ing the picture closely and were awaiting special computer enhance-ment of the shot — expected today for a better look.

"We aren't officially terming them anything," said Miller, who added they could be "literally any-

thing."

fixed to go out etc. In Capricorn I the witnesses finely got to the News Media...and did reveal the fact Moon Media...and did reveal the fact Moon Landing and entire space program faked and so found a measure of protection...I'll not say any more about it, but it was a TRUE picture! Since the Death by Cancer of Nazi Mad Dog Von Braum, Marjory's and my health has improved...well to get back to the entirely FAKED Space Program! All California including all the Deserts have been engineered and the Deserts have been engineered and the Deserts have been engineered and basic reports made to put in ROADS (one of the reasons Cal is ahead of most Western States, is access roads everywhere). Also motorcycle riders and hikers hike every inch of the Deserts...and leave behind their mostle like veer or like the second of the control of the deserts...and leave behind their mostle. Deserts...and leave behind their marks, like years ago 'kilroy was here' many out there now MIDAS MUFFLERS and STP etc etc. In this MARS pic a MIDAS MUFFLER sign was in the picture! Also here on the desert many ride the deserts in Dune Buggies just a car stripped down, big tires. Some have tried to make Volkswagons DB's it don't work, this GERMAN NAZI product like its inventors...can't take the 'heat'. So many are left to rust away, right where they stalled...many said right where they stalled...many said at the time not only was a MIDAS MUFFLER visable...but an old

VOLKSWAGON! It don't come through in these little reduced photos though. But the California Highway Dept's markers do come through loud and clear. I have here an offical list of Highway Depts abrevations in layof Highway Depts abrevations in laying out prospective roadways, plain and plane fact is the MARS LAND-ING is PROVED to be right here in California Desert! I've told you before, will tell you again, the fact the SPACE PROGRAM...Space Shuttle etc. is ENTIRELY FAKED and not only that but is an 'open secret' ...here in California...Headquarters for the Spaced Out Program...in more for the Spaced Out Program...in more ways than one. Is estimated after years of space-out science and their dopes fiend dreams half of our youth are spaced out, on Sorcery and witch-craft. # **Newtonian Physics** and Dr. Einstein

by Michael Becker

Newton's theory teaches that there is a force in the universe called gravity. This force is what holds us to the spinning ball which is the earth, and this force holds the planets and the stars in place.

Einstein's theory of relativity dis-cards this "force" theory, which arose in Newton because of a mis-take. When Isaac Newton attempted to force a Euclidian geometry upon a universe it did not fit, theory taking precedence over experience) h forced himself into a corner he could not get out of except by hypothesiz-ing the "force of gravity." Edding-ton describes the scientist who assumes that space is Euclidian, a man who should be able to make experimental observations and soon discover that his theory "cannot be recon-ciled with observational results, and so realize his mistake. But the mind does not so readily get rid of an ob-session. It is more likely that our observer will continue in his opinion, observer will continue in his opinion, and attribute the discrepancy of the observations to some influence which is present and affects the behavior of his test bodies. He will, so to speak, introduce a supernatural agency which he can blame for the consequences of his mistake... The name given to any agency which caused deviation from uniform motion in a straight line is force, according to the Newtonian definition of force... A field of force represents the discrepancy between the natural geometry of a co-ordinate system and the abstract geometry arbitrarily assigned to it." (As quoted by Bertrand Russel in The A B C of Relativity, 1925).

Newton's hypothesis of gravity is an invention, akin to the story a

child makes up about a monster who causes two and two to stretch to five on his exam paper. There is no force; there is no gravity; there is no mon-ster; and two and two still make four according to Dr. Einstein.

#### THIS FLAT EARTH AND DR. EINSTEIN

Albert Einstein did not prove that the earth was flat, though he certainly might have, had he set his mind to it. What he did do is free us from irrational superstitions masquerading as scientific theory, superstitions which are traditionally used as support for the spinning ball theory. Unfortunately, 24 years after Einstein's death, most people do not stein's death, most people do not realize that the Copernican and Newtonian systems have been tossed on tonian systems have been tossed on the scientific scrap heap along with alchemy and the reading of character from bumps on the head. "The mind does not so easily get rid of an obsession." as Eddington said in the session," as quote above.

But common sense ultimately But common sense ultimately wins out, as the history of scientific thought tells us. The work of the Flat Earth Society, and the popularization of Einstein's theories, are both contributing to the gradual rejection of the nonsense hypothesized so many hundreds of years ago by Comany hundreds of years ago by Committee and Newton pernicus and Newton.

Our world view must be based

on common sense and experience.
Dr. Einstein bears repeating on this.
"The only justification for our concepts and system of concepts is that
they serve to represent the complex of our experience; beyond that they have no legitimacy." Experience have no legitimacy." Experience teaches us the shape of the earth. And it is flat.

## The final solution

In our wild dream world of imagination, where everything seems to be getting worse to everyone and they can't find a solution to it all. I think it may be about time people stopped to think and look at things in a Good Common Sense Way. Look around you, ships are transporting oil each day, air Planes flying to and fro, trains and automobiles traveling from Los Angeles to San Francisco to New York, to Sydney, all of them designed to travel on a straight path on a Level a Plane the Plain Truth is the Plain Truth...earth is Flat. Use your good sense, if people would just stop and Think...they would know earth is Flat. Now that will be the Be-ginning of enlightment when you see and know that what you have been taught the spinning ball world is a False Concept. THIS will Start to enlighten you to a Lot More False Concepts...you have been going along with. We've been hearing these false doctrines for years and get to think-ing and believing they are right and true, but Not So! There are Deceivers around...who make problems for ev-

eryone. But all we must do is to Seek The Truth as we have been told and taught by Jesus Christ, and now we are near CHRISTMAS DAY...we all celebrate his birth and we give Thanks to Him for giving his Life... to Show us the Way of Life Jesus said: If you love me you will Keep and Do my Words. Yes to do and Live by his words which he told and showed us...not only to believe on his name...but to Do what He told us and to Love one another as he loved those which the Father Gave Him...and to Do Unto Others as We Would Have Then Do Unto as We Would Have Then Do Unto Us. The exact way to express and do these things, the channel by which and through which we express Gods Love is by KEEPING THE TEN COMMANDMENTS...in the spirit was the channel and for the purpose they and intent and for the purpose they were intended, to be the FINAL SOLUTION to mans troubles on this ... # FLAT MEDITERRANEAN SEA

According to official 'texts' in the necording to official texts in the public schools, how the Med. got there is: a hole was broke loose, a breach was made at the Strait of a Gibraltar that let the water into the Gibraltar that let the water into the low lying Desert. First it was a vast Waterfall 100 times higher than Victoria Falls. It kept flowing estimated 1000 years. till as always, the Laws of Physics were fulfilled, nothing can alter or change the Laws of Nature called Physics. Law of Nature-Physics is Water flows till it backs against something, then laws backs against something, then lays level, the water from the Ocean flowed till it REACHED ITS OWN LEVEL. So today the Mediterranean ... is an absolute living Proof that the Religion of Blind Faith Superstition called 'Science Theory or Crease Ball Theology or Christian Science, (modern Science is Really 'Christian' Science concocted and elaborated by More Poles Edd. with the best Science to the Science of the Science Science of the Science Science Concocted and elaborated by More Poles Edd. with the Science Sc Science concocted and elaborated by Mary Baker Eddy, while stoking her Oil Burner, which says that everything is Just the way you Want it to be you MAKE things so by just saying it, she did grow beautiful Boston Poppies). But when the Ocean stated to low just the low desert Opium Dreams could NOT Stop the Water from seeking its own Level and Laying FLAT. So the Strange God

though all the present Science books existing on earth perish and turn to dust, these words will REMAIN FOR-EVER AS LONG AS THE WORLD LAST, EARTH IS FLAT.

(Note: Mad Crazed German Scientists in Germany claiming to be 'Holy Romans' in 1600 declared the childish IDIOCY of Copermecious to be True. In March 1616, the real Holy Congregation ruled in part: the claim earth a spinning ball whirling also around the sun...is absurd...scientifically FALSE and CONTRARY to the facts known to be true in the to the facts known to be true in the Holy Scriptures) The Congregation Holy Scriptures) The Congregation of the Index March 1616, ROME! Med. is 1200 miles wide, about 2 miles deep someplaces. IF world a Crease Ball 126 miles of curve across the width! In other words... on a ball the bottom of the sea in middle would be at least SIXTY MILES, 60 miles HICHER THAN interfer when human wisdom falters! interfer when human wisdom falters."
HICHER than the shore! you could not see over the bottom...ha ha ha... what a JOKE Its NOT the inventors or tellers of the grease ball myth that is STUPID but the BELIEVERS. Truely is the, or 'a', mark of a beast to believe such NONSENSE!

## ZETETIC ASTRONOMY

Zetetic and Theorectic Defined and compared.

Second Installment:

"Perfect truth, like perfect love, casteth out fear."

Let the method of simple inquiry—the "Zetetic" process be exclusive—by adopted—experiments tried and facts collected—not such only as corroborate an already existing state of mind, but of every kind and form bearing on the subject, before a conclusion is drawn, or a conviction affirmed.

"Nature speaks to us in a peculiar language; in the language of phonomena. She answers at all times the questions which are put to her; and such questions are experiments." "Nature lies before us as a pan-

"Nature lies before us as a panorama; let us explore and find delight, she puts questions to us, and we may also question her: the answers may often times be hard to spell, but no dreaded sphinx shall interfere when human wisdom falters."

We have an excellent example of a "Zetetic" process in an arithmetical operation, more especially so in what is called the "Colden Rule." or the "Rule of Three." If a hundredweight of any article costs a given sum, what will some other weight, less or more, be worth? The separate figures may be considered as the elements or facts in the inquiry; the placing and working of them as the logical arrangement of the evidence; and the quotient, or answer, as the fair and natural deduction,—the unavoidable or necessitated verdict. Hence, in every arithmetical or "Zetetic" process, the conclusion arrived at is essentially a quotient; which, if the details are correctly worked, must of necessity be true, and beyond

the reach or power of contradiction.

We have another example of the
"Zetetic" process in our Courts of
Justice. A prisoner is placed at the
bar; evidence for and against him is
demanded: when advanced it is carefully arranged and patiently considered. It is then presented to the Jury
for solemn reconsideration, and whatever verdict is given, it is advanced
as the unavoidable conclusion necessitated by the whole of the evidence.
In trials, for justice, society would
not tolerate any other procedure. Assumption of guilt, and prohibition of
all evidence to the contrary, is a practice not to be found among any of the
civilized nations of the earth — scarely
indeed, among savages and barbarians; and yet assumption of premises,
and selection of evidence to corroborate assumptions, is everywhere and
upon all subjects the practice of theoretical philosophers!

The "Zetetic" process is also the

The "Zetetic" process is also the most natural method of investigation. Nature herself always teaches it: it is her own continual suggestion; children invariably seek information by asking questions, by earnestly inquiring from those around them. Fearlessly, anxiously, and without the slightest regard to consequences, question after question, in rapid and exciting succession, will often proceed from a child, until the most profound in learning and philosophy, will feel puzzled to reply; and often the searching cross-examinations of a mere natural tyro, can only be brought to an end by an order to retire—to bed—to school—to play—to anywhere—rather than that the fiery "Zetetic" ordeal shall be continued.

If then both Nature and justice, well as the common sense and practical experience of mankind demand, and will not be content with less or other than the "Zetetic" process, why is it ignored and constantly violated by the learned in philosophy? What right have they to begin their disquisitions with fanciful data, and then to demand that, to these all surrounding phenomena be moulded. As private individuals they have, of

course, a right to "do as they like with their own;" but as authors and public teachers their unnatural efforts but as authors and are immeasurably pernicious. Like a poor animal tied to a stake in the centre of a meadow, where it can only feed in a limited circle, the theoretical philosopher is tethered to his premises, enslaved by his own assumptions, and however great his ta-lent his influence, his opportunities, he can only rob his fellow men of their intellectual freedom and independence, and convert them into slaves like himself. In this respect astronomical science is especially faulty. It assumes the existence of certain data: it then applies these data to the explanation of certain phenomena. If the solution seems plausible it is considered that the data may be looked upon as proved demonstrated by the apparently satis-factory explanation they have af-forded. Facrs, and explanations of a different character, are put aside as unworthy of regard; since that which is already assumed seems to explain matters, there need be no further concern. Guided by this principle, the secretary of the Royal Astronomical Society (Professor De Morgan, of Trinity College, Cambridge), reviewing a paper by the author, in the Athenoeum, says: "The evidence that the earth is round is but cumulative and circumstantial; scores of pheno-mena ask, separately and independently, what other explanation can be imagined except the sphericity of the earth?" It is thus candidly admitted that there is no direct and positive evidence that the earth is or assumed to be so in order to af-ford an explanation of "scores of phenomena." This is precisely the lan-guage of Copernicus, of Newton, and of all astronomers who have laboured to prove the rotundity of the earth. It is pitiful in the extreme that after so many ages of almost unopposed indulgence, philosophers instead of beginning to seek, before everything else, the true constitution of the physical world, are still to be seen la-bouring only to frame hypothese, and to reconcile phenomena with imaginary and ever-shifting foundations Their labour is simply to repeat and perpetuate the self-deception of their predecessors. Surely the day is not far distant when the very complications which their numerous theories have created, will startle them into wakefulness, and convince them that for long ages past they have but been idly dreaming! Time wasted, energies thrown away, truth obscured, and falsehood rampant, constitute a charge so grave that coming generations will look upon them as the tions will look upon them as the bitterest enemies of civilisation, the heaviest drags on the wheels of progress, and the most offensive embodiment of frivolity, pride of learning, and canting formality; worse than this — by their position, their standing in the front ranks of learning, they deceive the public. They appear to represent a solid phalanx of truth and wisdom, when in reality they are but as the flimsy ice of an hour's induration-all surface, without substance,

Let the practice of theorising be abandoned as one oppressive to the reasoning powers, fatal to the full development of truth, and in every sense, ininical to the solid progress of sound philosophy.

If, to ascertain the true figure and condition of the earth, we adopt the "Zetetic" process, which this is the only one sufficiently reliable, we shall find that instead of its being a globe—one of an infinite number of world's moving on axes and in an orbit round the sun, it is the directly contrary—a Plane, without diurnal or progressive motion, and unaccompanied by anything in the firmament analogous to itself; or, in other words Earth is the Only Known Material World in Existence!

Flat Earth Society, I copied your address from a magazine recently, and your viewpoint intriques me. Do you really have empirical evidence from which to argue? I would appreciate hearing from you on this point and about your organi this point and about your organization and its viewpoints. Frankly, I have never heard any argument against the spherical earth concept, but I would like to hear from you if such arguments do exist.

Sincerely Yours, Professor, U. of Mass Amherst, Mass.

Reply: You will note all Profes-sors use word 'spherical' instead of 'globe' or ball. One member, student at UC in Pasadena tells me his professor when he hears earth called a - sphere, sphere, he yells, no Do this, check closely, you will find sphere really means a circle, a FLAT CIRCLE. How about sphere of influence' or sphere of friends, etc. etc. — always means a flat circle. KNOWN WORLD IS A SPHERE, OR FLAT CIRCLE! North center, ice ring the outer known limit! is not today or has there EVER been found any logical, reasonable, rationargument rgument for a 'globe world'. EVIDENCE that IS empirical. Al.I. EVIDENCE that IS empirical, is FLAT. The only evidence existing on earth today, 1979, that earth a ball ... is TV movies and Pictures made by the Florida Carnies' and pictures given out by the PATHOLOGI. CAL. Liars of Communist USSR. There EXISTS no other 'evidence' for a grease ball world. Years and years ago, our USA courts, after so many cases of blackmail etc., using FAKED PICTURES that Pictures are not to be taken as sole evidence. So not to be taken as sole evidence. So NO EVIDENCE EXISTS ON THIS FLAT EARTH for the heathen 3000 year old Babel MYTH. Dear Mr. Johnson,

Several weeks ago I was listening to a New York radio station about the Pope's arrival from Boston to New York, I cannot receive NY TV sta-tions on my set and it was before his arrival, so the commentator was forced to fill in the time. He said that the Pope would be traveling the entire time in the US on TWA and that 4 pilots of TWA believe that the earth is Stationary and Flat! No names were mentioned and he did not say these four were in any way connected with the Pope's flight. I am not sure what station broadcast the above, as it was raining very heavy in NY and kept switching sta-tions because of static. It is a Good sign when people whose job it is to fly over the earth, have to realize it is flat. I am enclosing a small donation to help you with your mailing expenses.

Sincerely, Member Philadelphia

Think how strange that is in a day when Scientists, Christian Leaders, when Scientists, Christian Leaders, are known to be as treacherous as rattlesnakes and crazy as bats! so crazy and double minded? They have departed from the world of reality so now live in a world of delusions. The Bible and Life itself is 'about' laws, rules, regulations and systems of BEHAVIOR of HUMAN BEINGS. Jesus didn't come to just to save our soul but to tell you how to LIVE! The Bible is not about religion but trying to work out a system whereby Man and the Entire Creation .can function together without beating each other to death, in short, some fundamental RULES whereby some fundamental RULES whereby we can ALI, feel safe and secure to stop wars and rumors of war...stop the hideous practice of 'preying on one another'. In about 700 BC the 10 Tribe Israel was taken away captive then scattered...never so far to return to the old land of Israel. Later also the two tribed Juda or the JEWS also did return, along with the corrupt Babylonians. For instance there is not today and there has NEVER been a by the Law and the Prophets...oh no, Pharisee is Parsee or Persia-Zoraster Phansee is Parsee or Persia-Loraster Priesthood...so the murders of Jesus were NOT either real JUDA or IS-RAEL! Anyway, CIC sends out this message...believed most of the 'lost or unidentified...10 tribes of Israel... are among the Christians' of today. So if you feel a great LACK in the Plain Christian Gentile teaching, rea-son may be YOU are an ISRAELITE son may be YOU are an ISRAELITE...a lost heir. Does it sound reasonable to you that Jesus and Common Sense teaches you to keep the IO Commandments and do you feel an 'urge' to seek the truth? And then to try to 'take hold' and make the world a better place? Do you feel like instead of getting something from God, you'd like to help, have domin-God, you'd like to help, have dominion, to make a better world and life for all? Then maybe you're an ISRA-ELITE? ...so says the Christian Israelite Church and DAVID KNIGHT the head of the Sydney Australian Church. He migrated to USA, and in 1888 Declared Zion he lived first in San Francisco, then Chicago. His aim was to bring about a true alignment of JEWS, ISRAELITES AND CHRIST-IANS AND CATHOLICS. In old days, Protestants called 'Christians' and Catholics called Catholics, meaning 'Universal. So he founded Zion Christian Catholic World, or Universal World Harmony, all coming about to fulfill the words of our Lord Jesus Christ: ...They kingdom come, Thy will be done, on earth as in Heaven. So this CHRISTMAS, let us all say, Father, forgive us, for we have sinned. And then let us forgive all who have sinned against us. Let us love our neighbor as ourselves, and do unto others as we would have them do unto us, then Jesus says...Lo, I will be with

# NIKITA KRUSHCHEV FATHER OF

Picture below of the anti-Christ Beast Nick Khrushchev. This Beast was with the Beast Cang or Beast Syndicate from the beginning. In 1914 the Imperial Cerman Army attacked Russia with troops from the outside, from the perial Cerman Army accessed reasons with troops from the outside, from the inside the 5th column, attacked with Peace Marches' and demonstrations, preached Pacifism and said. "war was evil, give up Krushchev," and his gang told the 'people,' peace they cried, peace, peace, they cried, we love peace give in to the German Imperial Army very much like the enemies are doing in U.S.A. now, Jane Fonda, etcetera.

Khrushchev with President John F. Kennedy at Vienna in 1961. Kruche has just told one of his famous ziddish jokes. After buying the American Island Cuba, lock, stock and barrel. The Monroe Doctrine and rights to spoil all South America in exchange for the rights to make movie landing on the moon. exclusive rights, and Kruche promise to get him elected again. The Beast on the promise to get him elected again. the right sold U.S.A. down the river to Mark, Lenen, and Khrushchev. Which is the worst? The K who sold America or the K who bought America? How could you blame Nikita Khrushchev for knowing a bargain?

The way to 'peace' Khrushchev said, just as do the NAACP, Civil Liberties Union, the Boston Red Kennedy, Christian Science Party of Harvard, Inc. 'Harvard is a Jewish-English grease ball communist College in Boston.' The organized Sodemites and Lesbians of U.S.A., the dope peddlers union, along with Panderers and Pimps, Inc., Masterbaters, Inc., mostly Church of England, and other subverted 'scientific Christian Priests and Preachers — anyway, Mr. K along with the Nazi-Army overpowered the Orthodox Catholic people of Russia. This, in 1917. From then to the end of the war, the outside Germans and inside Germans (commies that is) murdered all the natural leaders of Russia. And they have had contri of Russia since that time. Khrushchev's middle name was Uniah Heep. As long as Joe Stalin was alive and well, the older and sicker Joe 20t, Mr. K. became more of a Lion. Death of Uncle Joe as Solly Truman used to call him, pushed for power as sole ruler. In 1956, he made a quick trip to London and conferred with the Commie Rulers of that commie darkened land. He made a deal to use the science fiction jibberish, created

in part by Clarke, to be the one 'the beast' who would destroy all the religions on earth, to pretend to 'prove' the earth was a ball spinning around the sun. This montrous insane rubbish had been official dogma for hundreds of years, but nobody believed it for one reason, our society had from the year 1848 revealed the truth that earth is flat. No proof had ever been found to confirm this unreasonable weird religious dogma. K got the job as No. 1 Man in USSR in 1956. In 1957 his gang pretended to orbit the ball earth! The massive hoax was on — the communist space age had began, Joderl Bank, a commie gang in England, had the contract to pretend to verify that spooknick was really orbiting a ball earth, according to Cope, Calileo, Newton, and Darwin, Later Mr. K's gang pretended to orbit a man and they, on their pretended return said. "Now at last we have proved there is no God." This is of course the entire point in the Space Age. This is what you call Real Christian Science. Nothing exists or is true except what you say is true. In the old days, BC, top Greek has said. "he could deceive so well, if he met God and could deceive him." In the bible it is claimed that Jacob and his mother deceived God himself. Stole everything from his brother — money, land, and honor. Then went about saying, "the victim of his lies was the bad guy." Anyway, this gang of Christian Scientists, Mr. K, and etc., the Masterbation idiots of England think by pulling this hoax, they can convince the people that earth is a ball and that they can go to heaven with this trusty rocket ships, etc. That this lie is just as good as the truth or even better as being a total lie can be controlled or modified, or revised all the time. Since it is a total lie system unrelated to facts in any way at all, all the best liars and deceivers on earth are proselytized, hired, paid well, and supplied with some real good medicines, some of that good of Utopia-euphoria medicine, usually injected with the scientific seppent's tooth, the hypodermic needle, a s head with the truth about anything and they would never feel it. In the picture the two K's are smirking together about how the fish suckers have fell ou the hook line and sinker for the TV movie's called Space Age and heaven exists only in the mind. This picture was made in 1961, perhaps big Red Kennedy is selling the American island off Florida — Cuba, selling out all South America, selling down the river all the people there who trusted us to protect them, selling out the Monroe Doctrine that saved us all from the foreigners for the contract to be the one to make the first pretended moon landing, getting exclusive rights from the Khrushchev gang to make the movie Moon Landing. He did sell Cuba, signed it overlock stock and barrel, made a treaty to for-

Madame Nina Khrushchev, the Jewish (Yiddish) wife of Nikita.

# ZETETIC ASTRONOMY

(Third Installment)

If the earth is a globe, and is 25,000 English statute miles in circumference, the surface of all standing water must have a certain degree of convexity - every part must be an arc or a circle. From the summit of any such arc there will exist a curvature or declination of 3 inches in the first statute mile. In the second mile the fall will be 32 inches; in the third mile, 72 inches, or 6 feet, as shown in the following diagram:

Let the distance from T to figure 1 represent 1 mile, and the fall from 1 to A, 3 inches; then the fall from to to B will be 32 inches, and from 3 to C, 72 inches.

We have a table of all distances, the amount of supposed curve or drop. Examples: 10 miles, 66 ft. drop; 20

miles, 266 ft, drop.

It will be seen by this table that after the first few miles the curvature would be so great that no difficulty could exist in detecting either its actual existance or its proportion. Experiments made on the sea shore have been objected to on account of the constantly changing altitude of the surface of the water, and of the existence of banks and channels which produce a "crowding" of the waters, as well as currents and other irregularities. Standing water has therefore been selected, and many important experi-ments have been made, the most simple of which are the

In the county of Cambridge there is an artificial river or canal, called the "Old Bedford." It is upwards of twenty miles in length, and passes in a straight line through that part of the Fens called the "Bedford Level." The water is nearly stationary — often completely so, and throughout its entire length has no interruption from locks vater-gates of any kind; so that it is, in every respect, well adapted for ascertaining whether any or what amount of convexity really exists.

Experiment 1

Experiment 1

A boat with a flag-staff, the top of the flag 5 feet above the surface of the water, was directed to sail from a place called "Welche's dam" (a well-known ferry passage), to another called "Welney Bridge." These two points are six statute miles apart. The author, with a good telescope, went into the water, and with the eye about 8 inches above the surface, observed the receding boat during the whole period required to sail to Welney Bridge. The flag and the boat were distinctly visible throughout the whole distance! There could be no mistake as to the distance nassed over as the man in charge of the boat had instrucdistance! There could be no mistake as to the distance passed over, as the man in charge of the boat had instructions to lift one of his oars to the top of the arch the moment he reached the bridge. The experiment commenced about three o'clock in the afternoon of a summer's day, and the sun was shining brightly and nearly behind or against the boat during the whole of its passage. Every necessary condition had been fulfilled, and the result was to the lact degree definite and eatherstery. The combusion to the last degree, definite and satisfactory. The conclusion was unavoidable that the surface of the water for a length of six miles did not to any appreciable extent decline or curvate downwards from the line of sight. But if the earth is a globe, the surface of the six miles length of water would have been six feet higher in the centre than at the two extremities, as shown in the diagram fig. 2; but as the

telescope was only 8 inches above the water, the highest point of the surface would have been at one mile from the place of observation; and below this point the surface of the water at the end of the remaining five miles would have been 16 feet.

have been 16 feet.

Let A B represent the arc of water 6 miles long, and A C the line of sight. The point of contact with the arc would be at T, a distance of one mile from the observer at A. From T to the bridge at B would be 5 miles, and the curvature from T to B would be 16 feet 8 inches. The top of the flag on the boat (which was 5 feet high) would have been 11 feet 3 inches below the horizon T, and altogether out of sight. Such a condition was not observed: but the following diagram, fig. 3, exhibits the true state of the case — A, B, the line of sight, equi-distant from or parallel with the surface of the water throughout the whole distance of six miles, from which it is concluded that the

surface of standing water is not convex, but horizontal

Experiment 2

Along the edge of the water, in the same canal, six flags were placed, one statute mile from each other, and so arranged that the top of each flag was 5 feet above the so arranged that the top of each hag was seef above the surface. Close to the last flag in the series a longer staff was fixed, bearing a flag 3 feet square, and the top of which was 3 feet above the surface of the water — the bottom being in line with the tops of the other and intervening flags, as shown in the following diagram, fig. 4:

On looking with a good telescope over and along the flags, from A to B, the line a sight fell on the lower part of the larger flag at B. The altitude of the point B part of the larger flag at B. The altitude of the point B above the water at D was five feet, and the altitude of the telescope at A above the water at C was 5 feet; and each intervening flag had the same altitude. Hence the surface of the water C, D, was equi-distant from the line of sight A, B; and as A B was a right line, C, D, being parallel, was also a right line; or, in other words, the surface of the water, C, D, was for six miles absolutely horizontal.

If the earth is a globe, the series of flags in the last experiment would have had the form and produced the results represented in the diagram, fig. 5. The water curvat-

below the line A, B. The first and second flags would have determined the direction of the line of sight from A to B, and the third flag would have been 8 inches below the second; the fourth flag, 32 inches; the fifth, 6 feet; the sixth, 10 feet 3 inches; and the seventh, 16 feet 8 inches; but the top of the last and largest flag, being three feet higher than the smaller ones, would have been 13 feet 8 inches below the line of sight at the point B. The rotundity of the earth would necessitate the above conditions; but as they cannot be found to exist, the doctrine must be pronounced as only a simple theory, having no foundation in fact — a pure invention of misdirected genius; splendid in its comprehensiveness and bearing upon natural phenomena; but, nevertheless, mathematical and logical phenomena; but, nevertheless, mathematical and logical necessities compel its denunciation as an absolute falsehood.

The above-named experiments were first made by the author in the summer, but in the previous winter season, when the water in the "Old Bedford" Canal was frozen. when the water in the "Old Bedford" Canal was frozen, he had often, when lying on the ice, with a good telescope observed persons skating and sliding at known distances of from four to eight miles. He lived for nine successive months within a hundred yards of the canal, in a temporary wooden building, and had many opportunities of making and repeating observations and experiments, which it would only be tedious to enumerate, as they all involved the same principal, and led to the same conclusions as those already described. It may, however, interest the reader to relate an instance which occurred unexpectedly, and which created such a degree of confusion, that he was repeatedly tempted such a degree of confusion, that he was repeatedly tempted to destroy the many memoranda he had previously made. Up to this time all his observations had been made in the direction of Welney, the bridge there affording a substantial signal point; but on one occasion, a gentleman who resided within a few miles of the temporary residence already alluded to, and with who conversations and discussions had been repeatedly held, insisted upon the telescope being directed upon a barge sailing in an opposite direction to that previously selected. Watching the slowly receding vessel for a considerable time, it suddenly disappeared altogether! The gentleman co-observer cried out in a tone of exultation, "Now sir, are you satisfied that the water declines?" It was almost impossible to say anything in reply. All that could be done was to "gaze in mute astonishment" in the direction of the lost vessel—was the canal 'humped' after all.

President Jimmie Carter says the Defense Dept. convinced him they need the LSD Tim O'Leary, idiot Oneil and 'Gov Brown's "space shuttle movie" for 'national security' — Mr. Carter, Democrat, is for 'the spaced outway" — so they ask for and got an extra tip of \$300,000,000 bucks. They have had thousands of millions already. As a result USA has no 'national security', no gattlen guns — just movies of science fiction and lots and lots of black holes. That's OK by me. I used to have carnie friends, one has run a razzle dazzle for years, so I understand how Carby me. I used to have carnie friends, one hus run a razzle dazzle for years, so I understand how Carnies work — and you can't blame them as W. C. used to say'you can't cheat an honest man' — only robbers are robbed. The Rockwell International and Lockheed Carnival — take the cake. Can't blame you if a Born Again Christian who believes in Jesus, that He ascended up to Heaven — wants to give you billions to make TV movies pretending to prove Jesus didn't go up as 'no up exists' much less Heaven — if he wanted to pay you to demonstrate that He's not born again, and that he doesn't believe a word of the Bible, and besides has no common sense — then take the money. I don't squawk now or before about your getting the 'dough from them. Why not tell Him you must junk out your present tubs of junk and start over. Ask for a new thousand million — or a billion-billion— and dont forget — plenty of jobs — eh. Keep them ole black holes come back home.

## Wild Pitch

For Charles Johnson and the Flat Earth Society

Copernicus peers at the Milky Way like it was homeplate and he a pitcher searching for a sign. He stoops to earth, scoops up some dirt to theorize a ball; then, hidden behind his mitt, he spits on it, and winds his arm, leans back, left leg cocked, and falls forward through space til touching the ground with just one toe he throws the ball in a whirling curve aimed for the sun.

Under the desert sun Under the desert sun Johnson waits, patient as a catcher behind homeplate. His cleats cling to the ground. His eyes follow the pitch. He stretches out his arm and with a bare fist he stops the spinning ball and brings it back to earth. and sets it gently down on the wide, flat plate.

# THE ONE FLAT WORLD

Only known material world in existence

This is the Real World, it is not a theory, a concept, nor some relative idea that can't be proved.

No, it is the real Objective World, the way it is. It is a proved demon-strated, demonstratable fact, nothing to debate or have dialogues about, there is not two sides to the question, there is no question, there is no other side, the world is Flat - that's that. The end, finish.

North is the center of the known inhabitable world, lands stretched out around this. Outer limits to which men have reached is the Ice Ring, only a few miles into this ring have men been. one knows what is beyond the reef of ice. Logical to assume the world is, without end, it extends forever outwards and down. Heavens today as always, a total mystery. Idiotic and absurd, silly to even talk about what is in the heavens. One can never know, while in the flesh. 6,000 years of recorded history, almost nothing is even known about earth! Much less the little known about earth: Mitch less thefittle specks in the heaven, the planets and stars, sun, and moon. Earth is not a planet. It does not spin, whirl or gyrate. Since sun and moon are found to be 3,000 miles high, reasonable to suppose heaven, the place where Jesus ascended up to is about 4,000 miles. The Bible tells us heaven is our home from whence we have come and to where we go at death then after the judgement. People suffering from degenerate insanity or syphilis of the blood, say they have faith and believe, crazed monsters, maddened by drugs and vodka in Madland, USSR - athiest, nur-derers of innocent. Out of scraps of metal, made a heaven spaceship, or-bited a non-existent ball, went on to land in heaven, say they found no Cod in heaven, say they bother to our in heaven and returned – by fire – rockets – this, they say, they believe. But that Jesus, who was declared to be the Son of God, went about doing good, healed the helpless and young and old, told all to do good, to serve

others, not self. Told all to keep the Ten Commandments, told us to always Ten Commandments, fold us to always haver mercy and tell the truth. For His good works He was hated by the doctor's and other scientists, Jews, Pharisees and Saducees. For his good works the Persian, Greek, Egyptians, Pharisees and Saducees, Jews forced Pharisees and Saducees, Jews forced the Roman judge to allow them to murder Him. The Book says that after 3 days, He rose again, was seen by thousands, later was seen to float up on His way to Heaven. This, the fee-ble-minded syplific brain morons say, they just can't believe it! In any event, the fact stands by itself, the earth is Flat. Not a planet. If every book and record on earth were to be destroyed, still the fact would stand commonsense, the evidence of your senses and the denonstrated facts tell it like it is Sun and moon may be a kind of a gas. Sun and moon may be a kind of a gas, no one knows. Until I pass away or I am changed and my spirit returns to God who gave it, to heaven above who know what it is made of. So we may the flat much because if the matter of the contributions of the same things and the same things are the same things are the same things and the same things are the say this, flat earth, center of the universe, is the only known material world in existence. I am a Flat Earther. not because I found it in some book but because it is true, it is my nature to love the truth and to hate lies. It is natural for some of us to be zetetic, to try to seek and find the truth. hate to keep on talking about things in the Bible but it is also a zetetic fact that Jesus Christ told one and all to seek the truth and that the truth would set you free. Free from what? What else but free from the power of Satan. the devil who is described as the full time liar and deceiver. A doctor, scitime har and deceiver. A dottor, screenist or preacher, no doubt, these seem to be the unholy three. In other words, to be Zetetic is to be free from dlusions and to enter in and be a man, and so told to have dominion over this earth. Lets all try to stand upright, be men, lay aside Greek fairy tales that earth is a planet, spinning around the sun.

#### Frank & Ernest

by Bob Thaves

## NOT BY GRACE ALONE. . . Are you saved?

We all know there has been a deceiver in the world ever since this 'age' began in the Garden of Leden. Our allmighty Heavenly Father saw the destruction of his creation following the Deceiver. So he thought to begin again with the man Noah and his family. Noah did seem to want to live right. But just as soon as he got his chance he fell back to slaying all the poor beasts — eating flesh and drinking booze. When the Heavenly Father saw this — he said he knew that man's heart was on evil from his youth. The Creator had to carry on with his Creation, so he let it go on till he had another chance to get the people together in a place apart, alone in a — desert place. Then he gave them the Ten Laws. Commandments to live by — hoping they would follow and obey them. If so they would be a 'special people' and a light to the world. Of course they said they would — but they never did. So all went back into the worlds governments captivity. So our Creator Father tried once more withis Creation. He brought his Son into the world — we all know he waiked and talked and taught in his Fathers Way and had mercy to all and showed people of his Ways — and told them if you want

to enter in life — keep the Commandments. So this shows us this still the only way we should live our lives, if we want our Heavenly Father and Jesus to be with us and be blessed as we all want to be. Dont listen to the Deceivers telling you the Laws are did away with, they are not, and are the only way a person can be close and be heard by our Heavenly Father and his Son, Jesus Christ. In these days of distress and turmoil we should all take to heart and obey the Ten Laws or else we too will go into captivity, as all before us have. Let your Religion be the Ten Laws as a way of Life and thoughts. So very easy if your heart is right. And think about what Jesus Christ said: "Go and find what this means — I will have Mercy — not sacrifice." Mat. 9:13. So let us have the Laws of rightiousness as our way of Life. Then to be "Mantfested" as was 9:13. So let us have the Law.
rightiousness as our way of Life.
Then to be Manifested as was
Jesus — as Sons of God! Then Jesus – as 'Sons of God!' Then can he the government of God – on earth, the deceivers overcome, and rule with Jesus. Until then 'the whole world groans – waiting – for you to manifest.

Dear Mr. Johnson, I've mailed the signed application. So please dont worry about me. I am serious and in my right mind. Rather worry about the millions of Americans that refuse to believe their senses and common sense and instead follow dogmatic scientific the oretical assumptions that have no basis on the real flat world. With the help of the F. E. S., I plan to do my part to help restore the earth to sanity. Sincerely, Young man, Annapolis, Maryland

Reply: Another of the elect, or elite, because your mind and brain is undamaged, good, true, and ba-lanced, unlike many, you prefer truth to lies, because you don't deceive, you are not deceived, today and for the future you will be among the wise who are not deceived. In the book of Daniel, it is said regarding this stage of the great plan, none of the wicked will understand. I be-lieve you are a young man of destiny and like John Paul Jones, you will help secure this U.S.A. Remember, in George Washington's vision. he saw all the nations of earth as on a great stretched out plane. He was a Flat Larther, destiny of U.S.A. is to be the first in all re-Corded history to declare the truth. Larth is Flat! Center and focus of the new age or new world, truly U.S.A., The Holy Land. Dear Mr. Johnson.

I've been a member of the Flat Earth Society for some time now and I must say it's given me a new look on the shape of the world. I must also admit that when I first joined the Society, I wasn't sure that the earth was flat. I thought that the 'pictures from outer space' proved that it was round. I have now come to believe that these pictures, as well as sky lab and the moon walks, are part of a massive hoax.

I have found other people as well who believe that the earth is actually flat. Suddenly I have friends where I work and where I go to school. People who wont laugh in my face when I express my beliefs to them.

Mr. Johnson, I would like to

say, Thank you.

Thank you for giving me the opportunity to discover for myself shape of this earth. Enclosed, please find my check for \$10. I would like to renew my member-ship for the year 1980.

Thank you again, Young woman, Wis.

Reply: Flesh and blood has not revealed it to you — but be-cause you are of the elect — those with a good mind and a good heart — have housetly knocked — and it's been opened to you. On such as you depend the Fate of the world. We've not yet begun to fight! Earth is Flat, and that's that. End,

(Washington Post)

Dear Sir,

Dear-Sir.

Enclosed is my check for \$10.

For my '79' dues for membership in Flat Earth Society. Lam enclosing an article on reconstituted tobacco which appeared in 'letters to the Editor' in the Washington Post, Sunday, March 18, 1979. I remembered your article on tobacco page 3 Sept. 78 Flat Earth News. I noticed my December 1979

issue was postmarked Phoenix, Arizona: have you moved to Phoenix?

I will at a later date send you an article for a 1979 issue of Scientific American that may be of interest to you.

Member, renewed, BSCE, MS, RLS Associate Professor of Engineering, Instructor for Surveying. Arizona

Reply: Yes we have known for years, cigarettes are posioned, good tobacco is good for you. One of the main reasons for USA becoming the main reasons for USA becoming great was good tobacco. King James concocted the original anti-tobacco campaign, it too is a religious dogma. Booze is poisonous, or can be, different times and different t ent parts of USA and other nations different drugs are used - no state-ment on the bottle, just what is in the booze! Think, how the State Religion tries to get all to stop using tobacco and start drinking, booze. Especially beer — what's up — eh? Think it was Scientific American that last year asked us for a MAP and said they wanted to use it in the mag. Sent it, later they returned it, used some 'indian' one they said. Trouble was, they saw our map true. They like to pretend - till the spinning ball gang took over - all ideas regarding earth was way out. Told me they'd send a copy, but

Thanks for the clipping, please watch out for such things, and send watch out for such things, and send 'em. Did any other member receive his paper from some strange post-mark? No, we have not moved at all, it's mailed from right here, Lancaster. I am a research economist by training, and for the past several years I have researched the tobacco industry, especially cigarettes and their health consequences. I have uncovered a number of personally disturbing facts that I feel should disting its that teel should be brought to the attention of the American public.

One of the major findings of my research has been that few American brands of cigarettes

are made of all natural tobacco. Major cigarette manufacturers use tobacco substitutes, reconstituted tobacco and other filler products, as well as a large number of chemical additives. The health con-sequences of these filler materials and chemicals was virtually ignored in both the 1964 and 1979 surgeon general's reports, despite their widespread use by the their widespread use by the industry prior to the 1964 report. While little medical research has been done in this area, the findings indicate these substances, partic-ularly some of the chemicals, may actually increase the carcinogenic risk of the tar without increasing the amount of tar produced.

The lack of government regulation, lack of accountability to consumers and the lack of threat of new competition (created by the ban on cigarette advertising in the electronic media), all enable the major tobacco companies to take whatever steps they may deem appropriate in the production of cigarettes, such as lowering costs through the use of non-tobacco products, regardless of potential health hazards.

Frankly, it distrubs me that the average American will spend an hour at the breakfast table poring over the contents of his cereal boxes, then light up a cigarette, the contents of which are listed nowhere on the package and are beyond his wildest imagination.

I am plaining to propose leg-islation in Tennessee for the enactment of a package-labeling law on all eigarettes and feel such a law should be implemented nationwide. Ira T. Lapides

Do you remember the speech and can you see him now, Red Kennedy said. "Yes, there'll be plenty of jobs." Later the English creep Arthur C. spooknick hoax could have also well been directed and written by this hon-human creep.

Anyway, the space age hoax is from USSR, the land of Pathological liars (since 1917, anyway). The Khrushchev gang think the big lie can go on forever. I'm here to tell them it's all over but the shouting, the jig, is up. The New Age will do away with all the crazed lies accumulated over the last thousands of years. In the New Age, the Old Horse and Chariot Tale Myth of earth being a Globe-Planet will be gotten rid of, relegated to the rest of the old Greek Mythology. Zetetic is the word for the new age. Cod's existence is the first step to think sanely and logically and to know that tried and true rules for living already exist among believers of Jesus, Moses, Mohammed, the Hindu and Buddha, and Confucious of China. With the good from all plus tossing out of vast words of jibberish from all science and religion which is the father of all science, the pretending to know vast, a lot more than they do, and make out of vast words of jibberish from all science and religion which is the father of all science, the pretending to know vast, a lot more than they do, and make a science of everything. Zetetic fact is, most of all on the world and in the world is a mystery — the why and how of life itself is a total mystery! But we can have guidelines for our conduct, like the tried and true but never in all recorded history tried the Colden Rule, "do unto others as you would have them do unto you." One of the Commandments is "thou shall not bear false fitness or not lie". If we could just use this as a first commandment, think what a different world. No more lies. Think how beautiful it would be. So then, even if a person didn't like you, was your enemy, he would tell you the truth. Then you'd know what to expect. Also could take steps to correct the situation. Today, nearly everybody has accepted the lie as a "way of life from little white lies to big black lies, day and night." They tell and are told lies. So the Flat Earth and the Ten Commandments as taught by Jesus can be the new age. The truth has never been tried. I say, lets try it, as they say, "try it, you'll like it" and don't knock it if you haven't tried it. Another time I will give another view showing that the Jews in general are more honest, straighthorward, to be trusted than the most pious christian. That the Carnies who run the space program, etcetera, are nothalfas dishonest as the average public school teacher or professor, who is a hired corrupter of children. That compared to average person, the Space Carnies, the men who run the entire hoax are honest men and not to be blamed nearly as much as your dear ol' Sunday School Teacher, who originally corrupted your mind, telling you the world was a spinning ball and that the world was flat and round at the same time. (Double-think comes from the Church of England, the Martin Luther Church, the Baptist, and the rest.) Perhaps, 'double-think Christins Science' is "Hell on Farthe"

the Martin Luther Church, the Baptist, and the rest.) Perhaps, 'double-think Christian Science' is "Hell on Earth?"

Arthur C. Clarke (left) receiving the 1961 Kalinga Prize for the popularization of science from M. Rene Matheu, acting director general of UNESCO, in of science from September 1962.

Ancient tradition, the hible, the prophets, Jesus Christ, even Mohammed, the Orthodox Catholic Church, founded in Constantinople, the Roman Catholic Church, the evidence of your eyes, all indicate a Heaven, a certain place that is "Up" from this flat earth. The Church of England, and Martin Luther's Chur ch that sits on many waters has said all along, with all the anti-Christ, there is no heaven above. This explains why this Creep Clarke, born in Somerset, England, was hired by Anti-Christ to cause others to disbelieve in a "Heaven". So the Robbers of the British Islands are up to their neck in the Commie Space Hoax. Natives of British Islands have been killed and driven from their own islands by the Band of Devils, such as Clarke, Pommie Bastards, as native British call them. British call them.

# Charles Lindberg Proved Earth Flat

Charles Augustus Lindbergh, known as THE LONE EAGLE, was

Charles Augustus Lindbergh, known as THE LONE EAGLE, was and is one of America's greatest heros. On May 21, 1927, when the word was telegraphed that THE EAGLE HAS LANDED in Paris, France, history was made. This word-shaking event electrified the world! It was all the world knew it was — the beginning of Fantastic Rennaisance, the Re-awakening of Rhyme and Reason, and a Defeat for the Monsters' of Science Religion. Much of the same thing happened as had occured in 1492. Till that year, for thousands of years, the Science Religion or Religious Science, say it either way, (same thing) had kept the minds of people dark — we should say the Traders-Science Religion, could even say Traitors-Science Religion, could even say Traitors-Science Religion, and the world was a "Globe-Ball-Planet, way out in space". Only an elite few, Phonecian, Greek, Semitic traders knew the facts that Earth was Flat. This dark supertition of a Globe planet world was perpetuated to keep the people from travelling or trading by sea or any other way, but especially by sea. They were told, and of course would be true, if the world is a ball and sailed out of sight of land, they would go over the edge, start downhill and get so far that they couldn't get back — would go off the edge of the world! If of course the world were a globe, this would happen within six to 10 miles, then you would be heading downhill and by a couple hundred of miles would be hopelessly 'OVER THE EDGE!' Well, Columbus set out to PROVE ONCE AND FOR ALL THAT TIME EARTH WAS FLAT! Of course he couldn't have any sailors to go with him as all the Moors and etc. of ONCE AND FOR ALL I HAT TIME EARTH WAS FLAT! Of course he couldn't have any sailors to go with him as all the Moors and etc. of Spain in 1492 had 'faith and believed earth was a Clobe!" That is to say, all who were related to Rome and Islam-Babylonia the "Clobe was the official Dogma and had been official for at least from 200 A.D. Anyway this bold break through the derving of the Science Religion and omeial for at least from 200 A.D. Anyway this bold break through the defying of the Science Religion and Columbus proving the Roman Catholic and Babylonian Middle East official dogma was false, that the world of commonsense, reason, logic and physics, and the evidence of your senses, had proved that the world is flat. Instead of what is still taught by the State Religion, 'lean not to your own understanding but to what your own understanding but to what your Priests or Expert Rabbis say, live by faith and not by sight' etc... The people of Europe were overjoyed and thought his voyage PROVED THE COMMONSENSE, SELF-EVIDENT PLAIN LAWS OF PHYSICS THAT WATER SEEKS ITS OWN LEVEL AND LAYS FLAT. The Ocean was a pond, the people thought. The age of superstition was over but they reckoned not with the 'Scientists.' The Priests and Rabbis of Darkness, their VERY light IS darkness! Short while later a dope fiend monk named Pernecious, in English-Latin version was Comprecious, or the was Copernecious, or the

Col. and Mrs. Charles A. Lindbergh, The 20th Century American "Colum-bus" who proved with his airplane by Direct Experiment, Earth Flat. He proved that the Judo-Christian Theory of Ball Earth...was...only Scientific superstition.

Copernecious Hypothesis or with EVIL THEORY, had shot dope and chewed cocaine and tried to come up with something to do away with Columbus PROOF that EARTH WAS A FLAT PLANE. He did wrote a Si-Fi book "The Spinning Ball", the idea being to try to explain away the fact that Columbus didn't fall off it was spinning so fast and could not fall off! What a nutty idea! Of course, but that's the best the Monk Scientist could come up with. Well, enough of that, back to the Later Day Columnia. that, back to the Later Day Columbus, Charles Lindbergh. From about 1600 or so the Monk-Priest-Rabbi-Scientists had gotten rid of Columbus and his proof and put the old dope Heads Dream into textbooks and it was back in business for the Monks and Monkies — back to a ball but now SPINNING, WHIRLING, AND CYBATING.— same ball, but now CYRATING - same ball, but now

spinning! That is till the Eagle Landed in Paris. He was born in Detroit then went to school in Wisconsin, learned to fly mostly in Texas. He was one of the first to fly 'Air Mail' between St. Louis and Chicago. In Chicago and Zion he made contact with Wilber Clen Volvia and got the facts. Mr. Volvia was then the head of the Flat Earth Work in U.S.A. and most of the world. Charles, like me, and millions more, was born with commonsense, nowadays called 'genius' because it is so rare. He always knew the earth was flat but like most ius' because it is so rare. He always knew the earth was flat but like most people, just let it slide. But when he met the man who could and did make it so clear that a vast Satanic Hoar was taking place, showed him how to prove it. Well, from then on he couldn't rest until he had helped – to fully ESTABLISHED THE FACT THAT EARTH WAS FLAT and rout the 'gang' who were then and had always worked to 'deceive the whole world.' A plan was set up to suddenly and unexpectedly to upto suddenly and unexpectedly to up-set and disprove the Monster Scien-tists who were in league with the Pharisee and Saducees, now known as Christians and Jews, who were keeping the world in darkness. His keeping the world in darkness. His plan was out together partly in St. Louis, partly in Chicago and California with our men. The Pharisse and Sadsucees Scientists told him couldn't be done and that earth is a ball spinning, whirling, and gyrating through space millions of miles per hour, and that it's impossible, couldn't navigate over the HUMP in the ocean especially with all the spinning and whirling and gyrating in three or four directions. According to the Pharisee and Sadsucee Sciento the Phanisee and Sadsucee Scientists, on the ball world the "curve" between St. Louis and Paris was 6,000,000 feet! 1,136 miles. The HUMP between the two points would be about 200 miles both But he did be about 284 miles high. But he did not fly over ANY hump, but set his PLANE, LEVEL and stayed LEVEL

All the vast calculations and tons of navigational equipment and Einstien would have to write a whole book of scribbles and magic signs and equations to be able to fly there or he'd crash into the sea or off the

or he'd crash into the sea or off the world, etc. etc.
Well, the LONE EAGLE took off with almost NO EQUIPMENT, just a campass and commonsense. HE KNEW THAT ALL HE HAD TO DO WAS JUST SET HIS PLANE COOD MANY FEET ABOVE THE WATER AND FLY LEVEL, plane in the right direction and would 'Fly

Across the Pond. Oh yeah, from time of WWI here in U.S.A. and Australia, where the Holocaust vic-tims had been taken from the youth tims had been taken from, the youth our soldiers - to go over and be killed by Lord Kitchen (his battle field was called 'hell's kitchen) and the Red Germans. Anyway to go over was to 'cross the pond'. ALL OF THE COMMON PEOPLE knew the sea was just a pond, which it IS. Continued on page 4

# ZETETIC ASTRONOMY

(4th Installment)

I was compelled to listen to the jeers and taunts of the apparent victor. After thus wonderingly gazing for a considerable time, with still greater astonishment the ves-sel was seen to suddenly come agin into view! Obliged sel was seen to suddenly come agin into view! Obliged to admit the reappearance of the vessel; neither of us could fairly claim the victory, as both were puzzled and equally in an experimental "fix". This condition of the question at issue lasted for several days, when, one evening conversing with a "gunner" (a shooter of wild fowl), upon the strange appearance referred to, he laughingly undertook to explain the whole affair. He said that at several miles away, beond the ferry-house, the canal made a sudden bend in the shape of the letter V when lying horizontally, and that the vessel disappeared on account of its entering into one side of the triangle, and lying horizontally, and that the vessel disappeared on reappeared after passing down the other side and entering the usual line of the canal! After a time a large map of the canal was found in a neighboring town, Wisbach, and the "gunner's" statement fully verified.

The following diagram will explain this strange, and for a time confounding, phenomenon.

A. represents the position of the observer, and the arrows the direction of the vessel, which, on arriving at the point B. suddenly entered the "reach" B. C. and disappeared, but which, on arriving at C. became again disappeared, but which, on arriving at C, became again visible, and remained so after entering and sailing along the canal from C to D. The ferry-house and several trees, which stood on the side of the canal, between the observer and the "bend," had prevented the vessel being seen during the time it was passing from B to C. Thus the "mystery" was cleared away; the author was the real victor, and the gentleman referred to, with many others of the neighborhood, subsequently avowed their conviction that the water in the "Bedford Level" at least, was horizontal, and they therefore could not see how the earth could possible be a globe. could possible be a globe.

#### Experiment 3

A good theodolite was placed on the northern bank of the canal, midway between Welney Bridge and the Old Bedford Bridge, which are fully six miles apart, as shown in diagram, fig. 7. The line from the "levelled" theodolite

fell upon the points B, B, at an altitude, making allowance for refraction, equal to that of the observer at T. Now the points B, B, being three miles from T, would have been the square of three, or nine times 8 inches, or 6 feet below the line of sight, C, T, C, as seen in the following diagram, fig. 8.

#### Experiment 4

On several occasions the six miles of water in the old Bedford Canal have been surveyed by the so-called "forward" process of levelling, which consisted in simply taking a sight of, say 20 chains, or #40 yards, noting the point observed, moving the instrument forward to that point, and taking a second observation; again moving the instrument forward, again observing 20 chains in advance, and so on throughout the whole distance. By this process, without making allowance for convexity, the surface of the water was found to be perfectly horizontal. But when the result was made known to several surveyors, it was conresult was made known to severat surveyors, it was con-tended "that when the theodolite is levelled, it is placed at right angles to the earth's radius — he line of sight from it being a tangent; and that when it is removed 20 chains forward, and again "levelled," it becomes a second and different tangent; and that indeed every new position is really a fresh tangent — as shown in he diagram fig 9, T1, T2, and T3, representing the theodolic levelled

at three different positions, and therefore square to the radii 1, 2, 3. Hence, levelling forward in this way, although making no allowance for rotundity, the rotundity or allowance for it is involved in the process." This is a very ingenious and plausible argument, by which he visible contradiction between the theory of rotundity and the results of practical levelling is explained; and many excellent mathematicians and geodesists have been deceived byit. Logically, however, it will be seen that it is not a proof of rotundity; it is only an explanation or reconciliation of results with the supposition of rotundity. oncilation of results with the supposition of rotundity, but does not prove it to exist. The following modification was herefore adopted by the author, in order that convexity, if it existed, might be demonstrated. A theodolie

was placed at the point A, in fig. 10, and levelled; it was then directed over the flag-staff B to the cross-staff C then directed over the flag-staff B to the cross-staff C—
the instrument A, he flag-staff B, and the cross-staff C,
having exactly the same altitude. The theodolite was
then advanced to B, the flag-staff to C, and the crossstaff to D, which was thus secured as a continuation of
one and the same line of sight A, B, C, prolonged to D,
the altitude of D being the same as that of A, B, and C.
The theodolite was again moved forward to the position
C, the flag-staff to D, and the cross-staff to the point E—
the line of sight to whichwas thus again secured as prolongation of A,B,C,D, to E. The process was repeated
to F, and onwards by 20 chain lengths to the end of six
miles of the canal, and parallel with it. By thus having
an object between the theodolite and the cross-staff,
which object in its turn becomes a test or guide by which
the same line of sight is continued throughout the whole which object in its turn becomes a test or guide by which the same line of sight is continued throughout the whole length surveyed, the argument or explanation which is dependent upon the supposition of rotundity, and that each position of the theodolite is a different tangent, is completely destroyed. The result of this peculiar or modified survey, which has been several times repeated, was that the line of sight and the surface of the water ran parallel to each other; and as the line of sight was, in this instance, a right line, the surface of the water for six miles was demonstrably horizontal.

This mode of forward levelling is so very exact and satisfactory, that the following further illustration may be

given with advantage. In fig. 11, let A,B,C, represent the first position respectively of the theodolite, flag-staff, and cross-staff; B,C,D, the second position; C,D,E, the thrid position; and D,E,F, the fourth; similarly repeated

thrid position; and D,E,F, the fourth; similarly repeated throughout the whole distance surveyed.

The remarks thus made in reference to simple "forward" levelling, apply with equal force to what is called by surveyors the "back-and-fore-sight" process, which consists in reading backwards a distance equal to the distance read forwards. This plan is adopted to abviate the necessity for calculating, or allowing for the earth's supposed convexity. It applies, however, just the same in practice, whether the base or datum line is horizontal or convex; but as it has been proved to be the former, it is evident that "back-and-fore-sight" levelling is a waste of time and skill, and altogether unnecessary. Forward levelling over intervening test or guide staves, as waste of time and skill, and altogether unnecessary. Forward levelling over intervening test or guide staves, as explained by the diagram, fig. 11, is far superior to any of the ordinary methods, and has the great advantage of being purely practical, and not involving any theoritical considerations. Its adoption along the banks of any canal, or lake, or standing water of any kind, or even along the shore of any open sea, will demonstrate to the fullest satisfaction of any practical surveyor tha the surface of all water is horizontal. — Continued Sept. 1980 issue.

## 10 Laws of Physics or the Laws of Life

This Law even more than the 'letter', then as said so long ago...this LAW brings you to be like or 'a 'Christ, that is a 'Son or Daughter of Cod' the great Lawgiver. I have rearranged these laws, from the JBK version, to heip. I hope, you understand that they are not 'religious' or 'weird superstitions, like science theory' but practical Laws by demonstration Proved to be effective...for LIVING. Right, Kosher, or Proper, however you prefer to word it.

1. Thou sall not Murder. Murder as defined by Moses. British and All common law on earth is the willful, premeditated with bad intent to take a life.

2. Thou shall not steal. This also means, as commonsense tells you, willful premediated, with bad intent to rob others. to their HARM. Commonsense is key to all understanding of Life and Law, if you were staving and found some unattended food and took it, or part of it, not depriving someone else of life, is NOT condemned. Though another law of life is 'Ask and you will receive'.

3. Thou shall not bear false witness or Lie.

receive'.
3. Thou shall not bear false witness or Lie. Common Law - commonsense is always identical - by lying to people you cause them to error, you HARM them! Key is not

them to error, you HARM them! Key is not to Harm.

4. Thou shall honor thy father and thy mother. You would not or could not exist without your father and mother. You are their 'product', you are the pot they potter. how DARE you curse the potter who made you – perverse and crazed to do so.

5. Thou shall not committ adultery. The man and woman to become one flesh' is a contract that is made. You gave yourself to your mate – heart, mind, and body, and become one. Become a perverse degenerate beast, unable and unwilling to be a Man or Woman created to be an image' of Cod and a Liar and a Thief as well as a LUST crazed beast, when you 'commit adultery'.

6. Thou shall not covet. Means not to Envy. It is a very root of much of ALL evil on earth. This thought or condition makes Your Life miserable and all you come in contact with. It is also a condition of insanity, like a cat wishing he was a dog, black hair — wishing he was blond or ANY other condition. Cuittwate wHAT YOU HAVE and be glad of why YOU are, insane or otherwise, is illogical and irrational.

7. Remember the Seventh Dav and keep it

is illogical and irrational.

is tilogical and irrational.

7. Remember the Seventh Day and keep it Holy. Separate or different). When you obey this, it helps to keep you sane — that is to KNOW you are in a world you did NOT make and you YoURSLEF were created that in 'reality' you are the or under the barrel of nothings...less than nothing — everything you are and can see or even think...has come from OUTSIDE of you! Has been 'given you by grace or without your deserving it, to keep or 'remember' the 7th day is to 'remember, dust your body is and to dust it will return and your spirit to Cod who gave it'. What a subhuman pervert, what a Lout you are if you refuse to even for one day give some thought to the FACT that you are alone and if you have any sense be afraid in a world you never made. For one day confess your sins or shortcomings. Confess you are a nobody going nowhere and unless you do as commonsense and Jesus Christ said do: Knock and it shall be opened unto you. Ask and you shall not take the Name of the Lord thy God in vain. Commonsense. SA-NITY tell you, not only is there 'a power greater than you, but ALL power on earth and Heaven above is greater than you and that it is all 'beyond you.' so FEAR GOD!

9. Thou shall not make and bow down to any graven image, You will not make some thing, like your house or business or popular 'hero' or ? and 'make it your God'.

10. Thou shall not have any other God before me. God says, consider these commandments and understand the thought or Spirit and intent behind them, the principle of them...come to understand the Mind that created them. Then, any power or person or whatever who comes to you with 'some other outlook or ways that contradict these laws or principles of Life, then Reject them. You know this GOD by these LAWS. Let this mind be in you — Jesus Christ the record says, was the First Born of MANY BRETHEN. If you keep these laws in the spirit and intent for good, then you too will become a 'big brother'. Pets sold or given to strangers usually find their way to the vivisectors' trough. An estimated one hundred and sixty-one million animals die each year in vivisection experiments, at least one hundred million of these in the United States alone. Laboratories buy helpless puppies and kittens by the pound; a large percentage of all pets sold at public auction suffer untold agonies at the hands of experimenters.

The experiments include 100% first degree burns, beatings, poisoning, drowning, crushing and such cruel and futile procedures as grafting a second head on a dog or a second heart in the animal's neck as illustrated here.

"If only one-fifth of the sum expended on animal experiments were available for tissue-culture, we should have more practical results than from experiments. Unfortunately, however, the pharmacologists are not willing to give up their usage and continue to use animals. It has long been known that the danger of deformity can be ascertained whilst testing medicaments in cell-cultures very early and indeed more surely and cheaply than by animal experimentation. For instance, in Turkey there were no Thalidomide (Contergan) children, because S. T. Aygun had recognized in 1956 the effect of Thalidomide (Contergan) leading to deformities in the course of a month's test with cell-cultures, and prevented its introduction into Turkey. He also informed the manufacturers of the results of his investigation. However, the latter replied that the product had been tested for three years on 3,000 animals and so it was harmless. We know the outcome."

Excerpt from the book:

#### ANIMAL EXPERIMENTATION and ANIMAL EXPERIMENTERS

by Herbert Stiller and Margot Stiller

Animals & Humans don't react the same—give a cat morphine and it goes wild! Why continue to use animals???

Billions of dollars of our tax money is spent annually, cutting up and torturing many millions of animals in 556 Federal laboratories. Breeding companies sell these animals to our Federal Government & we are the ones who pay for it. Some laboratories cut vocal chords then use NO anesthesia in experimentation. PLEASE WRITE TO YOUR CONGRESSMEN AND SENATORS OPPOSING THE CRUELTY OF VIVISECTION.

# **WARNING**

Don't dispose of unwanted dogs, cats and other pets to dealers who may re-sell them to Vivisection Laboratories—where they could suffer in painful experiments.

Never let your pet out alone—it may be stolen for research!

# Midnight Light for Dan McGrew

A bunch of the boys were whooping it up in the Malamute Saloon; The kid that handles the music box was hitting a jag-time tune; Back of the bar, in a solo game. sat Dangerous Dan McGrew And watching his luck was his light-o'-love, the lady that's known as Lou.

When out of the night, which was fifty below. When out of the night, which was fifty below, and into the din and the glare.

There stumbled a miner fresh from the creeks, dog-dirty, and loaded for bear.

He looked like a man with a foot in the grave and scarely the strenght of a louse, Yet he tilted a poke of dust on the bar, and called for drinks for the house.

There was none could place the stranger's face, though we searched ourselves for a clue; But we drank his health, and the last to drink was degree our ban McCreew. was dangerous Dan McGrew

There's men that somehow just grip your eyes, and hold them hard like a spell; And such was he, and he looked to me like a man who had lived in hell; With a face most hair, and a dreary stare of a dog whose day is done. or a dog whose day is doile.

As he watered the green stuff in his glass,
and the drops fell one by one.

Then I got to figgering who he was,
and wondering what he'd do.

And turned my head — and there watching him
was the lady that's known as Lou.

His eyes went rubbering round the room, and he seemed in a kind of daze.

Till at last that old piano fell in the way of his wandering gaze.

The rag-time kid was having a drink;

there was no one else on the stool,

and flops down there like a fool. In a buckskin shirt that was glazed with dirt he sat, and I saw him sway; Then he clutched the keys with his talon hands my God! but that man could play.

Were you ever out in the Great Alone, hen the moon was awful clear, And the icy mountains hemmed you in with a silence you most could hear; With only the howi of a timber wolf, and you camped there in the cold.

A half-dead thing in a stark, dead world, clean mad for the muck called gold; While high overhead, green, yellow and red, the North Lights swept in bars? — Then you've a hunch what the music meant ...

hunger and night and the stars. And hunger-not of the belly kind, that's banished with bacon and beans,

But the gnawing hunger of lonely men for a home and all that it means; For a fireside far from the cares that are, four walls and a roof above;

But oh! so cramful of cosyjoy, and crowned with a woman's love -A woman dearer than all the world.

and true as Heaven is true — (God! how ghastly she looks through her rough, — the lady that's known as Lou.)

Then on a sudden the music changed

so soft that you scarce could hear; But you felt that your life had been looted clean of all that it once held dear: That someone had stolen the woman you loved;

that her love was a devil's lie:

That your guts were gone, and the best for you was to crawl away and die. 'Twas the crowning cry of a heart's despair, and it thrilled you through and through -

"I guess I'll make it a spread misere," said Dangerous Dan McGrew.

The music almost died away . then it burst like a pent-up flood:
And it seemed to say, "Repay, repay,"
and my eyes were blind with blood.
The thought came back of an ancient wrong, and it stung like a frozen lash, And the lust awoke to kill, to kill ... then the music stopped with a crash, And the stranger turned, and his eyes they burned in a most peculiar way; In a buckskin shirt that was glazed with dirt he sat, and I saw him away; Then his lips went in in a kind of grin, and he spoke, and his voice was calm, And "Boys," says he, "you don't know me, and none of you care a damn; But I want to state, and my words are straight, and I'll bet my poke they re true,
That one of you is a hound of hell ...
and that one is Dan McGrew."

Then I ducked my head, and the lights went out, and two guns blazed in the dark.

And a woman screamed, and the lights went up, and two men lay stift and stark. Pitched on his head, and pumped full of lead, was Dangerous Dan McGrew.

While the man from the creeks lay clutched to the breast of the lady that's known as Lou.

These are the simple facts of the case. and I guess I ought to know. They say the stranger was crazed with "hooch," and I'm not denying it's so.
I'm not so wise as the lawyer guys, but strictly between us two -

The woman that kissed him and - pinched his poke was the lady that's known as Lou.

## THE PRINCE OF LAWMAN

Mr. J. Edgar Hoover, for 48 long years directed the Federal Bureau of Investigation. He made the FBI respected and feared by wongdoers. He was loved by most citizens, who appreciate the fact that it is the various Police, from local to FBI who make life possible. Without POLICE and LAW, the crazed no law dreamers' would soon learn that the world is a wild JUNGLE of BEASTS of PREY — seeking who they can prey on. Only the Police and the Law are our Protectors on this Earth. I, CKJ, say that have Honor and Respect and Owe to all Police and Law enforcement officers, for if we don't, we are like a dog wbo bites the hand that feeds him. The Police and the Law are our saviours on earth. I greatly admired and respected Mr. Hoover. I can remember in my youth that seeing him and the FBI on "GANG-BUSTERS" and the slogan of J. Edgar Hoover, "CRIME DOES NOT PAY". This man and the FBI in my youth had an influence on me and millions of others that last to this hour. He gave honor, dignity, and respect to law enforcement. The FBI hour. He gave honor, dignity, and respect to law enforcement. The FBI was and is to this day, honest and fair — no reasonable honest person has anything to fear from the FBI. They are careful and sure, bend ov-

er backwards to be fair and tolerant. Yet a bad menace to life's limb and property — it is best to listen to the knock on the door, for he will hear it sooner or later. J. Edgar Hoover warned of how the commie would seek to DESTROY U.S.A. by corruption, by drugs, perversions, and morals. To plant spies in key defenses and other aspect of government and defense, and to destroy the people's faith and confidence in our Police is the last step before the 'take-over'. DON'T FALL FOR IT! I have had vast experience in many levels of life and investigations of many happenings in the U.S.A., and I say, Don't lost confidence in the FBI or Police. One rotten apple may rot a heared but a good part and police are not a Don't lost confidence in the FBI or Police. One rotten apple may rot a barrel but people and police are not apples! AMERICAN POLICE HALL. OF FAME AND MUSEUM, operated by Florida Crime Prevention Commission, 1100 N.E. 125th St., Miami, Florida, is establishing a J. EDGAR HOOVER MEMORIAL POLICE SERVICE PROCRAM. They have been in business for twenty years and would like a \$20 dontributions on this fund or would appreciate any amount fund or would appreciate any amount donated.

Goodnight, Mr. J. Edgar Hoover, your good work goes on. THANKS from my heart to yours.

# The Midnight Light As Seen in Ft. Worth-Dallas

Long ago and far way I lived in Ft. Worth, Dallas, before I met the light of my life, my better half, Marjory. From the time I arrived in Old Ft. Worth on the Greyhound bus, from West Texas, I walked down the street and found the Richelten Bar... to the time I left for San Francisco. few years later much water passed under the bridge. Somehow a destiny has followed me all the days of my life to somehow became involved and acquainted with the movers and shapers of the world we live on. I got acquainted with some women, one in particular, who was to alter the couse of my life. My closest friends became some women and men who were associated with and close friends of the Rulers of Dallas and the High Wide and Handsome Life. the High Wide and Handsome Life. I remember in particular, Sadey, Lou, and Ruby. The 'lady called Sadey' was a Texas beauty, witty, a lover of poetry, a favorite and the belle of untold parties among the 'in group' of Dallas – the Neiman Marcus crowd, Ditto with Lou. She not only knew Greg and Pitman, but had been 'confidential secretary' and God only knows what else to...the High Roller Oil and Politics crowd. When I met her, she'd just broke up a man, who her, she'd just broke up a man, who not then, but nowadays, in some buildings around U.S.A. has his name in brass plated, and by some strange stroke of fate, his name is up here in Lancaster! What I'm saying is the destiny has followed me to this hour to somehow getting involved with the most vital issues and with people—who make the history and the deeds and the events that are history. Everybody knows today but not every

body knew in those days, that Dallas was a Power Point on Earth! Now Ruby was one apart. I didn't know Ruby so 'personal' as the others, but Sadey and Lou knew Ruby better than Ruby knew Ruby. Ruby was never on the Merry Go Round like many of us, but got in the passing lane and never got out. Ruby taught Sadey a whole lot of declamation-poems. She memorized them, like "if you can walk with kings and not lost the common touch...if all men count with you...but none too much... if you can risk all...and lose and... body knew in those days, that Dallas count with you...but none too mucha-if you can risk all...and lose and... never breathe a word"...or" I hailed me a woman from the street....... placed her in my model's chair... painted her there... as though the painted her there... as though the worst had been the best"...or" she stabbed me in the night ... when I wished she was white..." Robert W. Service...flowed like wine... and Kipeling. I think Ruby taught Sadey all this. Or was it the other way around? Anyway I can see the scene now, the Richelieu Bar was on the corner of Main Street, an old bartrom way back before prohibition was fantastic, back mahogany bar, beau-tiful glass, a brass ail, no seats — men stood at the bar with foot on the rail. And booths in the back. Oh, how many hours I've spent drinking those wast heavy glass mugs of beer, strong as an ox. Long about midnight...the air blue with good tobacco smoke, the brew had flowed for many an hour...on the juke box, playing that haunting song of songs of sadness... Born to Lose and through it all, I heared Sadey saying these words ... A bunch of boys, etc. etc.

# Time is runnina out...

Senator John Tower, Republican, Texas, and a ranking minority mem-ber of the Senate Armed Services Committee has said recently, "TIME

Senator John Tower, R - TX.

IS RUNNING OUT!" for the U.S.A.! He says U.S.A. is now No. 2 in strategic nuclear power, theater nuclear power, all conventional ground powpower, an conventional ground per er and air power and its most aspects of Naval Power! He says, "The Stark Truth is that we are now No. 2, and that fact is being translated at an accelrating pace by continued Soviet EXPANSION, ENCIRCLEMENT, and OUT-FLANKING vital U.S. in-

terests." Since the Democrat elements got in power years ago, nearly all power is being lost. It takes five to ten years to build ships for the NAVY. We have a bit over 400, Soviet have over 1000. Russia has 50,900 Tanks, Over 1000. Russia has 50,900 lanks, U.S.A. has one fourth of that amount. He says, "I believe THE TIME IS AT HAND... a reversal of present policy is needed if U.S.A. is to SURVIVE. "USSR seeks to take CON-VIVE. "USSR seeks to take CONTROL of this Flat Earth, Imperial Russia to rule the world. I say nothing wrong with them WANTING to do this, it is perfectly normal. What is ABNORMAL and FREAK-ISH and PERVERT is for U.S.A. Government and Citizens NOT to try and succeed in BEING THE DOMINANT POWER ON EARTH OURSET VES.

Why are we now falling behind in influence and power? NASA? This Communist-Democrat Subversive gang has sidetracked all our Real gang has sinetracked all our heal Defenses...the Commie Con Game... the race to make better TV movies of "space adventures" has led people to think, especially after NASA and USSR Space Program conducted the "Marriage in Heaven", that, that ole nasty tank airplane ship soldier warfare was over, from now on just "push buttons" and build cities and factories in the sky as Brother Brown and the Democrats have promised. Give Earth to the Commie and we'll "Go to Heaven" in a space ship...build us a "world in orbiting cities" etc. LSD Tim O' Leary and Idiot O'Neil and Gov. Brown — all democrats — layed the plan out! The SOLE REASON why U.S.A. is No. 2 is the FAKE SPACE PROGRAM. I say, now, cut asunder, Defenses...the Commie Con Game... PROGRAM. I say, now, cut asunder, stop, finish the fake SPACE SHUT-TLE! NASA can be kept to test rockets and other good and worthwhile things — Space Shuttle is Out! like Lotties eye! — C.K.J. May Day 1980

#### Stop the torture of God's Creatures

To Both Houses of Congress To the Chief Justice and the Supreme Court Washington, D.C., USA

May 1980

Honorable Sirs,
I humbly write you, in order to ask you, even beg you to act as God toward millions of little humble folks who can't even speak much less write. Pass a law to stop the experwrite. Pass a law to stop the experimentation on poor dumb animals? They cry out to us all, each day for help in some way, the whole Creation of dumb animals groams! Surely we must hear their cry, for with untold misery, they suffer. It is well known that experiments and tortures of animals cannot help the Human, as our bodies are different! So why make the poor dumb animals suffer and go through such torture, misery and sorrow?

So. Honorable Sirs, I humbly

# Lindbergh ... Contd.

So Charles A. Lindbergh, armed with the true facts from the FLAT EARTH SOCIETY, in 33 hours flew across the FLAT SEA and landed in Paris, in bit over 33 hours. When the word went out, THE EAGLE HAS LAND-ED, all knew the very FOUNDATION of the insame jibberish of Judo-Christian Science Dogma...was shattered and the claim made by our people that U.S.A. would be first in Recorded History to know and declare the TRUE SHAPE OF THE WORLD and DISMISS WIERD WAY OUT OF THE INSANE OLD WORLD SUPERSTITION and be the center and forces of the New Age... the true facts from the FLAT EARTH center and forces of the New Age... and Age of Truth and Justice, Merand Age of Iruth and Justice, Mer-cy where HONESTY and TRUTH DECENCY would PREVAIL, instead of the old European and Asiatic world of preying on the ignorance of the masses of the beasties as the Judo-Christian Scientists called the people and still call them today. They qualify to be called that cause so few can or do bother to even TRY to think and be rational logical men. All this is the TRUE reason the 'people' of earth loved and still love Charles A. earth loved and still love Charles A. Lindbergh. He fought a good fight—against the Priests of Darkness, the State Religion, in U.S.A. Judo-Christian Science. He made trips to Old China, then a FLAT EARTH NATION (though not official) ... ever wonder why in all these years the Chinese were degraded? The Priests of Darkness lived in FEAR the "China Truth" would leak out, so the Chinese were called one word "heathenchinnie"...so who cared what they Chinese were called one word "heathenchinnie"...so who cared what they thought." Later his child was kidnapped and killed by a German. Was it because he proved Earth was Flat? In 1934 he went to live for awhile in England. While there, he learned of what he thought was the PLAN and PLOT to make a HOLOCAUST of the Americans. He said the English, and the Germans and their Run-

war—not for our good! He had left the country because of the news med-ia persecution. We knew why — to prevent the True Meaning of his Flight to ever get going strong. Dis-proving the Jewish-Christian Lie that earth (s. a hall! While to Faciliate he earth is a bail! While in England he learned the real reason or one reason learned the real reason or one reason for the war — to stop Flat Earth Society and give strength to the Communists, who were the Church of England, Lutheran-Jewish Christian-Atheist...their weird idea of 'kingdom of God or Satan on Earth. And to overthrow FLAT EARTH CHINA! and bring under by force and violence, under the CRAZED SATANIC DEMENTED DOGMA OF JEWISH-CHRISTIAN SCIENCE and so completed the job of DECEIVING THE WHOLE WORLD. He was shut up and called unpatriotic for this...no more heard of him. By the way, CHI-NA did fall to the Spinning Grease Ball Gang, untold of MILLIONS MURDERED 'holocausted' by the 'kingdom of god gang.'

Today, they in China are busy as bees, brainwasbing China ... or TRYING, to accept the INSANE DE-LUSION OF LUNATICS... spinning ball world, no up, no down, no nothing, just grease balls and all of them spinning.

#### Members Called Chosen and Faithful

Charles Kenneth Johnson, 1980 "A Stranger on the Shore"

Don't think I have thanked the many loyal members who not only paid their dues right on time but sent contributions, besides. Things have been rather hectic around. Let have been rather hectic around. Let me say right now, "thanks to all members who sent in contributions, gave added motivation to forge ahead." Also thanks for the letters. Many needed to be published, but due to lack of space, printer had to leave out. Pity we can't afford another page. As truely the time is at hand, as we've said all along that 1980 is a crisis year! To be on safe side, I'd say, it is a good idea to always keep extra water — gal. of purex bottles. Also extra tobacco, coffee, and food. We are under 'invasion' right now but it could develop into bombings, etc. and millions of into bombings, etc. and millions of 'enemies' are in the U.S.A. and bor-

Mr. Robert J. Schadewald, an un-usually good scholar and researcher, who one day may be considered Ame-rica's Greatest Scholar-Researcher, has written another very informative article for one of the 'old line' science magazines. SCIENCE DIGEST will be in the July 1980 issue on our Flat Earth Society, will be in the July

issue of SCIENCE DIGEST. We advise you all to get an issue. Also, by the time this paper is printalso, by the time this paper is pintied, we will have appeared on NBC's new and most popular show "Real People", scheduled May 7, 1980. It is about time someone took an interest in REAL PEOPLE as contrasted to the shallow, callow, psuedo peo-ple, who we read so much about.

It looks like now, it seems that NASA has taken our offer made in JUNE 1979 FEN to 'call off the space shuttle hoax'. Indications here is that they have! Edwards AFB under new commander has now run the carnies off and is doing REAL Air Force work! NASA base on Edwards is now testing airplanes that you paddle and other useful projects that may benefit the United States and not damage us. the United States and not damage us. Edwards has now turned Si Fi at base over to NBC. They have the 'contract' to provide the Science Fic-tion – fitting! If sins stopped, sins are forgiven as far as I'm concerned. Go right on, now and do it right, and fly straight. Forget about space shuttle and we'll forget about it.

# A New Beginning, Sun Does Not Set On U.S.A.

Nancy and Ronald Reagan

Ronald and Nancy Reagan are two of the nicest people not only in California but the entire United States of America. They are two of the most beautiful Americans, the kind that have in the past made Americans the MOST LOVED, HON-ORED and RESPECTED people the world has ever known. They are straight, square shooters, above board honest, clean in mind, body and soul. These were demonstrated for many years. He almost single-handed straightened out Hollywood. From that he went on to be the No. I elected Governor of California. While in Sacramento he drove out and smoked out the worst of the low class skum that the Democratic Party seems to 'hatch' and Reagan got California to be the most 'progressive' houest and efficient gooernment in USA. At close of his term, hundreds of millions in surplus monies and State of California running like clock work. Only squawks coming from the skum class, or should say the skum who have no "class" at all! It is no secret what Democrats can do for you and to you and what a gang and 'culture' of bactericide is drawn to this "Hate Decent American Party" - the Democrats. They come from under rocks and out of the woodworks and out of the sewers attracted by the smell of the corruption...when a so called Liberal Democrat gets in office. When Ronald Reagan and Nancy took office, they attracted 'good people' who want to 'serve' and benefit our Nation and State. They have clean, decent, normal instincts and outlook of real Americans and they attracted this class to serve and help the 'Good Guys Team'. So when Ronald Reagan gets in office, he will pull thousands of decent loyal Americans to get involved in trying to SAVE THE UNITED STATES OF AMERICA from the DISASTER THAT LOOMS STRAIGHT AHEAD - perhaps the DOWNFALL of our great nation! In days of FDR and other times the Democrats were also 'Americans' and 'decent' but that's all past now, the decent ones have been converted to the Republican Party - no doubt many decent people that are still with the Democratic Party, a tiny few with no power. No doubt, Mr. Carter and his close family circle. including Billy (who is my favorite) are basically good and decent people. I will not lift my voice against Mr. Carter, but My God, the Monsters who run the party and are the wheels.

Republican, Texas, at the recent convention in Detroit: "Unless we elect Mr. Ronald Reagan President in November, the United States and the world will enter a DARK AGE — A LONG DARK AGE from which neither we nor our children or our children's children will emerge." Mr. Tower and hundreds, even thousands, of our top people from the Army, Navy, Marines, and both Parties, men from every walk of life and I have said "this is the crisis of what could be the END of USA". Americans who are in their right mind have sense enough to come in, out of the rain and love their own native land and say, we must act quickly while it is yet day for the night cometh to elect a clean slate and try to save America and to go on to the New Beginning as our founding father -George Washington predicted in his 'vision' for America that in these 'latter days' that we can and will, with the help of the Almighty God, by keeping the FEAR OF GOD BE-FORE OUR EYES and upholding his Holy Righteous Laws and emerge out of the smoke as the CENTER and FOCUS and the LEADER OF THE ENTIRE WORLD - THE FLAT WORLD. George Washington said that we are the Light and Inspiration to all the nations - UPON THIS STRETCHED OUT PLANE - this one FLAT EARTH. It could be the New Beginning spoken of by the Republican Party is this crisis at the end of this age and the New Beginning is the GOLDEN ACE, THE MILL-ENNIUM...the one FLAT WORLD - USA showing the way, the USA the Great and Shinning Light that aiready has inspired the people of all earth, will now re-arm morally, and spiritually...put on the whole armor of Godland in other ways and go forth and TAKE CONTROL OF THIS EARTH and make the entire earth the delightful, prosperous FREE, HONEST, and BRAVE country—as the United States is Already! We FREE, DECENT, GOD FEAR-INC SANE people of USA, bowing our head, giving THANKS for our

It is reported by Mr. John Tower,

many blessings, asking for the strength, courage, the power and the WILL TO STAND UP AND BE COUNTED, then TAKE CONTROL OF THIS COUNTRY AGAIN THEN TAKE CONTROL OF THE WORLD! You who read this and other decent God Fearing People are the Only Hope the World has. You are invited to the wedding — WILL YOU CO? You are called, you are chosen, BUT ARE YOU FAITHFUL! Get up, get out, do something — CET IN. VOLVED — VOTE for RONALD and NANCY, or vote for somebody — Get Active! Let's go for broke — for the New Beginning, the New Age, — C.K.J., August 1, 1980.

Senator John Tower, R-TX.

My mother and father were born and raised in Texas. I was born and raised in Texas so I can tell you that when Sen. Tower - Republican of Texas - tells you: 'Time is Running Out'...'The hour is at hand' that unless Mr. Reagan is elected, United States will enter a DARK AGE and loss of all power. As a 'Texan' he says this you better listen, for he wouldn't say it unless he KNEW WHAT HE WAS TALKING ABOUT and can and will back it up, he would not lie about this, we better LISTEN and HEED — as the old saying goes, 'he who hesitates is lost'.

# PILATE ...

#### washes his hands

"So when Pilate saw...that a tumult was arising, he took water, and washed his hands before the multitude..."

From the little real knowledge that has come down to us concerning Pontius Pilate he does not appear to have been an evil-disposed man. He must have possessed at least a weak will to do the right thing, for at the arraignment of Jesus, we are told, he went out three times and tried to reason with the rabble before he finally gave them their way. The trouble was, he lacked the interest or the courage to go through with what he knew to be right. He was either a moral coward or a moral shirker, and no theatrical gesture with a hand basin could wash away his blood-guilt for a wrong he might have prevented.

Pilate happens to be the most historically conspicuous example of a very numerous tribe. They are everywhere around us, all trying to wash their hands of unpleasant responsibilities.

There is, for example, the man who knows what vivisection is and would like to see it abolished, but keeps silence from a sort of shame. Perhaps he fears the ridicule and abuse that must be faced by all who dare attack an established wrong on moral grounds, or he may be under the curious delusion that to be humane is to be in some way unmanly; as if there were ever anything in common between manliness and cruelty, which in all its forms is close kin to cowardice.

There is the woman who feels in her heart that vivisection may be the evil thing it is reputed to be, but shrinks from the harrowing details of its barbarities, which must be understood before a fair opinion can be formed. "Don't tell me those dreadful things," she begs. "My nerves won't stand them." But the nerves of the living animal may stand the knife, or the long drawn out misery of implanted disease, and she will not raise a finger to help it.

So these men and these women seem to take water and wash their hands of responsibility for the wrong. Like Pilate, they are not cruel or entirely callous. Most likely they have consciences. They "have felt the sublime prompting to do the painful right," and would prefer to follow it, but the moral courage is wanting, so, like Pilate, they persuade themselves that it is no affair of theirs.

But are they right? Is it not in some measure the concern of each one of us? In so far as it lies in our power to help right a wrong and we hail to do our part, to just that extent we are responsible for the perpetuation of that wrong. There is a noblesse oblige of character no less compelling than that of birth. The just man cannot in conscience pass by on the other side and leave the suffering to their fate, be they men or animals. If he can do no more than speak a word for their cause whenever opportunity arises, he is at least helping to form public opinion, and it is in public opinion that the strength of a good cause lies.

To bring help to the helpless has always been the mission and privilege of strong souls, and surely novictim ever appealed more poignantly for help than the forgotten little animal gagged and strapped down to the operating board, awaiting vivisection. Only an animal, yes, and man has "dominion" over the animals, which gives him the right to use them for his own purposes. All that might be granted, and still it would not follow that the common laws of decency and humanity are thereby abrogated.

# ZETETIC ASTRONOMY

(5th Installment)

Although the experiments already described, and many similar ones, have been tried and often repeated, the Author was induced once again to visit the scene of his former labours, and to make some other (one or more) experiment of so simple a character that no error of complicated instrument or process of surveying could possibly be involved. He left London (for Downham Market Station) on Tuesday morning, April 5, and arrived at the Old Bedford Sluice Bridge, about two miles from the station, at twelve o'clock. The atmosphere was remarkably clear, and the sun was shining brightly on and against the western face of the bridge. On the right hand side of the arch a large notice-board was affixed ( a table of toils, &c., for navigating the canal). The lowest edge of this board was 6 feet 6 inches above the water, as shown at B, fig. 12.

A train of several empty turf boats had just entered the canal from the River Ouse, and was about proceeding to Romsey, in Huntingdonshire. An arrangement was made with the "Captain" to place the shallowest boat the last in the train; on the lowest part of the stern of

this boat a good telescope was fixed-the elevation being exactly 18 inches above the water. The sun was shining strongly against the white noticeboard, the air was exceedingly still and clear, and the surface of the water "smooth as a molten mirror;" so that everything was extremely favourable for observation. At 1:15, p.m., the train of boats started for Welney. As the boats receded the notice-board was kept in view, and was plainly visible to the naked eye for several miles; but through the telescope it was distinctly seen throughout the whole distance of six miles. But on reaching Welney Bridge, a very shallow boat was procured, and so fixed that the telescope was brought to within 8 inches of the surface of the water; and still the bottom of the notice-board was clearly visible. The elevation of the telescope being 8 inches, the line of sight would touch the horizon, if convexity exists, at the distance of one statute mile; the square of the remaining five miles, multiplied by 8 inches. gives a curvature of 16 feet 8 inches, so that the bottom of the notice-board-6 feet 6 inches above the watershould have been 10 feet 2 inches below the horizon, as shown in fig. 13-But as always and forever it was flat.

## Fluids Facts Logic, Earth Is Flat

It is in the nature of fluids to be and remain level, and when that level is disturbed by any influence whatever, motion ensues until the level is resumed.

Professor Airy tells us, in his "Six Lectures on Astronomy," that "quick-silver is perfectly fluid, its surface is perfectly horizontal." We may add that all fluids are the same, for the reason given by the next writer.

Mr. W. T. Lynn, of the Royal Observatory. Greenwich, in his 'First Principles of Natural Philosophy,' says: 'the upper surface of a fluid at rest is a horizontal plane. Because if a part of the surface were higher than the rest, those parts of the fluid which were under it would exert a greater pressure upon the surrounding parts than they receive from them, so that motion would take place amongst the particles and continue until there were

none at a higher level than the rest, that is, until the upper surface of the whole mass of fluid became a horizontal plane."

The English Mechanic of 26th June, says:

"Since any given body of water..... must have a level surface, i.e., no one part higher than another, and seeing that all our oceans (a few inland seas excepted) are connected together, it follows that they are all VIR-TUALLY OF THE SAME LEVEL."

More and more I come to believe that any person who is 'on the level' about seeking the truth Can and Will understand There is no 'question' or 'debate' about the demonstrated FACT the Very LAW of Nature...that EARTH IS FLAT!

## **Another Witness**

Sir,—In August last I, with several other friends, being in Oban for a holiday, took a trip for a day in a small yacht on Loch Lorne, and being a glorious sunshiny day and so calm that not a ripple was seen, and being becalmed for an hour about mid-day we observed a good many sights of various kinds. Amongst other things that we saw was a yacht, which the captain told us was 12 miles distant. We saw all the masts and part of the hull, and to get a better view of her we took our binocular opera glass (a good one). Now, sir, wouldn't it require a funny curvature table either with or without the odd fractions to explain how we saw the hull of that vessel twelve miles off? According to a table furnished by the present Astronomer Royal recently, tought to have been 66 feet below the line of sight; but the "table" that we saw it from was the side of our

yacht, and we concluded the sea was level. Yours respectfully,

Siddal, Halifax. JOHN SMITH.

"If we take a trip down the Chesapeake Bay, in the daytime, we may see for ourselves the litter tallacy of the idea that when a vessel appears "hull down," as it is called, it is because the hull is "behind the water" for, vessels have seen, and may often be seen again, presenting the appearance spoken of, and away—far away—beyond those vessels, and, at the same monient, the level shore line, with its accompanying complement of tall trees, towering up, in perspective, over the heads of the 'hull-down' ships!"

Whatever the fate man claims the privilege of imposing on the animals by virtue of his acquired dominion over them, a higher principle than the tyrant's right of conquest demands that it be executed in a humane manner. If that is impossible then obviously the thing is one that ought not to be done at all. There is no such thing as a right to do wrong, however plausible the pretext.

How it ever can be held by any unbiased mind that kindness and mercy toward human beings are essential qualities of an upright character, but toward the sub-human races these same qualities may be renounced at will without blame or shame, is something of a mystery. Certainly there is no foundation in reason for such a distinction. Kindness is good and cruelty is bad, and it is not the zoological classification of the object that makes them so, it is a truth as fundamental as the concept of good and evil.

But, say the vivsectors, our cruelty is excusable because we hope thereby to serve the human race.

Here is a topsy-turvy conception of right and wrong. If it is righteous thing to vivisect dogs and rabbits "for the good of the human race," on what reasoning can the teamster be restrained from clubbing his horse over the head to make him pull hard-

er for the same high end, and why should the law not burn criminals instead of electrocuting them, so that researchers may study their reactions? By the same guileless logic Adolf Hitler had no difficulty at all in figuring out a complete justification for his own peculiar method of bringing peace to the world. All for the good of the human race!

Surely there are limits in morality to what man may do for his own profit. That people of unquestionable humaneness toward men are so often found condoning the ghastly processes of animal vivisection, marks a strange blind spot in the human con-

Now USA has Kennedy Democrat TV movies of moon landings'...Nazi Germany and Nazi USSR has real airplanes, ships, tanks and guns. Thanks to the Democrats, U.S.A. today at the mercy of enemies! In my opinion, it is impossible to be a Democrat and love U.S.A. at the same time! Democrats

have done us in! Democratic Party produces de-generate insanity? People are wondering if it is all the violent sex degenerates sodomites lesbians torture murderers just naturally 'fit' in the Democratic Party of if the 'Party produces these symptoms? Last couple of years there were at least five Mass Torture by Sodomite Murderers. They tortured to death at least 200 people, mostly young men. Each and every one was a leading democrat'. The contractor near Chicago tortured to death in most horrible, painful, insane, and degenerate way 25 or 30 young men - a real wheel in the Democrat Party. One in Houston, the torture this sodomite gay did on 75 or 100 is too hideous to tell...top Democrat...right in the town where the Queen's Space Control Center is located. Of course one reason is that all Sodomite Gays are Democrats - out west here the Democrat Party is now called the Sodomite Lesbian Party. And of course most ALL so-called 'Cays' real name Sodomites are sadists, in their perverse brains to inflict torture is a pleasure. Many bomosexuals are like this. A certain Intelligence Service' made available to us, finds ALL perverts...are Democrats! Jim Jones, the Swamie Arvan Commie Indian, the hater of white and all straight people, the one who rented the old Synagogue in San Francisco for his People's Temple was a real top Democrat, a wheel in the Party. # Eclipses of the Moon

From "Wonders of the Sun, Moon, and Stars" I extract the following:

"Astronomers, by mere calculation, are able to forecast the position of any luminary at any time for many years to come. By the same means, they can foretell to a second, the commencement, duration, precise aspect, and the ending of all the eclipses that will occur for a lifetime hence, and more, without limitation. Such being the case, the theories upon which the calculations are based must be true, or the correctness of such calculations would be impossible."

This statement, and similar ones so often made, have had the effect desired by their inventors. The public have believed that the theory of a globular world is true, because astronomers can correctly foretell eclipses. This is a totally erroneous view of the matter, as eclipses have no connection with the shape of the world, and are not calculated on any theory, but on well-known time cycles. In "Pagan Astronomy," by A. McInnes, the following occurs:

"More than 2,000 years ago the Chaldeans presented to Alexander the Great at Babylon, tables of eclipses for 1,993 years: and the ancient Greeks made use of the cycle of 18 years, 11 days, the interval between two consecutive eclipses of the same dimensions. A total eclipse of the sun occurred on Jan. 22, 1879, and the preceding ono Jan. 11, 1861. Now, have not mere theorising about the sun and moon—the great unerring clocks of time—thrown chronology and the calendar into confusion, and hence scientists cannot agree as to the world's age, and the year absurdly begins on Jan. 1 instead of at the vernal equinox, the months consisting of 31 or 30 days one of 23? However, it can be shown that, with eclipse and star transit cycles, the greatest accuracy as to dates may be attained.

"Coing back, for example, from Jan. 11, 1861, through a period of thirty-six eclipses, or 651 years, we find that a total eclipse occurred also on Jan. 11, 1210; and, continuing backwards, by such cycles we arrive precisely at the date of creation as given by Moses in Cenesis. Also, as related by Josephus, the moon was eclipsed in the fifth month of 3.998 a.m., when Herod the Creat died, and Christ being then two years old, His birth occurred 3.996."

In "The Triumph of Philosophy," Mr. J. Gillespie informs us as follows:

"I am asked to take into consideration how they, with the present theory, can calculate and forteell eclipses and other events with surprising accuracy. Now, I can prove that long before the present theory was ever thought of, even 600 years before Christ, the ancients discovered the difference of local time or the hour of the day between places of different longitudes, knew the causes and laws of eclipses, and the motion of the sun, moon and stars with surprising accuracy."

R.J. Morrison, F.A.S.I., R.N., in his "New Principia," sys:

Eclipses, occultations, the positions of the planets, the motions of the fixed stars, the whole of practical navigation, the grand phenomena of the course of the sun, and the return of the comets, may all and every one of them be as accurately, nay, more accurately, known without the farrago of mystery the mathematicians have adopted to throw dust in the eyes of the people, and to claim honours to which they have no just title. . . . . . The public generally believe that the longitudes of the heavenly bodies are calculated on the principles of Newton's laws. Nothing could be more false.

T. C. Ferguson, in the Earth Review, "No doubt some will say, "Well, how do the astronomers foretell the eclipses so accurately." This is done by

cycles. The Chinese for thousands of years have been able to predict the various solar and lunar eclipses, and do so now, in spite of their disbelief in the theories of Newton and Copernicus. Keith says. 'The cycle of the moon is said to have been discovered by Meton, an Athenian, B.C. 433,' when, of course, the spinning whirling ball was not dreamt of.'

### Disciples of "Sir" Isaac Newton Idiots?

Many men of thought and learning have scouted the ideas imposed upon us by Sir Isaac Newton, of which the following is a sample: —

'The repetition of a blunder is impertment and ridiculous. To liberate oneself from an error is difficult, sometimes indeed impossible for even the strongest and most gifted minds. But to take up the error of another, and persist in it with stiff-necked obstinacy, is a proof of poor qualities. The obstinacy of a man of originality when he errs may make us angry, but the stupidity of the copyist irritates and renders us miserable. And if, in our strife with (Sir Isaac) Newton, we have sometimes passed the bounds of moderation, the whole blame is to be laid upon the school of which Newton was the head, whose in competence is proportional to its arrogance, whose laziness is proportional to its self-sufficiency, and whose virulence and love of persecution hold each other in perfect equilibrium." "Through the whole of Newton's experiments there runs a display of pedantic accuracy, but how the matter really stands, with Newton's gift of observation, and with his experimental aptitudes, every man possessing eyes and senses may make himself aware. It may be boldly asked, where can the man be found, possessing the extraordinary gifts of Newton, who would suffer himself to be deluded by such a hocus pocus if he had not in the first instance willfully deceived himself? Only those who know the strength of self-deception, and the extent to which it sometimes trenches on dishonesty, are in a condition to explain the conduct of Newton and of Newton's school. To support his unnatural theory. Newton heaps fiction upon fiction, seeking to dazzle when he could not convince." - GOETHE. Proceedings of the Royal Institution of Great Britain. ## Sacred Cows

In our youth we are taught that the cattle are sacred, That sensible people believe in this fact. We don't really believe that the cattle are sacred. And yet we believe that the others believe. And accordingly we treat the lowliest cattle As holiest of all us dumb animals.

In our youth we are taught that the earth's shape is global. That sensible people believe in this fact. We don't really believe that the earth's shape is global, And yet we believe that the others believe, And accordingly we treat ourselves and all people As fleas creeping over a wild spinning ball.

# PILATE...

science. In this modern day, which all for re-examining ancient presumptions and rooting out long-standing abuses, it is about time to inquire why our conduct toward the animals, should be considered a matter of irresponsible caprice, outside the range of the moral law which applies to all other actions.

Pilates come and go, and the world is little better for their having lived their lives of moral mediocrity, content to take things they find them, leaving to others all tough and unpleasant problems. The thing that moves the world forward is that "divine discontent" which cannot see a wrong, no matter how time-honored, without wanting to do something about it.

The ceaseless torture of animals in research and biological laboratories is not only a wrong to the victims but a debasing influence on the collective conscience of the society that shabbily expects to profit by it. The men and women who are attacking this social ulcer — the physician who, knowing it well, condems it openly, the clergyman who ooes not fear to

opeak against it from the pulpit or among his people, the teachers and parents who implant the nobility of humaneness in the young minds they guide, authors who help with a word here and there in their published works, all crusading spirits who scorn to ask whether a cause is popular, so it be right — these are of the kind who leave the world better than they found it; these, and not the animal-torturers, are the ones who, in the higher and broader sense, are working "for the good of the human race." — R.B.C.

#### Science Insults Your Intelligence

Iron, Salt, &c., are said to be elements of the sun's composition, and as the earth contains these and other minerals, it is a globe or planet like the other heavenly bodies which contain the same metals. What is known as:

#### SPECTRUM ANALYSIS

is relied upon as proving this. A prism is placed in position so as to intercept the sun's rays, and the colours seen through this instrument, red, orange, yellow, blue, are said to be the result of the sun in a state of fusion, emitting their several colours in the combined similight, which total light is decomposed into its component colours by the prism.

With the object of testing the conclusions arrived at by the learned relative to spectrum analysis, several experiments were made by the writer. The light of the sun on a clear day. about noon, seen through the prism disclosed the various colours that can be seen through this instrument. On a hazy day before sunset the colors seen were the same but very faint. Light from a lighthouse and a star seen through the prism, showed the colours to be the same, the colors from the light of the star being much less brilliant than that from the lighthouse. Light from a lamp gave the same result as light from a star or the sun, only much fainter. Then the electric light was tried. A large street lamp of great power and several others of less power gave the same result as the sun, star, lighthouse, and street lamp, but in various degrees of brilliancy according to the power of the light. Even a candle gave a very faint yellow-blue tinge, so slight that it had to be looked at for some time before anything but blue was apparent.

If, therefore, it be argued that spectrum analysis proves that the sun is made of the same metals as we find in the earth, and that, therefore, the earth is a product of evolution then it is equally clear that the electric light and the glass shade of the lamp which encases it are really composed of iron and various iron metals in a state of fusion, constituting indeed, a globe of glowing vapour, and not glass, carbon, &c., at all. It is also as reasonable to conclude that the kerosene lamp and the candle are composed of metals in a state of fusion and that there is in reality no paraffine, no glass, no tallow, and no wick. That is to say, known facts must be thrown aside, common-sense stultified, and reason dethroned in order to bolster up the unprovable assumptions of modern science relative to the doctrine of evolution as applied to the earth and the heavenly bodies.

The truth is a fact and a fact is the truth and the Twain cannot be parted.

The form of idiocy that says 'any-hing you want to be Truth IS the Truth is 'whatever you or he say it is or you make it true by 'saying it is true have not only missed the boat but missed the HUMAN RACE and belong in the Pavlov's pack. This is ENAGTLY what is the central DOGMA of so-called 'modern science theory also called 'christian science that nothing is real but delusions dreams, ideas, theories, so just any idiocy, such as the claim that earth is a spinning, whirling, gyrating, grease or greek or swamie ball, is the truth as long as you wish it to

be or your 'time' you want it to be so. No amount of dreaming or pretending or 'time bending' has ever made the Flat World a Ball — either Swamie, Arian, or Greek or Gatholic or Church of Germany — the world is flat and that is that! In this NEW BEGIN-NING...let us BEGIN with Truth or Fact ... earth is FLAT. Sun revolves around and above the Flat Earth 3,000 miles high — IT DOES NOT SET ON USA. Is said in scripture that in the Day of the New Beginning the New Age will be declared. THE SUN DOES NOT SET ... so it is to YOU so Declared today, August 1, 1930. THE SUN DOES NOT SET. Directories and similar publications rank right up there with newsletters as sources of vital, on-target information about what's going on in any given field. The best source of information about these very handy guides seems to be a brand-new book, The Directory of Directories, distributed by Gale Research Co., Book Tower, Detroit 48226 (\$56.00). (Gale also does the Encyclopedia of Associations, well known to most researchers.) The DOD is 722 pages with over 5,100 concise but detailed entries and really good subject and title indexes which make the book very easy to use. Supplements are published about every six months under the title, Directory Information

Gale also provides access to business information sources in the brand-new Business Organizations and Agencies Directory (\$72.00). The 596-page volume covers a wide range of agencies and services vital to modern business activity. Separate chapters provide names, addresses, phone numbers, and additional details on: Commodity and Stock Exchanges. . . Better Business Bureaus . . . Federal Government Agencies . . . Galileo's Case to Re-open

### Galileo Was A Liar Space Shuttle, Democrat Hoax

Pope John Paul II

The late Pope Paul VI, an Italian, supported the work of our FLAT EARTH SOCIETY, and, I believe he knew earth was flat. Will Pope John Paul II re-open the Galileo case and claim Galileo was right? Pope Paul VI said, "United States of America was the world's best hope and he loved the USA.

AP NEWS BULLETIN: Pope John Paul II says Galileo was 'wrongly condemned and calls for a 'new trial'! At the time of Galileo's trial (he was charged with teaching and pretending he believed it was true, the Copernician nonsense; it was found that this idiocy claim earth is a speck of dust spinning around the Sun, which was the center of the universe, was ABSURD - unrelated to the known facts and expressly contrary to the Holy Scriptures! Today the same charges are still true. In fact for a person to claim to be a 'Chris-tian, a Jew or an Islam, all based on Moses writings, and to believe such nonsense, such idiot athiest nonsense as the spinning ball hoax, is a big joke. As Thomas Paine said so long ago, and so true "it is IMPOS-SIBLE to believe in Jesus or the Bible being in any way INSPIRED and at the same time believe in 'modern astronomy' (oh yeah... it was called modern then too in 1770). So today not only was Galileo a Liar, but all who claim to be Bible Believers or 'Christians and ESPECIALLY to Christians and ESPECIALLY to claim to be an Israelite or a JEW ... makes a person who does so a 'Liar' and since the God of Israel and the Bible dams Liars. But don't sell Vatican short. Remember earth IS ilat, and the truth will be out! At a new 'trial' all earth would learn and

have to confess - CALILEO... DO LIE.

Anyway there used to be a country call Prussia, which was and is part of Nazi Germany, was the area from which came the Deluded Madmen, the raving lunatics, the glorious supermen, who concocted the absurd theories' and plans to keep wars going. The Military Cast, also known as Junkers, and from the word has come the word Junkies, meaning a dope head or a dope head nut, or a nutty dope head, also known as dope fiends which is a much better description. Like a hype, also spelled Hip (means one who uses the hyperdermic needle). A little Hype is a 'hyppie' which is also known as 'hippie, 'meaning a younger dope fiend. So a Junkie means a younger Junker or Fiend. Anyway, Prussia, the land of the Junkers and Junkies is where Copernicious was born, Thorn Prussia and now called Poland. By the way Copernicious, the Prussian dope fiend, deceiver and dreamer of opium and other dreams, at last died in utter madness. He was in fact demented the very day his book of Dope Fiend Dreams was printed entitled "THE SPINNING BALL." Now, to students of history, political-religious history, Thorn should ring a bell.

Anyway, Galilei Galleo, 1564-1642, is claimed to be an Italian but I doubt it. Well, his tale is - he went the same route as did the Copernicous Prussian did, took up DRUCS - the 'study and use of it,' at the same school just as the way Copernicious did. Interesting sidelight that Aldous Huxley, an English writer of BRAVE NEW WORLD, a dope fiend and advocate of the New Order being "The Dope Fiend Age." At least he CONFESSED that his aim was to help bring in the total age of BEASTIAL DOPE FIENDISM. You could say that Copernicious, the dope fiend Prussian and then Calileo. his dope pusher and user disciple, carnie, montebank, astrologer, science fiction writer laid the foundation for the completed BEAST AGE as prophesied in the bible - 'every tribe kindred and tongue to come under the BEAST or BEASTS and the power was gained by the use of MANY DRUGS - Revelation 18:23 (sorcery ONLY means drugs). Well, anyway

the Vatican tried to stop the spreading of the utter nonsense called then 'the Copernicious Hypothesis' and preached by Galileo who claimed that earth is a ball, spinning, whirling, gyrating around the sun, the sun being the 'cemter' of the universe etc. They did not stop this nonsense dogma, the dream of dope fiends from gaining ground as the Spanish and Jewish "Society of Jesus" or "Society that IS Jesus" came forth full power pushing the Copernicious dope fiend dream as did the rest of the German bohemians, and so called English and all out effort to establish the ATHEIST Spinning Ball Concept as a dogma in their so-called 'State Religion.' The protestant foundation dogma, The Spinning Ball Word,' is totally atheist to the Hebrew bible.

Well, I believe that another good reason that the Vatican couldn't stop the new delusion was that the Ptotemaic system then held was ALSO FALSE. So they went from one False System to another equally and worse false system. They never had, to my knowledge, the correct concept of earth. Why? Because the plan from the beginning was that the TRUE FLAT EARTH TRUTH would ONLY come at the end of the present system and would be the basis of God's statement – 'behold I will make all things new and the sun will not set in that day. This will be 'revealed' and not 'made' as was the wrong translation.

What FLAT EARTH SOCIETY is teaching is THE NEW HEAVENS and NEW EARTH! Marjory and I are Two Witnesses and fulfilling all the prophecies of the bible. So today all these organizations, the churches, nor scientists or anyone teaches the truth about the world - but us! Marjory and I are two witnesses against the world and our members who are the Elect spokenof in the forecasts in the 'revelation' of those WHO ARE NOT DECEIVED. We teach all to "Fear God who created Heaven above and Earth below"; to keep the commandments of God and the testimony of Jesus Christ. It is forecast by all the Prophets and by commonsense and simple logic that the truth will not perish from this earth but that the truth WILL prevail. (Read the 37th Psalm.)

Sometime back a very good member back East sent me some large clippings, mainly AP, regarding the Pope's idea of reopening the Galileo case. So far I didn't get a statement from the Pope about Galileo being a good guy' though AP tries to imply he's saying this. Latest data from the AP is that the Pope will re-open the Galileo case. I think the world will be shocked when the facts will re-veal as we have taught for so long that the present day claims regarding 'astronomy', 'the Russian Venus visits' etc., are WITHOUT ONE WORD OF TRUTH! Will I be invited

#### **World Is Not A Ball**

#### Nebula Hypohesis and Gravity

As to the origin of this earth, when and how the world began to evolve itself, we are told that in the beginning there was gas, or a "ne-bulous cloud," according to scientists and evolutionists. This is rather a difficult subject to deal with, because there was scientifically, no beginning — just an "eternal evolution of substance." Anyway there was of substance." Anyway there was a time when this "nebulous cloud" arose - never mind where it came from, for no scientist has yet ever attempted an explanation on this point, although its existence requires some accounting for considering it was inorganic matter, and it possessed the powers of "feeling and inclination." According to LaPlace,

"The particles forming the cloud were very hot," he was not there to see, but I only mention this because some scientists, like Herbert Spencer, state that the "embryo universe" was cold. Anyway, hot or cold, the particles by universal suffrage, or by some other method, unknown to scientists, took upon themselves to form the "Solar system"; therefore, it was necessary that this "diffused fire mist" should condense a little and move its particles a little closer together, "according to Newtonian laws."

There is a difference of opinion among the men of science concerning the origin and destiny of this earth. Some geologists inform us that this earth had its origin in fire, others in water; some contend that it will become extinct by a lack of water — a drought; others by too much water, a flood; others, that the end is likely to come by fire — a burn out; others that it will be caused by intense coldafreeze out. They all feel sure of their opinions, and yet no two of them quite agree.

Now concerning gravitation, C. Vernon Boyd, F. R. S., A.R.S.M., M.R.L., in his paper "The Newtonian Constant of Gravitation," says: "It is a mysterious power which man can explain, of its propagation through space all men are ignorant," - Proceedings of the Royal Institution of Great Britain. P.355, March.

This is certainly an honest and authoritative confession of astronomical ignorance of their fundamental position.

Prof. W. B. Carpenter, in his paper, "Nature and Law," says: "We have no proof, and in the nature of things can never get one, of the assumption of the attractive force exerted by the earth, or by any of the bodies of the solar system, upon other bodies at a distance. Newton himself strongly felt that the impossibility of rationally accounting for action at a distance through an intervening vacuum, was the weakest point of his theory. The doctrine of universal gravitation then is a pure assumption." — Modern Review.

This "absurd" law, or "mys-

This "absurd" law, or "mysterious power," which no man can explain, "the existence of which has never been proven," and of which its supposed operation through space "all men are ignorant," amounts to nothing more or less than an empty assumption.

Astronomers themselves consider

that gravitation is absolutely necessary to their system, in fact the very foundation of it all. But I deny that there is any such force in existence, and will express my denial in the language of Sir Isaac Newton himself, written in a letter to his friend, Dr. Bentley, February, 1692, just before the death of Newton; "That gravity should be innate and inherent in matter, so that one body can act upon another at a distance, is to me SO GREAT AN ABSURDITY, that I think no one who has, in philosophical matters I agree with Sir Isaac, for I, too, think it "so great an abthat I shall never "fall into surdity'

#### Inertia of Matter and Inherent Force

Inertia is that property which renders a body incapable of putting itself in motion when at rest, or coming to rest when in motion. When a stationary body begins to move, or a moving body comes to rest, it is not through any power of its own, but because it is acted upon by some external agency, which is called force.

That no inanimate body can put itself in motion, is evident from our daily experience and observation. The rocks that we saw on the earth's surface years ago, are precisely in the same place today that they were then, and there they will remain forever unless some force removes them.

A moving body gradually comes to rest, when the force which put it in motion ceases to act; this is also due to the resistance of the air, and not by any agency of its own. A projectile may be thrown with such force as to be borne some distance in a straight line, without having its direction altered either by its weight or air resistance; but when the force is spent, its velocity diminishes, and it comes to rest.

Now since it requires force to act. whether that force be a pull or a push, I might inquire how did the planets ever tend to group themselves together about the sun, or speed off into space as we are taught to believe? Do they run on their own power? Does that force reside in them? Is it inherent force? It must have some source, some origin, some place of abode. Are the planets living organized bodies, or are they composed of dead unorganized matter? When they left the supposed nebula mass, did they separate, "move off or "drop behind," on their own power or by some other force. Can a mass of dead matter at rest start itself into motion, or stop itself when once it is in motion? Can a pebble or your penknife start or stop itself? Then if, according to the inertia of matter and the first law of motion, a mass of dead matter can neither start nor stop its own motion; can it pull on some other mass of matter at a distance and start that mass into motion? These are pertinent questions, which, when carefully considered, lead to the conclusion that universal gravitation is a gross delusion, a presumptuous assumption. A crazy doctrine of an insane religion.

#### Blessed are the merciful

Jesus Christ said, Blessed are the Merciful...for they shall obtain Mercy. He also said. Blessed are they that do hunger and thirst after rightiousness...for they shall find it and be filled. Jesus came to End The Sacrifices! Over and over the Prophets have said speaking for the tor God, 'I did Not give you sacrifices' you have added them! Common sense tells anyone, God don't want you to 'kill, murder, torture an animal because he is not able to overpower you, sacrifice him because you can. If you do a "sin" which is transgression of the Law, like stealing for instance, if you rob someone, that's sin...so to get clear with 'God' or the Powers that be, you then go and murder an INNOCENT one... and have his INNOCENT BLOOD all over you...this Evil clears you from the first evil the robbery ...??? Does that make any sense? of course not, no more than claiming Aussies all hang by their feet head down! Jesus said: "I will have Mercy...not killing, torturing the innocent (sacri-. He went to the Temple...Freed the captives, the innocent ones bound and ready to be murdered or sacrificed...]esus set them Free!

Today millions of innocent animals are 'sacrificed' daily; millions are, as you read this, being Tortured

To Death...by who? only One Class of people on earth would do this. Scientists! From one end of USA to other...Scientists are experimenting on animals...torture without end, all unnecessary, as animals are Not humans and experiment does no good. As Mr. Johnson will reveal in next year's issues of FEN, 'scientists' are Priests in a Devil Religion, Torture of Innocent is a very Dogma of this religion, as is utter Hatred of People

You will notice we have left the date off this issue, hope to use it as kind of a universal issue, for a while, to be given or sold as a sample of our paper. Thinking about a plan that would put the information about us into hundreds of thousands of hands and no doubt get more members. We can't do it until we get the extra money. This is not a 'plea' or 'request' for more money — don't believe in it.

#### Much response to 'Real People Show'

Well, the REAL PEOPLE SHOW ran 2 times this year, much response more the second time than the first! Science Digest article...responses still coming in ... and from many countries .. even SPAIN! AP ran a nice nationwide article, the Great Los Angeles Times, ran our picture and article in the Editorial Section. I've given quite a few lectures or 'talks'; Rotary International, the Kiwanis...also an 'international! Have spoken at the Library sponsored by Friends of the Library. By the time this is published I will have given a Lecture at a Large University! Also the local College has run a nice article with pictures on us the Flat Earth Society.

Everything is looking up...the lies and deceits get flicker every day but at the same time the TRUTH is going out faster and faster...The Plan Book, says toward the 'end' the forces of Lies and Deceit will show great wrath and will trip over himself...in frustration as he knows he..."Has But a Short Time". The space and other deceivers are 'coming to pieces' tangled in their own web of deceit, will finally 'hang themselves' in their own webs!

Another thing, thinking about adding a sheet to the paper, would make it six pages instead of four, just can't seem to cram enough in these 4, what do you think? Any ideas? Also, you note all this year that we have used the 9 x 12 brown envelopes to mail the paper to prevent folding, etc. and cost 15 cents each as well as 15 cents extra for postage. Do you appreciate it? Or does it make any difference if not being folded. Dues time has arrived Don't forget

#### Thank God we live in U.S.A.

Think about this! In every country, even the English speaking ones, severe restrictions are on any truth especially the 'spreading or publishing of it.' England has a law that any word said or published that may disturb the herd is a 'crime'. Here, in God's chosen nation, or the nation that has chosen God, complete freedom is found - speech, dissent, publishing and more. But think about this - we have freedom to expose the most powerful deceivers on earth today - the 'Scientists' who are in the place of the church of the middle ages.' No place on earth does such freedom exist. Real Free Enterprise and all the ideas and thoughts, also facts can be and are brought forth in the "Marketplace of Ideas" to rise or fall by its own Merit! All of us, to show that we are Real People and not ungrateful beasts, should fall to their knees and THANK GOD WE LIVE IN U.S.A.I

Note: How many members are interested in a 'Convention'? Say May I, next year, meetings to be held at the Downtown Convention Center in Los Angeles. Could make it a combination 'vacation' and convention. No need to be nervous. Don't know how it is where you live, but here in California no one 'gets upset' at us knowing earth is flat. In fact being the most 'advanced' state in the Union, Californians are glad we're here! News media would write it up etc. but you could not give them your name or address. Anyway, let me know what you think about it? OK?

#### **Zetetic Cosmogony**

6th Installment, 6th Experiment

The following important experiment has recently been tried at between two piers. On the Pier A, a good theodolite was fixed, at an elevation of 30 feet above the water, and directed to a given point on the pier B, a distance of at least ten statute miles. Several small yachts and other vessels were sailing about between the two piers, one of which was brought to within a few yards of the Pier A, and directed to sail as nearly as possible in a straight line towards the pier B; when the top of the mast, which scarcely reached the theodolite, was observed to continue below the line of sight throughout the whole distance, as shown in figure 14 - A, repre-

senting the theodolite, and B, the other pier. From which it is concluded that the surface of the water is horizontal throughout the whole length of ten miles. Whereas, if the earth is a globe, the water between the two piers would be an arc of a circle (as shown in fig. 15), the centre of which

would be 16 feet 3 inches higher than the two extremities, and the vessel starting from A, would ascend an inclined plane, rising over 16 feet, to the summit of the arc at C, where the masthead would stand considerably above the line of sight. From this point the vessel would gradually descend to the point B. As no such behavior of the vessel was observed, the ten miles of water between the two piers must be horizontal.

Earth was flat yesterday, is flat today, will be flat tomorrow and forever. It was created FLAT and nothing or no one can do about it. No amount of NASA talk, TV sci-fl movies of Ruskie on Venus or Armstrong — either Herbert, Carner Ted or the other one on the moon as it is only a paper moon on a cardboard world of show business make-believe. The only one, SURE, REAL thing you can KNOW about earth is, that it is FLAT!

#### Lest we forget — the Party

Mr. Bill Brock, Chairman of the Party

(Picture from FIRST MONDAY, R. N.C. 310 First St. SE, Wash. D.C.)

Well, most all of the people of U.S.A. are feeling pretty good in fact ELATED that almost Total Victory of the Grand Old Party, the American Party. The whole country in fact the whole world had grown SICK and despondent through the monstrous crazed anti-American and un-American Democratic Party. All the people of EARTH until the last few years have looked to U.S.A. for inspiration and for hope - they stood in amazement and wonder as this Democratic Party became and was the anti-American Party, runned by a gang of people who hated all that America has stood for... sought to destroy it all through implementing one crazed THEORY after another ... look at the DISASTER of forced integration! Bussing! Anyway, lest we forget in our elation in Ronald Reagan and George Bush and the dozens of good men of the Republican Party who have won seats in the Senate. Courthouses and Statehouses. Let us not

forget who and what is responsible for this Great Victory for the American People — Bill Brock. The chairman of the Party is "The Man" who ramroded, correlated, the entire campaign! With Betty Heitman as co-

Betty Heitman, co-chairman

chairman of the Party, these two gathered together many able helpers in Congress and outside and worked day and night to bring it all together — got the money, the exposure, formulate the ideas, etc. etc. Without these two who can say we'd have had this Great Victory? See how the whole world or a nation can HANG on the 'works' of one or two? THINK! AL-WAYS TRY TO DO YOUR PART AND MORE!

I thank Bill Brock and Betty Heitman for myself and for the entire U.S.A. Thanks to these two, U.S.A. has another chance, a chance for the great NEW BEGINNING, for the New Age. Most people are unable to express any of their feelings, but I KNOW how most everybody feels today — so HAPPY — the Criminal Democrats are out and the United States have a new chance, and they say THANKS, MR. BROCK!

#### Letters to the Editor. . .

Dear Mr. Johnson,

I saw and enjoyed your program and comments on the REAL PEOPLE show. Please advise me of membership requirements for joining your organization. (The Real People, NBC, was runned early this year, re-run September.)

Sincerely. Man from Mississipi .....

Centleman:

With much pleasure, I enclose my check in the amount of \$10.00 in payment of dues for this year. I shall look forward to receiving your literature for study and inspiration in the continuing search for realism.

Very truly yours, Man, Michigan .....

Dear Mr. Johnson,

Hi! Just recently I saw the segment in the TV show "REAL PEO-PLE" and was so excited to find out that the "FLAT EARTH SOCIETY" was alive and well. Some ten years ago, I wrote to the then 60-year old Samuel Shenton who was at that time the president of the FLAT EARTH SOCIETY of ENGLAND, based in Lordon. To my disappointment, Mr. Shenton never answered my request for information regarding the views of the Society and information on how to join. My guess is that perhaps he just never received my letters due to the insufficient addresses. At any rate, the story on the Society in the TV show once again renewed my interest and intent to become a member. I am hopeful that you will send me the necessary information with regards to membership eligibility and other important Society information.

Thank you for your time and consideration. I will be looking forward to hearing from you soon.

Sincerely yours, Woman, New Jersey .....

Mr. Shenton passed from this vale of sorrow to his great reward in 1971. He answered very very few let-ters - didn't have the time for one thing. He didn't publish a paper as we do. He spent most of his time giving lectures, talks, in public school and other places. Since England was and is a "Police State" he thought it best to instead of putting out a paper as we do, to create a select few mas-ters', fully prepare them, so they could also recruit others. Before his death he mined England with this 'secret society' of flat earthers - they lay low until the time is right. News and all public news media is under TIGHT Covernment control. It is against the law to tell the TRUTH about anything. (This way all over Europe and the world, ONLY USA are 'free' to tell the truth). The Grease Ball Government and the beasts of England hoped with Mr. Shenton's and his wife Lillian's death that the truth of the flat earth could DIE in England and total darkness could prevail. But their spinning ball false religion is doomed, the whole country is infiltrated with hard core Flat Earthers, the "Beasts of England" will NOT prevail. Enclosed is the information you requested.

I first heard about your organization while viewing the TV show "Real People".

I am a merchant seaman and work as a mate and navigator on various vessels and have for some time shared the same view as yours, although I was hesitant to say anything contrary to convention thought. I would appreciate it if you would forward information in regard to your organization.

Sincerely. Man, Houston, Texas

Mrs. Charles Johnson,

I read your story in Science Digest, July issue, with a great deal of interest. It seems incredible that the world is flat, but it could be. However, I have always believed that the trip to the moon as a fake. I was even told that some scenery over in Arizona was made up to look like the moon. Yet, the public believed the moon shot. It's a great old world! Please send me information.

Sincerely, Man California

Dear Mr. Johnson,
Hope you get this ... didn't hear
your address. I saw you on NBC's
"REAL PEOPLE" and am interested
in Joining. Please send information. (Address to Flat Earth Society, Lancaster, CA)

Thank you. Woman, California . . . . . .

Dear Flat Earth Society,

I too believe the earth is not round but flat. I am seriously thinking of joining your society. I would greatly appreciate it if you would send me some information about your society. If it is also possible, could you send me the requirements and donation on fee for joining?

Thank you, Man, Connecticut . . . . . .

The other day I saw Mr. Johnson being interviewed on the CABLE NEWS NETWORK. This prompted me to go to my local library where I obtained your mailing address, and the reason for this letter. Please send me information on how I may receive your publications.

Thank You, Man, Iowa

#### New Universal Union

This is to inform all friends, cooperators and sympathisers that the Founder, Chairman and Rahnemoun of the NEW UNIVERSAL UNION. Heshmatullah Dowlatshahi

(Heshmatus-sultan) has made transition (died) at 20th July 1980. A summary of his biography has been reported in the most circulated Iranian newspapers and great memorial as-semblies have been held to do honour to him, in Iran.

His detailed biography, which is wonderful mirror of the life of a human which has eclipsed the tales of angels, will be written in a near future. He was 76 years old at the moment of his 'transition' and has spent 60 years of it for his divine mission. He struggled all his life hardly and effectively for the cause of humanity and for the settlement of: self-recognition, God-knowing, Peerless-worshipping, unity of religions, union of God-worshippers, social cooperation and moral purification. The horde of his thousands and thousands followers and disciples throughout the world cannot ever forget his selfless services.

His is the author of numerous books and booklets in Persian (e.g. The Mechanism of Creation, The Dynamism of Creation, The Flowers of Guidance, etc.) and many pamphlets in English. His articles have been published in the reviews and publications of different countries.

Many books about different branches of all human sciences (theo-

logy, spiritual problems, philosophy, astronomy, human health, sociology, moral, natural sciences, physics, chemistry, etc., etc.) have been written by him, which is to be published for the benefit of humanity. In these writings he has revealed new and unprecedented keys to solve the unknown problems for which scientists have searched during centuries. He has unveiled many secrets of science which scholars are ardently anxious to elucidate. Innumbrable discoveries of thought, which are usually known to man, step by step, during the progress of time, has been explained clearly, through the sparkles of mental spoutings, by this wonderful brain. He founded the NEW UNIVERS-

AL UNION in 1947 in Tehran and very soon the noble ideals of it was spread throughout the world in all continents; innumbrable seekers of truth of every country and every religion joined this organization and many humanitarian activities were achieved by him, his friends and co-

Pope Paul VI

Several years ago, while he was alive and well and most active, I contacted Pope Paul VI. I told him what was true, he was then the only WORLD LEADER who spoke up for sane, reasonable, logical outlook, the proven-by-time and experience way of moral, upright life as depicted by the TEN COMMANDMENTS and by experience. I said quite a lot to him; I will not go into it now. I did explain that our aim was to help establish the sane, flat world...could be called the Kingdom of God. He sent BLESSINGS to me and my WORK...He sent me this picture signed by him...I look at it often...no doubt he is now in HEAVEN above.

I remember that this great Pope Paul VI was with us then, and even now! He said, and I also say the United States and the United Nations are the world's best hope! BOTH the United States and United Nations, perhaps they both mean the same thing, were ESTABLISHED as FLAT EARTH GOVERNMENTS! I know the church, for so many years, hundreds and hundreds of years, has adopted the INDIA-GREASE-BALL-MYTH, but the first CHURCH, the one original PAUL was part of, was FLAT EARTH! So for JESUS CHRIST to be KINC OF KINGS and LORD OF LORDS, it must be on the FLAT EARTH! There is no other way...IN FACT THE INDIA-**GREASE-BALL-GLOBE-PLANET** world is the ANTICHRIST or BEAST WORLD OF THE ANTICHRIST OR BEAST RELIGION called SCIENCE Full name - Christian Science. Oh yeah...the false ANTICHRIST BEAST RELIGION INVENTED, with it's university, the BEAST RE-LIGION called SCIENCE, the Foundation (Dogma) of which is the in-sane delusion of lunatics, the dream of the reprobate minds...that earth "speck of dust" spinning around the SUN, which is millions of times larger and more important!...That the entire universe is just grease balls... and all of them spinning. It is claimed officially, by science, that the head of each and every pin on earth has ONE HUNDRED AND FIFTY-FIVE QUADRILLION SPIN-NING BALLS on it! WHY or HOW could anyone on earth believe such nonsense? I don't know, but the SCRIPTURE says..."All those who LOVE LIES AND TELL LIES...are cursed and forever outside the gates of the city ... mind is turned over reprobate...VOID OF ANY UNDER-STANDING! But let one and all NOTE THIS, perhaps the devil's work is to "try" to "reveal" people.

Johnson on the Shore

Greetings and blessings to the called, chosen and faithful. Many of you, it seems, the very day you received the fourth quarter December issue of FEN, sent in your '81 dues. We are very proud and happy that by now the GOD OF TRUTH has brought together a "hard core", as they call it today, a small and select group of the most intelligent, highly developed human beings in the world ...to know and understand the EARTH IS FLAT, and what that implies regarding all other ideas, systems and religions, etc., etc. Since 1972, over 1600 people have joined, tens of thousands have written and gotten information, WHOM NEVER I MANY NEVER JOINED NOR CONTRIBUTED A DIME, but DO KNOW we have the goods on the Idiot-Indian-Ball-Myth and that EARTH IS FLAT! A good number of new people join each year, in 1980 the most yet! But like all magazine subscriptions and/or clubs and societies, and you name it, people have a tendency when dues times come...to let it slide. Other organizations all have a vast system of pouring letters to members to get them to cough up and belong. Even then it is hard to keep up dues or subscriptions, etc. We don't do any of these things to try to get people to pay up...so a falling off each January.

The ones who stay are THE ONES WE WANT ANYWAY and the only we exist for, the true seekers who hear the word gladly, search it all out, ponder it, study it to see if be true, then they do, and we recom-

This way we are helping to develop...what is called in all scriptures THE SONS OF GOD ... to have dominion over this FLAT EARTH and all that is on it! In December we sent out between 400 and 500 FLAT EARTH NEWS. Today, February 1st, we have secured, money wise, the FLAT EARTH NEWS for 1981, as per we wanted, In the latter part of 1980, I was invited to give a lecture at Arizona State University. It looked like a couple hundred students and a few professors. It seemed some of them had crammed for months to try to refute me. It was a beautiful new auditorium where I spoke. After I had talked for about thirty minutes I had shocked them out of a year's growth, by PROVING BEYOND ANY SHA-DOW OF ANY DOUBT THAT...No. 1) THE EARTH IS FLAT, and that, No. 2) NO PROOF OF ANY KIND WHATSOEVER EXISTS THAT IT IS A BALL. By then, one demented priest of outer darkness, professor, was red in the face and blown up like a toud, as was plain to all that the three months of CRAMMING, PLANNING with ALL THE RE-SOURCES OF THE ARIZONA STATE UNIVERSITY WAS TO NO AVAIL...I HAD PROVED BOTH POINTS! So, he started baobling questions...like..."If the world is flat we will all fall off, Ha Ha Ha", and

mend, hold fast that which is true.

he egged the gang of students on that he had coached to start the questions. He felt he had to stop the rest of the lecture as it was making a total fool of him. Anyway, and of course, I answered that question very easily... that was the easiest question of all and the best one the professor could think of which also showed him up to be a moron, as only on a bail is there any danger of falling off. So for the next forty-five minutes or an hour, without let up, I took questions from students and professors. It goes without saying I could, AND DID, answer each and every one, and at the same time demonstrate how FUTILE and what a waste of time it was to try to prove the earth a ball when NO EVIDENCE OF ANY KIND AT ALL EXISTED, BUT ALL EVIDENCE EXISTED TO PROVE IT WAS FLAT! So it all went about two hours, way overtime, questions and talk hot and heavy. The Bad Uns, with the demented professor, finally...slunk off...tail between their I left with a high hand...total VICTORY. Afterwards, I met with several reporters from Arizona newspapers and college newspapers and gave some more interviews, some taped, pictures, etc., etc.

Marjorie was there all the time. We had set up a vast array of literature on a large table at the back of the auditorium. She ran this department the entire time of the lecture and thirty minutes before. This table was mobbed by students questioning her and looking over our literature and taking some. Let me tell you, she brought all to heel she talked to. But it turned out there were several serious students among them that the black hole priests hadn't been able to brainwash, who took applications and wrote us and joined later. Of course they don't want the monster beasts, the professors, to know that they only pretend to go along with the Idiot Balls, but in fact could, and did, use logic and were eager to learn and prove the FACTS. So it all went very well. The fee they gave, I instructed them to make out (as I had before I made the talk) to the Flat Earth Society as we take nothing. We paid our own expenses there and back to Phoenix, and the fee was paid to and received by the Flat Earth Society. I might mention

### The Merciful Shall Find ... Mercy

Marjory Waugh Johnson

To carry on from my column in the December issue, was to have mercy and stop the sacrifices. Let me say that while and when you have Mercy on the animals...you will be helping yourself also...as your Temple will start to become clean (body) and holy, acceptable to the Heavenly Father, the creator of all flesh and blood creatures. If we don't stop murdering and/or hiring murderers, how can we be without sin? Sin "is" the "transgression of the Law" the Law the Ten Commandments, the Sin here: Thou Shalt Not Murder! It makes us no better than the ravaging beast of the field...preying on the Meek and Helpless! Just stop and think, an innocent little Lamb, a kindly Dear Old Cow! What harm have they EVER done to us or could do? YET seems no Mercy or Kindness shown to them at all. Thousands are slaughtered, killed, murdered daily, pretty sickening, when you stop and THINK. I would say to anyone who 'craves' "Flesh" to eat, why not go out and attact ANOTHER beast of

prey...like Themselves! NOT the little ones, the harmless ones, the ones who DON'T PREY on anything, but are harmless! So a word to all of us who "say we are Human - if you want to clean your Temple, and to stand before the Creator GOD without Sin, have Mercy on the innocent. Make your menu out of fruits bearing seeds as we are told to eat in the instruction book. Commonsense and sanity tell us the last thing on earth to eat would be flesh and blood...like yourself! I say have MERCY, don't be like the Monster Demented Cruel Scientists, the Vivisectors, who not only murder the innocent but have PLEASURE in the TORTURE of the helpless animals. Surely must be the MIND OF SATAN in the Scientists who murder and torture and/or UP-HOLD those who do. I feel pretty sure if you have Mercy it will be alot more healthy and blessed and much easier to become Sane. Experiment 7

The sea horizon, to whatever distance it extends to the right and left of an observer on land, always appears as a perfectly straight line, as represented by H, H, in fig. 16. Not only does it appear to be straight as far as

it extends, but it may be proved to be so by the following simple experiment. At any altitude above the sea-level, fix a long board — say from 6 to 12 or more feet in length — edgewise upon tripods, as shown in fig. 17. Let

the upper edge be smooth, and perfectly levelled. On placing the eye behind and about the centre of the board B, B, and looking over it towards the sea, the distant horizon will be observed to run perfectly parallel with its upper edge. If the eye be now directed in an angular direction to the left and to the right, there will be no

difficulty in observing a length of ten to twenty miles, according to the altitude of the position; and this whole distance of twenty miles of sea horizon will be seen as a perfectly straight line. This would be impossible if the earth were a globe, and the water of the sea convex. Ten miles on each side would give a curvature of 66 feet ( $10^2 \times 8 = 66$  feet 8 inches), and instead of the horizon touching the board along its whole length, it would be seen to gradually decline from the centre C, and to be over 66 feet below the two extremities B, B, as shown in fig. 18. Any vessel approaching from the left

would be seen to ascend the inclined plane H, B, C, and on passing the centre would descend from C towards the curvating horizon at H. Such a phenomenon is never observed, and it may be fairly concluded that such convesity or curvature does not exist.

#### The Earth Is Not A Ball; Gravity Does Not Exist

#### Exhaustive Energy of Force

And now, in case the planets can and do pull on the sun, and the sun on the planets, as we are told, how does that pulling force act? If that force does not reside in the planets, if it is not innate force then the planets do not attract or pull on the sun, or the sun on the planets, and the force is not an attractive force. If, however, that force does reside in the planets, does it go out of the planets, pass across the intervening space between themselves and the sun, and on reaching the sun does it reverse itself and come back to the planets when they pull on the sun, and vice versa? Does that force flow out from the planets to the sun and back again in a steady constant stream, or does it go in impulses or waves? If so, would it not meet itself coming back and thus interfere with its own motion, or counteract or nullify itself?

But does force ever reverse itself and return to its own source? Does force act that way? How often can you explode a stick of dynamite? What becomes of the force when dynamite is exploded? Does it return and concentrate itself in its original source ready for subsequent action? Does force push or pull when it leaves its source? Does dynamite accomplish the purpose for which it is used by a push or a pull? What is your answer? But is not force exhausted and wasted when it leaves its source or center instead of returning to that center? It is utterly impossible then for the planets to attract or puil on the sun or the sun on the planets, or on anything else, because force never reverses itself and returns to its own source, thus pulling on some object at a distance. On the contrary, when force acts and passes away from its source, no matter what that force may be, it radiates in all directions from that source and the farther it goes, the weaker it becomes, until it

is finally entirely exhausted. Force then exhausts itself. It spends its strength in its action — it wastes its own power or energy in moving away from its source. Furthermore, when force is exerted and reaches an object, if that force is strong enough to move the object, it would push on the object and drive it farther and farther away from its source instead of pulling the object towards itself. Force pushes, it is repulsive not attractive; hence, we have here inconvertible proof in the exhaustive energy of force, that gravity is an absurd assumption, a scientific myth. I find that "science" is the religion of the total lie.

#### Action of All Known Force

If there is such a force as gravitation, as taught by our astronomers, the the action of that force violates the law of all other known forces. Now the action of all known forces is eccentric, expansive, outward: that is, repulsive. This of course, is the direct opposite to attraction. force of dynamite, powder, steam, heat, electricity, gas, air, water, lightning, mineral, vegetable and animal oils, and all combustible and explosive materials and elements, are all eccentric, outwards, and therefore repulsive, and not concentric or attractive forces. Repulsion is not attraction. All these forces are exerted eccentrically. They operate outwardly from their centers or sources. So then, if matter exerted any force at all, it would be eccentric, repulsive, instead of concentric or attractive; and bodies would be driven apart instead of drawn towards each other.

Now we know from experience and observation, that the action of all force is expansive, butward, repulsive. Dynamite rips up the earth, steams bursts the boiler, powder speeds the bullet, lightning splits the trees, electricity runs the dynamo, wind topples over buildings and de-

vastates, water breaks the dam and inundates. It is only by some intelligent and mechanical device that force can be made to pull, or draw objects concentrically. The hand may reach out and draw objects inwardly, but even then the pull is a push. This is the nature of force. Force pushes; it is refulsive, not attractive. The wheels that speed along our highways and run our factories of industry, exert a repelling force. All rotary movement, like a wheel in motion, whether it be a water-wheel, or a millwheel; all exerts a repulsive outward force. The grindstone that sharpens our tools, throwing off the water, exerts such a force; and so would this earth if it were in motiona revolving globe; nothing would remain on its surface.

Even a magnet does not "draw" a needle towards it. The needle, or a piece of soft iron, when brought within the magnetic current, which enters into and flows through the magnet, is pushed or impelled towards it. But the other "pole" of the magnet will "repel" the needle, because the current comes out at the negatives end. So that there is quite as much evidence in the action of the magnet for "repulsion" as for "attraction"; but magnetic currents account for both.

So then, if gravitation exists, the nature of that force must be similar to the nature of all other known forces, which are eccentric, repulsive, expansive, and not concentric or attractive. Now, since all known force is expansive, repuisive, outward, - if there is such a force as gravitation it must, by the law or analogy be like all other forces; and therefore it would be a repulsive and not an attractive force. Therefore, we have con-clusive evidence, by a knowledge of all known forces, that the supposed law of universal gravitation is an unproved and unprovable assumption. Science Fiction!

#### Letters to the Editor. . .

Dear Mr. Johnson,
As you will see from the enclosed clipping taken from the San Francisco Chronicle, Aug. 30. 1966. I have been interested in your society for a considerable length of

Until the recent article appeared in the Los Angeles Times, I had not been able to locate the headquarters of this unique group.

Please be kind enough to let me know how one goes about joining the Society. Thank you.

Man, Los Angeles

Dear Sir(s):

Several months ago while engaged in conversation with one of my friends he told me that in the United States today there exists an organization committed to the ideal that the earth is in reality "flat" Further, he stated, they propose that modern science is a hoax and as such they, as concerned citizens, dedicate themselves to actually proving their theory about the shape of the earth. This, to me sounded very interesting.

So, with some time off from my studies, I paid a trip to my local library and so started to seek you people out, and much to my surprise I found your association in less time than I had suspected, in fact in the PEOPLES ALAMANAC, page 1252. Having done what I consider the first bit of "primary research" I would appreciate your sending me any information about your organization as well as an application for joining.

I anxiously look forward to your resmonse. Sincerely yours,

Student, Man College Los Angeles

Dear Mr. and Mrs. Johnson.

Having read with much interest about your great work in the L.A. Times, I greatly desire further information and a sample copy of the FLAT EARTH NEWS. Also my Lady friend would also love to receive information.

Dear Sir:

A good friend mine, Mr. who is a member of the Society has recommended that I contact you regarding membership. Mr. --- and I had frequent talks about the principles of the Universe and especially how some "tried and true" beliefs beliefe aren't what they all appear. Well, scientists aren't so sure as they once were that the solar system is inha-bited by "little green men" or otherwise. And speaking of the recent "space odd-essy" — Walt Disney couldn't have did a better job! I recently moved here to work. On the jet airliner I looked out on our earth below - a huge FLAT disc.

I have enclosed my check for membership. Your early response will be appreciated.

Very Truly Yours, Man. Republic of South Africa

Note: Our grapevine tells us Walt Disney DID do to the "ring around rosey" and has did much of the NASA sci-fi TV movies, many cases he farms his experts out to work, done on government reservations. Look what a disaster the grade z movie moon landing was, 6-year-old children could tell it was made by amatuers, so NASA learned its les-son — get Professional special effect movie men to conduct their Hoax. NBC has the sci-fi contract at Edwards Air Force Base, make Buck Rogers out there now, they will handle the 'Space shuttle faked orbit and landing there at EAFB...if Washington don't call the whole idiot caper off, before Ides of March when the scam is due. - C.K.J.

#### I Saw the Miracle of the Sun

Dear Mr. Johnson:

Enclosed please find a clipping concerning the Miracle of the Sun at Fatima Portugal in 1917. It was witnessed by more than 70,000 people including reporters from the secular

The reason I am sending you this particular eye-witness account is that it describes how the sun was wrench ed from the sky and whirled toward earth. If the modern 'scientific' theory of the universe is correct - that would have been the end of the world! But if the sun is only 32 miles across, as proven in your articles. then we can explain it. Evidently most of Europe was overcast that day, including Portugal, except for one hour at Fatima.

There is plenty of literature on this subject - books and magazine articles, along with photos and eyewitness accounts, but because Protestants don't like the Catholic emphasis on Mary they ignore Fatima altogether. But as someone pointed out - what happened there was of a magnitude comparable to the mira-cles of the Old Testament (as, for example, when the sun stood still in the time of Joshua).

As for the role of the Virgin Mary: some accept Mary as representing the Church and that the apparitions symbolize the triumph of Christianity over anti-christ forces such as communism. And that is what Fatima is about, (Gen.3:15, Rev.12:1-6 Rom.

In any case, the Miracle really happened, and it disproves what scientists claim about the size and distance of the sun.

Sincerely, (member)

"These excerps from this First Hand account of the Fatima event was seen and written by Dr. Joseph Xavier Proenca de Almeida Garrett, a professor of the university of Coimbra, and included in a book written by Father John de Marchi called FATIMA, THE FACTS, Mercier Press, Cork Ireland."

The time was October 13, 1917. The place was Fatima, Portugal. This "miracle of the sun" was witnessed by more than 70,000 people. An event so outstanding that it was reported in many secular newspapers of the times - including the influential O Dia and O Seculo, papers run by atheists and agnostics.

At that time and in four previous apparitions, Our Blessed Mother told three shepherd children that wars are a punishment due to sin and that man must stop offending God "al-ready too much offended." She predicted that if people did not follow the "Peace Plan from Heaven" that Russia would rise "and spread her errors throughout the world" and that 'various nations would be annihi-ated..." She also predicted World War II which would come in the "reign of Pius XI" - and it arrived right on schedule.

"It must have veen nearly two o'clock by the legal time and about midday by the sun. The sun, a few, moments before, had broken through the thick layer of clouds which hid it and shone clearly and intensely. I veered to the magnet which seemed to be drawing all eyes and saw it as a disc with a clean-cut rim, luminous and shining, but which did not hurt the eyes. I do not agree with the

comparison which I have heard made in Fatima - that of a dull silver disc. It was a clearer, richer, brighter color, having something of the lustre of a pearl. It did not in the least resemble the moon on a clear night because one saw it and felt it to be a living body. It was not spheric like the moon nor did it have the same color, tone, or shading. It looked like a glazed wheel made of motherof-pearl. It could not be confused, either, with the sun seen through fog (for there was no god at the time), because it was not opaque, diffused or veiled. In Fatima it gave light and heat and appeared clear-cut with a well-defined rim.

"The sky was mottled with light cirrus clouds with the blue coming through here and there but sometimes the sun stood out in patches of clear sky. The clouds passed from west to east and did not obscure the light of the sun, giving the impression of passing behind it, though sometimes these flecks of white took on tones of pink or diaphanous blue as they passed before the sun.

"It was a remarkable fact that one could fix one's eyes on this brazier of heat and light without any pain in the eyes or blinding of the retina. The phenomenon, except for two interruptions when the seemed to send out rays of refulgent heat which obliged us to look away, must have lasted about ten minutes.

'The sun's disc did not remain immobile. This was not the sparkling of a heavenly body for it spiun round on itself in a mad whirl. Then, suddenly, one heard a clamor, a cry of anguish breaking from all the people. The sun, whirling wildly, seemed to loosen itself from the firmament and advance threateningly upon the earth as if to crush us with its huge and fiery weight. The sensation during those mements was terrible.

Let us simply note the five or six surprising phenomena which the scholar has precisely distinguished.

- 1- The sudden cessation of the rain and the rapid dispersion of the black clouds which covered the hori-
- 2. The bluish cloud which appeared three times in the same way.
- 3. The visibility of the sun to the naked eye without any protection for ten minutes.
- 4. The violent and rapid rotation of the sun.
- 5. The "fall" and the reascension of the sun.
- 6. The variation of the colors of the atmosphere and of nature.

Fred Silverman, a Jewish boy who made good, head of NBC, walks and Is one of the "powers that be." He's had the "connection" with the Red Barrons at Edwards Air Force Base, here at Lancaster for a long time. He, with NBC, has the "Science Contract" out there at the base and with NASA Dryden Center located on EAFB. He films their Glorious Science Show called BUCK ROGERS! Oh, yeah, Buck was the first man in space. I saw him — not only "walk" on the moon but RUN on the moon way back when may be 1937. Science was bigger and better then! All us

children, twelve or so, just 'knew' all that stuff was 'kinda true.' Difference then was from 12 years up – nobody 'believed' in Buck Rogers! Now, these same kids are 50 to 60 years old, 'believes in 'science of Buck Rogers and Flash Gordon! Just never grew up. The Bucks', both Rogers and Jones, would be shown on Saturdays, a Western and a Space. Also for 10 cents 'Paperback Novels – mostly science (fiction and westerns ...funny, called 'escape literature then ...Buck Rogers and Buck Jones even then I liked Buck Jones better.)

On April 14, 1981, out at Edwards

Force Base and NASA, they moved the props and cast for Buck Rogers over a few feet and set up to film a NEW SPACE SERIES, to be called THE CREAT WESTERN CAR-NIVAL, to be known also as BRING ON THE CLOWNS or the SPACED OUT SHUFFLING SHUTTLE or for short, just HOT BRICKS AND COLD EPOXY. Stars are two clowns, one known as 'dripen cripen,' got to be a 'carnie', said after winning the title as the BIGGEST LIAR in TEXAS (international known liars contest held each year in Texas). The other clown, Young, known as the MOON DUST KID or the MOON RAKER, claims he 'raked up lots of...that fine white powder for the nose on the MOON. Oh, yeah, that boy's been HIGH! It's said that this 'white powder' applied to the nose or nose cone is what "blasts them vehicles off their pad." The Kennedy Space Center is blasts them vehicles off their known world wide as the SPACED OUT CENTER. They keep COCAINE by the bushel basket, WORLD IM-PORT AND USE CENTER OF THE ESSENCE OF MODERN SPACE SCIENCE, CO-CAIN. They say. when a clown sucks up his nose cone of this moon-shot-dust, he "goes to heaven and hears the Music of the

It is feared out here in Los Angeles county, Lancaster is in L.A. County, that the Science Dust or Space Program Dust, known also as the Kennedy's 'Secret Fuel' or MOON DUST is about to corrupt Hollywood. Spaced Out Space Gang from Florida have used the Hollywood production studios for SO LONG to make the NASA movies, MOON LANDINGS. MARS LANDINGS, ORBITING, etc. The NASA HABIT has rubbed off on the Movie Makers, pity. Well, anyway, for the Movie Columbia Landing, over 200 science fiction writers were invited and hundreds of other celebrities - almost none showed up. The reason, is they felt this show Columbia is produced by folks with burned out brains if they ever had any - nothing 'tracks' in the silly show and everybody is under the influence etc., etc., - so none of them, almost

showed up. The only celebrity that did show up was the man taking the place of BUCK JONES, ROY ROGERS, like old times to him, the double feature, the WESTERN ESCAPE, double bill and Science Escape (entirely fiction of course). By the way what you saw on T.V., the 'orbiting', the clowns floating, etc., was filmed long weeks before, in 'simulated flights.' Some say that a few of the "astronauts are so spaced out that they REALLY believe they have been in space"—wonderfulmodern scientific drugs used to be known as sorcery. Roy saw the mockup flim flam imitation spaceship (Columbus), was no good, couldn't get a saddle on it. I think he was right.

Falling Up - Falling Around

Now you sober people out there won't believe this, but in this NASA-SILVERMAN-ROCKWELL the clowns claim that after filling up the nose cone with that powder and kerosene, that they blasted off their pad and 'GOT SO HIGH', THAT INSTEAD OF FALLING DOWN... THEY FELL AROUND. Oh, yeah, man, that was HIGH. Well man, they say they fell AROUND THE WORLD AT NEAR 2000 MILES AN HOUR! (Coke Science also says earth spins around and around 1000 MPH and alo spins around the sun at over 60.000 MPH and that the whole shebang is also spinning few hundred thousand MPH 'somewhere else'. So you can see a WHOLE LOT OF SPINNING GOING ON. Never mind 'shaken, going on' - now it's spin-ning, going on! The mock-up, flim flam movie spaceship only has 'jets' in the rear (slight oversight, put em in wrong end), so to slow it down ithey claim) they just flip it upside down and BACKWARDS - then 'flying or FALLING backwards at 2,000 MPH, then they turn the kerosene. jets on the back and slow it down a bit, then flip it backright side up and forward - no problem to these clowns of Silverman, NASA, and Rockwell

#### Young, Cripen, Gravity, All Fake

#### Center of Gravity of Equilibrium

(Third in anti-gravity series)

My next proposition is that equal balances equal mass, and equal force exhausts the strength of equal opposing forces. Every mass of matter whether smooth or rough, regular or irregular, must have within itself a center of gravity, according to this universal law, or scientific principles of physics. The center is that pivot about which all its parts are balanced. The center of gravity is nothing more than the center of weight. Each mass retains its own weight, but inherent weight is a very different thing from extaneous gravitation, or a pull from something outside a body.

When a body is of uniform density, its center of gravity coincides with its center of magnitude. When one part of a body is heavier than another, the center of gravity is shifted and lies nearer the heavier part. Take a wheel for instance, of uniform density; both the center of motion and the center of gravity correspond with the center of magnitude. But let the same wheel, with its two lower spokes be of lead, while the center of magnitude and motion remain, the center of gravity has fallen or changed. Those who have made a study of natural philosophy or physics, are familiar with these laws.

When two bodies, say lead balls, of equal weight are connected by a rod, the center of gravity will be in the center of the rod, they will balance each other when placed at equal distance from the fulcrum. They are then said to be in equilibrium.

But when two bodies of unequal weight are so connected, the center of gravity will no longer be at equal distance from the pivot, but will be nearer the heavier one. This same principle is illustrated by the teeter-board balanced on a bench, or by the common balance or scales used for weighing. The balance weighs correctly only when the arms of the beam are exactly equal. The weight of one exactly balances the weight of the other, so that the one side could not lift a pound more than

Does an airplane flying 300 miles an hour have to drop 60,000 feet an hour to maintain its altitude?

An airplane is built to fly level and follow a horizontal line. When flying 300 miles an hour on a globe, an airplane pilot must drop his ship 60,000 feet an hour from a level line drawn tangent to the earth at the point of departure. Some air races are conducted over triangular courses. Do these pilots make two changes in their course at the corners, as the globular theory requires, or do they simply turn right or left? Ask any pilot on earth and he will ask you if you are crazy. He knows and you know, if sane, airplanes fly FLAT.

Also, according to the priests of the delusion of lunatics (science) earth is spinning and whirling in three directions at once and also zigʻing and zagʻing which means, it is traveling in four directions at once! How could an airplane fly over such a jumping and gyrating object? Come-bin, you know the very idea — earth a spinning globe, is absurd.

the other without destroying the equilibrium, or throwing them out of balance.

In other words, we have mass acting against mass, equal weight working against equal weight, and equal force pitted against equal force; and just that instance either side exerts a greater weight, force or strength than the opposite side, the law of equality is violated and it becomes unequal. The weight of one is all employed in belancing up the other; and all the weight, force, power, pull or gravity exerted by one is exhausted in neutalizing that of the other, so that neither body could attract or exert a force on anything beyond anequal mass, or outside its own circumference.

Two boats of equal weight, A and B, are connected with a rope, a man in A pulls the rope: action and reaction being equal, not only will the boat B move towards him, but the boat A, which he is in, will move with the same velocity towards B. If another boat were attached at either end, the law of equality would be destroyed, and they will not move with the same velocity towards each other. Hitch two horses together of equal strength, and then let them pull against each other. Where will they move to? Will not each one exhaust all his strength on his opponent and not move him? Then how could they pull on some other object at the same time?

This may represent the supposed globe cut into sections, the center of which is called the center of its gravity. Gravity is said to act towards the center of the mass. So, on the principle of the balance, section A and section B, and all the sections of the sphere, for that matter, exhaust all their force, power or pull on their opposite sections, the center being the pivot on which the whole mass is balanced. So, then, section A cannot reach out and pull C towards itself, because it exhausts all its force on B, an equal mass of the opposite side of the pivot, the center; and B cannot reach out and pull D towards itself, because all its force is exhausted on A, an equal mass on the opposite side of the pivotal center of the greater mass. Remember, mass A equals mass B; therefore, the attraction of mass A must equal the attraction of mass B and so neutralize it. If A can pull B towards itself and more too, then B is not equal to A and the law of equality would be destroyed, and it would no longer maintain its equilibrium, and thus would become unbalanced.

Every mass must have a pivotal center and cannot act beyond its own circumfereene. Of course this refers to dead unorganized matter and not to living beings. Therefore it is utterly impossible for any sun, planets, globe or mass of matter to exert the power of attraction outside of its own circumference; because every particle of matter in that mass has its equal, neutralizing force on the opposite side of the center of the mass. There can be no center without equal masses in opposition. Matter could only exist in the aggregate and never in the segregate if this law of universal gravity were true. To separtet them is impossible. Here, then, we have demonstrative and scientific proof that universal gravitation is an unfounded assumption, a universal FAKE. —

#### Earth, free from rotations and revolution

K. J. M., Special Earth Research, India

1. At midday send an aeroplane at 1000 MPH from India to West. After 12 hours the plane reaches America, just opposite from India, at midday itself. If the earth rotates, the plane does not move an inch! No need for plane to fly just get off the earth and let the earth rotate under it (if earth is rotated). But the plane moves forward. Then the SUN MOVES WITH THE PLANE! THEN THE EARTH IS STATIONARY!

 Anybody or anything entering of to the 'rotating earth' would be broken to little bits, as wood entering a round saw. But no rocket broken. Then the earth is STATIONARY!

3. If each heavenly body has a field of attraction of its own, all are individual. If the earth 'revolves around the sun, it must move at 66,000 miles per hour, to east. Apollo-17 of America is coming from the moon to earth at 6,000 MPH. The position of the moon (1/2 moon after the new moon) was west of the earth. Apollo-17 is coming from west to east, earth moves at 66,000 MPH west to east, so is in front of Apollo, 66,000 MPH. As such Apollo-17 cannot land on earth but they say it DID land on earth! Then the earth does NOT move around the sun and also does NOT rotate. THE EARTH IS STATIONARY!

This is only a small part of proofs this Researcher in India has worked out, independently of anyone. An outstanding independent Researcher, Seeker of the Truth, also called "the facts". He would appreciate any assistance, moneywise, to help him publish in English and Maly in India. He has researched these things for over 20 years. He has spent his own money trying to alert those in power there and other countries. Sri. Jawaharlal Nehru thought that his work had merit. Many have thanked him, Universities, etc. All sweep it all under the rug, NONE with one cent have helped him. He has never seen the FLAT EARTH NEWS and the poor soul is just learning. Universities and none else in 'power' WANT the truth to ever get out, that the established scientific truths are in fact total LIES. Anyway, I feel we should encourage him and show some appreciation to him. If any member wants to help him a bit from \$1.00 up, send it to me for him and I'll get to him. I feel I know it would mean a lot to him to KNOW we appreciate the INFORMATION he has worked out and would encourage him. OK? We know India is RICH in many things, money is NOT one of them, hard to come by over there.

LIBRARY OF CONGRESS requested and has received FLAT EARTH NEWS since 1975. Also in other ways many in power have had access to the FES FACTS, yet still the DESTROY- ERS OF THE FREE WORLD, NASA goes on - available yet to our government, we love U.S.A., have tried to save it!

#### **GATHERING STORM?**

We have been graciously invited to Hamburg, Germany, to hold our 1981 CONVENTION. Or perhaps 1982 if the Hot War is not on by then. How many members would be interested in meeting Hamburg sometimes? Write and give us your opinion, etc. - yea or nea, or what? Keep this in nind that Cermany don't have a space program hoax going, though the Nazi Party supplied U.S.A. with Werner Von Braum who in turn sup-plied U.S.A. with a Space program hoax. Contrary to general opinion, Germans have a vast sense of humor. It is so fantastic, more so, than the 'Tales of Hoffman,' ...how Germany lost every battle...BUT WON THE WAR! To have pulled this off, they must have the credit. Anyway, no doubt the Germans would have no trouble at all in understanding that the EARTH IS FLAT!

TOKYO, JAPAN: I had a thirty-minute interview over the phone awhile back. The guy was very nice, and polite and ran a large article about us, our address, etc., with the largest newspaper in Tokyo. He sent us a copy of the newspaper in Japanese. Many have written in to join as they were interested.

#### BABYLON IS FALLING -IS FALLING, IS FALLING......?

In year 1975, before we launched this campains to alert the citizens of U.S.A. on the total FAKE HOAX SPACE PROCRAM, asked the government through the 'National Science Foundation in Washington, D.C. for a 'Grant' explained a plan for us to get it all together in such a way to force the Schools, etc. and NASA to confess and repent before the world and DECLARE THAT EARTH IS FLAT OFFICIALLY, our government to do it. I told them it was our ONLY chance to save the United States. That we had been entrapped or had entrapped ourselves into fulfilled prophecy, a plan book for Babylon who also built silos towers and pretended to go to heaven by fire and returned by fire — FALSE WONDERS, LY-ING WONDERS, etc., the result is that 'Babylon isgto be thrown down

by force and violence and not to rise again! U.S.A. is in mortal danger. I told them that if they don't. ### Seek and you will find

One must read the Bible from the beginning to the end in prayer with a mind that seeks the truth and willing to 'hold fast' and be 'obedient' to what is found to be the truth. Don't take offense, but the Bible contains much of Satan or the Devil (the one who represents evil deceit and destruction). It is a very large book and much history. But if you seek with a 'right heart' you will find the Father's Words of Truth scattered from the beginning to the end. It never changes. The people who condemned him, the Babylonian Priests taught killing is a sacrifice - blood, blood, blood - washin blood. (Just as modern Christians do.) Jesus said to these 'christians', you are your father the devil, and him you serve, who was a Murderer from the beginning! So where do christians get all this talk of 'sacrifice and saved by the blood? Truly Jesus gave his life, showing and teaching us the Gospel of the Kingdom and died, that he could return to heaven above and send the Holy Spirit to those who seek his way in truth. And I think if we honestly Seek the Truth and Find it, there will be whole lot of change or repenting instead of as so-called christians of today saying that everything is already done for us, all we have to do is say His 'name.' Whole Bible especially JESUS is about REPENT

Marjory Waugh Johnson

CHANCE, for the evil destructive ways which are so crazy as it can only harm oneself and others, is the result. The whole Bible is mostly about a bunch of 'gangsters' and half crazy mobster...disobedient to any plain commonsense advise... refuse to do right...prefer to be upside down and backwards to everything honest and right. God said through the prophets. "oh, that you would the prophets. "oh, that you would have such a heart to do right" and "why would you die, oh Israel", "come let us REASON together... keep the Law and LIVE." Said curses on them and their children for the mad crazed, disobedient way, blessings to do right! I am sure all this applies to us all TODAY! Jesus told them, "you do ERR...not knowing the scriptures," it is not line on line this leads to falling over backwards but with a right heart to 'rightly divide the scripture'... So to the Elect of the Flat Earth believers who are seekers of the truth, may the Holy Spirit lead you into all truth, build on the Rocks of Truth and so we shall STAND...in this day and in the latter

#### **Lucky Luciano Stands Alone!**

"The Syndicate" started running this series, best I remember near the first of March, run 2 or 3, stopped about the 14th. Many 'shootas band of Jewish Gangsters, led By Lucky Luciano seek to 'take over all crimes in New York.' Then U.S.A. then the world - the band is Lucky, Buggys Siegal, Legs Diamond, Dutch Schultz, Al Capone, and that boy who founded Murder, Inc. and many more. They rub out the 'Romans'... Gangsters ... and others. Sometimes, what SEEM to be Men" or Secret Service 'Police' show up and gun down theirenemies. Many times they just 'shoot 'em down on the street'...sometimes several at a time. Lucky and the big gang are trying to bring peace like David of Old they 'cry for peace' ... FDR the Governor of N.Y. may be part of the fix. Well, anyway, this Chronicle stopped. Next event was NOT on T.V. - oh, yeah, it was on T.V. the Real McCoy, a gangster like old time gangster days - shot President Reagan and three members of his gang down! The scene looked just like the GANGSTER CHRONICLES ...well, well, well! Next event, this too on T.V., the Big Event, the 20 billion T.V. Caper on April 14 known as the "Orbit of the Snowbirds" or THE HOT BRICK'S FALLS AGAIN, the space shuttle caper. (G.C. don't mention that since the late '30s the MOB took over or created the space age.) ROCKWELL is the Mob Manufacturing Co., so with DOPE, WHORES, CAMBLING its SPACE SHIPS is part of the racket! Strange, before he was shot down, like a

BUSH was FOR the Space Racket, in fact, was at the Queen's Space Center in Houston when word came that Ronald Reagan was shot down on the street — he came back to D.C. to take over and get the space program going good again — well, no need now, seems somehow President Reagan is now, according to his April 28th speech a 'true believer.' #### Letters to the Editor. . .

Dear Charles and Marjory,

We just got the latest issue dated March 1981 of the FLAT EARTH NEWS, and it started us thinking. We are thinking of drilling a well on our land. We onder if anyone has ever drilled through the earth? We have looked at your pictures of the flat earth, but how thick is it? Is it like a pancake or does it go down forever? What's down there? If someone could drill through, would all the water leak through? We really like getting the FLAT EARTH NEWS. Keep up the good work! It is good to see someone stand up with courage. Sincerely,

Darrow and Carol, Member, California

If I answered any of the questions, for sure I would be like the doctor's of hocus pocus (scientists). The flat earth is the 'known world' or as the bible says 'the circle of the known inhabited world. No way of knowing 'how thick it is' or 'what's on the other side or even if there is another side! I presume, earth goes on down forever and outward forever, a world without end. Very, very LITTLE is known about earth or anything else. Nearly anything we can 'seem to know is always a danger of having to change the mind as time goes on, not sure. You will find TWO things not sure. You will find TWO things are certain, not death and taxes as Delerium Tremeins Mark Train though, but that God exists, and Earth is Flat. Neither of these things can be contradicted. You both can got to bed at night, get up in the moming KNOWING earth is still Flat till the moming and the NOWING earth is still Flat. - still not moving and that NO ONE WILL EVER BE ABLE TO CHANGE THIS FACT. SO YOU CAN HAVE FAITH IN COD, THAT HE AND HIS FLAT EARTH WILL REMAIN FOREVER. So to seek, to be on 'God's Side' and to seek out His truth is the ONLY worthwhile and SURE thing you can do. A couple like thou Twain can build your life around these certain things. Check chapter 12 of Ecclesiastes, esp. v. 10 through 14.

Dear Mr. Johnson,

Received this enclosed slip with the latest FLAT EARTH NEWS. If you check you'll find that I renewed my membership dues for Jan. 1, 1981. I enjoy the quarterly periodical intensely. Also, my wife and children read it avidly. They all agree with my high opinion of it and we wish to continue our membership in this International Society of Learning.

Dear President Johnson,

Many thanks for the reminder dun about my annual subscription. This serves as a chance to send you a personal note of thanks and encouragement. It always surprised me how some 'newlogians' can pick and choose so easy. The earth is Flat and is part of my belief in the Bible. And we all know Fish-Eye lens can make a square room look as a circle, so so-called pictures from space don't count with me. Will write again next

Dear Mr. Johnson,

I would like to become a member of the International Flat Earth Society. Included a check for \$10.00 and aplication filled in.

Good luck in carrying the battle against ignorance and evil theoreligious doctrines and science.

Man, Pennsylvania

EDITOR: You are starting out wrong! The theoreligious doctrines ARE SCIENCE. You are trying to say 'science' is NOT theoreligious idiot doctrines (interesting note sent this chap Dec. '81 and March '81, he wrote back mad as a homet, said we misrepresented and are religious ...wants part of his money back!) I wrote him a letter and told him to send back the certificate and card and the two issues, and that would be GLAD to return the \$10.00. He hasn't done it, and will receive this issue, hope he wises up.

Dear Mr. Johnson.

Thanks for your letter and newspaer clipping. Glad to hear that things are booming!

In George Korda's article "EARTH IS FLAT" ("Today" staff "EARTH IS FLAT" ("Today" staff writer) he uses the phrase 'planet flat earth' — planet comes from both Creek and Latin and etymologically means "Wanderer", something that is moving, revolving; whereas the flat earth is a "nailed down" "stay wit" thing a man light at the start of the start o put" thing - am I right? Well, may-be with him it was "Lapsus Cala-I am enclosing a small donation. I guess you know the old postal rates are going up. Success in your work, Mr. Johnson. No acknowledgement is necessary - you are very busy, I can see, however ALWAYS be glad to hear from you.

Reagan, on the tube said, "these clowns were great heroes and said he as a true believer wants more and more of this Hot Brick serial! Said he may have to cut government, but have to keep the 'bring on the clowns Dreams are better than real, he said. You, Mr. Silverman, made a believer of me, that the people of the nations of the world are idiots and no hope for them The elite man must rule them with a rod iron, or maybe gust T.V. movies? And let's not for-get the immortal Kipling: "A woman is only a woman...but a Cigar is a good smoke."

#### Personal note from the editor . . .

Johnson on the Shore

I am in earnest -I will not equivocate, I will not excuse -I will not retreat a single inch, And I will be heard.

Greetings to the Called, Chosen, and Faithful, to the humans on this World Animal Farm. Those who are not deceived and whose names are written in the Book of Life (Rev. 13: 7-9).

It has just occured to me that thousands and thousands of non-members in U.S.A., Australia, Canada, England, Sweden, Denmark, India, and several more have heard a more or less full explanation of our 'gathering of the facts' regarding Earth and also some 'why's for the world deceit, whereas, members who receive FLAT EARTH NEWS get much more basic proofs, etc., maybe lacking in some factors. Am speaking of the over 100 times I have been on Radio Talk shows, sometimes for over 2 hours taking questions from callers in San Francisco, Boston, Philadelphia, Pittsburgh, New York, you name it, all OVER U.S.A. and AUSTRALIA. Oh, yeah, just the other day I got a call, did live interview with Australia. Couple years ago did most of USA and Australia, and last year. Slacked off now, as the 'hosts' at last all learned no way on earth to 'refute'
Flat Earth RATHER on each and EVERY show I won all arguments proved beyond any shadow of doubt EARTH IS FLAT. The powers that be have and now are seeking to get me stopped from these radio interviews as have had a LARGE PART in 'turning America around' as they say - 85% of all people now are not only, sick and tired of the idlot space übberish but sick and tired of being sick and tired. All has translated into the DESIRE in DC and elsewhere to cut the NASA crime syndicate off without a sou - stop the circus, tell em to get back in the alleys, pimping and peddling dope! It got so bad even couple years ago President Carter, Democrat, called for a shutdown of the Scandal ridden Snow Bird Two Bit Circus called the Hypespaced out Rockwell shuffle. But the the Sec. of Defense Harold Brown, syndicateman, at the INSISTENCE of the Christian Snowbirds of NASA. and the Mad Dog Baptist Grease Bal-lites, told Pres. Carter and Congress we need the space shuttle for 'national defense! God Pity the nation that

depends on a bunch of Florida Snow

Birds putting together piles of junk

that would make a 1900 model T look like a Cadillac and making two bit movies of simulated space flights. if the Snow Bird Spaced Out NASA is a 'friend' of U.S.A., my God we don't need any enemies - they'll do. Anyway, NASA has discredited USA before the world made U.S.A. the laughing stock of the world! North is the center of the 'known inhabitated world,' just as the writings of Moses says, north is the center of the circle of inhabitated world." The lands or islands are stretched out in the water around the this north.

Circumnavigation: think of a big lake - is land is water, you sail around the island, you have circumnavigated the land, right? Ditto, with north pole sailing, flying 'around the world east to west, just going around the flat earth, campass always points to the NORTH center.

Sunset: Like telephone poles on flat lands, get smaller and smaller to sink, sun stays the same height, but its further away...appears to set.

Day and Night: Sun is a small light, 32 miles across, 3,000 miles high, the place it over, is day, it moves in circular course above and around the Flat Earth vicinity of the equator. When it moves away, it is night; when it comes back, it is dav.

Seasons: In this circular course, gradually it gets further south, then further north. Like when it is further south, north has winter and vice versa. The ships hull disappearing first, etc. Hull disappearing is sup-posed to proved earth is a ball. Think - in next issue we will really go into this one further. Not that it is hard to refute, but it is very important as this, so simple to explain seeming phenomenom was the beginning of the ball superstition, among the poor backward heathen savages THOU-SANDS of years ago. To believe the ABSURD spinning ball, is for you to RETURN to the beliefs of the most primative heathen savages of thousands of years ago - so far, far, far, from being 'new and modern!

Several people sent in over their dues that I haven't thanked but it is noted and thanks to all! Thanks for the several letters of encouragement, they are treasured - as the old song has turned out to be true for Marjory and I. "You and I against the world," so also "we may be ragged and funny but we travel along and we sing our song - the song of God's truth, side by side. - C.K.J.

### Ships Sail on Flat Sea Railroads Roll on Flat Land The World is Flat!

#### RAILWAYS

In projecting railways on a globe, the datum line would be the arc of a circle corresponding to the latitude of the place. That the datum line for railway projections is always a horizontal line, proves that the general configuration of the world is horizontal. To support the globe theory, the gentlemen of the observatories should call upon the surveyor to prove that he allows the necessary amount for "curvature." But this is what the learned men dare not do, as it is wellknown that the allowance for the supposed curvature is never

#### REAL ENGINEERS SPEAK

I am thoroughly acquainted with the theory and practice of civil engineering. However bigoted some of our professors may be in the theory of surveying according to the prescribed rules, yet it is well known amongst us that such theoretical measurements are incapable of any practical illustration. All our locomotives are designed to run on what may be regarded as TRUE LEVELS or FLATS. There are, of course, partial inclines or gradients here and there, but they are always accurately defined and must be carefully traversed. But anything approaching to eight inches in the mile, increasing as the square of the distance, COULD NOT BE WORKED BY ANY ENGINE THAT WAS EVER YET CONSTRUCTED. Taking one station with another all over England and Scotland, it may be stated that all platforms are ON THE SAME RELA-TIVE LEVEL. The distance between the Eastern and Western coasts of England may be set down as 200 miles. If the prescribed curvature was

indeed as represented, the central stations at Rugby or Warwick ought to be close upon three miles higher than a chord drawn from the two extremities. If such was the case there is not a driver within the Kingdom that would be found to take charge of the train....We can only laugh at those of your readers who seriously give us credit for such venturesome exploits, as running trains round spherical curves. Horizontal curves on levels are dangerous enough, vertical curves would be a thousand times worse, and with our rolling stock constructed as at present physiother reasons why such locomotion on iron rails would be AS IMPRAC-TICABLE AS CARRYING THE TRAINS THROUGH THE AIR."

#### A CIVIL ENGINEER, UK

"As an engineer of many years standing, I say that this absurd allowance is only permitted in school books. No engineer would dream of allowing anything of the kind. I have projected many miles of railways and many more of canals and the allowance has not even been thought of, much less allowed for. This allowance for curvature means this - that it is 3" for the first mile of a canal. and increasing at the ratio by the square of the distance in miles; thus a small navigable canal for boats, say 30 miles long, will have, by the above rule an allowance for curvature of 600 feet. Think of that and then please credit engineers as not being quite such fools. Nothing of the sort is allowed. I must, however, state that college astronomers have made the student engineer to think than in his method of levelling what

CHRONICLES...No. 2 by E.B....

All past oligarchies have fallen from power either because they ossified or because they grew soft. Either they became stupid and arrogant, failed to adjust themselves to changing circumstances, and were overthrown, or they became liberal and cowardly, made concessions when they should have used force, and once again were overthrown. They fell, that is to say, either through consciousness or through unconsciousness. It is the achievement of the Party to have produced a system of thought in which both conditions can exist simultaneously. And upon no other intellectual basis could the dominion of the Party be made permanent. If one is to rule, and to continue ruling, one must be able to dislocate the sense of reality. For the secret of rulership is to combine a belief in one's own infallibility with power to learn from past mistakes.

It need hardly be said that the subtlest practitioners of doublethink are those who invented doublethink and know that it is a vast system of mental cheating. In our society, those who have the best knowledge of what is happening are also those who are furthest from seeing the world as it is. In general, the greater the knowledge, the greater the delusion: the more educated the less sane. One clear illustration of this is the fact that war hysteria increases in intensity as one rises in the social scale. Those whose attitude toward the war is most nearly rational are the subject peoples of the disputed terriject peoples of the disputed terri-tories. To these people the war is sim-ply a continuous calamity which sweeps to and fro over their bodies like a tidal wave. Which side is winning is a matter of complete indifference to them. They are aware that a change of overlordship means simply that they will be doing the same work as before for new masters who treat them in the same manner as the old ones. The slightly more favored workers whom we call "the proles" are only intermittently conscious of the war. When it is necessary they can be prodded into frenzies of fear and hatred, but when left to themselves they are capable of forgetting for long periods that the war is happening. It is in the ranks of the Party. and above all of the Inner Party, that the true war enthusiasm is found. World-conquest is believed in most firmly by those who know it to be impossible. This peculiar linking-to-gether of opposites - knowledge with ignorance, cynicism with fanaticism - is one of the chief distinguishing marks of Oceanic society. The official ideology abounds with contradictions even where there is no practical reason for them. Thus, the Party rejects and villifies every principle for which the Socialist movement originally stood, and it chooses to do this in the name of Socialism. It preaches a contempt for the working class unexampled for centuries past, and it dresses its members in a uniform which was at one time peculiar to manual workers and was adopted for that reason. It systematically undermines the solidarity of the family, and it calls its leader by a name which is a direct appeal to the sentiments of family loyalty. Even the names of the four Ministries by which we are governed exhibit a sort of impudence in their deliberate reversal of the facts. The Ministry of Peace concerns itself with war, the Ministry of Truth with lies, the Ministry of Love with torture, and the Ministry of Plenty with starvation.

### Going About Doing Good. . .

In this day and age one had better be sure the gospel they are being taught and hearing is the same gospel that Jesus Christ taught. The gospel we are supposed to live by and to think by. As I read, Jesus taught us what good works we were to do, all he taught us was to mend our ways from doing evil, and to do good! He also said whosoever shall do and teach the commandments of God shall be called great in the kingdom of God. So, it is all good works he taught us, and said you shall know them by their fruits, or by their works, though they be good or whether they be evil. So that seems to me to leave out all this talked of "washed in the blood" or "under the blood" and that it was all "paid and done FOR you" and 'all finished at the cross' that sounds just like the Pharisees. that murdered and put Jesus to death. They said "LET HIS BLOOD BE ON US AND ON OUR CHILD-REN." They also went to the synogogues (churches) each Sabbath and read the law. But their heart was far from it as they followed their own traditions, not the law. For fesus told them, you make the commandments

Marjory Waugh Johnson

of God of none effect! So we want to follow and do as Jesus, sanity and reason tell us, not old time traditions of man and also to follow the intent of the law, that is to have our heart right, as God judges the reins of the heart, and JESUS WENT ABOUT DOING GOOD. And, for ourselves as well as helping and doing right to our fellow man, don't ever forget to do right to all God's creatures. The sweet little animals, they also have feelings as us. They also get hungry, they also get thirsty and they do need us to care for them, to love them also. Not kill them or torture them or mistreat them. I find that the teachings of Martin Luther is contrary to the teaching of Jesus. As the Luther gos-pel is all what you can "get for yourthe Jesus gospel is how you can help others, and to help others do right. In doing what Jesus said you're always helping yourself in the end, and that you will be and have a righteous heart ... and THE RIGHTeous shall inherit the world, (Psalm 37, check it out).

These contradictions are not accidental, nor do they result from ordinary hypocrisy: they are deliberate exercises in doublethink. For it is only by reconciling contradictions that power can be retained indefinitely. In no other way could the ancient cycle be broken. If human equality is to be forever averted — if the High, as we have called them, are to keep their places permanently — then the prevailing mental condition must be controlled insanity.

But there is one question which until this moment we have almost ignored. It is: why should human equality be averted? Supposing that the mechanics of the process have been rightly described, what is the motive for this huge, accurately planned effort to freeze history at a particular moment of time?

Here we reach the central secret. As we have seen, the mystique of the Party, and above all of the Inner Party, depends upon doublethink. But deeper than this lies the original motive, the never-questioned instinct that first led to the seizure of power and brought doublethink, the Thought Police, continuous warfare, and all the other necessary paraphernalia into existence afterwards. This motive really consists... now listen...very closely and you'll hear it, The Sound of Stlence...

#### MOTHER SHIPTON

Made many prophecys in Old England, this one said to be made in 1485, 13 of the predictions have come to pass, the 14th is contained in the last two lines...

Carriages without horses shall go, And accidents fill the world with woe.

Around the world thoughts shall fly, In the twinkling of an eye; Water shall yet more wonders do, Now strange, yet shall be true. The world upside down shall be, And gold be found at root of tree; Through hills man shall ride, And no horse nor ass be at his side: Under water man shall walk, Shall ride, shall sleep, shall talk In the air men shall be seen In white, in black, in green; Iron in the water shall float. As easy as in a wooden boat Gold shall be found 'mid stone, in a land that's now unknown. Fire and water shall wonders do, England shall at last admit a Jew; And this world to an end shall come In nineteen hundred and eighty-one.

#### The Passing Parade

#### BAPTIST SUBVERTING JEWS

The "Baptists" are the weirdest, most evil, anti-God, anti-sanity, hogflesh, spinning-ball religions (some say almost as atheist and idiotic as the Lutherans) have brought such pressure, BLACKMAIL and day and night subtle propaganda to try to proselyte the Jews, that in the state of Israel HOG FLESH is served in many cafes. An orthodox must be very careful when dining out not to become quilty of...the dead flesh and blood of hogs. The crazies called Luther-Baptist claim that the sole reason for JESUS CHRIST was so that they (those called Baptists, Lutherans, and Christians in general today (were then called parsee or pharisee in the year 30 A.D.) could kill him and have the blood splattered them...and so get rid of all law and to clean the hog so they could kill and eat him also! So the "Christhe land eat nim also: 50 the Christian Plot" continues against the Jews. We should all pray that the swami, cannibal beasts of pray, buggy ball people called "card-carrying Christians", will be stopped and chained for 1,000 years, so sanity and reason can prevail.

#### LUTHERS-BAPTIST BEASTS IN-VENTED SCIENCE

The Baptist-Luther beasts not only invented science, the present idiocy called the blind-faith, spinning, whirling, gyrating world, but now we have received a report that the Baptist minister, Dwight Wymer, uses an "electric chair" to administer "electric shock therapy" to his students in Sunday school, who are slow and being programmed with the Baptist double think. Another Baptist beast was seen on TV playing his guitar with his toes. I think that he was seeking to demonstrate that he was a monkey's uncle, and he did succeed.

#### OTHER CHRISTIAN BEASTS

Jake's spinning-ball witnesses, also known as the Jehovah's Witnesses, brag in their mag "WATCH-INC THE STORE, Brooklyn Published," that they have and are gaining new members by the thousands and the tens of thousands in the U.S.S.R.! It seems that at LEAST this Brooklyn gang is "free" in U.S.S.R....strange... bedfellows, oh yeah...

#### SAN FRANCISCO

In another one of the scientific bailite churches there, thousands worship while the dope incense burns and the acid rock music plays, along with recorded wolf howls. The worshippers join in the wolf howls and howl along with them and MAN-IFEST THEIR TRUE NATURE. In an Episcopal communion service hard booze is consecrated, and "all kinds of smoking and group snake dancing through the aisles." One thing about this Episcopal church (the real and true name, Church of England) is at least that they confess that they don't believe in God, the God of the Bible, nor the Bible. They confess to anyone who asks that they don't believe Heaven exists, they don't believe up exists or down exists, so the one redeeming grace of the Episcopal Church of England is that they confess that they worship "Ike Newton" who taught "An apple is an apple is an apple!

#### NEW MEXICO

A woman says she saw the face of Jesus in a tortilla. Now so far

3,000 people have made pilgrimages to this shrine of the divine tortilla. Each and everyone of them who visit the shrine and are asked about the Earth say they "believe and have faith that the earth is a tiny speck of dust spinning around the sun at exactly 66,000 miles per hour, and that no up exists and that no heaven exists." Many of them speak Spanish and they brag and say that it was from Spain that the florious grease ball came from. They are quite proud of their claim that it is the Spanish who invented and gave the world the ball.

#### TO BE OR NOT TO BE...A BEAST.. IS THE QUESTION?

Now we must all understand once and for all time it is a DOGMA of the Christian church, of all Christian churches, that Earth is a ball spinning, that NO GOD EXISTS and that HEAVEN ABOVE DON'T EXIST and no such place as "up." I just can't tell you enough times that this idiocy called science is the BODY of the so-called 'Christian church. Also the full name for science is CHRISTIAN SCIENCE. They believe they make anything true by just "SAYING IT"...that's what science is. They believe that nothing really exists...it's all in your head, so you make, say...the Earth a ball by JUST SAYING IT. I'll say again, as a human being you must understand; JUDO-CHRISTIAN SCIENCE is just a FORM OF INSANITY OR TO BELIEVE IT IS TO RECEIVE THE MARK OF AND/OR BE A BEAST.

#### CHRISTIAN BEASTS OF THE FIRST WATER, ASTRONOMERS;

Washington D. C. (AP) Dr. Robert Kirshner, chief priest of black magic at the University of Michigan has looked up and found nothing! In his gang of cannibal beasts of pray at the Uni, announced October 2, 1981, that they had found the biggest nothing in the world. (As you know, when a Christian speaks in church he claims to be God, God is in him, so this same tail-less cannibal claims to know everything.) This beast told AP, now we know the exact size of the Milky Way galaxy, right down to the inch, pardon me, millimeter. He said this hole in the sky was 2,000 times bigger than this entire galaxy (galaxy is camie-talk, for all you can see). He said we knew there was a big bad black hole that was out there, but this nothing is the biggest nothing the world has ever seen. This nothing can swallow other nothings. He said this hole was 400 light years away, getting bigger, further away, and much closer! Now a light year, according to these tail-less cannibals, calculated in this way. They claim that they know light travels at 186,000 miles a second or 11,160,000 miles a minute! Dr. Robert, when asked about this world, said it all began 100 billion years ago. "Twas a balmy summer evening, and a good-ly crowd was there." "Vunbigband," when asked what or who made the bang, he got mad, said in a loud voice DON'T QUESTION SCI-ENCE! He said that "particular bang" had no banger, but he said strange thing, ever since that magic bang, all bangs have had a banger! Anyway, he said his grandfather was a ringtailed baboon, but his grand-father's problem was that he was a vegetarian. He said his family of monks or monkies, took up killing

and eating everything that moved on earth, that is all their dead bodies, 'that's when us monkies got smart, when we started eating dead bodies. The same doctor, a doctor of science, said earth was a speck of water gyrating through space in 4 directions at once, that Australians all hung by their feet head down because "SCIENCE SAID THEY DID". When he was asked exactly how far it was from Los Angeles to Hawaii he scratched his head and said well, no one knows for sure as there is no tape measure that long...but to get back to ... spaced out Christian monk (ie) science, well you know what they say, ain't science in 1981 won-derfull Oh yeah.

#### EXPERIMENTAL... Contd.

it seems at first sight a waste of words to re-state it, but the following quotations will show the necessity of emphasing even self-evident truths.

"Some Laws of Nature," by I. Singer and another creep scientist, contains the following:

"We suspend two plumb lines at a convenient distance and then measure their distances from each other at hoth ends. The most delicate measurement at present possible would demonstrate as far as this is possible by direct observation-that the two lines are parallel to each other. By parallel lines if extended indefinitely would never meet, we would draw the inevitable inference that two such plumb lines, if indefinitely extended would never meet. This conclusion would seem obvious and inevitable; yet the student of today knows it to be false. But his knowledge is not due to direct observation, but to his acquaintence with the fact that the earth is round, and that plumb lines at any part of the earth are at right angles to the horizon.

I have not read one work on Astronomy which does not require on enormous amount of credulity if the reader is to accept as truth whatever is presented to him, but the above quotation will equal anything anywhere for the amount of credulity it pre-supposes the reader to be possessed of. By direct observation and experiment it is proved that parallel lines can never meet, being equidistant from each other. Yet the student after having proved the truth of the proposition, knows it to be false!!! Parallel lines can never meet, because they are parallel, no matter what the figure of the world may be. The same work, on page 13, states:

"To the man who conceived the earth as a flat expanse nothing could be more conclusive than that plumb lines were strictly parallel.....
But notwithstanding such direct and positive evidence, the student of today desbelieves this delusion, and that not because he has any direct evidence to the contrary, but because it conflicts with the now established fact that our earth is a sphere. His evidence is not due to direct observation, but is circumstantial depending on a concatenation of inferences."

It would be difficult to conceive anything more opposed to reason and common-sense than the foregoing. One fact is done to death by what is said to be another fact, which is manifestly impossible, and one marvels how educated men can lend themselves to support what their own experiment condemns. The same work, continuing on page 15, says:

"The reason why parallel lines never meet is because we conceive them so and because as soon as lines

approach towards each other we no longer call them parallel."

"This conclusion will enable us to understand why of two such conclusions—as: (1) plumb lines are parallel; (2) plumb lines are convergent,—we accept the latter, though based on a long chain of inferences, as against the former which is the result of actual observation."

Now, the most amateur draughts'man knows that parallel lines are not parallel, "because we conceive them so." but because they are equidistant from each other, and, therefore, can never meet if extended indefinitely. So that the gifted authors of the work from which I quote have actually to mentally destroy a fact and to deay self-evident truth in order to support what depends on a "concatenation of inferences or double think". The "long chain of inferences" has to be accepted as truth as against the result of actual observation! If plumb lines are parallel, how can they be convergent? Truly, this globe theory depends for its support on the stultification of common-sense, the free run of the imagination and the dethronement of the reasoning powers. According to the globular hypothesis, parailel perpendiculars are impossible, yet any builder will admit that a house is a

mass of parallel perpendiculars.

The authors of "some Laws of Nature" have gone to strange lengths to support the fiction of a globe world. It never occurred to them that their experiment proving plumb lines to be parallel, proved also that the world is not a sphere but a plane.

Johnson on the Shore

Greetings from world headquarters of the FLAT EARTH RE-SEARCH SOCIETY and the site of the Rockwell factory, where the "space shuttle" is built and where the first "landing" was held by NBCsyndicate, a few months back, Interesting, so many afraid of the flat earth facts, fearful somehow that them papist Roman Catholics are Flat Earthers. Well, here at Edwards Air Force Base, here at Lancaster, where the NBC farce was held, it is laughing time. There are vast carnival concessions, lots of dough making, souvenirs by the thousands, all kinds of refreshments, pictures, etc. etc. memorabilia as they call it these days. Well, normally regular carnivals handle this sort of thing, but in this case the regular carni's in L.A. couldn't even get a foot in out there at the Base. They complained bitter-Rather the KNIGHTS OF COLUMBUS, a Roman Catholic outfit had the contract for all of the carni peddling activity! So don't wor-ry about the Catholics being Flat Don't forget Kennedy,
i'' to be a Roman Catholic, Earth. "claimed" suspected to be rather a "Nazi-German Jesuit Catholic", who started the space hoar USA. First and only Roman Catholic President, so called, and the disaster brought about through him may end or has perhaps already ended the USA. For NASA is Babel, claiming and pretending to go and come from heaven by fire, this is the prediction of what the modern Babel will do, NASA fills the bill. But the entire space farce is a dead duck around here. After that childish fiasco called the Shuttle landing a few months back it was so embarrassing to everyone here in the Vailey, and I guess to NASA and everyone in the world, it was so utterly mindless and absurd, that you would have to be feebleminded to even take it seriously. A few weeks back out at Edwards they held their annual open house. It is held every year, open to the public, with all of the air craft displays, etc., etc. Usually a few thousand people come. This year that old pile of trash the Enterprise Shuttle was also there, and supposed to be an added attraction. Another added attraction was "JEW-ISH HERITAGE DAY", with many Jewish displays out at the Base. It seems also that the Commander of the Base is from New York. It seems

almost NOBODY showed up, maybe a few hundred, it was shocking to everyone, if you realized how sick the people are, being treated like idiots with the pretended space travel and orbiting, when nearly everybody knows we have proved the Earth flat, so nobody showed up. But on the evening TV news, and I guess it was on the networks, the nation was told Edwards Air Force had an open house, and over 300,000 people attended! See what I mean, the age of the total lie! An old saying, I see is true for now, "believe nothing you hear and only half of what you see". I would say cut that in half today ... anyway...I am sure you all understand that in the last issue cussing Satanic Christians, that I am not against Jesus Christ, or Moses or the Prophets o the Bible, rightly divided and understood properly, but the degenerated subverted by the scientists minds that is called Christian Science religion, as old Paul himself said, 'falsely so-called science".

Weil, many of you already have your names in our BOOK OF LIFE. Many have not, I hope for many more this year...those who have been with us for over a year, faithful, their names, your names, are entered in our BOOK OF LIFE. The most interesting fact to me, seems to be known by few, is that Jesus' favorite disciple, who was given the "keys to the kingdom" was a man, Flat Earther, azcetic, named Simon Johnsonl Oh yeah, and in scripture J.C. said "Johnson, I say unto you flesh and blood has not revealed it unto you, but my Father, who is in Heaven above, I say unto thee", "Johnson, above, I say unto thee, Johnson, because you are so steadfast, so reasonable and so sane, I'll call you the or Peter Johnson, this instead "Simon Johnson", but anyway, J.C., Big Brother Himself, the great Flat Earther, said a man named Johnson was the foundation of the new and the true age.

It seems that that TV pilot I mentioned in the last issue, and that "Awful Quiz Show," made and produced in part by John Barber of "Real People," will not make it this year, but will be on next year. It will not be on the network, but is "syndicated" — See? Even the word syndicate is "in"! We made it in a very nice studio in Hollywood, the same studio where I made my first appearance on nation

times. Next year we are going to get into some other stuff; we are going to start to hit some things hard. enough is enough, so prepare for some new facts and attacks of false things as the NEW ACE unfolds. Oh yes, keep in mind BIG BROTH-ER does not necessarily mean the "bad hombre," is your big brother is your big brother a bad guy? No! BB stands for JC himself, the plan book says he we first born of MANY BROTHERS." The time is coming when we must all stop horsing around and BE BIG BROTH ERS OURSELVES. How else will anything ever be changed? Time's a wasting. To learn that it is so easy to prove the Earth is flat, that it has been, and that it can be demon-strated at any hour of the day or night, anywhere on the Earth, this is not an end in itself. We're not spending our lives studying geography, perish the thought, no. This knowledge is just opening the DOOR...to your sanity...and to start to understand that...people are NOTLOGICAL, and that most everything is false. This is to start you to THINK! And since it is us who gives you this CHANCE... we must be kind of "good guys," right?...so listen, KEEP THE TEN COMMANDMENTS...only words of the book, which it is said in the book, "written by the very finger of God"...Mo and JC were Flat Earthers, the book is flat, the prophets were Flat Earthers, so God exists. Fear of God is the beginning of wisdom...Earth is flat. As these things become a very "part of you"...don't worry about big brother...He's not against you but FOR YOU...In fact then you'll be a part of BIG BROTH-ER! You see, even though this is the BEAST ACE 686, at the very same time that this beast age is in existence the COD OF HEAVEN ABOVE, "oh yeah there is an up"... is setting up a government...that will NOT BE EVER THROWN OVER! So, don't worry about BB, but DO WORRY about DOING RIGHT and TRUE, and HONEST, being true and honest are the most rare things on Earth! You're in like Flyn right now with BB and will always be if you stay that way. And another thing, I spoke in the last issue about the syndicate and organized crime, and one thing and another with the Space Shuttle. But let's get this straight now. Organized crime and murder incorporated is not as bad as people make it out to be. Many are honest and upstanding people. You could trust your life with them, but this is not so with "school teachers" or 'professors in universities' or "any scientist". All of these people are the REAL DEVILS. JC said satan was a liar and the father of all liars, so this makes all school teachers and all university teachers, including Sunday school teachers the very devil, they are working for the very devil. On the other hand, many cases of organized crime, people involved in this are perfectly honest people. They are working somewhat beyond the normal law, usually dealing with consenting adults, whereas school teachers are actually the "corrupters of our children

### Civil Engineers Say: World Is Flat Johnson Prophecy Comes True

#### Railways

In projecting railways on a globe, the datum line would be the arc of a circle corresponding to the latitude of the place. That the datum line for railway projections is always a horizontal line, proves that the general configuration of the world is horizontal. To support the globe theory, the gentlemen of the observatories should call upon the surveyor to prove that he allows the necessary amount for "curvature." But this is what the learned men dare not do, as it is well known that the allowance for the supposed curvature is never made.

#### Real Engineers Speak

"I am thoroughly acquainted with the theory and practice of civil engineering. However bigoted some of our professors may be in the theory of surveying according to the prescribed rules, yet it is well known amongst us that such theoretical measurements are incapable of any prac-tical illustration. All our locomotives are designed to run on what may be regarded as TRUE LEVELS or FLATS. There are, of course, partial inclines or gradients here and there, but they are always accurately defined and must be carefully tranned and must be carefully tra-versed. But anything approach-ing to eight inches in the mile, increasing as the square of the distance, COULD NOT BE WORKED BY ANY ENGINE THAT WAS EVER YET CON-STRUCTED. Taking one station with another all over England and Scotland and the USA, it may be stated that all platforms are on THE SAME RELATIVE LEV-EL. The distance between the Eastern and Western coasts of England may be set down as 300 miles. If the prescribed curvature was indeed as represented, the central stations at Rugby or Warwick ought to be close upon three miles higher than a chord drawn from the two extremities. If such was the case there is not a driver within the kingdom that

would be found to take charge of the train....We can only laugh at those of your readers who seriously give us credit for such venturesome exploits, as running trains round spherical curves. Horizontal curves are dangerous enough, vertical curves would be a thousand times worse, and with our rolling stock constructed as at present, physically impossible. There are several other reasons why such locomotion on iron rails would be impossible."

#### A Civil Engineer, UK

"As an engineer of many years standing, I say that this absurd allowance is only permitted in school books. No engineer would dream of allowing anything of the kind. I have projected many miles of railways and many more of canals and the allowance has not even been thought of, much less allowed

for! This allowance for curvature means this — that it is 8" for the first mile of a canal, and increasing at the ratio by the square of the distance in miles; thus a small navigable canal for boats, say 30 miles long, will have, by the above rule, an allowance for curvature of 600 feet. Think of that and then please credit engineers as not being quite such fools. Nothing of the sort is allowed. I must, however, state that college astronomers have made the student engineer to think that in his method of levelling what is known as the "backsight" cancels any curvature by his "foresight" and so on. It is only a theory, and if astronomers declare that our method of levelling cancels the obligation of making this allowance, we sha'nt quarrel with them — it does no damage to our projects when we get into practice, but we no more think of allowing 600 feet for a line of 30 miles of railway or canal, than of wasting our time trying to square the circle."

### The fall of White South Africa

Just a few years back we had lots of contact with South Africa, including a couple of Universities, several members. In fact FLAT EARTH was strong there 90 and 100 years ago, faded out, till, might say...the time of the end. I remember in an issue of FLAT EARTH NEWS I said, "unless South Africa drops Greek ballism, the insane delusion of lunatics, the people from the jungles will have to come in and take it all over...as the so called Whites are unworthy to be leaders of ANYTHING, including the uncivilized black Africans." They didn't do it, neither the right or left..both reprobate. THE BIBLE says "don't just believe, but do listen to any who tells you something and/or warns you, and consider." Then, it says, "IF THE THING COME TO PASS...XOU WILL KNOW A PROPHET HAS BEEN AMONG YOU."

What I said has come to pass. South Africa is of course a white country, created by, run and lived in by white Africans. As the Bible and common sense says, "much was given them... and much expected" they failed DUE TO BELIEVING EARTH A PLANET. OH YEAH, THIS WAS THE DOWNFALL OF SF, from that first step into INSANITY and it is INSANE for anyone, ESPECIALLY for a South African to believe earth a globe, for he CLAIMS HE IS UNDER THE WORLD, HANGING BY TEET HEAD DOWN! Is that NUTS or what? So God and common sense has driven the people in from the jungles, to come and TAKE OVER THE WHITES, COULD SAY WITH NETS, ASTHEYTHEBLACKS KNOW THE WHITES ARE CRAZY AND MUST be taken out of power!

Note to members only: This issue of NEWSWEEK has marvelous example of how Party People at the Ministry of Truth work, to change the past and Present, to distort and lie with upmost subtlety (Gen. 3:1). By the way it was in the MINISTRY OF TRUTH in England, the Smithy worked. He took great pride in his work, of expertly altering all news, in the present and past...oh yeah, there and nearly everywhere the past is altered. Records of the past are changed. Anyway, this cartoon is a marvelous steam valve, and goat and face saver...for everyone! Even the Mr. Anti Right himself Johnny Carson, was sick and disgusted...when the Hubble BS telescope when taken to space didn't show us 100 billion years in the past and somehow forever do away with God and Right and Wrong. So even him and everybody...started to see...NASA and the entire Carnival was a FAKE...suddenly and unexpectedly they were "caught in the act"... found they couldn't "produce". Like taking civilians and school teachers to space...THEY COULDN'T DO IT...had to rub em out, to get off the hook...make an excuse why they couldn't take them to space (we know it's all a Hoax). Back to the cartoon...this puts the blame on the telescope... for no pic! FACT: no space ships "orbiting," earth not a Grease ball, not spinning, they CAN'T take Hubble to space to get the pics, can't rub the telly out, so make excuses. This cartoon "makes it all right" that damn telescope, real micky mouse magoo junk, NOT NASA'S FAULIT, GET IT? FACT: SPACE PROGRAM IS A GIANT BIG FOOT JOKE-HOAX. 7-7-90

coul not now remember.
Since about that time, war had been literally continuous, though strictly speaking it had not always been the same war. For several months during his childhood there had been confused street fighting in London itself, some of which he remem-bered vividly. But to trace out the history of the whole period, to say who was fighting whom at any given moment, would have been utterly impossible, since no written record, and no spoken work, ever made mention of any other alignment than the existing one. At this moment, for

example, in 1982 (or maybe 1948), Oceania was at war with Eurasia and in alliance with Eastasia. In no public or private utterance was it ever admitted that the three powers had at any time been grouped along differ-ent lines. Actually, as Smith well knew, it was only four years since Oceania had been at war with Eastasia and in alliance with Eurasia. But that was merely a piece of furtive knowledge which he happened to possess because his memory was not because his memory was not satisfactorily under control. Offi-cially the change of partners had never happened. Oceania was at war with Eurasia: therefore Oceania had always been at war with Eurasia. The enemy of the moment always represented absolute evil, and it followed that any past or future agreement with him was impossible.

The frightening thing, he reflected for the ten thousandth time — the frightening thing was that it might all be true. If the Party could thrust its hand into the past and say of this or that event, it never happened — that,

surely, was more terrifying.
All Inner Party men knew the earth was flat, that the known inhabited world was surrounded by frozen waste no one knew

what was beyond. Yet a frantic day and night charade on TV and in all the media, all the State controlled schools to claim earth controlled schools to claim earth was a "space ship" and was a ball spinning, whirling through space, that if the proles were "good" the Party would take them to Heaven by space ship and there...would be Pie. Party worther must know earth Elvit prophers must know earth Elvit prophers must know earth Elvit members must know earth Flat and at same time claim it was a

speck of water, whirling, a globe! The Party said that Oceania had never been in alliance with Eurasia. He, Smith, knew that Oceania had been in alliance with Eurasia a short a time as four years ago. But where did that knowledge exist? Only in his own consciousness, which in any case must soon be annihilated. And if all others accepted thelie which the party imposed — if all records told the same tale md records told the same tale md then the lie passed into history and became truth. "Who controls the past," ran the Party slogan, "controls the present controls the present controls the past." And yet the past, though of its nature alterable, some the past and been placed. "When the past is not present between the past in the past." And yet the past, though of its nature alterable, some the past in the past in the past." never had been altered. What-ever was true now was true from everlasting to everlasting. It was quite simple. All that was needed quite simple. All that was needed was an unending series of victories over your own memory. "Reality control," they called it; in Newspeak, "doublethink."

I sold you and you sold me... Under the spreading chestnut tree...and the band played on. His mind slid away into the labyrinthine world of doublethink. To know and not to know.

think. To know and not to know, think. To know and not to know, to be conscious of complete truthfulness while telling carefully constructed lies, to hold simultaneously two opinions which cancelled out, knowing them to be contradictory and beliaving in both of them to use lieving in both of them, to use logic against logic, to repudiate morality while laying claim to it. to believe that democracy was impossible and that the Party was the guardian of democracy, to forget whatever it was necessary to forget, then to draw it back into memory again at the moment it was needed, and then moment it was needed, and then promptly to forget it again, and above all, to apply the same process to the process itself—that was the ultimate subtlety: consciously to induce unconsciousness, and then once again, to become unconscious of the act of hypnosis you had just per-

The center of the earth on a stationary plane is the North Pole, which is supposed to be relatively underneath Polaris, or the north polar star, which is a fixed stationary star. Vol. is a fixed, stationary star. You can put a gas pipe on a post, out in your back yard, bring the north polar star within the field of your pipe, go away and return in thirty days, and the polar star will still be within the field of the pipe. North is toward the North

Center.

There is but one absolute direction. In other words, north is the only direction in which a man can travel and reach a point where he cannot go any farther in the direction of the north. East, west and south are not absolute direction: they are only relative directions with reference to north. East and west are points at right angles to north and south.

Suppose that we put an ob-server on the Tropic of Capricorn on the above diagram, and tell him to travel due east until he comes back to the point of de-parture. He starts out with the needle of his compass pointing to the North Center, and as he travels due east the needle will continue to point there; and he will describe a complete circle and come back to the point of departure on the Tropic of

#### **FLAT EARTH:**

#### **Experiment demonstrates facts!**

#### Anti-reason, anti-logic — Mary Baker Eddy delusions

The term "parallel" signifies equidistant, hence the self-evident truth that "parallel lines never meet." Because they are at equal distance from each other, they can never meet, not matter how far they may be prolonged. If lines do meet when prolonged, it is because they are not parallel or equidistant from each other. The above is so well-known that it seems at first sight a waste of words to re-state it, but the following quotations will show the necessity of emphasizing even self-evident truths.

"Some Laws of Nature," by I. Singer and another creep scientist, contains the following:

"We suspend two plumb lines at a convenient distance and then measure their distances from each other at both ends. The most measure their distances from each other at both ends. The most delicate measurement at present possible would demonstrate as far as this is possible by direct observation – that the two lines are parallel to each other. By the aid of the abstract axiom that parallel lines if extended indefinitely would never meet, we would draw the inevitable inference that two such plumb lines, if indefinitely extended would never meet. This conclusion would seem obvious and inevitable; yet the student of today knows it to be false. But his knowledge is not due to direct observation, but to his acquaintance with the fact that the earth is round, and that plumb lines at any part of the earth are at right angles to the horizon."

I have not read one work on astronomy which does not require an enormous amount of credulity if the reader is to accept as truth

enormous amount of credulity if the reader is to accept as truth whatever is presented to him, but the above quotation will equal anything anywhere for the amount of credulity it pre supposes the reader to be possessed of. By direct observation and experiment it is proved that parrallel lines can never meet, being equidistant from each other. Yet the student after having proved the truth of the proposition, knows it to be false!!! Parallel lines can never meet, because they are parallel, no matter what the figure of the world may be. The same work, on page 13, states: "To the man who conceived the earth as a flat expanse nothing

could be more conclusive than that plumb lines were strictly parallel......But not withstanding such direct and positive evidence, he student of today disbelieves this delusion, and that not because he has any direct evidence to the contrary, but because if conflicts with the now established fact that our earth is a sphere. His evidence is not due to direct observation, but is circumstantial depending on a concatenation of inferences."

It would be difficult to conveive anything more opposed to reason and common sense than the foregoing. One fact is done to death by what is said to be another fact, which is manifestly impossible, and one marvels **how** educated men can lend themselves to support what their own experiment condemns. The same work, continuing on page

"The reason why 'parallel lines never meet' is because we conceive them so and because as soon as lines approach towards each other we no longer call them parallel."

"This conclusion will enable us to understand why of two such

conclusions – as: (1) plumb lines are parallel; (2) plumb lines are convergent, – we accept the latter, though based on a long chain of inferences, as against the former which is the result of actual observation."

observation."

Now, the most amateur draughtsman knows that parallel lines are not parallel, "because we conceive them so," but because they are equidistant from each other, and, therefore, can never meet if extended indefinitely. So that the gifted authors of the work from which I quote have actually to mentally destroy a fact and to deny self-evident truth in order to support what depends on a "concatenation of inferences or double think." The "long chain of inferences" has to be accepted as truth as against the result of actual chervation! If rlumb lines are parallel, how can they be convergent? merences' has to be accepted as truth as against the result of actual observation! If plumb lines are parallel, how can they be convergent? Truly, this globe theory depends for its support on the stullification of common sense, the free run of the imagination and the dethreacment of the reasoning powers. According to the globular hypothesis, parallel perpendiculars are impossible, yet any builder will admit that a house is a mass of parallel perpendiculars.

"Measuration," by T. Baker, C.E., page 1, gives the definition of parallel lines as:

es are always at the same distance, and never meet

when prolonged."

The authors of "Some Laws of Nature" have gone to strange lengths to support the fiction of a globe world. It never occurred to them that their experiment proving plants lines to be parallel, proved also that the world is not a sphere but a plane.

#### Mississippi Proof

Astronomers assume earth is a globe, they also assume t is flattened at the poles, somewhat like an orange. This Polar depression they further assume is accompanied by a corresponding bulge at the equator of thir-teen miles all around. Such is their theory; let us see what is the fact. The Mississippi River flows from north to south, a distance of about 3,000 miles towards the Equator. According to the accepted theory it must therefore be continually ascending this bulge as it nears the equatorial line; until, by the time it reaches the Gulf of Mexico it will have climbed a hill something like eight miles high! It is contrary to the nature of water to run up hill, but we know that it will always seek a falling route to the Sea, which is LEVEL. A Chronical of Kings from William I to Present By George B. Powell (a small excerpt, from page 16)

No one it seems took much thought of the old king, and it was some time later when a knight by name of Herlwin took charge of the body and had it borne to Caen where it was buried (-not, however, without incident, as the land in which the plot had been made, was claimed by Ascelin, son of Arthur, as belonging to his family, and a cash payment made - there and then - before the ceremony could be concluded) at the Chapel of St. Stephen which William had himself founded. But the ravages of time have hardly been kind to him, as the monument raised by his son Rufus was destroyed by the Huguenots in 1562, and the king's bones then scattered; and a later tomb destroyed in 1793 at the time of the French Revolu-

the time of the French Revolution, when the last (or nearly the last) bones were finally lost.

William II, commonly known as William Rufus, was born very close to 1054 (1055 or 1056; - if 1054 then he would have had the Chinese Golden Cycle - the 'independent' HORSE - as a part of his zodiac make-up), the third son of William I (as Richard, the second son, generally thought to second son, generally thought to be illegitimate, had been gored to death in the New Forest by a wounded stag). In appearance, he was of medium height, square built and chunky, and very strong like his father, but not nearly as handsome. Frank and outspoken, given to impulsive

acts and oddly enough quite generous with his money, once it was got, of course, as he was not above 'cheating the devil' in order to get it. Yellow headed and a ruddy complexion, hence the nickname Rufus or Red, and with the similarity of his given name (William) to that of his father\*, caused the latter to be practically substituted for his real one. In the words of one

author, a quite robust Henry VIII
type of a person.

\* Author's note: It is quite an
odd fact that William I's first three boys were named Robert, Richard, and William; – as William I's father was Robert, the 'Grasper'; his grandfather and greatgrandfather both named Richard - 'the Good' and named Richard - the Good and Richard 'the Fearless' respec-tively, and finally the latter's father and Rolf's son - William 'Longsword'. Logically then the next son after William Rufus would have been called Rolf, but instead was named Henry. Why, we don't know. It is easy to imagine that by the time Henry arrived, William's wife may have arrived, William's Wife may have had a little say-so in the matter, and/or felt they had come up in the world and 'too modern' to consider such an old-fashioned name for their child. Who Henry name for their child. Who Henry was in fact named after would be anyone's guess. The King of France (between 1030 and 1061) had been Henry, as was two Emperors of this period – Henry

III, who died in 1056; and Henry IV. 1056-1106.

He carried father's ring and a letter to Lan-franc (who we must know had replaced Stigand as Archbishop of Canterbury in 1070) request-ing that – 'if he deemed that it could be justly done that he should crown his son King of England.'

#### **Notice to Our Many** Texas Members

In the last issue #74 I spoke of William Sydney Porter, AKA, O'HENRY. Mentioned he left Texas went to "little ole New York" as he called it, and "found a home" he never found in Texas etc. Said Texas filled with cut throats. Well, many may not be familiar with the times this happened in. O'Henry was born in 1863, middle of the war between the states! My own father was born in **Round Rock Texas** in **1873** and even then Texas was occupied with Yankie troops and run by Carpet Baggers, cut throats and worse vermin ever known to exist! Before 1900 O'Henry was a bank clerk, was framed or made the scapegoat for a crooked carpet bagger Banker, accused of the scapegoat for a crooked carpet bagger Banker, accused of embezzlement. He fled to Mexico and Central America for a few years, then came back, carpet baggers bagged him, he went to prison. There started to write short stories. When he got out, to be an 'ex-con' was considered to be a crime itself, as it still is, by some of the carpet bagger criminal element still in power. Anyway, he went to 'Bagdad by the Subway' as he also called New York, was a National and International sensation, one of the, if not THE best short story writer ever to live in history! So in #74 was not referring to the people of Texas then OR now, but to the criminal element of the Yankies in power when he lived in Texas. OK? By the way, TEXAS and CALIFORNIA today are the most advanced and enlightened people, as a whole, of entire nation. I sometimes say California is just "extreme West Texas" and a wonderful State it is and I've found a home here.

with USA and the world! Anyway, he said world much saner now, that's true! We have been able to end the Space Shuttle HOAX. Have reminded all for years the Russian People and most years the government has been the friend of USA, from days of George Washington, the Orthodox Catholic were of course anti-science as was George Washington...both Flat Earthers! Well now this years all is reversed...no more of the "hate Russia hour" daily. So we've done this also Also told all it was Correctived Puscin in done this also. Also told all, it was Germany who captured Russia in 1914-1918 World War and established athiest socialist government. 1914-1918 World War and established athiest socialist government. But then Stalin ended that and began the Bible Version "communism" the concept is from early Christians (among themselves) of course don't work with worldly people. Stalin was an Orthodox Priest, in early years. Socialism is of course athiest...like Europe today! So, in the end the Nazi captured not only USA and England but all the allies, now including USSR!! This explains the "Hate Stalin" hour now held, why? He was a friend and ALLY of USA and believed in God and Flat Earth! AND above all, he and Christian Russia beat Germany fair and square...anyway FLAT EARTH FACTS are now...blowing in the wind...SPACE HOAX is about DEAD in USA, due to this work. #### Spherical Appearance of Earth on NASA Photographs

When photographed from a great height, the surface of the Eearth can be made to appear spherical when a camera using a "distortion lens" is used. The radius of curvature of such a lens is inversely proportional to the distance from the optical axis. The scale of the image produced on the photographic plate will be correct at the centre, but decrease radially in proportion to the square of the distance therefrom, making a plane surface appear spherical. If the lens is used in conjunction with an aperture stop, the portion of the Earth photographed can be limited to a circle, covering the area, say, from the North Pole to the "equator," completing the illusion of a spherical body in space.

WPA Government actors, appearing in the US Government Production "THE SPACE PROGRAM." It's a sci-Fi Carnival Show, BILLBOARD MAG usually covers this kind of "outdoor theatre" carnivals-circus, etc. But Mr. Franklyn D. Roosevelt brought intertainment, all kinds of theatre, created WPA THEATRE. If I'm not mistaken Orson Wells began with WPA, and his famous MARS INVASION, was done under Federal Government WPA Theatre. Kind of a tryout for the WPA's greatest production, so far, a movie mini-series called "THE MOON LANDING." The "truth is" as written out by a famous Democrat is: create lots of jobs, and keep the rich rich and the rest happy... so that's why these WPA workers are so happy looking, light movie work, good pay... just good clean sci-fi, like the old time "Westerns." #### One hundred proofs that Earth Is Not A Globe

knowledge; if he uses them not, he remains ignorant. Mr. R.A. Proctor, who has been called "the greatest astronomer of the age," says: "The Earth on which we live and move seems to be flat." Now, he does not mean that it seems to be flat to the man who shuts his eyes in the face of nature, or, who is not in the full possession of his senses: no, but to the average, common sense, wide-awake, thinking man. He continues: "That is, though there are hills and valleys on its surface, yet it seems to extend on all sides in one and the same general level.' Agai, he says: "There seems nothing to prevent us from traveling as far as we please in any direction towards the circle all round us, called the horizon, where the sky seems to meet the level of the Earth.' "The level of the Earth!" Mr. Proctor knows right well what he is talking about, for the book from which we take his words, "Lessons in Elementary Astronomy," was written, he tells us, "to guard the beginner against the captious objections which have from time to time been urged against accepted astronomical theories." The things which are to be defended, then, are these "accepted astronomical theories!" It is not truth that is to be defended against the assaults of error — oh, no: simply "theories," right or wrong, because they have been "accepted!" Accepted! Why, they have been accepted because it was not thought to be worth while to look at them. Sir John Herschel says: "We shall take for granted, from the outset, the Copernican system of the world." He did not care whether it was the right system or a wrong one, or he would not have done that: he

#### Today's Science Is: A Carnie Con-Game

The world must be a globe, or it would not cast a round shadow. From "Wonders of the Sun, Moon and Stars," p. 110, by R. Russell, this statement is taken:

"When the moon gets on the side of the earth precisely opposite the sun, the interpolation of the mass of the earth causes an eclipse of the moon.'

Prof. Laing, in his "Key to Laing's Planetarium," states that an eclipse can only occur at the time of full moon. This is in harmony with Sir. Robt. Ball's statement, and, indeed, with all other astron-

I will here draw your atention to diagram 27.

When the sun is at M, to be eclipsed by the earth shadow, the moon must be "precisely opposite to the sun" or at T. If the sun is at K the moon must be at V to be "precisely opposite." The rays of light from the sun passing along the lines B and C would be absorbed by the earth E and so a shadow formed. However, we have this statement from "Recollections of Past Life," by Sir Henry Holland: "On the 20th of April, 1837, the moon rose eclipsed before the sun

And E. Breach, in his "Fifty Scientific Facts," says: "Yet the last eclipse of the moon, on February 28 (1893) \*\*\* both luminaries were above the horizon when the eclipse commenced.'

Lady E. A. M. Blount, F.R.S., London, in a lecture delivered at Todmorden, referred to an eclipse she herself had witnessed that Continued on back page

would have looked into it. But, for sooth, the theories are accepted, and, of course, the men who have accepted them are the men who will naturally defend them if they can. So, Richard A. Proctor ties his hand; and we shall see how it fails him. His book was published without any date to it at all. But there is internal evidence which will fix that matter closely enough. We read of the carrying out of the experiments of the celebrated scientist, Alfred R. Wallace to prove the "convexity" of the surface of standing water, which experiments were conducted in March, 1870, for the purpose of winning Five Hundred Pounds from John Hampden, Esq., of Swindon, England, who had wagered that sum upon the conviction that the said surface is always a level one. Mr. Proctor says: "The experiment was lately tried in a very amusing way." In or about the year 1870, then, Mr. Proctor wrote his book; and, instead of being ignorant of the details of the experiment, he knew all about them. And whether the "amusing" part of the business was the fact that Mr. Wallace wrongfully claimed the five hundred pounds and got it, or that Mr. Hampden was the victim of the false claim, it is hard to say. The "way" in which the experiment was carried out it, to all intents and purposes, just the way in which Mr. Proctor states that it "can be tried." He says. however, that the distance involved in the experiment "should be three or four miles." Now, Mr. Wallace took up six miles in his experiment, and was unable to prove that there is any "curvature," though he claimed the money and got it. - To be continued.

#### **Anti-Apartheid Act** lifted in South Africa

Relations improve between United States and South Africa

Dear Reader,

As you probably know, on July 10 the economic sanctions that had been imposed on South Africa by the United States Congress under the Comprehensive Anti-Apartheid Act of 1986 were terminated.

I believe that this action by the United States signals more than the resumption of fully normal relations between the U.S. and South Africa. it is also a tremendous vote of confidence in the ongoing reforms that President F.W, de Klerk has undertaken in South Africa.

In light of the lifting of sanctions, I thought you would be interested in the enclosed South Africa Update "A time for support or for washing of hands?" It outlines the key steps taken by President de Klerk over the last year and a half, and also reviews the impact that economic sanctions have had on the South African economy.

I am hopeful and confident that the lifting of sanctions will result in improved relations between the United States and South Africa in the months and years ahead.

Sincerely, Ambassador **Embassy of South Africa** Washington, D.C.

ED. NOTE: Sure Great News! These native sons of AFRICA, the whites, have really been through a siege, demonstrated a wonderful tolerance and understanding, what wonderful "self control" these Native Africans (whites) have. We should always remember the Whites are NATIVE AFRICANS, just as anyone who is born there is! The long war conducted against the White people of South Africa, has been hard on all the Native Sons, both White and Black, and in between. Lets all WELCOME and be FRIENDS with SOUTH AFRICA. Bible mentions Queen of Sheba came from South Africa, "the end of the earth." May God be with you. C.K.J.

#### We get LETTERS...

To whom it may concern:

I heard about your society through a friend and am pleased to know of a group that may be able to clear up some contradictions that I have often wondered

Do you still have a Flat Earth map? And somebody told me you have a newsletter. How can I get it? And is there any information you can give me so I can get a handle on your philosophy?

Thank you, San Francisco

Mr. Charles K. Johnson

On July 9 I called you and we spoke for quite a while about the Flat Earth Society. Perhaps you remember I was preparing a persuasive speech on your Society's main points.

I would like to thank you for your time that day. Your help was significant. Due to the amount of questions after my speech, I can only assume that I was able to cause some doubt in the mind of my audience. I feel I was successful.

Also, I mentioned joining your society. I have enclosed a check for one year's membership. I look forward to hearing from you soon.

Sincerely, Nevada

Dear Men and Women of the Flat earth Research Society,

I am interested in your conclusions concerning the Earth as a flat entity. I would like to request any information you have regarding the history, membership information, goals, current projects, etc.

I look forward to whatever information you can provide.

Sincerely, Michigan

Dear Sir,

I would like to join your society. Please send me information to my home at the above address.

Sincerely, Proff. University\_ State

To whom it may concern,

I am interested in finding out more information about FERSE (activities, membership, etc.) Although I am not sure how I feel about the earth being flat. I do believe that the space program is a hoax, and I would like to hear other views about this. Please send information.

Dear Mr. Johnson,

I am a high school student who would like to learn more about your society. I would greatly appreciate any information you could send me. Thank you very much.

Sincerely, Iowa

Charles and Marjory Johnson

Dear Sirs,

I have been informed of your organization, and I would like you, if possible, to supply me with more information. I believe that your beliefs possibly coincide with my own, as I have become disenchanted with the opinions of our world.

Sincerely, Florida

Dear Flat Earth Research Society,

I am very interested in receiving your newsletter. Could you please send me a sample copy? I feel I will subscribe.

Thank you, Ohio

Dear Sir or Madam,

I have been looking for you for a very long long time. I enclose an SAE and \$2. I hope it might cover the expense of sending me a sample of FLAT EARTH NEWS?

I look forward to hearing from you.

Dear Sirs,

I recently encountered some of your information, and am very interested in studying the material you have collected on the flat earth. Could you send what information you can on flat earth research? I would greatly appreciate any small informational leaflets, information on membership in the Society, and information on Society publications (do you publish a journal?). Thank you very much.

Dear President of the

International Flat Earth Society, I am writing to you as the Editor-in-Chief of the Illinois Mathematics and Science Academy yearbook, GALLIMAU-FRY. The IMSA is a pioneering three year public residential high school for talented math and science students in the state of Illinois. Students at the Academy will be among the future leaders in mathematics, science, the arts, politics, just as you are a leader in the world to-day.

The theme for our 1992 yearbook is "THIS IS YOUR LIFE." I keeping with this theme, the editorial staff would like to feature the lives of well-known individuals whom students respect, people who, through their distinguished lives would make our book a rich picture in the high school years of our generation. You are one of the individuals chosen by our student body as a role model, a symbol of the kind of success that we hope to attain.

Therefore I would like to request, on behalf of the student body, your support of "THIS IS YOUR LIFE" and IMSA in the form of an autograph, autographed picture/item, and/or words of advice for the students. Most items will be featured in the 1992 THIS IS YOUR LIFE" yearbook, and later auctioned off as a much needed student-activity fundraiser.

On behalf of the IMSA student body and the staff of GALL-IMAUFŘY, I would like to thank you for your support.

Sincerely, Name withheld Editor-in-Chief Mathematics and Science Academy

To whom it may concern,

Could you please send me your free tabloid and any other literature that you freely disseminate that can tell me what your organization has to offer. Thank you.

Respectfully, Annapolis, Maryland

Dear Sirs,

Please send me everything you possibly can. I am extremely excited about your group. Please include everything you possibly send me, as well as literature to distribute (so I can gain more converts in my area). Thank you. I am hopefully awaiting your reply.

Dear Flat Earth Society,

Hello: Please send me any information that you have available on your organization. Thank

Name withheld, director Boys Ranch Wisconsin

Dear Sirs,

I have recently been informed of your organization. I met someone on the bus who was telling about how the world was flat, and he started to make a lot of sense. He gave me this address and told me to write. I'm very intrigued by this idea and would appreciate more information. I'm enclosing a self-addressed stamped envelope. I'm also interested in inofrmation about your newsletter, and I heard you sell a Flat Earth map. I've always been told that the earth was round, and never gave it much thought until now. Some of the things I heard were amazing! I've tried to explain it to other people but I forgot a lot of what this guy said.

Sincerely,

Dear Sir or Madam,

A friend of mine told me your group has proved the world is flat. That surprised me because I had always learned Columbus proved it was round. But what troubled me more was he said the Bible says the world is flat. He told me a Christian cannot believe the world is round and be a good Christian. I was born again in 1975, and have been with the Lord ever since, so how can this be true? He also said it was a lie that scientists proved the earth is round. Can you help me out? What is going on? How did you prove the earth is flat?

Thank you, Athens, Ohio

Ed. Jesus said, "seek the truth, and you will know the truth, and it will set you free." Aim of FLAT EARTH NEWS is to help "set you free"...from what? who? From Satan, "the deceiver from the foundation of the world and his angels." Bible tells us (and common sense, observation) "people in general" are, at the least, the agents of The Deceiver. In Genesis, God says, "that mans heart was filled with evil imagination from childhood" his heart wicked and DECEITFUL... ABOVE ALL THINGS." he said his, mans heart and works are so wicked and DECEITFUL...no said.

The meaning of "being saved"

and/or being converted is; According to the scriptures, God, the Creator, the one who wrote the Ten Commandments (never fulfilled by Israel or anyone else). After Israel failed, to get understanding and desire to do right, God gave "another chance" to Israel and Mankind...through the Gospel of Good News of JESUS! He Jesus, demonstrated a "man" could, if he WANTED TO, ask and he would receive help and Power to OVERCOME HIM-**SELF**, stop being The Devil, wicked and deceitful, but rather, a "son of God" as the man species of his creation, the rest of the animals, was intended to be, first Adam failed, JESUS second Adam...he made the grade...the first born... of the many brethen to come, who will try, as I do, to be the GOOD GUY, the son of GOD, and not a wicked DE-CEITFUL DEVIL. anyway...join the FLAT EARTH SOCIETY! As per the scriptures main line religious missed the boat...natural bent to be the Devil won out... so they are as per the scriptures, (Paul) now given over reprobate, to not only tell lies, but BE-LIEVE LIES!

A. How did we prove earth flat? Simple just went out and checked it, most simple, proof is total, THINK! How else could

anyone prove it?

B. Entire Bible is based on this Fact, earth flat, sun moves not earth, Earth the only known world in existence (Heaven, a place, is God's Home) scripture says known world is round, a CIRCLE, ultimate shape of world is INFINITE, Moses says in Genesis, first few verses, WORLD HAS NO SHAPE...just water...this world a world with-out end...infinite. Entire Bible tells you one way is UP, one way is DOWN, right? Heaven is UP, right? Jesus assended UP, will come DOWN again, right? Science says no up, no down exists, only infinite space, nothing, billions of bigger, better worlds, then nothing. If science astronomy is true...Bible is pure rubbish. If Bible inspired science is RUBBISH! I just told you, we checked it out, as we are advised in the Bible about things, "check it out" found by observation, demonstrable evidence SCI-ENCE IS RUBBISH! Reason you were converted etc and still talking Greek Balls is you don't understand either what the carnie-scientists are claiming with astronomy, and don't so far understand how Bible describes the world. Once you understand both, must reject JESUS and MOSES and accept this pile of theories-lies of atheist men, or use your God given mind and think, and see it is the evil stupid imaginations of unregenerate men that you should reject, spinning globe world, pure hokum!

PS...how about it, all this writone can find the depth of this ing forgot to say "round" in case deceitfulness" . . . hopeless, he of world means round, NOT a "ball-planet-globe," inhabited known world lays in a CIRCLE.

day, April 22, 1902, when both luminaries were visible above the horizon.

Let the line A, Figure 27, represent the horizon. You see it is tangential to the earth's surface, and at right angles to F, the vertical. The moon was eclipsed at V when the sun was at M, both being above the horizon at the time. Therefore, it was not the earth's shadow which eclipsed the moon. Astronomers admit there are many dark bodies in the heavens, and we believe it is one of them intervening between us and the moon which causes the eclipse.

#### Why do people believe in Swammie-Grease Ball World?

#### **Antelope Valley Press** Senior Feature Writer

LANCASTER - Thanks to hypnotist Terry Stokes, there was no shortage of entertainment at the Antelope Valley Fair Friday night. People paid big bucks to see Kenny Rogers in concert, but the real happening was on the Park Center Stage where M.C. Hammer, Dolly Parton and country singer Garth Brooks drew enthusiatic applause.

Well, actually, M.C. Hammer wasn't really M.C. Hammer, Dolly Parton wasn't really Dolly Parton and Garth Brooks wasn't really Garth Brooks.

However, for five minutes during Stokes' shows, three volunteers from the audience thought they were the famous entertainers.

"The real stars of my show are the volunteers on stage," said Stokes, whose shows are nightly at 6, 8 and 10 p.m. until the fair ends. "Just about everybody I talk to is afraid to get hypnotized because they feel they'll make an ass of themselves – and that's pretty much what's going to happen."

Stokes said the hardest idea to get across to people is hypnosis is not like you see in the movies.

"Bela Lugosi doesn't walk in after 10 minutes and start moving his watch back and forth, but that's what most people believe is hypnosis."

In his show, Stokes selects members of the audience to come on stage and directs them through a relaxation process until they "are under."

"Usually I take about three minutes to put the people under, but I could do it in 30 seconds," Stokes said. "The tendency of an audience is not to believe you anyway. So if you do it too fast, nobody would believe you. So I make it last a little longer."

Once the volunteers are in a hypnotic state, Stokes is at his

best, making suggestions to the volunteers and they willingly complying.

During Stokes' first show Friday, Randy Wolfe of Quartz Hill, who never heard of country singer Garth Brooks, nonetheless lip-synched to one of his songs and, as suggested by Stokes, went out into the audience to sing to the ladies.

Only to Wolf, all the ladies in the audience were men and all the men were ladies.

Wolf "sang" to one man in the audience and finished by dancing a Texas two-step," said Wolf. other.

After the show, when informed he had been dancing a two-step with another man, Wolf weakly smiled then shook his head.

"I didn't think I knew how to do a two-step," said Wolf.

- end of quote. As I told you before, I was born a genuis so by age 10 or 12 had gotten interested in hypnosis, sent off for cheap booklets etc. This led me into full research on the subject in the Library. I run the whole thing down, back to the German Anton Messemer, in France etc etc, boy, would you be shocked and surprised if you knew what I know on this subject, what had been done can be done and IS being done with what is called "hypnosis." First 1 learned that the name itself is a hoax! Oh yeah, was given that name by the French Academy of Science for the same purpose that "science" does everything, to conceal and hold back knowledge. All the French Academy did on this subject was a "cover up." To this day just about everything you think you know on the subject is false! I saw clearly then, I remember so clear my talking and thinking... this subject is the only frontier that is wide open, The Mind! Had already checked out the Austrian Hill Billy Comic Einstien, and that too added to the obvious Truth the The Mind was an inscrutable mystery, else how could so-called "humans" take

#### Globe is a Faith - Not a Fact

42. It is certain that the theory of Earth's rotundity and that of its mobility must stand or fall together. A proof, then, of its immobility is virtually a proof of its non-rotundity. Now, that the Earth does not move, either on an axis, or in an orbit round the Sun or anything else, is easily proven. If the Earth went through space at the rate of eleven hundred miles in a minute of time, as astronomers teach us, in a particular direction, there would unquestionably be a difference in the result of firing off a projectile in that direction and in a direction the opposite of that one. But as, in fact, there is not the slightest difference in any such case, it is clear that any alleged motion of the Earth is disproved, and that, therefore, we have a proof that the Earth is not a globe.

43. The circumstances which attend bodies which are caused merely to fall from a great height prove nothing as to the motion or stability of the Earth, since the object, it it be on a thing that is in motion, will participate in the motion; but if an object be thrown upwards from a body at rest, and, again, from a body in motion, the circumstances attending its descent will be very different. In the former case, it will fall, if thrown vertically upwards, at the place from whence it was projected; in the latter case, it will fall behind – the moving body from which it was thrown will leave it in the rear. Now, fix a gun, muzzle upwards, accurately, in the ground; fire off a projectile; and it will fall by the gun. If the Earth travelled elevenhundred miles a minute, the projectile would fall behind the gun, in the opposite direction to that of the supposed motion. Since, then,

#### The Moon

(continued from #79)

Refraction will again be objected here. To meet that objection I call your attention to Figure 28.

Take you a common pie tin, stand a nail on its head for a gnomon or style, place a candle at a distance so that the shadow of the nail just reaches to the opposite side of the basin. Remember, there is no refraction of light unless the light passes from one density into a different density. This proposition was thoroughly discussed under Figure 11. There it was shown the the image of an object is elevated and projected forwards in case of refraction. Now, pour some water into your pie-pan and you will observe that the shadow of your nail will be shortened and lowered. Instead of the light still passing along the line A to B it breaks at the top of the nail and passes down S to the bottom of the dish, shortening and depressing the shadow. Try it out.

Now, when the Sun is at M above the horizon, Figure 27, his rays do not pass along the line C to the earth and then turn up along the line B and allow the moon to be thus obscured. But his rays would pass direct to the moon at V, and in case of refraction, if the earth cast any shadow at all it would be shortened and depressed below the horizon down towards T. Therefore, the moon being eclipsed when both it and the sun are visible above the horizon proves that it is not the shadow of an intervening earth which obscures the moon. So this supposed proof that the earth is a globe fails just as signally as have all other proffered proofs. It is said that more than 50 such eclipses

Now we wish to ask how long an eclipse of the moon could last if the earth pases between it and the sun to cause it? For answer, I quote you a statement from "Fifty Scientific Facts," by E. Breach: "It is supposed that an eclipse of the moon is caused by the earth intervening between the sun and the moon. The earth is reckoned to travel 1,100 miles per minute; how long would it be passing the moon, traveling herself at 180 miles per minute? Not four minutes. Yet the last eclipse of the moon, on February 28 (1893?), lasted four and onehalf hours; so it could not be the earth intervening, as both luminaries were above the horizon when the eclipse commenced, and the spots of the moon could be seen distinctly through the shadow; the moon was also seen among the stars."

The disameter of the moon is said to be 2,160 miles. The earth is said to move in its orbit round the sun at the rate of 1,100 miles per minute. Now if the moon stood still, the earth would move the 8,000 miles of its diameter across the moon in less than four minutes. But the moon's motion is in the opposite direction from the earth, we are told, therefore, her speed being 180 miles per minute the time is less still. But the four and one-half hours the eclipse has been known to last and the general appearance of an eclipse, is strong evidence that it is not the moon and earth passing each other, but some dark body, moving from east to west in the same general direction that the moon does, but a little faster, overtaking and passing the moon, and thus causing the different aspects of an eclipse.

Astronomers admit that there are many dark bodies in the sky. "Dark stars in countless numbers course hither and thither throughout the universe at speeds as stupendous as the lucent ones themselves." - Prof. Lowell, Director Astronomical Observatory, Flagstaff, Arizona.

It is a fact that eclipses are foretold. The date is fixed and announced beforehand so we may be prepared for observation.

Such statements as the following will continue to befog the unlearned:

'Astronomers, by mere calculation, are able to forecast the position of any luminary at any time for many years to come. By the same means, they can foretell to a second, the commencement, duration, precise aspect, and the ending of all the eclipses that will occur for a lifetime hence, and more, without limitation. Such being the case, the theories upon which the calculations are based must be true, or the correctness of such calculations would be impossible." -(An official Science claim.)

#### Globe is a Faith Continued

this is NOT the case, in fact, the Earth's fancied motion is negatived,

and we have a proof that the Earth is not a globe.

44. It is in evidence that, if a projectile be fired from a rapidly moving body in an opposite direction to that in which the body is going, it will fall short of the distance at which it would reach the ground if fired in the direction of motion. Now, since the Earth is said to move at the rate of nineteen miles in a second of time, "from west to east," it would make all the difference imaginable if the gun were fired in an opposite direction. But, as, in practice, there is not the slightest difference, whichever way the thing may be done, we have a forcible overthrow of all fancies relative to the motion of the Earth, and a striking proof that the Earth is not a globe.

But the movement of the sun, moon and stars has nothing to do with the shape of the earth." And against that statement of Giberne's I put one found in "Pagan Astronomy," by A. McInnis:

"More than 2,000 years ago the Chaldeons presented to Alexander the Great at Babylon, tables of eclipses for 1,993 years; and the ancient Greeks made use of the cycle of 18 years, 11 days, the interval between two consecutive eclipses of the same dimensions. The last total eclipse of the sun occurred on January 22, 1879, and the preceeding one on June 11, 1861. Now going back, for example, from January 11, 1861 through a period of thirty-six eclipses, or 651 years, we find that a total eclipse occurred on January 11, 1210; and continuing backwards, by such cycles, we arrive precisely at the date of creation as given by Moses in Genesis."

I must here record, too, an admission made by Sir Robert Ball in

his "Story of the Heavens," p.56:

"If we observe all the eclipses in a period of eighteen years, or nineteen years, then we can predict, with at least an approximation to the truth all the future eclipses for many years. It is only necessary to recollect that in 6,585 ½ days after one eclipse a nearly similar eclipse follows. For instance, a beautiful eclipse of the moon occurred on the 5th of December, 1881. If we count back 6,585 days from that date, or, that is, 18 years and 11 days, we come to November 24, 1863, and a similar eclipse of the moon took place then.

It was this rule which enabled the ancient astronomers to predict the occurances of eclipses, at a time when the motions of the moon were not understood nearly so well as we now know them.

So we can, "by mere calculation," "predict" the occurence of the birthdays of all the members of our families, provided we have a good record in our old family Bibles. We can predict the occurence of an anniversary of any event of national or international importance if we have a good historical record of that event. "This rule" enabled the ancient astronomers to predict eclipses at a time when all people believed the earth a stationary plane, the sun, moon and stars small bodies near the earth and moving above it. That is the rule that is followed today. So that eclipses are not foretold by computing the movements of the sun, moon and stars, but by reference to a carefully kept record of eclipses! (See? Science lies. ed.)

Here is a fabulous, authentic reproduction of the famous 500-yearold Aztec Calendar Stone, which is now located in Mexico's Museum of Anthropology. A unique conversation piece that will add a touch of exotic excitement to any room, this expertly cast replica is a scaled down reproduction of the original stone, which measured twelve feet in diameter and weighed 57,000 pounds.

And "the scriptures" describe the world as a Circle, a flat circle. Other scriptures say "God, and/ or the power of God is at the center of the circle...of the earth." Note, this so-called Aztec "calendar" is a map of the world, our known world, a circle, center depicts God! The zodiac is the Real World! Where the Sun is, what sign, when you are born is your sign. 12 months, 12 signs, 12 tribes and/or kinds of people. Little wonder that Women, who are much more perceptive than men, pay more attention to the Real Flat World of the zodiac than the idiot India-Greek ball nonsense! #### **Promotion of** dove hunts draws fire from activists

COLUMBIA, S.C. (AP) - "Shoot for the Future - Don't Use Drugs," a slogan the state wildlife department is using to encourage youths to shoot doves instead of using drugs, was denounced by animal rights organizations.

"We are outraged of the absurdity of giving people two choices - shooting doves or shooting drugs," said Heidi Prescott, a national director of the Fund for Animals. The group, based in Silver Spring, Md., claims 250,000 members.

The dove shoot began a year ago to give parents and children a chance to enjoy the outdoors, said Brock Conrad, director of the state Division of Wildlife and Freshwater Fisheries.

This year's slogan was pat-terned after the "Hooked on Fishing, Not on Drugs" program in South Carolina and other states, he said.

In Real Life and in The Bible the Dove is a sweet kindly creature. Was released from the Ark, found land, came back to Noah. The Spirit of God is depicted as a Dove descending on Jesus, the Doves come here each day to THE OLD CHATEAU ABBEY, especially one pair.

The desire and the act of murdering Doves could be called "satanic," I believe. My mother and people from the old days always called them "mourning doves" as they make a sound as of mourning...little wonder! L. B. Johnson, former President, the man who damaged the United States, some called him The King of the Hill, some called him The Queen of the Hill...anyway he was cruel, each year took off for home to hunt and murder Doves! What could be more hideous than a grown man with a great long gun going out to blow doves to pieces...why, the "call of Satan?" To the evil ones, Jesus said, "You are of your father Satan the Devil, a murderer from the foundation of the world."

### Man Lives On The Flat Earth Apes Lives on a Planet (Delusion)

### What is science?

It is a religious cult, fanatic in the extreme. Founded in 1843. Oh yeah, don't let 'em kid you, "science" is a LATE cult. Full original name was "scientism" the "practitioners," yeah, same title as christian science, they were and ARE called scientists. National Association for the Advancement of Science, yeah like the NAAS, and just as, even more subversive. Claim world is a tiny ball whirling, all matter is just more balls, all spinning (atoms) no Creator, everything created itself, and most insane feeble minded dogma of all, "all knowledge can be learned by these practitioners." Was a very small cult for many years. Ninety-nine percent of the growth of this idiot fanatic cult has come since early 1900s and from 1945, most was hatched in horse and buggy days! Oh, yeah the entire batch of theories called facts is old time card. A certain hill-billy burlesque comic from Austria, some of his jokes, are the very basis of the cult, 156 QUADRILLION balls on the head of every pin on earth, AND all of 'em spinning, AND vast SPACE between 'em! Yeah, that hee-haw hill-billy comic was a card. Went on to say, crack one of the adams, excuse me atoms of the 156 Quadrillion on ONE pin head and whole world will blow up... Hee haw. Also said okay to hang by feet head down in China, for was only relative... hee haw! So could say "science is" a Hillbilly HEE HAW, not Grand Old Oprey, but GRAND OLE BUR-LESQUE of so called intelligent people who are in fact degenerate monkeys! (Took up flesh and blood eating.) Science is a

#### What's the matter?

No one knows or has the faintest IDEA of what "matter is" nor what "spirit is." A person is INSULTING your intelligence to pretend he has any idea at all. Science, the DELUSION OF

FLAT EARTH SOCIETY president Charles Johnson and his wife Majory display a map of the earth as they see it.

LUNATICS (those who believe it) not reasonable, not worth even talking about, not even "theories", but JOKES! In the past years, up to 1945, was generally understood by most all, science was a joke, untold number of common jokes indicates this!

Balls, Balls, everywhere Balls, Cried the Queen, The King laughed, He had to.

#### Stop the World and let me off.

You have to STOP the world, stop believing nonsense, and get off the monkeys back, stand ye upright and be a MAN, be separate from the "herd" or "pack" don't be one of the "stock" on this One World Animal Farm, be a KEEPER. Must be sane and understand objective reality, be a Flat Earther, ONLY MONKEYS live on a "planet."

## Earth Is Flat Is A Fact And That Is That

How do we know earth is flat? HOW ELSE? We went out and checked it. Its that simple! I did it WHEN I WAS 10 YEARS OLD! You can do it, anybody can do it! Earth FLAT is one of the few things you can KNOW and prove it yourself. In past issues have run vast proofs, not only my proof, but so many other FLAT EARTHERS over the years have taken pen in hand and recorded their EXPERIMENTAL PROOF, oh yeah, Flat is EXPERIMENT-AL AND DEMONSTRABLE! Ha, ha, HEE HAW and you thought that's what "scientific proof was!" Oh no, the Hillbillys the HEE HAW comics don't use this kind of proof at all, more to smoking an opium pipe and burlesque comedy writers concoct the "theories" or "jokes" they use on the Monkeys. (The so called intelligent, educated or programmed people.) Is also called the BIG LIE, monkeys minds are such, they think they are clever, don't believe "little lies," BUT will believe a LIE IF

IT IS BIG ENOUGH. The "point" of FES is to give everyone a chance, to prove and demonstrate "what you are," a Monkey or a MAN! Marjory and I are TWO WITNESSES on earth, giving everyone a CHANCE to come out from among the Monkeys, be ye MEN, have some sense! GOD EXISTS, RIGHT AND WRONG EXIST, UP AND DOWN EXIST, EARTH IS FLAT. Not our job to try to "talk you into this" just give you the CHANCE! It's up to you, but know this, if you believe and have faith, this is a "Planet" it is THE PLANET OF THE APES! I must say, myself, only an Ape COULD believe such NON-SENSE! Do you believe in evolution? Then you have already answered, you SAY YOU ARE AN APE! And you must know! Then, so be it. You are and will be managed as a sub-beast all your life, MAN, REAL PEOPLE will have dominion. Ask GOD for wisdom.

#### Globe Is A Faith - Not A Fact

Every man in his senses goes the most reasonable way to work to do a thing. Now, astronomers (one after another - following a leader), while they are telling us that the Earth is a globe, are cutting off the upper half of this supposititious globe in their books, and, in this way, forming the level surface on which they describe man as living and moving! Now, if the Earth were really a globe, this would be just themost unreasonable and suicidal mode of endeavoring to show it. So that, unless theoretical astronomers are all out of

their senses together, it is, clearly, a proof that the **Earth is** not a globe.

The common sense of man tells him — if nothing else told him — that there is an "up" and a "down" in nature, even as regard the heavens and the earth; but the theory of modern astronomers necessitates the conclusion that there is not; therefore, the theory of the astronomers is opposed to common sense — yes, and to inspiration — and this is a common sense proof that the Earth is not a globe.

#### Some Accomplishment Since 1972

1. In our original charter we state we believe "God has made an everlasting covenant with every living creature of all flesh and blood on this flat earth." (Gen. 9:16). At that time very very little was being done to aid most of God's Covenant People, the four-footed, the furry and feathered population of this Flat Earth. From the very first mimeographed copy of THE FLAT EARTH NEWS we declared the Rights of All God's People. From that very second, began an awareness and the beginning of what is today a VAST and effective vocal "animal rights movement" this movement was and is the biggest and hottest movement in USA and world! HUNDREDS of animal right movements, millions of two-footed people now work to end the most monstrous sub-animal cruel blindly insane system ever to exist in all RECORDED HISTORY! The torture and murder of hundreds and hundreds of millions of helpless HARMLESS creatures. by science! The depraved indescribable horrow animals put through for slaughter for "food" it is now exposed for all to decide 'what you think about it.' Strange as it may seem to many. THE FLAT EARTH NEWS and the Two Witnesses who run it, began it all. This the most important work that exists, to start to end "the groaning and sorrow of the entire creation," as Jesus

2. FLAT EARTH NEWS has changed the teaching of the entire system WORLDWIDE. Re: flat earth belief and COLUMBUS! Till now all schools in our system has taught in 1492 "everybody thought the world flat" that it was a "dark age superstition!" Columbus, a glorious scientist of the glorious new atheist age, The Renaissance, set out to prove the earth was just a little bitty round ball! Every man, woman, and child in USA was PROGRAMMED in a compulsory so called education system, forced brain washing, brain tangling, a big lie system of producing people unable to think logically! When the FACTS are, in Columbus time, the Big Lie People had had the planet-ball superstition going for untold generations. COLUMBUS PROVED, DEMONSTRATED THAT THE WORLD WAS FLAT! In Grease ballism, people told, you can't just sail out into the ocean, as world a ball, it being a ball, OF COURSE you have to SAIL OVER THE EDGE, and if go far enough may not be able to get back. So? Nobody did any major exploring. Greek ballism science, then as now CREATED to hold back KNOWLEDGE. Columbus disproved it all, neither he nor his crew found any "edge" as a Globe-ball-planet must have, but rather the world to be FLAT and the known part round, so you can sail east and get west, you can sail around the world! To even use a compass, it must be set level, the hand points to the north, to the magnet there. So using the compass, you can sail around the world, the north magnet! I have said this on at least 300 Radio talk shows

nationwide I've been invited on (I do 'em all sitting right here, by telephone) in hundreds of interviews and in THE FLAT EARTH NEWS for 20 years. This year, 1991, did you notice the Party Mags TIME, NEWS-WEEK and all the rest ran vast articles on Columbus and 1492, only THIS time they all KNOCK HIM! Ha, ha, and no mention of the Big Lie all have told all these years, that he had proved world a Greek Ball and refuted "them ole flat earthers!" All Party Mags and evrybody else now has to acceptthe fact that we have revealed the fact that this claim was a LIE! So now they just drop the claim, and CUSS COLUM-BUS, for all can see, no escape for anybody on earth, when told by us this Truth, must see it, so they know COLUMBUS WAS A FLAT EARTHER and made one of the very best PROOFS EVER MADE, THIS IS IRRE-FUTABLE! So don't let anybody tell you one or two people with the Truth, GODS TRUTH can't change anything! TWO WITNESSES AND THE FLAT EARTH NEWS have changed the World System!

3. BREAKUP OF THE ENTIRE WORLD SYSTEM, USSR, etc., yep us again. It was due, but the timing for it, Two Witnesses brought it about... Haven't got space, etc. to go into

#### **PERSONAL**

In this day, when evil is called good, and good is called evil, the days of woe and destruction and rebuilding for USA-USSR, Europe and all the world **THE** FLAT EARTH NEWS will continue, till death do us part. We have never missed an issue and never intend to. Let me say in 1992 will be much shocking things said, revolution and shaking and quaking is moving fast, so stay with us.

Many new members this year as each year, old members know, we like to have dues sent in January 1 each year, most of you will have received four issues even if joined late in year. Anyway, that's the way we do it, so remember DUES ARE DUE and any extra, appreciated! In this 20 years, we have gradually got \$5,000 in debt. Anybody rich? All of this or any part anyone can lift off us, would be a great help.

#### World's **Troubled Times**

Why? I think it is because we have all been misled by wrong doctrine. Instead of going by our own heart, which may have told us there was a right and wrong. I am sure there are lots who have felt that way, others misled by thinking they should only think of themselves and not what is right and wrong. In the first place, GOD did not give 'sacrifices." GOD made a Covenant with all his creation, on this Flat Earth. He did tell us does common sense HEAVEN is above, EARTH is below, one way is up, one way is down. Gave us Ten Laws as a guidelines in life. If we have a right heart we will hear the Holy Spirit leading us in the Right Way, into Truth. Would be good to read: Isaiah 1, "your new moons and sabbaths and sacrifices (feasts) are an abomination." Matt. 12:7, "if only you could understand what God meant when he said, I want Mercy, NOT murder (sacrifices), Jesus said this!

Marjory Waugh Johnson

There are many wrong things happening on earth, like people lie, cheat, and most of the world go on forgetting them, as they have for years forgot our poor little brother creatures in the forests and wilds and deserts. And still driving them from their homes and any means of food and water. Never a thought for them, only how they them-selves feel. Well, we try to help them all with what we have at least share with them, that means all the little birds, mice, rats, squirrels, along with dogs, cats, and chickens. Jesus said, "do unto others as you would have them do unto you." On THIS hangs all the Law and Prophets. Don't forget one must hear God and keep this commandments. Many people feel and act as if they are God himself, this is the exact way satan thinks!

As the real doctrine says, "the beginning of wisdom is fear of God" and the end of wisdom is "and keep His commandments."

heart's thanks"

Your words came just when needed.

Blowing and bringing from the wide salt sea, Some cooling spray, to meadow scorched with heat And choked with dust and clouds of sifted sand That hateful whirlwinds, envious of its bloom, Had tossed upon it. But the cool sea breeze Came laden with the ordors of the sea. And damp with spray, that laid the dust and sand And brought new life and strength to blade and bloom, So words of thine came over miles to me, Fresh from the might sea, a true friend's heart, And brought me hope, and strength, and swept away The dusty webs that human spiders spun Across my path. Friends - and the word means much -So few there are who reach like thee, a hand Up over all the barking curs of spite And give the clasp, when most its need is felt, Friend, newly found, accept my full heart's thanks.

#### On the birthday of JESUS, the saviour of the world,

we send love and greetings to all the friends of this work. If we did not have the Fear of God and the Love of His Wisdom, personafied by JESUS, there would be no Flat Earth Society. For we would not care what happened to anyone, we'd be busy seeking money instead.

## COLUMBUS PROVED EARTH FLAT

#### The Earth NOT a Whirling Globe

SHAPE - Children at school, before they are able to judge for themselves, are taught to believe that "the earth is round like an orange." This idea was drummed into our ears so long that we came to believe it in spite of its palpable absurdity. It will not bear critical examination. For instance:

A school geography says, "We know that the earth is round because ships have sailed around it." What wretched logic! Ships can sail round the Isle of Man: Is that a globe? Not more so than the earth. Ships go round the world as they sail round an island, or as we walk round a square, or a town, going round along a flat surface. A thing may be "round" and flat too, like a penny.

Pictures of ships, in false and distorted perspective, are given in school books, professing to show why the hull disappears before the masts. The line of sight which should be a tangent to the sphere at the place of the observer, is raised miles high, descending to a very

Yet the book from which I get my data for calculating the sun's height is by "Paralax, "the nom de plume of the late Dr. Rowbotham, with whom I corresponded before his death; and I am not aware that zetetics, according to J. Layton, believe that the sun's distance is approximately 4,000 miles, far less 6,000. We must calculate by plain trigonometry, seeing that the surface of water is level, whilst the Bedford Level, the Salisbury Plain, etc., are what their names imply, and not arcs of a globe. distant horizon at a considerable angle. But no man in this world, whatever his altitude, ever looked down to his horizon. It is always on a level with the eye. It, therefore, a fraud to picture it otherwise. Besides, when the hull of a ship has disappeared to the naked eye it can often be rendered visible again by a good telescope, thus proving that it had not gone down beyond or over the horizon, nor behind a hill of water. Vapour or spray might obscure it.

MOTION - Astronomers teach that we are rushing through "space" at the awful rate of about 63,000 miles an hour, or more than 1,000 miles a minute 'Can you believe it' It would be fearful. The astronomers would be whirled off mto "space," with clouds, rivers, and seas all flying after them. The idea is absurd. No proof of such motion has ever been given. It is a mere supposition, incapable of proof.

It is absurd to suppose there are people at the so-called Antipodes" hanging heads downward ... relation to us. What keeps them from falling off? Flies that walk the ceiling have suckers to their feet Gravitation! A myth invented to support the whirling globe superstition. What is "gravitation" - a solid, a liquid, or mere gas? Heavy bodies fall to the earth by their own weight; light substances float in the air in spite of the combined pull of all the particles in the world. Luminous bodies have no attraction, except for silly moths. Magnetic currents affect bodies according to their varying forces, but there is no such thing as universtal attraction, or a general pulling and tugging of bodies to get together in the whole universe. Gravitation has never been proved. It is an absurd speculation of men spoiled with the pride of "science," but, as Paul says, a "science falsely so called." - 1 Tim. vi. 20. Give it up for the

Now, isn't this

## Is the Newtonian Astronomy True?

Glasgow, 15th May Sir, Your correspondent seems to think this a question entirely of flatness or convexity: whereas there are four sects of globists all at loggerheards: (1) The Ptolemaists, representd by J. Gillespie, of Dumfries, who suppose the "earth" globe a centre for the revolution of the sun, moon, and stars; (2) The Koreshans of America, who suppose the "earth" a hollow globe for us to live inside: (3) The Newtonian Copernicans, who suppose the sun a centre, keeping the planets whirling in orbits by gravity; and (4) the Copernicans, who suppose the planets to whirl round the sun, without the necessity of gravity, Sir R. Phillips heading up this school. However, here are a few nuts especially for Copernican teeth: Why are railways and canals constructed without any allowance for terrestrial convexity; and why do artists in marine views represent by a straight line the horixon, whether running east and west, or north and south? How can all the vast continents with convexity only imaginary, along with the oceans, stick together to make a ball something Like a little schoolroom globe, able to what on an axis only imaginary is, no axis at all; and though

#### The Greeks were coming

To Editor of "Halifax Courier."

Sir, "The distance," says Dr. Rowbotham (Zetetic Astronomy, p. 102), "from London bridge to the sea coast at Brighton in a straight line is 50 statute miles. On a given day at 12 O'Clock, the altitude of the sun at London Bridge was found to be 61 degrees of an arc; and at the same moment of time the altitude from the sea coast at Brighton was observed to be 6.25 degrees of an arc." With these data he calculates by the method called "construction." However, I shall here follow J. Layton's method, taking his diagram; the base AB being 50 miles, the angle at A 61 degrees, and the angle DBC 64 degrees. Then multiplying the sine of 61 degrees, or 87,462 by 50, and dividing the sine of 3 degrees, angle ADB or .052,336, we have about 835 as BD. Next multiply the sine of 64 degrees, or .898,794 by 835, and divide by the sine of 90 degrees or 1, and the result is approximately 750 miles.

Will your Halifax correspondent kindly tell us, if he can, where he found his data of 151 miles as a base line, with the altitudes of 55 and 53 degrees? Does he really accept the astonomy of Pythagoras,

who as a worshipper of the sun, imagined it to be the centre of worlds depending on it as a god for light, heat and rain, and every blessing? If so how does he calculate the sun's distance by parallax so as to reconcile the conflicting opinions of Pythagorean astronomers? Accordingly, he must believe himself tied by the gravity of the infernal regions to the end of a globular wheel with spokes 4,000 miles long, to be unceasingly tossed thousands of miles either upwards or downwards, and at the same time pitched over the sun, 19 miles a twinkling. Moreover, he is liable to be tossed off his big ball by a centrifugal force of about 116,000 billion tons, due to diurnal motion; by another of 24,000 billion tons due to annual motion; by a third force due to an imaginary flight of his solar system towards Hercules, 46 miles per second; and by how many more forces is a wretched globist tormented in the hell of "endless space?" Further, there is an atmospheric pressure of 24,000 million tons per square mile, to squeeze the poor globe into a monster jelly; and how many million tons of coal are daily shovelled into the sun to keep up it heat and light?

- Yours, etc

Last issue mentioned the planned uprising, the revolution in Los Angeles. Further, it was conducted by so called "religious people," of course; it was run and sponsered (same as South Africa) by African Methodist-Episcopal Church, located in downtown L.A. All day in this church, demigods, subversive anti-caucasian, anti-American, anti-decent criminals preached and slobbered their black racist mad dog ravings, preparing for the verdict in the Rodney King case, they knew the Police would be found not guilty, as they were NOT GUILTY of anything, except kindness. All the Racist Leaders (black) wound up their slobbering, in the evening . by saying something like HIS THIN BLUE LINE OF "the blacks must be able to vent their KNIGHTS BEAT 'EM AT anger"...this was the official word that went out for the attack on L.A. I happened to be listening to a TV channel, that from a helicopter was over the scene where the truck driver was beat and hundred of other crimes suddenly started, then on other spots Noted that the police, suddenly left the area, they went to staging areas. left the scene. WHY? was apparent to the Top Police! IT WAS SET UP FOR ENTIRE USA REVOLU-TION, COMMUNIST-NAZI STYLE! The plan was for the Po-

lice, to fall to and fight and stop the revolution... and in so doing perhaps 100 to 200 people would have to be killed... NO OTHER WAY! THEN. same night, world wide news bulletins, all ready to send out, MASSA-CRE IN L.A.! MONSTROUS MAS-SACRE by police of "poor downtrodden minorities" Racist Police did it! This was the Nazi German Lenin, and Nazi Marx always planned the beginning of a revolution, from then on that's the cry MASSACRE (check SA right now). Then other cities, more uprisings, more shootings etc... next maybe UN troops! USA as we know it, gone! POLICE CHIEF GATES AND THEIR OWN GAME! Refused to be tricked, so all was later stopped when the booze and other drugs had worn off a bit. Chief Gates was ready to retire, in few days. So he went out HEAD HIGH, HIS LAST OFFICIAL ACT WAS THE WITH HIS NOBLE KNIGHTS, TO DE-FEAT THE WORLD NAZI-SO-CIALIST PLOT AGAINST THE USA' SUPPORT YOUR LOCAL POLICE, SAY A PRAYER FOR THESE NOBLE SOULS ALL POLICE, CKJ

rule of mechanics, - "The difference between real apparent levels is equal to about eight inches in evey mile, and increases as the square of the distance." As one example among many, the Suez Canal is 100 miles long, and therefore there ought to be a difference in deviation of 1.75 miles, whereas it is a dead level from end to end.

J. Layton would have us believe

without proof and in opposition to

sense, that the sun which we see

moving westward, is in reality

moving the opposite way, and that the moon, with Jupiter, is moving east and west at once, therefore standing still! The contradictions, he assures us being explained (and how?) by modern astronomy taught by the idol worshipper Pythagoras 2000 years ago. He asserts, however, that zetetics assume that the earth (meaning all the vast oceans and continents) has neither axial nor orbital motions; whereas we believe our senses, which testify that the continents do not fly through the air, especially with the awful speed of 19 miles a twinkling. Copernicus himself confessed that the whirling lightning globe of heathendom was not even a probability; Herschell, that we must take it for granted; Professor Wodehouse, that it cannot be proved, etc. Further, as John Wesley, founder of Methodism, long ago pointed out, astronomers prove the distance of the stars by their great magnitude, and the magnitude by the great distance. Zetetics hold according to common sense, sound argument and God's revelation, that the earth or land floats in the great abyss of waters fixed there by the Creator so that it cannot move, the ocean being surrounded on all sides by the Antarctic icebergs (Psalm xxiv, 104; Job xxxviii, 10, etc.), and that the sun, moon, and stars move in the vault of heaven always at the same altitude above the earth, neither rising nor setting, but as the He-

Here are nuts for Copernican teeth: (1) How can the continents extending thousands of miles with vast mountain ranges, great plains, and rivers, along with the immense oceans (the Arctic and the Antarctic unfathomable), be rolled together into something like a little schoolroom globe, and the whole mighty mass be tumbled over and over, and heaved about the sun with more that lightning speed, without the earth and all its inhabitants being at once destroyed thereby? (2) How is gravitation or attraction proved - first taught by the idolater Aristotle of ancient Greece - which supposes almighty power not up in heaven but down in the infernal regions or heart of the earth? How is the imaginary globe proved to be 24,000 miles

or so in circumference, without supposing the sky, otherwise called "infinite space," after all a vault for the sake of measuring degrees; and how is it possible to reconcile the conflicting calculations of distances of sun and stars, differing by millions of miles? (4) Are the Copernican diagrams, mathematical "proofs," the schoolroom globe and maps of a turnip-shaped earth; the technical terms, such as parallactic motion, spheroid, terrestrial axes, plane, orbit equator, poles, etc., anything else than the tricks of a disguised atheism now misleading multitudes? (5) Is not the parallelism of the globe's axis with the lurch of 23.5 degrees on an imaginary plane, as well as centripetal and centrifugal forces to account for orbital motion, polar nutation, infinite ether, infinite space, stars with men hanging from them by the heels, globes of many million tons floating on nothing, light as feathers, moonshine being sunshine, etc., mere suppositions, unsupported by one fact or solid argument, but making up one huge anti-Christian fiction for simpletons to swallow? I am - etc.

#### **Globularity**.

ger Copernicus started with three million miles, now swollen up to some hundred millions, why, according to Newton's rule, we being now thirty times further away, have only a nine-hundredth of the sun's light, heat, and gravity formerly enjoyed. Further, the speed of our lightning ball is increased from less than one foot per second to nineteen miles. Indeed, as regards distance, speed, light, heat, gravity, the whole machinery of the solar system, without leaving out the millions of twinkling globes outside, has been for 300 years getting such a tinkering as must gladden the heart of "Topsy-Turvy" to behold. Moreover, Brewster and Herschel, in calculating the distance of the nearest fixed star, differ by eight hundred thousand million miles; but, of course, millions of miles are as so many paltry inches to star gazes. A correspondent cites in proof of globularity the supposition of boundless space, which in turn is the usual inference from globularity; but to prove this assumption would require a boundless astronomer accordingly, without shape, centre or gravity, and bodily organs; or an astronomer of organic protoplasm, but endued with unending life, to explore creation through endless time, therefore, never to get at the evidence sought for. If our "globe" needs tangential force and gravity to spin it round the sun, just as does the moon to spin round us, why not the sun to spin round its vaster centre towards Hercules, whilst the sun's centre needs another centre still more monstrous?

of heaviness, representing the moon as falling 16ft. per minute towards the earth, but somehow deflected into an orbit; also the "earth" as falling towards the sun, but likewise deflected? Why do astronomers differ so much as to the size of the "earth" and as regards distances of sun an stars? Why believe antiquated fables devised thousands of years ago by stick worshippers, such as Thales and Protagoras, who foolishly believed the sun a god to govern all, and hence the centre of whirling worlds, instead of the true God, who has declared that "the earth stands in and out the water," and is so fixed that it never can move. - I am, etc.,

A. M'Innes

[All calculations of the earth's size and therefore of the distances and magnitude of sun, moon and stars, depend wholly on the length of a terrestrial degree. The land and sea are first supposed to unite into a sort of ball, shaped like a turnip, orange or lemon, and then the circumference is divided into 360 parts called degrees, but not all equal, as is evident from Newton's supposition of ellipticity. Aristotle, about 300 B.C., said that mathematicians fixed the globe's circumference at 40,000 stadii (or 5000 of our miles). Fifty years afterwards, another Greek, .Erastothenes, first devised the plan of measurement still general followed, that of determining by celestial observations the difference of latitude between two places on the same meridian, and then measuring the earth's distance between them. He calculated the earth's circumference to be 250,000 stadii (or about 32,000 of our miles). Various attempts have been made within the last three centuries to measure a degree, but with results so unsatisfactory, up to this hour that the International Geodetic Association have lately resolved to hold a conference at Berlin during the summer to consider this much vexed question. The common method of measurement supposes the sky for the nonce a hollow globe corresponding precisely to the terrestrial one which it completely envelopes, and hence a degree as measured on the sky is believed to be the same as a terrestrial one; though again astronomers suppose the sky to be boundless space. Thus God's challenge to Job thousands of years ago may be repeated to the modern astronomer, "Hast thou perceived the breadth of earth?" The terrestrial base line being therefore unreliable, all calculations of terrestrial magnitude, as well as distances of sun, moon, and stars founded thereon, are as fabulous as the monkey-man of evolution, or Lord Kelvin's third guess of past time at 4,000 million years.]

#### **Going "Round the** Real World"

Geographers tell us that the assumption that THE EARTH earth has been circumnavigated many times in an easterly, or westerly direction which proves it to be a globe.

To this proposition I quote you Prof. NAMELESS, Fellow, Royal Astronomical Society. who says: "Circumnavigation in an easterly or westerly direction does NOT prove the earth to be globular. It has been pointed out that circumnavigation would be possible on a flat surface, with the North magnetic pole at its center."

Circumnavigation on a flat surface, keeping everywhere equidistant from the "North magnetic pole at its center," would bring the navigator back to his starting point, according to the theory, barring imperfect practice.

In "Navigation in Theory and Practice," p. 66 by Prof. Evers, LLD, we have it stated that: "Plain sailing is sailing a ship, or making the arithmetical calculations for so doing on the IS PERFECTLY FLAT." And Mercator's Chart, which represents the earth and seas as one vast but square plane, is the chart most commonly used by navigators today.

Now I should like you to make an imaginary journey round the earth in an easterly or westerly direction: yes, two or three journeys, say travel in a westerly course and on the equator all the time. And to aid you to always keep this equatorial path, suppose we tie a rope to the north pole just long enough to reach from it to the equator, and you are to hold the end of this rope in your right hand. Of course we can tie the rope to the pole. Is it not a very material thing? Have not two brave American explorers already nailed the "Stars and Stripes" to the pole? Of course they have! Well, now you are ready, start! Away you go facing westward, your right hand extended outward toward the

#### The Builders

"An old man traveling a lone highway Came at evening cold and gray To a chasm deep and wide,
The old man crossed in the twilight dim, The sullen stream had no fear for him But he turned when safe on the other side And built a bridge to span the tide.

" 'Old man,' said a fellow pilgrim near, You're wasting your strength in building here, Your journey will end with the ending day, You never again will pass this way; You've crossed the chasm deep and wide, Why build you the bridge at eventide?

"The builder lifted his old gray head.
"Good friend, in the path I've come," he said, There followeth after me today A youth whose feet must pass this way, This chasm that was as naught to me To that fair youth may a pitfall be; He, too, must cross in the twilight dim;
Good friend, I am building the bridge for him." — — Annon

#### Real Think: Checking World to See if a Ball or Flat

If the earth is a globe, and is 25,000 English statute miles in circumference, the surface of all standing water must have a certain degree of convexity—every part must be an arc or a circle. From the summit of any such are there will exist a curvature or declination of eight inches in the first statute mile. In the second mile the fall will be 32 inches; in the third mile, 72 inches, or six feet, as shown in the following diagram:

Let the distance from T to figure 1 represent one mile, and the fall from 1 to A, eight inches; then the fall from 2 to B will be 32 inches, and from 3 to C, 72 inches.

We have a table of all distances, the amount of supposed curve or drop. Examples: ten miles, 66 feet drop; 20 miles, 266 feet drop.

It will be seen by this table that after the first few miles the curvature would be so great that no difficulty could exist in detecting either its actual existence or its proportion. Experiments made on the seashore have been objected to on account of the constantly changing altitude of the surface of the water, and of the existence of banks and channels which produce a "crowding" of the waters, as well as currents and other irregularities. Standing water has therefore been selected, and many important experiments have been made, the most simple of which are the following:

In the county of Cambridge there is an artificial river or canal, called the "Old Bedford." It is upwards of twenty miles in length, and passes in a straight line through that part of the Fens called the "Bedford Level." The water is nearly stationary—often completely so, and throughout its entire length has no interruption from locks or water-gates of any kind; so that it is, in every respect, well adapted for ascertaining whether any or what amount of convexity really exists. To be continued.

#### The Wings of the Earth

The expression "wings of the earth" which occurs in the Bible (usually translated "ends" as in Job 38:13) is sometimes appealed to as proof that the earth is a sphere and flying, as it were, around the sun. Joseph Smith, the founder of the Mormon Church, subscribed to this idea: "He described the shape of the earth at the poles as being a rounded elongation. He quoted scripture in proof of his theory which says that "the earth flieth upon its wings in the midst of the creations of God" and said that there was a semblance in the form of the earth that gave rise to the saying." From the Young Woman's Journal, Feb. 1982. (A Mormon publication quoted by Gerald Tanner in Mormonism, p. 4).

Rotherham, in the Emphasized Bible, says that the reference to "wings" is "simply poetic" language for "ends of the earth"—p. 525. But the expression could be derived from some ancient concept of the world, certainly not in accord with modern theories. For

example, this "Babylonian map of the world about the sixth century, B.C., taken from a tablet in the British Museum. It portrays the earth as a circular disc, with "the seas surrounding the world indicated by the large circles... the two broken vertical lines represent the Tigris and Euphrates (rivers)." What makes this map so interesing is that it depicts wings extending from the rim of the world: the Biblical "wings of the earth?" These symbolic wings represent the fact of the earth floating on the waters. so this piece of evidence, contemporary to the days of the Bible, shows us what, if anything, the expression "wings of the earth" refers to: not a sphere flying through the sky or space, but a flat disc floating on the surface of the primordial waters—of the deep or ocean (Gen. 1:9-10). —there, back to your starting point safe and sound. Now, suppose we have the power and we do just snip off the "top of the only end of the earth's axis or axle on which the earth spins, and which projects out a little) sticking up yet. Your rope will now become slack and settle down to the solid earth. Now pull in your slack, cut off the superfluous length and make another trip. There-done! Now cut off another slice of earth, say down to the Tropic of Cancer, take up your slack in the rope again and make another trip—that was well done! Now, please cut off the rest of our globe down to the equator, take up your slack in the rope and make one more, a last journey in this experimenting. What have you done? You have simply gone round a circle, with yourself picketed to the central stake or pole, just as the cowboy pickets out his broncho. In each journey from the first to last your right hand pointed to the north, your left to the south, your face was to the west and your back to the east. If all the land area of our earth were spread abroad on this flat, circular surface, and you made your journeys by water your would certainly have circumnavigated the earth, never turning backward on your course, and arriving at your starting point again.

But we do not intend to argue that all the land surface is spread abroad within this circle surrounding the north magnetic pole. Most of it is. Some extends outside of the circle.

I was tickled to hear that no one in whole Lancaster area believes that Columbia Space Shuttle really orbited the earth. I just happened to be in Space yesterday and I too can attest to that fact. By the way, did you know that not only is the earth flat, but I know for a fact that all spheres are really flat. Pearls, golfballs, garbanzo beans, are really flat. We should exchange notes sometime. You and I should have lunch together or something. In the meantime, how can I join your ranks?

It is NOT a "BALL," as you no doubt KNOW "goofballs" are "balls" and "grease balls are most goofballs" (ball nonsense came from grease). by the way, very first invitation to give a talk came from Beverly Hills a few years back. Marjory and I went over, gave talk at Beverly Hills High. Very nice kids and teacher. It was a very short talk, have had much practice since then, also had no mike. #### California's Salton Sea Flat!

If the Earth is a globe, and is 25,000 English statute miles in circumference, the surface of all standing water must have a certain degree of convexity – every part must be an arc or a circle. From the summit of any such arc there will exist a curvature or declination of eight inches in the first statute mile. In the second mile the fall will be 32 inches; in the third mile, 72 inches, or six feet, as shown in the following diagram:

Let the distance from T to figure 1 represent one mile, and the fall from 1 to A, eight inches; then the fall from 2 to B will be 32 inches, and from 3 to C, 72 inches.

If the earth is a globe, the series of flags in the last experiment would have had the form and produced the results represented in the diagram. The water curvature below the line A, B. The first and second flags would have determined the direction of the line of sight from A to B and the third flag would have been eight inches below the second; the fourth flag, 32 inches; the fifth, six feet, the sixth, ten feet eight inches; and the seventh, 16 feet 8 inches; but the top of the last and largest flag, being three feet higher than the smaller ones, would have been 13 feet eight inches below the line of sight at the point B. The rotundity of the earth would necessitate the above conditions; but as they cannot be found to exist, the doctrine must be pronounced as only a simple theory, having no foundation in fact - a pure invention of misdirected genius; splendid in its comprehensiveness and bearing upon natural phenomena; but, nevertheless mathematical and logical necessities compel its denunciation as an absolute falsehood.

#### 100 Proofs that The Earth Is Not A Globe

51. A "Standing Order" exists in on the Newtonian hypothesis, all this the English Houses of Parliament is inexplicable. This is a proof that that, in the cutting of canals, &c., the datum line employed shall be a "horizontal line, which shall be the same throughout the whole length of the work." Now, if the Earth were a globe, this "Order" could not be carried out: but, it is carried out: therefore it is a proof that the Earth is not a globe.

52. It is a well-known and indisputable fact that there is a far greater accumulation of ice south of the equator than is to be found at an equal latitude north: and it is said that at Keguclen, 50 degrees, south, 18 kinds of plants exist, whilst in Iceland, 15 degrees nearer the northren centre. there are 870 species; and, indeed, all the facts in the case show that the Sun's power is less intense at places in the southern region than it is in corresponding latitudes north. Now, the Earth is not a globe.

53. Every year, the Sun is as long south of the equator as he is north; and if the Earth were not "stretched out" as it is, in fact, but turned under, as the Newtonian theory suggests, it would certainly get as intensive a share of the Sun's rays south as north; but the Southern region being, in consequence for the fact stated, far more extensive than the region North, the Sun, having to complete his journey round every twenty-four hours, travels quicker as he goes further south. from September to December, and his influence has less time in which to accumulate at any given point. Since, then, the facts could not be as they are if the Earth were a globe, it is a proof that the Earth is not a

#### Overheard in

#### The Chestnut Street Cafe

Will mention in last issue the part about New York was written at least two weeks before the big blowup there. Didyounotice how actions there proved what I was saying? New York is not under the USA? Gov. Cuomo each day teasing and making light of head of the FBI. Notice how jolly he was? What a master (Cuomo) he didn't care what head of FBI thought but needed to play to the people of USA, they don't need to know NY is an independent country. Gov. Cuomo would keep referring to the "bomb", Mr. Sessions who, by the way, is from Texas, would correct him, saying, NO EVIDENCE OR REASON TO THINK THE TRADE CEN-TER HAD BEEN BOMBED, OR A BOMB HAD BEEN INVOLVED. Over and over for several days this went on, one day, in a most jolly mood, Cuomo told the joke, "well if it looks like a bomb, sounds like a bomb... smells like a bomb, must be a bomb!" hee haw. Well, anyway, he run the head of FBI out of NY, left a more knowledgeable or "complying" agent in the charge. You know many powers that have been trying to fire Mr. Sessions, even before the Clanton Gang took over, guess he got word, get out of that Country, and maybe we'll ease the pressure on you.

Anyway, some days back dropped by the Cafe, one night. Don't know if I mentioned it, but frequented by poets, music people, party members, anarchists, thinkers and in the know people, believers in God, revolutionists. The Cafe expresses the Deep Mystery of the Party, what it is, who's in it. It expresses the MYSTERY of life, the Mystery of God, the Mystery of Religion. Word today "Political correct", is just new name for "Party line" as the book of Proverbs says, there's nothing new under the sun, what has been will be. Anyway, the "Party" no matter how it seems, allows all kinds of people, truth seekers, especially honest ones and honorable ones. Party seems to subscribe to this belief; to stop Truth and Truth seekers who are honorable and reasonable, is unthinkable, and they will not do it. The Herd of course has nothing to do with the whole thing, just unthinking beasts of prey. So the Herd must stay in the "Herd". Jeb was talking when I went in, something like this: Was perhaps a Coke plant in the trade building, to refine coke must have large amount of kerosene or diesel, most powerful and explosive! Also plant for PCP and some other uses either and other Powerful explosives.

Somehow this plant got ignited... and blew up! That's it! Remember, Mr. Sessions, he ALWAYS said "no evidence of a BOMB?" Said four or so killed, 1,000 injured, right, remember the thick black smoke? The smoke was injury's smoke, whole building filled with the smoke. Jeb says, we know was not a bomb just an explosion in a sub basement. The Alcohol Tobacco and Firearms Mob FIRST people on scene, (they are not

"police") then like a shot... they hit for Texas, and attacked a church, at night, as burglers and robbers, since the spot with me, as had just written about NY being a separate country, lo and behold, national proof came out! So, I ambled out about midnight, cool wind was blowing and jute box playing the Cafe, "Alexander's Rag Time Band". So long till next time.

P.S. The vidence is the MOB killed their own men. So doped up and half drunk (the ATF) fired perhaps thousands of shots, riddled ceiling, floor as well as the walls, so it was the, dirty little cowards who killed four of the dirty little cowards. The Mt. Carmel Religious People didn't kill any of the thugs!... and the beat goes on.

#### according to law of the land CHURCH people or any people can protect themselves. Remember in the Bible, Law of Self Defense was given to the Jews in Easter; anyway, the Mob put hundreds and hundreds of holes in the Church and killed, 11 or 12 people including the children. They claimed Church citizens got four of the Mob, standoff since, right? Hee Haw, Hee Haw... took all attention off the dope explosion in the trade center, right? What a Mob. Notice every few months, it seems

Hollywood makes another MOB pic, P.O.H. Mob, like the Pimp and panderer Lucky Luciano etc. etc. and the other P.O.H. Pimp Panderer White Slaver Al Capone, Great Heroes, in the movies. Well, lots of talk went on that night can't go into it all. Really hit

#### "I Think that I Shall Never See, A Poem Lovely As A Tree..."

Dear Editor:

The U.S. Postal Service is being urged by NARFE Chapter 1116 (Vienna, Virginia) to issue a commemorative stamp honoring Joyce Kilmer, one of America's most beloved poets, on the 75th anniversary of his death in action during World

War I. Kilmer's son, Kenton Kilmer, is a member of Chapter 1116.

A sniper's bullet ended Sergeant Kilmer's brief life at the age of 32 during a bloody American offensive by the historic Rainbow Division on July 30, 1918, near the Ourq River in France. Yet, Kilmer's enduring fame had

already been established by his most famout poem, "Trees," originally published in 1913 and memorized by generations of school children.

His talent brought him recoginition in "Who's Who" when he was only 25and France awarded him the Croix de Guerre posthumously for heroic bravery on his final infantry reconnaissance mission with then Major Wil-

liam J. "Wild Bill" Donovan. Kilmer's poems spiritually guard the graves of his fallen comrades, for he wrote many warpoems such as "The Peacemaker," "Rouge Bouquet," and "Prayer of a Soldier."

We strongly feel Sergeant Kilmer deserves the dignity and recognition

of a commemorative stamp and our chapter has adopted a supporting resolution, addressed to: The Citizen's Stamp Advisory Committee,475 L'Enfant Plaza, Washington, DC 20260.

We hope that members who share our admiration for Joyce Kilmer, his talents and his sacrifice will support our recommendation with

Joyce Kilmer

tee listed above. Postcards to your two Senators and Representative in Congress will also help. Thanks, NARFE, for caring.

#### Prayer of A Soldier in France

My shoulders ache beneath my pack (Lie easier, Cross, upon His back)

I march with feet that burn and smart (Tread, Holy Feet, upon My heart!)

Men shout at me who may not speak (They scourge Thy back and smote thy cheek).

I may not lift a hand to clear My eyes of salty tears that sear. (Then shall my fickle soul forget Thy Agony a bloody sweat)

My rifle hand is stiff and numb (From Thy pierced palm red rivers

Lord, Thou didst suffer more for me Than all the hosts of land and sea.

So let me render back again This millionth of Thy gift. Amen – Joyce Kilmer

#### Hell's Kitchen or Kitchen's Hell?

It's said all the good people were killed in WWI. A General English, in that war about wiped out a generation of English people... got most of the heroes. Kitchen's famous order was... "send me more heroes" the butcher ground was called Kitchen's Hell, or Hell's Kitchen. Thousands of Australians murdered, when they were sent to certain death, by the ones conducting the HOLOCAUST, Battle of Gallipoli, not much battle, just Aussies wiped out... got rid of, the People of Hell who conduct the Holocausts want to destroy the "good people" and ALL HEROES off the earth. Anyway WW2 ditto, Also ran by the Democrats! Holocaust of christians, many MILLIONS of the most religious people on earth, the Russians wiped out by the PEOPLE OF HELL plus the thousands of AMERICANS, ENGLISH, etc. The People of Hell, led by Hitler hated the Christian religon a long story, but the Nazi won WW2 occupied England and USA. Now beginning to come out in the open... OPEN WARFARE IS NOW TODAY BEING CON-DUCTED AGAINST ALL THE GOOD PEOPLE IN USA. Total war against any Church or group that "believe in God" who believe in the commandments of God, and JESUS! In the German State of Israel, people don't dare say the name! Supreme Court or Sanhedrin (this the old name the Hellenistic people called their supreme court) in USA has ruled jail to any church who teaches the

Bible or Commandments or the teachings of Jesus! Haven't got space to go into all this, but let me say my reports are: David Koresh and his Church were all decent upstanding people... just believed in God that was their CRIME. ATF is NOT police. I support The Police, but are a "Mob" now, have always been since the Volstead act abolished, criminals, thugs, dope heads, boozers no good rats, and dirty little cowards.

Was NOT tear gas used a special gas also from the back side of what you saw on TV, concussion bombs were shot in, to give all inside brain concussion, and DISABLE them, then the gas was pumped in every room, vast amt, front where the wall was knocked out was a propane tank, as they know also electricity was cut off for days, they, church people, used kerosene LAMPS, was KNOWN FROM THE START THEY WERE TO BE BURNED ALIVE. The Dirty little cowards ATF, to the end was afraid to go near the Church. David Koresh told 'em, you want us, come and get us. Fair enough, isn't it? He dared them to "draw" over and over, get it on, the cowards all refused. So ATF, the mob got hold of the Witch Reno, this evilwitch got hold of Killer Clanton... why? the ATF and FBI refused to fight it out like men. So asked President Clanton to call up the army to attack the Preacher-Prophet Koresh! So that's what happened the US Army special weapon department

for WAR... armored, PUMPEDGAS INTO THE CHURCH, BANGED THELIGHTCHURCHBUILDING OVER AND OVER KNOWING THEY WERE KNOCKIN' OVER KEROSENE LAMPS AND STARTING FIRES, are after all the members of the Church were gased and had brain cuncussion and helpless... while in this state... the United States Government run by the Pervert Democratic Party burned them alive... HOLOCAUST is a religious act in the heathen Jewish religion, where the "innocent" are burned and cooked and eaten by the guilty!

THEY ARE ALL MYRATERS from American... land of the free and home of the brave, freedom of religion first and foremost, right? Vast disinformation going out now, all lies... this should show you how the "government can and does LIE" so hard to believe they would lie tell you earth a Greek ball of Hell, when in fact it is flat, so surely now you can understand? Next issue will mention, what I believe is the true interpretation of certain part of book of Revelation, and it means the ... end is Near ... for the WICKED.

Today the Bell Tolls for Thee -Decent American!

...and that dirty little coward, shot Mr. Howard, and layed poor Jessie in his grave...

### EARTH IS FLAT No Moon Pictures of Earth Exist

#### **Bablylon-Babel** Revisited

ON THE PAD - The shuttle discovery sits on launch pad 39-B.

This "launching pad" tower IS the Tower Built at Babel, to "reach up to Heaven." Oh, yeah, the Fake Space Program Hoax is not new, described in the Bible, is used to unite the world (Babel also means unity). They

Gods to "go into the Heavens" and return, as John F. Kennedy said! Called "lieing wonders" deceived the world, "wonders that were a lie." It's all being re-done in Florida, The New Tower of Babel is in USA now run by USA... and USA to get the credit and at last the BLAME! For God hated the builders of this launch pad thousands of years ago. Oh yeah, Chinese had rocket power then, and could and did try to Launch a Space ship, for this, God scattered all the people all over the world, Unity was bad, "one world bad" for people so evil, if and when they all get together both heaven and earth suffer! So the downfall of "Babylon" in Bible means BABEL. Confusious spoke of the evil time when unity prevailed, must never be done again! Anyway, I've warned our Government in 1975... only HOPE to save USA was to confess to the world earth flat, dump science superstition and begin anew Honest, then I told 'em, world would be for us, if not... people, nations waiting in wings to knock USA out... for USA is set up by our enemies to be pretended to have the power of SATAN ON EARTH...BABEL!

#### 100 Proofs Earth Not a Globe

54. The aeronaut is able to start in his balloon and remain for hours in elevation of several miles, and come down again in the same county or parish from which he ascended. Now, unless the Earth drag the balloon along with it in its nineteen-miles-second motion, it must be left far behind, in space: but, since balloons have never been known thus to be left, it is a proof that the Earth does not move, and, therefore, a proof that the Earth is not a globe.

55. The Newtonian theory of astronomy requires that the Moon "borrow" her light from the Sun. Now, since the Sun's rays are hot and the Moon's light sends with it no heat at all, it follows that the Sun and Moon are "two great lights," as we somewhere read; that the Newtonian theory is a mistake; and that, therefore, we have a proof that the Earth is not a

56. The Sun and Moon may often be seen high in the heavens at the same time – the Sun rising in the east and the Moon setting in the west – the Sun's light positively putting the Moon's light out by sheer contrast! If the accepted Newtonian theory were correct, and the Moon had her light from the Sun, she ought to be getting more of it when face to face with that luminary – if it were possible for a sphere to act as a reflector all over its face! But as the Moon's light pales before the rising Sun, it is a proof that the theory fails; and this gives us a proof that the Earth is not a globe.

#### 1993: A Generation of Conceited Fools

To Editor of "Lincoln Chronicle"

SIR, – Two queries by C.D. may be answered with the help of Solomon's proverb, "A wise man carries his eye in his head." We see, as the Hebrew prophets reveal, "the earth stretched out upon the waters," and the vault of Heaven spread overhead, whilst, on looking all around, we find a limit to our range of vision, called the horizon, towards which the earth appears to slope up, and the Heaven to slope down. Now, whatever point of the horizon we look at becomes a point of convergence, being on a level with the eye, and all lines above the eyeline must descend, whilst all lines under it must ascend to that point, where, indeed, we see an object vanish. Hence a ship receding from view appears to ascend to the horizon, but approaching to descend towards us, though when about to disappear the hull (on account of the obscurity) becomes confounded

with the watery base; yet, with a good telescope we see no "hull down." What artist would represent a ship "hull down" by a mast like an indiscoverable north or south pole, sticking up behind a hill of water? Also when a ship has disappeared we have but to climb some eminence to see it to see it again, and whilst it goes away it appears to go up, but never goes onver the imaginary hill. Likewise the sun appears to rise and go down, but the Hebrew Scriptrues, with scienctific accuracy, speak only of the sun going forth in the morning and going in at night. In page 20 of "Herschel's Astronomy" there is a cut representing a man looking down on the horizon. The pillar he stands on is supported by a curve of the "earth," fully 60 degrees, and, therefore, one-sixth on an entire circle, or 4,000 miles in extent; whilst the man with the pillar equals in height one-fourth of the curve, so that, according to the scale, the man is 300 miles high and the pillar 700! A line is drawn from his eye, as a tangent to the circle, representing him as elevated thousands of miles above the horizon, which, according to true perspective, can never be below the level the spectator's eye! The third question by C.D. is seemingly abou the "phases of the moon," which he wishes "fully explained." Hershel, in his "Astronomy," by way of explaining, gives a diagram representing the moon in eight different positions circling round the "earth" globe, but were he sharp and not a flat at reasoning, he might see a logical connection between the general belief in Copernican fables and the latest saying of Carlyle, his theologicalteacher, that his is "a generation of conceited fools," aye, too, with engineering inventions to fill the world with accidents, and warlike engines to destroy mankind.— Yours, etc.

#### A Scot Checks The World

To Editor of "Dundee Weekly News"

SIR, - Mr. Gillespie, whose book I have long ago read, supposes with Thales, Ptolemy, and other pagans of remote ages all the oceans and continents rolled into something like a monster turnip or apple, and whirling mysteriously round itself upon nowhere 1,000 miles an hour, though he denies the thunderbolt dash of 19 miles a twinkling round the sun. But even if to the Pacific and Atlantaic along with the unfathomable Arctic and Antarctic Oceans we add all the islands and continents, how can they unitedly have the quality of solidity, without which there can be no globe? unless the astronomers want us to imagine all the oceans frozen into a huge iceberg and somehow soldered to the land. Yet, again, how can we all endure the awful daily somersaults caused by what is quietly called axial motion, to be pitched as often heels uppermost as heads thousands of miles down into a fearful gulf, and after being hurried under, to be tossed aloft to a giddy height of thousands of miles, being all the while bound as to a vast wheel like the fabulous Ixion? Then as for gravity, that ties us on, and moves the sea-earth wheel, 8,000 miles high: what is it? Hobgoblin or fiend, that Newtonians suppose everywhere, yet is found nowhere, unless in astronomers' brains, though guessed by Mr. Gillespie to be lurking far down in the earth's centre or infernal regions, and hindering our escape into the Copernican boundless space where worlds fly more plentiful than cannon balls in battlefields? Moreover, as drums, poles, pennies, cups, &c., are round without being globes, let Mr. Gillespie show (though not yet done anywhere) that everywhere on si face of land and sea, there is. according to mechanics, a fall of eight inches per mile, the increase being as the square of the distance. Hence, our island being about 700 miles long. John o' Groats should be at least 60 miles higher or lower than Land's End in Cornwall. Also, the Atlantic cable was laid over 1,656 miles without any allowance for rotundity, and yet there should be at the centre, according to globularity, a hill of water 150 miles high. - Yours, &c.

#### **Man Believes Science Fiction Movie**

Q. How can you persist in your theory earth is flat, when we've seen the globe earth pictures from the moon landing?

A. We don't have a theory earth is flat! don't know where you got that idea! In fact Flat Earth thinking for "Zetetic" was/is to drop "theories"

which really means Dreams and or imagination. Imagination is the best description theory. Both Greaseballism and screw-ballism are pure and simple imagination. You say you saw earth a ball when men went to the moon? pictures seen on TV you mean. Do you believe all you see on TV? Do you also believe and have faith in the "Honky Tonk in the Sky" as you also saw on TV star wars? The pics you saw of globe earth, is just as true as the Honky Tonk in the Sky, you also saw on TV. Don't be silly, there Continued on page 2

#### **Man Believes Science Fiction Movie**

is NO Proof earth is ball, never has been, and NEVER WILL BE! Why? we checked the world, found it flat, so that is that, it is not debatable just a Fact, flat earth is fact, ballism is childish drivel.

Q. Why do so many people believe in the whirling planet-globe world, if it is not true?

A. Don't be so sure just how many Really believe in the screw ball system. (The expression screwballism, means those who believe in the "spinning/screwing through space planet world.") Grease ballsim is the still ball, not screwing-spinning, just sitting there. This was in effect in Columbus day, oh Yeah, at time of Columbus world a Ball, as the official belief had been for untold hundreds of years. Hee Haw, Galileo was claiming as per Co-pernecious the "planet was screwing though space," he was a "Screwball" man. The Church was affirming the old 400 B.C. Grease ball Theory, so his Great Controversy was over screwballism versus Greaseballism. Goes without saying the Greeks/Hellenistic or Hellites had pretty well taken over the Church. Anyway, most people are "con-wise", like the people in Orwell's 1984, as one said, "we know when to applaud and when to boo," follow the party line. So to day, entire system is so wrong and twisted with deceit, that no person ever reveals his true beliefs, he wants to... keep alive and do well, so party line all the way, now been changed to "politically correct"! Well, this has gone on for so long that many people can't think, don't even try. As far as "beliefs" a reign of TER-ROR has been on for untold hundreds of year. Look at WACO entire force of USA Government the entire CLANTON GANG holed up in Washington D.C., sent and had them all BURNED ALIVE for HERESY: If the people did not live under terror system, entire country would march on D.C. arrest Clanton and his gang, try and sentence them for first degree MURDER and TREASON, oh yeah.

Q. If the Space Program is a fake,

why? How about the space program in the USSR?

A. Quite simple, main thing is to get some kind of "proof" earth is ballplanet, so as I've always said, no proof CAN BE FOUND FOR THE **DELUSIONS OF LUNATICS globe** world! Nick Kruwchief in USSR in league with England started the "spook -nick" peep peep. HOAX! remember that? Purpose of that was to "prove world a ball, and so finally do away with God, and bring the Russian people into total subjection, no hope at all. As soon as spook-nick done, Vast campaign began to force atheism on the people, saying " we have now proved world a tiny speck, globe, science theory, so can be no God. The whole thing so false and fact is criminal-pervert fiends in England at JODREL bank, were really conducting it. Hee Haw, well, Nicks crime partner President Kennedy in USA, said... hey hey, the peons want to believe in spook-nick, beep beep, we'll pretend to go to the moon. We'll put entire good will of USA into it. At that time USA loved and trusted by the world. Also he told his henchmen... no worry boys, there'll be PLENTY OF JOBS, he was with the same gang of subversives CLANTON and his gang has. Well, somebody rubbed him out in Dallas, of course all the decent people in government, all the Army Navy Airforce knew ball was a hoax, in fact entire scientific concept on anything, is a hoax. So no doubt some Government People or people who didn't want USA to conduct such an obvious Hoax and ruin USA reputation. John Kennedy was the most hated and despised President ever to be elected, Lyndon B. Johnson, got him elected. Anyway, the point of the hoax, TO TRY TO STOP THE FLAT EARTH SOCIETY! got it? We were the only people on earth who stayed honest and true and like the Disciples of Jesus and the OLD Texas Rangers... we found what was right, and fell on to the riot of madness, the delusions of idiots and disproved the screwballism and totally proved it flat. AND nothing no body could do about it. And we will win,

for right and Truth must win in the end and God and experience tell us, "resist Satan, and he'll flee from you". Screwballism and Greaseballism are insane concepts, ruining the brains of helpless children, so they can never be real people, logical and reasonable, sane, HUMAN in other words.

So, that's it, Space Program Hoax is to try to defeat us here, THE FLAT EARTH SOCIETY. If they could or Did, all LIGHT WOULD PERISH FROM THE EARTH! But as now there is TWO WIT-NESSES that stand and our Light still burns, it has not failed.

I recommend, if your mind is warped and damaged so that you cannot understand, and you have a good heart, you Desire to do right to know that God exists, and he hates ALL LIARS... PRAY DAILY TO GOD, IN THE NAME OF JESUS CHRIST, to help you... to understand. Knock, and he'll answer.

Q. You say the world is flat, why haven't we heard of people falling off

A. You know I've always said science concept is burlesque comedy, or is also called hillbilly comedy. Same thing, silly absurd statements are said, so silly and absurd and yet true to form for unthinking people. Hee Haw, To say you'd fall off the flat world safe on round ball world, is pure Hee Haw. Falling off the flat is absurd, as if such a thing were true... would be no water at all, right, it would also fall off! So is quite obvious, we're not talking about anything like that PLUS its the round Grease ball also the Screwball that HAS AN EDGE! see? to go anywhere you have to go over the edge! Like to get to Australia, have sailed down the edge, sail over it, then sail **UPSIDE DOWN** most of the way. When you land, find Aussies all to be Opossums, just hanging there, upside down, oh yeah... that's a "scientific fact", not only that but the possums are spinning round and round 1,000 MPH! Hee Haw, AND also spinning around the sun 166,000 MPH! See what I mean "science" is Hee Haw comedy. Like the Great Comic Albert Einstein, he was a much better comic than his friend Charlie Chaplin (he too was hee haw comic) World infinite in size, BUT contained in a ball... space is also a round ball. Hee Haw, Hee Haw. Think of the power of this comic to tell such Jokes, people love 'em so, make it their **RELIGION!** Oh yeah. The science comedy is pure religion, accepted on "faith" UNRE-LATED to the real world.

#### Marjory's Corner

GOD the Creator has made an everlasting covenant with all flesh and blood upon the Flat earth. So you see it is not just with carnivorous beasts of prey, with two legs, that the Creator is interested. Common sense, logic "Sanity" itself tell us The Creator likes and cares for the good animals also, like sheep, cows, fish, birds, etc. According to the Bible, event the carnivorous beasts called humans have a chance to be saved if they "repent" stop their evil ways! It is MOST important that we help God's other children, not just think will reap what they have sown!

of ourselves all the time. Gen. 9-16 God makeds a Covenant with his people, all flesh and blood... an everlasting covenant. So maybe the Good Animals, the non-killers, nonharmful Cows, Sheep are even more important than us? I do feel for the Vivisectors, the Medical SCIENTSTS... as they

#### **Personal from Editor**

Well, there's so much to say, hard to do on this two page FLAT EARTH NEWS. You know for most of the years we've published it has been four pages! the cost eats us up, cost us just as much for this one sheet as not too long back was four pages! On top of that about three years ago a wild subversive gang took over the Post Office System. All out jipo business now, and some "strange" people rung into run things. Not just here but all over Deal now is like fast buck carnies. Trying to do in the smaller mailers with non profit, especially HATE anything to do with mention God.Over double for postage now, for mailing out FEN. AND such a hassle me making up 30 or 40 packs, depending on zip etc. etc. Federal

Printing office has for years sent us booklets, describing all the vast things available for free and money is available. Under the rules to weight part is ok, for us to put with FEN. But one of the strange women managers decides couldn't put the booklet in, as was not about the Flat Earth! Anyway, nuf of this guess you note am now sending FEN out first class. Cost three times as much as our non profit should be. Anyway just mention this as in most important that everyone pays dues and/or some contribution. All the good exposé truthful journals of the past went out the same way, money. Or lack of it. Since ours is the most important in USA Only honest exposé of the Truth, must always be only a small elite subscribers.

#### Remember Waco

You might stop all contributions to "churches" and political outfits, all Screwballers. Remember FES at Christmas.

Well, the Clanton Gang is still holed up in D.C. This by far the worst gang of subversives-degenerates ever assembled to run a country. One would have thought by now Clanton would have been impeached or charged with murder and in jail. Think: he murdered 100 people, quiet decent upstanding citizens, this why his backers hated them so much. They hate all that is good or normal.

On top of everything else day after he commanded the Army to murder the church people and burn them all

alive and their CHURCH in WACO day after he appeared on TV in big shindig with the Holyroast people all vowing never to let any jew by holyroasted again. THINK! he in PERSON had ordered the Holyroast of 100 CHRISTIANS and all White people, the day before! Its hard to believe it happened, and the band of Thugs, the dirty little cowards ATF are still in business and the monster witch degenerate Reno still HIGH-EST LAW OFFICER IN USA. Oh yeah... all over for USA! Just his, Clanton's Love of all sex fiends degenerates, being President means God will be forced to bring down USA! Bible and common sense decrees it.

#### Letter from Brookline

Recently, the International Flat Earth Society was brought to my attention by a friend. Until then I was answare of its existence. I wish I had heard of you years ago!

I remember the first time my uncle took me up in his old bi-plane, although I was just a school boy at the tame. As we clambed I expected to see the the earth curve in the distance. Of course it didn't. I knew then that we had been taken in by greek myths.

Trouble is, as time went on, no one seemed to care. Everyone seemed to be afraid to question the so-called scientists who claimed we live on a sphere. But I think you'll agree with me that most of what is called science is nothing more than guess-work in a white coat.

I'm either ignore, mocked or insulted by people I to to reason with People who are supposed to be open-minded. I don't think they'd be so quick to laugh if they knew that there are others who know that I have been trying to tell them for years.

I would like to order copies of your writings. Enclosed is an addressed. stamped envelope. Please send me any information yet can space. Any assistance would be greatly appreciated. Thank you

Man, Brookline, MA

# AUSTRALIA NOT DOWN UNDER A Compass Always Points North

#### A Plane Earth

Gravitation is the force which "keeps the planets in their orbits," which holds the earth to the sun and prevents it "rushing off into space," and which causes the earth to spin on its axis, causing the succession of day and night. Thus have our scientists taught us.

But in the foregoing argument on the gravity question, I consider that I have shown conclusively that there is no such force in existence as universal gravitation; therefore, it follows without argument that if my position is true, then this earth is at rest, it does not spin on an axis to cause day and night, nor remove in an orbit around the sun, causing the change of seasonS. It follows, too, that the sun, moon, and stars are in motion over and above a plane earth.

Now, I wish to present some of the evidences that this earth is an ourstretched plane.

In the first place it looks to be a plane. On those vast prairies of the Mississippi Valley of North America and the Ilanos and pampas of South America the eye is wearied with looking at objects away in the distance with no obstruction between and no limitation except the natural limitation of visual power. Mr. C. Darwin makes the following statement in his book. Voyages of a Naturalist, p. 166: "The guanaco, or wild llarma-Mr. Stokes told me that he one day saw, through a glass, a herd of these animals which evidently had been frightened and were running away at full speed. although their distance was so great that he could not discern them with the naked eye."

#### Scientific Testimony

Observations with the eye and practical tests agree. I quote Chambers' Information for the People, p. 59: "In North America, the basin of drainage of the Mississippi is estimated at 1,300,000 square miles, and that of the St. Lawrence at 600,000; while northward of the 50th parallel, extends an inhospitable flat of perhaps

greater dimensions... Next in order of importance is that section of Europe extending from the German Seas though Prussia, Poland and Russia, towards the Ural Mountains, presenting indifferently

tracts of heath, sand and open pasture, and regarded by geographers as ONE VAST PLAIN. So flat is the general profile of a region, that is has been remarked, IT IS **POSSIBLE** DRAW A LINE FROM LONDON TO MOSCOW, WHICH WOULD PRACTICALLY VARY FROM A DEAD LEVEL." It doesn't slope.

The Atlas of Physical Geography, by T. Milner, MA, states that: "Vast areas exhibit a perfectly dead LEVEL, scarcely a rise existing though 1,500 miles from the Carpathians to the Urals. South of the

Baltic the country is so flat that a prevailing north wind will drive the waters of the Stattiner Haff into the Oder, and give the river a backwards flow 30 or 40 miles.

"The plains of Venezuela and New Granada, in South America, chiefly on the left of the Orinoco, are termed llanos, or level fields. Often in the space of 270 square miles THE SURFACE DOES NOT VARY A SINGLE FOOT."

"The Amazon falls only 12 feet in the last 700 miles of its course; the La Plata has only a descent of one thirty-third of an inch in a

Isaac O. Rankin writes from South America: "Buenos Aires, for example, now the largest South American city, means 'Good Airs,' and its fine climate confirms the founders' choice. We might call it the Level City. It lies at the Atlantic edge of a great plain, as flat as a floor, without even a pebblestone as big as your thumb. And it looks out on a river so wide (La Plata, 90 miles across) that it is a night's

journey to the northern shore, and so shallow that the wind sometimes blows the water out of the docks and the big steamers go around."

Carlyle B. Haynes, quoted else-

where in this book, wrote to me: "The pampas of Argentina are quite extensive in area. There is about seven hundred miles of distance fro Buenos Aires to the Andes Mountains, and very flat and level."

Mark Sullivan of Chicago, accompanied President-elect Hoover on his South American trip in 1928. In his report of that trip he states: "We arrived in Argentina at a peak of the Andes with the elevation of 12,000 feet. Rolling down the Andes for 100 miles, we came upon what here are the foothills, but at home would be the Rockies themselves. Then came a belt of vineyards and alfalfa fields looking much like Fresno, California. That was beauty, but it was beauty in minimum, beauty of garden and beauty of cameo compared to what we were now about to see-a pampas stretching 400 miles from the Andes to Bucnos Aires, they are as level as any hardwood floor and as unbroken by any sec."

These men accidentally discovered these conditions and report them as they are. They were not trying to prove the earth flat, round, square, nebular or chaotic. Unbiased, most valuable witnesses.

In the book, **north** Nature and Man, by Prof. W.B. Carpenter, pp. 320 and 321, we find this language: "Nothing seems to have struck the "Challenger" surveyors more than the extraordinary FLATNESS of that depressed portion of the earth's crust which forms the FLOOR of the great Oceanic area... If the bottom of mid-ocean were laid dry, an observer standing on any spot of it would find himself surrounded BY A PLAIN.

only comparable to that of the North American prairies... The form of the depressed area which lodges the water of the deep ocean is rather, indeed, to be likened to a FLAT WAITER or TEA TRAY, surrounded by an elevated and deeply sloping rim, than that of the basin with which it is commonly compared."

R.S. Tarr, in his New Physical Geography, says, on page 20, that: "Fully three-fourths of the ocean bottoms are broad expanses of plain; and much more than half the land is either plain or plateau."

At this point I wish to equate statements from Dr. Frederick A. Cook, Capt. R.E. Peary, and Raold Amundsen, Arctic and Antarctic explorers.

Cook said: "We reached the Pole on April 21, 1908, and noticed for the first time in history the physical conditions about the Top of the Globe." Both Cook and Peary use identically the same words to describe the con-

ditions they found "about the Top of the Globe." Each said he found "a sea of moving ice. No lands. No life. Large, level, old ice fields."

This information is given in a booklet entitled, *The Case of Dr. Cook*, by Fred High, editor of *The Platform*, Chicago, Ill, who comments thus: "If there was anything in the Western Arctic between the North Pole and 87° 47' north but "a smooth sheet of level ice" [as Cook reported], Peary could not have covered the intervening 133 geographical miles in two days and a few hours... with its unique flat surface."

Here, then, is an area of at least two degree distance on either side of the pole. "about the Top of the Globe," or a tract of 266 miles diameter that has "an unique flat surface." Now, the bottom of anything is always directly opposite to the top of it. Then if the Top of the Globe is "about" the North Pole the bottom of the globe must be "about" the South Pole. So hear what Captain Raold Amundsen said of the ill-fated Scott expedition to the south. This is taken from a Chicago daily paper. He said: They were drawing their own sledges. They had no dogs. Always before them stretched this awful waste of ice. It is flat ice, stretching tight across the country in long, glassy undulations so far and white the eye cannot bear to follow it. The great flat expanse offers a terrific sweep for the blast (wind) and there is no protection except what man is able to build for himself."

Here are the exact words of these explorers declaring the flatness of the region about each pole.

It is perfectly plain from these quotations, that the face of the earth, both above and below the level of the ocean's surface, is a plane. This position is strengthened by the reports of aeronauts of how the earth looks to the man in a balloon. The *London Journal*, July 18, 1857, says:

"The chiefpeculiarity of the view Continued on Page 2

## A Scot Speaks\_

Dear Mr. Johnson:

An interesting demonstration that the Earth is not round has just occurred to me; if you have not already come across it, you may find it to be of some use.

Consider that a magnetic compass points North in a **straight line**. This means that, on a globular planet, the further south one travels, the more the compass must be angled towards the ground in order to work. Thus, at the equator, it would have to be pointed down at an angle of 45 degrees, and in Australia, it would have to be aimed almost straight down!

Since this is not so, we can only conclude that, logically, the World must be FLAT.

Keep up the good work!

Yours Sincerely, Member in Scotland

Ed. Note: More and more through the years I can see why for a person to be King of United Kingdom MUST have Scottish blood.

It is required. I see the point, for

Scottish people are noted for their Strong Mind. Some are led to believe they are stubborn. It's not stubbornness, but a Sound Mind not distracted by fol de rol. Even a raging bull can and IS distracted very easy (like people today). This is how the bull fighters kill the bull and KILL him while he pursues a silly red coat. Ditto USA today. USA is being killed by the bull fighters, now called "scientists".

I have often wondered why and how I have kept my reasonable sane mind all my life, while the herds have ran wildly, and have become more absurd and silly by the year!

Perhaps it's because my Great Grandfather came over here from Scotland, came on one of the Tall Ships as they call them today. After many adventures in South Seas and Mexico... arrived in TEXAS (where I was born) became a TEXAS RANGER. I used to wonder how a young Scot could qualify to be a T.R.? I have learned it was because SCOTS are known to have STRONG MINDS, Strong in EV-

ERY way. A few Rangers attacked Thousands and THOUSANDS of real tough bad hombres, Civil War just over. No average person could do this job, it took a form of Super Man to do the job. The credo was this, FIRST, be RIGHT, KNOW you are RIGHT... then, attack, be it one bad man or a hundred HAVE NO FEAR OF ANYTHING, be right go forward!

The Scotsman who wrote this letter is such a MAN, his MIND is TRUE and STRONG, and his CHARACTER is the same. You know they say "great or good minds travel the same road reach same conclusions." His Strong Mind arrived at same logical fact as our people arrived at. Page 1 is a drawing illustrating this done many years ago by a Top Flat Earther!

Dear Member, THANKS for the letter, you are so right. May God guide and protect you, as all the REAL PEOPLE are brought out from the herd, to, in time, be the KEEPERS on THIS ONE WORLD, the FLAT EARTH.

# A Scot Speaks

SIR,—Mr. Layton still dissatisfied, yet too nervous for your arena, writes to me confessing an "Atmospheric" squeeze for the poor globe sides of only 27 million tons. Then by mensuration, multiplying the supposed circumference of 25,000 mils by the diameter of about 8,300 we have a surface something like 207½ millions square miles, which again must be multiplied by 27 millions to get the whole pressure, so that we may well wonder why we are not balancing our bodies on something like a jelly inconceivably large. But the "atmosphere" (a word from the Greek. meaning "smoke of the ball") is said by physicists to be just as high as their theory will allow, 50 or 50 miles, and as a kind of outside ball for the earth whilst squeezing it so terribly, it whirls as fast or 1,000 miles an hour. and flashes along with it quicker than forked lightening around the sun. Now, why does the air press down and not up, though astronomers conveniently deny anything to be either up or down, there being therefore neither east nor west, north nor south, nor, indeed, any direction of the big ball with its air envelope to turn? What makes the "atmosphere" or the sea-earth globe whirl top-fashion, astronomers can't tell, and whether the "centripetal and centrifugal forces," which push the "Earth" along the imaginary rails of the annual orbit, do the same friendly job for the air, astronomers don't say, perhaps thinl nobody would ask. Proctor, with 22 figures for the "Earth's" weight, or six sextillion tons, makes his dupes scratch their heads utterly dumfounded; and yet the monster mass floats light as a little cork on a boundless sea of unknown ether found only in Copernican heads. Then as the globe flashes along faster than a red thunderbolt, according to Herschel it nods and waves its enormous head as if seized with St. Vitus's Dance. Yet what common sense can't see is, how with all this constant tumbling head over heels, we don't choke or get pitched against the man in the moon. Ah! but don't we always carry on our head and shoulders an aerial pillar 50 miles high, some tons in weight, enough to crush us outright, whilst the devil with his gravity far down in the infemal regions hauls us towards himself? Still that we may bear all this squeezing, tugging, and tossing ought not astronomers to say men are not flesh and blood but malachle iron?

Moreover, the scientists say the stars are not stars, any more than the sun and moon are what they are, but tremendous globes as many million miles off as they please to put them, with men hanging from the heels in danger of being burnt by flying comets. Also in "words of learned length and thundering sound" the evolutionist tells his "tale of wonder to gull the mob and keep them under," —that our great, great grandpapas were monkeys, baboons, apes, or gorillas—what a beastly pedigree! So we have a new edition of Genesis 1: "In the beginning, somewhere (says Lord Kelvin) between 20 million and 400 million years ago, was fiery gas; and gas after many years hardened somehow into solid rocks, which partly softened at length into cabbages, etc., whence sprouted long after tadpoles, and the tadpoles begat a donkey, and donkey begat a monkey, and after many ages the monkey begat Adam." These tales are great theories, of course, because fathered by men great because of their theories. Yes, but there are mathematical "proofs"—aye, and as mystical as Egyptian hieroglyphs, entitling the scientists to a monopoly of mutual squabbling.—Yours, etc.

Ed. note: This letter is to the editor of a Scotland newspaper, many years ago. Note the different attitude and the reasonable logical mind, the two plus two is four thinking! Today, in USA, this generation is the most gullible, illogical and UNreasonable perhaps in history! Maybe could call it the fish age - they swallow every bait, hook, line and sinker! The entire hoax of "astronomy", planet earth is not only wrong, but is downright SILLY, ABSURD, CHILDISH NONSENSE! The delusion is not a theory or idea WORTH EVEN TALKING ABOUT! Talk about Greek mythology or lool Arabian nights! They are at least entertaining. Grease ballism is SILLY such childish drivel to be entertaining, RATHER is an INSULT TO AN ADULT PERSON. Scottish people have a Strong good mind and are insulted when someone tries to palm off a childish nonsense as fact!

### **Dues-Donations**

Youknow dues due January 1. Many have sent in the S-but MANY have not (since no December issue - no notice Due) so Please Dear Members subscribers SEND IT IN! It is the lifetime for THE FLAT EARTH NEWS and the, by FAR, the most important WORK IN THE WORLD. Since only through FES can aperson become Sane and Join the REAL PEOPLE. What good is a person's life, if they live it as a "programmed idior" not even knowing which is UP? The entire REASON for this work is to give worthy ones a CHANCE... to come out from the

HERD of beasts of prey, programmed idiots, who cannot and will never bepart of God's Kingdom, the ones having dominion over this ONE WORLD (only one world in existence) and our Job to be herdsmen over the beasts, the cattle, who are unwilling and or unable to stand upright and be MAN, a sane reasonable kindly servant of the CREATOR of THIS ONE WORLD.

SEND IN DUES, DONATIONS
ALL NEEDED except for those who have already sent '94 dues,
EVERYBODYS DUES ARE DUE.

### **Personal**

Sorry we didn't get the December issue out. But there was a good reason! The greatest woman of this century, **MARJORY WAUGHJOHNSON** was sick. So everything ground to a halt, no letters answered, have vast stack beside me now February 2, 1994. At last will get them answered. This GREATEST most VALU-ABLE woman on earth MARJORY WAUGH JOHNSON. (She's the ONLY woman on earth, with the mind, spirit and character and desire to help save the world. Rest of women are being led BACKWARDS, by rings in their noses, into being mere beasts. MARJORY stands alone, on EARTH as an example to all women

and men of being a REAL HUMAN. Has devoted her life to being a help to all GOD's creatures on earth, twofooted, four-footed, winged and furry. Marjory's example and message to women WAKE UP, understand just WHAT men have done to create this evil world, CONCOCTED THE CRAZED IDIOT CHILDISH DE-LUSION THAT "Men know all about earth and heavens with the carnie con game called "science"). Anyway Marjory had two trips to hospital, two weeks in each time, I of course never left her side day or night. Sono December issue. She is better, will be OK, so full speed FOR-WARD.

### **Scientific Testimony...**

Continued from page 1

from a balloon at a considerable elevation was the altitude of the horizon, which remained practically on a level with the eye at an elevation of two miles, causing the surface of the earth to appear concave instead of convex, and to recede during the rapid ascent, whilst the horizon and the balloon seemed to be stationary."

J. Glaisher, F.R.S., in his work, "Travels in the Air," says: "On looking over the top of the car, the horizon appeared to be on a level with the eye, and taking a grand view of the whole visible area beneath. I was struck with its great regularity; all was dwarfed to one plane; it seemed too flat, too even, apparently artificial."

M. Camilla Flammarion testifies:
"The earth appeared as one immense plane richly decorated with ever-varied colors; hills and valleys are all passed over without being able to distinguish any undulation in the immense plane."

Hear the Aeronaut Elliott: "I don't

know that I ever hinted heretofore that the aeronaut may well be the most skeptical man about the rotundity of the earth. Philosophy forces the truth upon us; but the view of the earth from the elevation of a balloon is that of an immense terrestrial basin, the deeper part of which is directly under one's feet. As we ascend the earth beneath us seems to recede-actually sink away-while the horizon gradually and gracefully lifts a diversified slope stretching away farther to a line that, at the highest elevation, seems to close with the sky. Thus upon a clear day the aeronaut feels as if suspended at about an equal distance between the vast blue oceanic concave above, and an equally expanded terrestrial BASIN below "

Figure 6, presented below, fully illustrates the testimony of these gentlemen, and shows plainly that the view of the earth form a balloon is the direct opposite of what should be seen on a globular surface.

I'm not sure it would be wise to draw attention to George Orwell with a meme for the FES.

Orwell also said (in that same "As I Please" column) How Do You Know the Earth is Round?:

As for the Flat Earth theory, **I believe I could refute it**. If you stand by the seashore on a clear day, you can see the masts and funnels of invisible ships passing along the horizons. This phenomenon can only be explained by assuming that the earth's surface is curved.

He was actually saying that one didn't need to be an astronomer to ascertain that the world was spherical: It was obvious to any layman.

Yes, one does not need to be an astronomer to ascertain the worlds shape, flat or round. That was the point of the meme. Is that lost? I figured it would come up with the context of the set.

Perhaps you are right though. His proof, however, is as silly as most others. Such things are clearly outside his skillset.

He doesn't assert observations as truth, but instead his explanation of observation as truth. I wouldn't say either of us (or any of us) are particularly qualified to make such assertions to "truth". However his is an example of tunnel vision. The sinking ship phenomena has been modeled in several coherent ways. EA, Relativistic FET, Parallaxian Perspective, and relative wave sizes all come to mind.

To Be Updated Regularly George Bernard Shaw Knows. In the middle ages people believed that the earth was flat, for which they had at least the evidence of their senses: we believe it to be round, not because as many as one per physical reasons for so quaint a belief, but because modern science has convinced us that and that everything that is magical, improbable, extraordinary gigantic, microscopic, heartless or The Flat Earth Society Wilfred Knows. What about those people living in China? Do you want me to beleive they have magnets in their shoes? The Flat Earth Society

You do understand that this bit from Wilfred is \*satirizing\* people who believe that the Earth is Flat. Even most young schoolchildren know that there is no gravity in space, no up or down, so nothing would be pulling people in the Southern Hemisphere down off of the planet. But the joke is that Wilred is kinda dumb.

### LUNAR ECLIPSES AND THE SHADOW OF THE EARTH

Sep 1, 2016 JohnDavis

In January 2016 an article was posted on popsci that claimed to debunk the flat earth. Let's give this article some due diligence and topple its supposed proofs of curvature! You can find the article here.

Every so often we will see the eager glob post a blog article to attempt disproof of our theories. I have found that usually they have not spent the proper time even learning of ours! So often the globularist likes to take evidence and draw it wide enough to claim it is proof. We will show case by case why these 'evidences' are not proofs and how many are actually incorrect.

This week we will be looking from the point of view of the Rowbotham school of flatist thought.

Shadow of the earth on the moon? No one has ever seen it in its entirety. - Charles Fort, *Book of the Damned* 

Does the shadow on the moon prove the Earth is round? First we must examine if the shadow is actually the shadow of the Earth! We have some compelling reasons to think it's not.

When we look into Flat Earth Literature, we see that the model of lunar eclipses given to us make absolutely no sense what-so-ever. We must conclude as William Carpenter did in *One Hundred Proofs That The Earth Is Not A Globe*.

The Newtonian hypotheses involves the necessity of the Sun, in the case of a lunar eclipse, being on the opposite side of a globular earth, to cast its shadow on the Moon: but, since eclipses of the Moon have taken place with both the Sun and the Moon above the horizon, it follows that it cannot be the shadow of the Earth that eclipses the Moon; that the theory is a blund; and that it is nothing less than a proof that the Earth is not a globe.

We will borrow here from Samuel Rowbotham who talked at length about this in his work *Zetetic Astronomy: Earth Not A Globe*. He supplies for us several instances where both the sun and moon were visible during a lunar eclipse. As he puts it "is it possible that a 'shadow' of the earth could be thrown upon the moon, when sun, earth, and moon were not in the same line?"

You may wish to see some of the citations that this indeed happens as it will likely surprise the globularist who holds his faith very tightly. One occurred in Paris, 19th of July, 1750 as reported to Rowbotham through *Astronomy and Astronomical Instruments* by George G Carey. Again on 20th April, 1837 and the 20th of September 1717 reported through McCullochs Geography. The list goes on, citing as far back as Pliny.

The explanation of this given by round earth science is that it has been caused by refraction. This at first seems very likely and a solid answer. When we examine the situation further though, as Rowbotham did, we see this to be utter balderdash. He supplies this simple experiment any man can do on page 102.

An object by refraction is bent upwards; but the shadow of any object is bent downwards, as will be seen by the following very simple experiment. Take a plain white shallow basin, and place it ten or twelve inches from a light in such a position that the shadow of the edge of the basin touches the centre of the bottom. Hold a rod vertically over and on the edge of the shadow, to denote its true position. Now let water be gradually poured into the basin, and the shadow will be seen to recede or shorten inwards and downwards; but if a rod or a spoon is allowed to rest, with its upper end towards the light, and the lower end in the bottom of the vessel, it will be seen, as the water is poured in, to bend upwards - thus proving that if refraction operated at all, it would do so by elevating the moon above its true position and throwing the earth's shadow downwards, or directly away from the moon's surface. Hence it is clear that a lunar eclipse by a shadow of the earth is an utter impossibility.

Additionally we have other inconsistencies with the lunar eclipse and round earth orthodoxy. Rowbotham again shows us one of these paradoxes -the moon's entire surface has been distinctly seen during the whole time of a total lunar eclipse!

He provides the following account:

The appearances were as usual till twenty minutes past nine; at that period, and for the space of the next hour, instead of an eclipse, or the shadow of the earth being the cause of the total obscurity of the moon, the whole phase of that body became very quickly and most beautifully illuminated, and assumed the appearance of the glowing heat of fire from the furnace, rather tinged with a deep red… The whole disc of the moon being as perfect with light as if there had been no eclipse whatever!... The moon positively gave good light from its disc during the total eclipse.

If this seems anecdotal to you, I suggest you grab a copy of *Earth: Not A Globe* as he goes on for a good 4 or 5 pages with additional citations. The globularist here may say it is light refracted from the earth. The red color supposedly comes from

Rayleigh scattering. So often the positivist attempts to shove the round hole into the square block! So often he does so with refraction! From here he takes his assumption of the round earth and calculates what the variables would need to be to allow for a red moon. Then against all reason he declares it true - without a second thought. This may suit him well, if only the light from the earth was a deep bright red! Go out and observe it dear reader. Do you truly believe this is light that was Rayleigh scattered through the atmosphere?

Of course not. This is evidenced by the fact that the sky night is not red, but black! Should this light be bending this way and that to travel around the earth, we would see some of this light scattered within our atmosphere giving us a red night sky. Of what fun it is to watch the mental gymnastics of the round earther determined to keep hold of his faith.

Moving on to some more modern works, we can look at Mark Sargent's Dome model which also shows the experiment to be meaningless. In his book *Flat Earth Clues*, we see that "All eclipses in the enclosed world model are artificial, like they would be in a planetarium." So faithful of his view, the globularist will not suffer to hear the opposing view. This is why he presents only strawmen for himself to beat down instead of addressing the real claims of Flat Earth Theory. In reality, every notable flat earth theory of the last 100+ years has had an explanation for this.

Next week we will be toppling down Eratosthenes and his infamous sticks.

I'm not sure it would be wise to draw attention to George Orwell with a meme for the FES.

Orwell also said (in that same "As I Please" column) How Do You Know the Earth is Round?:

As for the Flat Earth theory, **I believe I could refute it**. If you stand by the seashore on a clear day, you can see the masts and funnels of invisible ships passing along the horizons. This phenomenon can only be explained by assuming that the earth's surface is curved.

He was actually saying that one didn't need to be an astronomer to ascertain that the world was spherical: It was obvious to any layman.

Yes, one does not need to be an astronomer to ascertain the worlds shape, flat or round. That was the point of the meme. Is that lost? I figured it would come up with the context of the set.

Perhaps you are right though. His proof, however, is as silly as most others. Such things are clearly outside his skillset.

He doesn't assert observations as truth, but instead his explanation of observation as truth. I wouldn't say either of us (or any of us) are particularly qualified to make such assertions to "truth". However his is an example of tunnel vision. The sinking ship phenomena has been modeled in several coherent ways. EA, Relativistic FET, Parallaxian Perspective, and relative wave sizes all come to mind.

Since the dawn of history, the Moon has possessed an almost unequalled hold over the imagination of man, provoking by turns fascination and even worship. Mankind has studied the Moon for thousands of years, and some human depictions of its luminescent features  $\underline{\text{may}}$  be over 5,000 years old.

However for as long as man has revered the Moon, he has also feared it. This topic will chronicle how ancient cultures have perceived the Moon's harmful effects, how modern

studies (both scientific and Zetetic) corroborate this view, and how and when to prepare to prepare for periods of high lunar activity and/or exposure. It will also provide a Zetetic Lunar Calendar, and a forecast/record of impending/past spikes in Lunar activity:

- 1. Moonlight: Historical & Socio-Cultural Perspectives
- 2. Moonlight: Scientific & Zetetic Perspectives
- 3. Moonlight: Precautions & Preparations
- 4. The Zetetic Lunar Calendar
- 5. The Lunar Forecast

Alarmism is not our aim here at the Flat Earth Society, but the threat presented by contact with Lunar rays is significant, and the mainstream media has proven unwilling to alert the public to the evidence for and dangers of this hazard. Our only goal is to make sure that you and your loved ones remain safe.

Any suggestions regarding additions or improvements should be posted in this topic.

Moonlight: Historical & Socio-Cultural Perspectives « Reply #1 on: May 05, 2012, 10:21:09 PM »

# **Moonlight: Historical & Socio-Cultural Perspectives**

Among the earliest of cultures to recognise the power of Moonlight were <u>Assyria and Babylonia</u>, who considered it to have an notable effect on the fertility of women, though whether this was a positive or negative effect is unknown. Both Aristotle and the Roman historian Pliny the Elder are known to have <u>associated the Moon with insanity</u>, and as early as the 13<sup>th</sup> century, the term "lunatic" was in use, derived from the Latin word for Moon, "luna". It is probable that the word has earlier origins, perhaps going back to the original Roman-era Latin. The Romans even believed that <u>Moonlight solidified to form the gem known as Moonstone</u>. What's clear is that the Moon was clearly regarded as having the ability to affect terrestrial matter, and the association between the Lunar cycle and insanity was clearly established well over 2,000 years ago.

Indeed, once the work of the Ancients was recovered in Western Europe, these observations quickly took on canonical status in Western medicine and psychology. The German-Swiss physician Paracelsus contended that mania was directly linked with the Lunar cycle, as did the English jurist Lord Blackstone, and the German psychologist Ewald Hering. Indeed, in the Bethlehem hospital in London, it was found necessary to chain and in some cases flog inmates in order to "prevent violence" during certain phases of the Lunar cycle<sup>1</sup>.

Moonlight has also been associated with other strange effects and powers, most notably lycanthropy, the phenomena whereby a human possesses the ability to turn into a wolf, or transform into a Werewolf, a creature that shares the characteristics of wolf and man. Werewolves and their capacity to transform were "often associated with the appearance of the full moon", so that "it was said that a man or woman could turn into a werewolf if he or she . . . slept outside on a summer night with the full moon shining directly on his face". Furthermore, "[i]n some cultures, individuals born during a new moon or suffering from epilepsy were considered likely to be werewolves". Although the existence of Werewolves is the subject of dispute, it represents an ancient, cross-cultural association between Moonlight, abnormality, danger and derangement, one that persists to this very day, as can be seen in Neil Jordan's *The Company of Wolves*.

It is therefore apparent that throughout much of recent human history, enlightened thinkers and medical experts and ancient cultures have identified the Moon's power to affect man's

cogitation, and to distort and warp his ability to reason when under the influence of its beams.

Moonlight: Scientific & Zetetic Perspectives
« Reply #2 on: May 05, 2012, 10:22:04 PM »

# **Moonlight: Scientific & Zetetic Perspectives**

The question of the Moon's capacity to harm or endanger humans was largely ignored by scientists during the late 19<sup>th</sup> century and for much of the 20<sup>th</sup> century, no doubt due to their belief that the Moon was a dead world that merely reflected the light of the Sun. The general public's increasing ignorance was perhaps as a result of increased electrification, and a resulting decrease in awareness with respect to the all-pervasive nature of the Moon's rays, which no doubt would have been more obvious prior to the advent of continuous street-lighting and reliable portable illumination such as flashlights.

Nevertheless, the experiences of sensitive professions forced scientists to examine the Moon's capacity to affect human behaviour. The resulting research has provoked considerable debate within the scientific community, with many scientists affirming the Moon's power, and others contesting their results. However, given the methodological flaws of the scientific method, such dispute is far from surprising.

In contrast, since the <u>creation</u> of the Zetetic Method, its followers have had no doubt as to the power of the Moon and the dangers presented by Moonlight. In his seminal treatise, *Zetetic Astronomy: Earth Not a Globe*, Dr Samuel Birley Rowbotham determined not only that the Moon's rays are of a different and independent composition to those of the Sun, but also that exposure to its rays can prove most injurious, resulting in the spoiling of food such that it is dangerous to eat, and that it can even cause blindness if direct exposure to its rays is prolonged. The Moon's capacity to damage terrestrial flora (which is exposed to Moonlight more often and more regularly than most humans) has been established not only <u>by Zetetics in the 19<sup>th</sup> century</u>, but also by <u>contemporary researchers</u>. Moreover, <u>a number of Zetetics have observed a variety of detrimental health effects under its influence</u>, such that within the Zetetic community there is a broad consensus regarding the Moon's capacity to harm biological lifeforms with its bioluminescent rays.

Moonlight: Preparation & Precautions

## **Moonlight: Preparation & Precautions**

Of course, the natural response when presented with such compelling evidence is to ask how one can avoid the risks posed by Lunar rays. Unfortunately, the Moon is an almost everpresent feature of our lives, and it emits its injurious beams for a considerable period almost

Administrator

Q 12107

40

every twenty-four hours.

The most important step, therefore, is to be aware of when such emissions are most likely to take place. Thankfully the Moon's emanations are regular, and therefore with sufficient research can be predicted, so that one can take steps to avoid it when it is most dangerous. Depending on your location, the apparent state of the Lunar cycle may vary, so we advise that you conduct independent, Zetetically rigorous research, preferably through remote means such as video cameras or specialized means of filtrating and projecting its light. You will soon record a cycle lasting approximately nine and-a-half days, punctuated by varying but regular degrees of Lunar emissions.

As the above research indicates that the harmful effects of the Moon correspond with the quantity of Moonlight to which one is exposed, the Full Moon is obviously particularly dangerous, as indeed are the Waxing and Waning Gibbous. Exposure to Moonlight during these periods should be kept to a bare minimum, and ideally should be limited to situations where contact is either necessary or unavoidable. The Waxing and Waning Crescent are obviously less dangerous, but nevertheless it is advised that one should not be foolhardy, as the limited amount of light produced by the Moon during these periods will be more than offset by any extensive exposure.

During the standard Lunar cycle, keeping regular hours and remaining indoors after dark should be enough to prevent illness in the majority of cases. However, many people may find themselves in situations where they are forced to expose themselves to Moonlight. In such cases, noted Zetetic James MacIntyre has the following advice:

#### Quote from: James on September 23, 2010, 06:28:17 PM

When viewing the Moon, or expecting to face exposure to the Moon, please try to follow these procedures:

- Wear sunglasses Dark glasses may protect your eyes, which are particularly sensitive, from Moon rays which can
  damage your eyes.
- Cover any exposed skin Cases of Moonlight exposure to bare skin can be particularly severe. Always wear long sleeves, gloves and a hat. A balaclava or thick scarf can protect your nose, mouth, cheeks and ears from the Moon.

He also advises that even when one is inside, one should ensure that your shelter is adequately sealed and protected:

#### Quote from: James on September 23, 2010, 06:28:17 PM

77

Protect your home - Moonlight can seep in through uncovered windows, doors and skylights. Make sure that you
have thick curtains, or, better still, shutters on major windows which are likely to face the Moon. You may find it
useful to tape reflective material, such as aluminium foil (shiny side out) on gaps in your home, or even on the
windows themselves, in order to improve Moon-protection further.

Finally, one should take precautions to ensure the safety of any other biological life for which you may be responsible:

#### Quote from: James on September 23, 2010, 06:28:17 PM

66

- Make sure your pets are safe The Moon can hurt animals just as much as humans. Consider bringing your pets
  indoors during the evening, or if you intend to let them roam the night, you may want to wrap them up in protective
  clothing just as you did with yourself!
- Watch out for plants Moonlight can putrefy many varieties of unsuspecting garden plant. Most flowers close their petals at night in order to protect them from Moon rays, but during the Super-harvest Moon this may not be enough. You may want to cover even self-defending flowers and other plants with aluminium foil or another protective material.

Though such measures should prove sufficent during the standard Lunar cycle, there are also occasional spikes in Lunar radiance, notably events such as the <u>Super Moon</u> and <u>Super Harvest Moon</u>. Though rare, during these events the Moon's intensity is noticeably greater, and thus its effects are especially powerful. During these crises, MacIntyre suggests that "it may be safer to stay indoors entirely and avoid exposure". Indeed, some have even suggested that such events may cause an increase in the number of natural disasters here on Earth. Accordingly, it may best to store or stockpile the following items:

- Several days worth of clean water, uncontaminated by Lunar rays. Filling spare bottles, baths and sinks before hand is a useful strategy.
- Proteinous tinned food and vegetables, along with any other non-perishables.
- A portable gas stove with plenty of spare gas cannisters.
- A fully-equipped first-aid kit.
- An emergency heat source, and sufficient blankets and other insulative materials.
- At least two high-quality flashlights, with plenty of spare batteries. If disaster strikes, you may be without electricity, and (for obvious reasons) you will be unable to navigate by Moonlight indeed you should be sealed off in complete darkness. Make sure to have several high-quality flashlights that will run efficiently and reliably.
- At least one multi-tool, and ideally a decent knife and perhaps a folding saw and hatchet.
- Depending on the situation, it may be advisable to stock several firearms and plenty of ammunition, depending on local laws. Natural disasters often bring out the worst in some people, and under the deleterious influence of a Super (Harvest) Moon it could be even worse. Do not seek violence, but be prepared to defend you and your family from the exposed.

So that our members are aware of such crises, we will endeavour to keep an updated list of immanent Super Moon events, detailing the date, duration and (when possible) intensity of these spikes in Lunar activity.

# The Zetetic Lunar Calendar

Ancient cultures across the world and throughout history have given names to the first Full Moon of a given month, and following the wisdom of the ancients, I consider this a useful way to categorise and refer to Lunar phenomena. However, as a host of different names exist, I felt it would be wise to create a Zetetic Lunar Calendar, choosing 12 names from among the various appellative Lunar traditions. This provides us with a common vocabulary with which to discuss Lunar events.

The Zetetic Lunar Calendar is as follows:

January: The Wolf Moon

**February:** The Hunger Moon

March: The Death Moon

**April:** The Waking Moon

May: The Milk Moon

**June:** The Hot Moon

**July:** The Mead Moon

August: The Red Moon

**September:** The Harvest Moon

**October:** The Dying Grass Moon

November: The Hunter's Moon

**December:** The Oak Moon

These names will be also be used in the Lunar Forecast below.

Moonlight burns were just mentioned on ABC's primetime show: Sharktank.

These millionaires and billionaires know the truth. Too bad they'd rather make money than warn more people.

Here is the bio of the shark that mentioned it:

Quote

O'Leary started a software company in the basement of a small Toronto home along with partners John Freeman and Gary Babcock. His mother provided the seed investment of \$10,000, which he used to start software publisher SoftKey. SoftKey products typically consisted of software intended for home audiences, especially compilation discs containing various freeware or shareware game software packaged in a "jewel-case" CD-ROM. By 1994, Softkey had become a major consolidator in the educational software market, acquiring no less than sixty rivals, such as WordStar and Spinnaker Software. In 1995, Softkey acquired The Learning Company (TLC) for \$606 million, moved its headquarters to Boston, and took The Learning Company as its name. TLC bought its former rival Brøderbund in June 1998 for \$416 million. In 1999, The Learning Company and its 467 software titles were acquired by Mattel in a \$3.8 billion stock swap.[5] Sales and earnings for Mattel soon dropped, and O'Leary departed from Mattel. The purchase by Mattel was later called one of the most disastrous acquisitions in history.[6]

In 2003 he became co-investor and a director in Storage Now, a developer of climate controlled storage facilities. Through a series of development projects and acquisitions, Storage Now became Canada's third largest owner/operator of storage services with facilities located in eleven cities serving such companies as Merck and Pfizer when it was acquired by the In Storage REIT in March 2007 for \$110 million.[citation needed]

In March 2007 O'Leary joined the advisory board of Genstar Capital, a private equity firm that focuses on investments in selected segments of life science and healthcare services, industrial technology, business services and software. Genstar Capital appointed O'Leary to its Strategic Advisory Board to seek new investment opportunities for its \$1.2 billion fund. O'Leary also serves on the executive board of the Richard Ivey School of Business at The University of Western Ontario. He is a member of the investment committee of Boston's 107 year old Hamilton Trust and an investor of EnGlobe, a TSX listed company.[citation needed] He is a former co-host of SqueezePlay on Business News Network, Canada's national business television specialty channel. O'Leary is currently working as the entrepreneur/investor co-host for the Discovery Channel's Discovery Project Earth, a project that explores innovative ways man could reverse climate change.[7]

O'Leary serves as foil to Journalist Amanda Lang on The Lang and O'Leary Exchange on CBC News Network. He is also a venture capitalist on the Canadian version of Dragons' Den and host of Redemption Inc. which both air on CBC Television, and a "shark" on the United States' version of Dragons' Den, Shark Tank, which airs on ABC.

In January 2008 he co-founded O'Leary Funds Inc., a mutual fund company that targets buy and hold investors. He is the company's chairman.

I found this lunar calendar to be inspiring.

I have been doing (reading and watching videos) some courses around Internet related to Astrology and I found this post to be linked in some sort to the names given to the moon.

I will bring the names and the relation of the zodiac symbols to their respective moon's name.

I only suggest those that are affected do something to prevent it. If you are not affected, as I, there is no worries.

99.9% or more of the worlds population are not affected. But to those that are, take measures.

Read Earth Not a Globe. This section was linked to in my original post, had you taken the time to read it.

And no.

Ok so if I provide a link demonstrating that Rowbotham drank Goji juice I could then start a post on it in FE General, right?

Go for it. But if it's rubbish (i.e. a lack of clear textual links to the FES) I'll just move it.

It might be worth your while reading the board-specific guidelines:

This board is for discussion about the Flat Earth Society or the Flat Earth movement in general. For example, if you want to ask questions about The Conspiracy, **flat earth believers and their beliefs**, or anything else not related to Flat Earth Theory, this is the place for it.

This topic is precisely the kind of subject matter intended to be posted in this board.

#### **Mysticism and Science**

« **on:** March 02, 2014, 10:44:21 AM »

When we look at science, we hope to see a rigid yet dynamic system which we use to quantify our world. Supposedly it is designed from the outright to remove bias with its main tenets dictating a strict non-opinionated approach to understanding and quenching our thirst and curiosity. At least that is our hope. In examination, we will show that mysticism, hallucinations, dreams and madness in many cases drive our progress in understanding, or at least inspiration leading to understanding, not strictly rational endeavor. Our aim is not to discredit these advances but instead simply to reveal their sources for what they are - nonrational.

Popper would look upon such an endeavor as suspect and an issue of psychology, not the nature of science or knowledge. I firmly disagree on the basis of the potential use of such psychological provide a method of sorts. Can elegance really be said to be less psychological? We can't make any sort of claim to this effect. What is elegant to the satellite is not elegant to the traveler on Earth. Since mysticism is a valid mechanic of discovery and analysis it thus should be placed among the methodologies taught for use in science - despite its dangerous nature.

What exactly do we mean when we say mysticism or when we talk of mystical experience? Perhaps it is best if we discovered this through the context itself, which is to say through examples. We do have hordes of them, after all. And they paint their own picture.

Let us first put our attention towards those cases where vast improvements in science, technology, or understanding came through relatively normal (if indeed any of these accounts could be said to be 'normal') visions or dreams. Surprisingly it has happened more often than we'd first guess. Perhaps it occurs much more often - as one might be hesitant to talk of such experiences due to social stigma.

The most famous of these visions is like Einstein's. As a small child in school he had a vision of himself running alongside light. From this he said his work on relativity followed.

Another notable example is Nikola Tesla, known for his integral part in the design of modern alternating current. One day he was taking an ordinary walk as any of us might and a vision appeared to him of rotating burning wheels. From this came the invention of the Electric Motor in 1887.

Dreams as we can see are not an uncommon method of inspiration and enlightenment. Otto Loewi, the father of neuroscience, had a dream on Easter Sunday 1923. He woke up, grabbed a nearby pad and scribbled down an experiment to prove that the transmission of nerve impulses was chemical and not electrical. In the morning, struggle as he could he simply could not read his writing. Luckily for us he had the same dream the next day and this upon waking went straight to work, and won himself a Nobel Prize for it.

Ahh, but there are more! So much more that we must be dainty in our selection, for like Rowbotham we are overwhelmed by the truth in all directions. So much more we must question how blind those are who deny that science is irrational at its core!

August Keke discovered the ring shape of the benzene molecule under the influence of a day dream. In 1855 he had a daydream of the ouroboros while on a horse-drawn omnibus in London. To him it appeared as dancing atoms and molecules that directly led to his discovery.

Paul Davies recalls another for us in The Mind of God

Ouote

For other scientists the revelatory experience happens spontaneously, in the midst of the daily clamor. Fred Hoyle relates such an incident that occurred to him while he was driving through the North of England. "Rather as the revelation occurred to Paul on the Road to Damascus, mine occurred on the road over Bowes Moor." .... One day, as they were struggling over a particularly complicated integral, Hoyle decided to take a vacation from Cambridge to join some colleagues hiking in the Scottish Highlands:

"As the miles slipped by I turned the quantum mechanical problem ... over in my mind, in the hazy way I normally have in thinking mathematics in my head. Normally, I have to write things down on paper, and then fiddle with the equations and integrals as best I can. But somewhere on Bowes Moor my awareness of the mathematics clarified, not a little, not even a lot, but as if a huge brilliant light had suddenly been switched on. ...." [pgs 228-229]

Paul Dirac, known to some as The Mystic of the Atom, would frequently have small revelations that guided his work. Off taking a walk to get away from his work one day on the Cambridgeshire countryside when out of blue he gained slight visual insight into the problem at hand: the non-commuting quantities in Heisenberg's theory. This was pretty common for him. (126 The Strangest Man, Graham Farmelo)

So often do insights come from these non-mundane sources it is inevitable that some would try to reach such states to steal insight through non-natural methods. And this is exactly what folks do.

Thomas Crick, co-discoverer of the double Helix structure of DNA, tells the story of how his use of LSD lead to this amazing discovery. He reveals to us that he would regularly take LSD and that it helped him to understand the structure of DNA, and thus winning him the Nobel Prize.

Kary Mullis tells the BBC in their Psychedelic Scene documentary: "What if I had not taken LSD ever, would I have still invented PCR? I don't know. I doubt it. I seriously doubt it." The evidence is stacking. Hordes upon hordes of instances, such that we only need to show a few to expose the truth. And yet like the walking dead they shamble around us. Hungry to be heard.

Carl Sagan was often known to smoke cannabis which he claimed in Marihuana Reconsidered "helped him intellectually." Richard Feynman set up deprivation tanks and experimented with pot to "explore human consciousness". Edison fueled his life by Vin Mariani, a cocaine infused wine that allowed him to sleep only 4 hours a night. Steve Jobs recounts his LSD experience as the "single most important event of my life." But enough about those who found their way artificially. Far more interesting are the tales of natural experiences of this sort. Those that touch us to believe there is another abstract Platonic realm.

As it happens accomplished Physicist and Mathematician Roger Penrose has spoken often of "breaking through to the Platonic Realm." Godel as well talked of experience with a realm where he could perceive mathematical objects. Of course this theme is not new to mysticism.

Others tell of an almost sixth sense from which they receive revelation. Einstein would talk of the "old one" and his religious feelings quite often. Both David Bohm and Brian Josephson, another nobel prize winner, are known to meditate to gain mystical insights to guide their creation of theory.

David Peat talks of his experiences

Quote

A remarkable feeling of intensity that seems to flood the whole world around us with meaning ... we sense that we are touching something universal and perhaps eternal so that the particular moment in time takes on a numinous character and seems to expand in time without limit. We sense that all boundaries between ourselves and the outer world vanish, for what we are experiencing lies beyond all categories and all attempts to be captured in logical thought

Okay, I can see you've had enough. But alas, there is so much more!

Here we must mention those ideas that sprang from decidedly mystical origins. A prime example being Heliocentrism whose origins of course are from mystical traditions in both Ancient Greek and Ancient Egypt. Aside from heliocentrism, Copernicus's view that god can be known through study of the universe is what put his famous work on the Church's Restricted Book List - it had nothing to do with some war between science and religion. Likewise, Faraday's passion was summed up by his statement: "unravelling the mysteries of nature was to discover the manifestations of god." Johannes Kepler saw God as a geometer and was influenced strongly by numerology. Newton was a strong believer in astrology.

But what should we take of all this? As one should clearly see by now, even with our dainty sampling of experience, mysticism is essential to the scientific process. So ingrained is the non-mundane experience with the advance of science that we can never hope to untangle these sources as outliers and restore a purely rational narrative of scientific advance.

What can we hope to gain from nurturing this behavior?

It is likely we will see faster advancement. Hopefully we will find ourselves also in a more moral and civilized science. Through examination of more mutations, even if they come from a

somewhat socially unpleasant grounding, we can only hope to see more angles of the

situation.

#### Pagan Flat Earth Cosmography

« on: October 18, 2006, 08:46:13 AM »

The prevalent cosmographies of all ancient civilizations were Flat Earth cosmographies. This fact is attested to by learned men who have made exhaustive studies of them, both those who revere the beliefs of the ancients such as Ananda K. Coomaraswamy and Rene Guenon http://www.fonsvitae.com/coomaraswamyseries.html

http://www.mrmlbooks.com/cgi-bin/bookware.cgi

http://en.wikipedia.org/wiki/Ananda\_Coomaraswamy

http://en.wikipedia.org/wiki/Ren%C3%A9\_Gu%C3%A9non

and those who scoff at them like Andrew D. White -

http://www.infidels.org/library/historical/andrew\_white/Andrew\_White.html

http://en.wikipedia.org/wiki/Andrew\_Dickson\_White

Andrew Dickson White is evidently an outstanding representative of that class of men who are ever learning and never able to come to the knowledge of the truth. Reguardless of the late Professor White's personal opinions, certain sections of his book (referenced in the link above) give specific references to vasts amounts of information reguarding descriptions of the Flat Earth cosmographies of ancient civilizations throughout the world.

Following is an analysis of pre-Christian Flat Earth cosmographies throughout the world which does not in any way pretend to be comprehensive. As the Hellenic philosophers finish off the list, the unbiased observation of many may be noted that as far as non-Christian philosophy is concerned, the well known Hellenic philosophers constituted the most meagre, weakest, recycled "Johnny-come-latelies" among the more sophisticated philosophies and religions of more ancient civilizations, and it is among these that globularist fallacies gained significant ground for the first time which is not to say that it did not exist in older cicilizations but only that such a false cosmography held a more inferior position. In this and in many ways, the revival of the debased philosophies of the Greeks and Romans since the renaissance and the decline of ancient Christian ways have formed somewhat of a basis for the spreading of falsehoods in the modern apostate world. As Rene Guenon wrote, time is cyclical, and errors and heresies that have always existed throughout a cycle albeit in a small way gain undue prominence as disorder reigns before the close of a cycle at which point restitution is accomplished as there is nothing covered which shall not be uncovered.

Brahmin Cosmography
« Reply #1 on: October 18, 2006, 08:51:30 AM »

#### Brahmin Cosmography

The following link has some information concerning Brahmin flat Earth cosmography which is definitely the philosophy of the Rig Veda as well as the 'Laws of Manu':

#### http://www.geocities.com/Athens/Ithaca/1335/Tech/brah\_sc.html

Vyasa is the compiler of the oldest vedic book, the Rig Veda. He is the founder of Brahminism and hindu civilization. Brahminism (which is the same as vedism or hinduism) originally held a flat Earth cosmography as can be discerned from its earliest books. The flat earth cosmography of early hinduism was not substantially different from that of other early civilizations thoughout the world. Early hindus believed that the Earth was a flat Circle of Land surrounded by the Waters with the Mountain Meru located at its center. This flat Earth cosmography was held by virtually all hindus until well after the time of the Christ.

## The Deluge in Hindu Tradition

In an article entitled 'The Deluge in Hindu Tradition,' Ananda Coomaraswamy wrote that the Flood waters obtained to the level of the Moon. This fact conforms with the belief of the Ancients that the Cosmos is bounded by four Walls of Heaven located to the East, West, North, and South. The four Walls of Heaven held the Waters in as they extended upwards. The Hindu tradition that the Flood waters of Noe reached the level of the Moon does only tend to confirm the belief of the Ancients that the Four Walls of Heaven extend upwards past the Stars.

## Four Maharajas

According to 'The King of the World' by Rene Guenon, Hindu cosmology speaks of four Maharajas which are great Kings located at the extremities of the four corners of the World. These immediately draw to mind the Four Horsemen of the Apocalypse and the Four Angels which control the Winds of the World from the four corners of the Earth spoken of in the Book of the Apocalypse (Revelation) 7:1. Guenon asserted that in Hindu esoterism these four Maharajas are Kings over the four quarters of the Earth. He also stated that a small subterranean Kingdom is located at the centre of the world, and that the King of this subterranean kingdom has authority over the Four Maharajas and the "King of the World." This tradition is common to Buddhism as well, and Guenon is hardly the only writer to document this esoteric tradition. Although Guenon vigorously objects to the notion, the fact should be evident that this "King of the World" is the Devil.

http://www.sophiaperennis.com/guenon\_kingofworld.html http://www.sophiajournal.com/Vol1Num1/Article02.html

#### Hindu Globularism

The Gupta empire which lasted from approximately AD 300 to AD 510 was time of hindu revival and buddhist decline in India. It is very significant that this period occurred after the spherical Egyptian astronomer Claudius Ptolemy. Ptolemy's sphericism unfortunately influenced one of the most influential hindu astronomical treatise of the middle ages which was written during this era: the Surya Siddhanta. The Surya Siddhanta holds to spherical geocentrism. This was certainly not the case with older hindus cosmology which was flat earth oriented, and flat earthism continued to be a force in hinduism after the appearance of the Srya Siddhanta, but the sphericism of the latter pagan greeks had made its appearance in India by means of this book:

http://en.wikipedia.org/wiki/Surya\_Siddhanta

So it was that medieval hindu cosmography had a sphericist element within it. To their credit, hindu astronomers did continue to hold to geocentrism long after most europeans had given way to heliocentrism.

# Jantar Mantars

In particular, Maharaja Jai Singh II of Rajasthan in the early 1700's became a prominent astronomer (perhaps the last of the great medieval hindu astronomers). He recognized the muslim Mogul empire had begun to decline with the deatrh of Aurangzeb, and he gained military control of most of northern India and recognition by the emperor. He then studied and researched the astronomy of India and its methods in great detail. He then researched the astronomical doctrines and observation methods of other civilizations, many other countries including those of the europeans as far away as the traditional Observatory of Tycho Brahe in Denmark. Jai Singh then built five Great Observatories in five different cities in India. He named them the Jantar Mantars. These are possibly the greatest of the remaining observatories of the old astronomy ianywhere in the world. The Jantar Mantar in Jaipur, Rajasthan (Jai Singh's capitol city which he built himself in accordance with the geometry of traditional hindu Architecture) is still fully functional. The following is a website

describing the Jantar Mantars: http://www.jantarmantar.org/

A brief monograph on Jai Singh II: http://en.wikipedia.org/wiki/Jai\_Singh\_II

Resurrection Versus Reincarnation

Of particular interest with respect to Jainism, Brahminism, and Buddhism compared with some other pagan religions is the difference between the words cosmography and cosmology. Whereas cosmography strictly speaking signifies the study of the cosmos, cosmology is broader in the sense that it also may include soteriology or the study of the salvation of souls, and there is somewhat of a difference with reguards to this between certain religions. Even the ancient Egyptians (and Zoroastrians of Iran) were different from MODERN hindus in that ancient Egyptians used burial and did not cremate. The practice of cremation being linked to the false theory of reincarnation, it would be of the utmost interest to know which is the oldest practice. As erudite Hindu writer Ananda Coomaraswamy shows, the doctrine of reincarnation is modern in spirit and NOT a part of traditional Brahminism or Hinduism: http://www.fonsvitae.com/bugbearliteracy.html

An entire chapter in his book 'The Bugbear of Literacy' is dedicated to this subject which begs the question if Hindus always cremated or was there a time when they did not. Rene Guenon has stated that Zoroastrianism, the pre-Islamic religion dominant in Iran has origins racially and to some extent religiously involved with India rather than the Arab countries (the muslim connection of Iran with the Arab world being only since AD 650). Small Iranian Zoroastrian communities (known as Parsis) which still exist today in such palces as BOMBAY< Karachi and rural Iran maintain that reincarnation is definitely not traditional Zoroastrianism and that reincarnation is false as it denies the resurrection.

ORTHODOXY OR DEATH

# **Buddhist Cosmography**

# **Buddhist Cosmography**

Without endorsing either Brahminism (which is Vedism or Hinduism) or Buddhism but merely to state some truths concerning the relationships between these two demonic religions. As Buddhism is derived from Brahminism (in a very rough way like protestantism is to papism), most aspects of these religions are compatible in some way. This is demonstrated in several learned books by Ananda Coomaraswamy which basically assert that those who delve the deepest into these religions discover that they are essentially the same while often exteriorally different:

http://www.mrmlbooks.com/cgi-bin/bookware.cgi http://en.wikipedia.org/wiki/Ananda\_Coomaraswamy

One could accurately view Jainism, Brahminsim, and Buddhism as three different levels of the same religion (although many Jains would characteristically likely find that untenable). Jainism is the most ascetic and least popular, especially in the modern world. It does not proselytize which explains why it never left India. However, research which takes the ancient records of both the Jains and the Brahmins at face value would (if honest) end up concluding that Jainsim is the oldest of the three and that hinduism is derived from Jainism and not the other way around. If Jainism is separated from hinduism because it is too loose, then Buddhism tends to the opposite extreme. Buddhism is more lax than hinduism, does proselytize and has spread to other countries, and tends to attract larger numbers of people with doctrines like its "great truth of the Middle Way."

Despite exterior differences in many aspects, the cosmography of the Brahminism and Buddhism is often consistently the same. (The more complex Jainist cosmology is something to behold.) Buddhism also believes in Mehru, the great Mountain in the receses of the North around which the Sun revolves. This fact is actually compatible with the flat Earth cosmography of virtually all ancient religions (even the ancient Israelites as the Prophet Isaiah speaks of the Mountain in the recesses of the North). It is the modern World which rejects the concept of Mehru. Some western educated Hindus and Buddhists who accept modern astronomy try to explain this away by equating Mehru with the axis of a globe and thereby

dismiss or deemphasize precisely those very Sacred beliefs of their Ancient ones which happen to be true.

The swastika is a cosmological symbolcommon to Jainism, hinduism, and buddhism. It has four lines indicating the four directions, but also conveys the concept of revolution (i.e. of the Sun, Moon, and Stars around a central Axis which is Mehru, the central point of the swastika). This is also consistent with the five elements of Earth, Air ,Water, Fire, and Ether being the fifth and highest of the elements and most closely connected to the essence of all five and symbolized by the centre point. 'Early Astronomy and Cosmology' by Menon has an extraordinary amount of information concerning the cosmological significance of the swastika: http://www.kessinger.net/searchresults\_orderthebook.php?Title=7114

Influence of Buddhism Upon the Modern World

Throughout the nineteenth and early twentieth centuries, Russian Orthodox literature warned of the growth of the occult and particularly neo-Buddhism which was especially popular among many of the upper classes in Moscow. One of the greatest of all the examples of such neo-Buddhists was Georgi Ivanovich Gurdjeff. This Armenian philosophe has the odd distinction of having influenced both his fellow Caucasian Josef Djugashvili (Stalin) when he was a seminary student in pre-revolutionary Georgia as well as the Thule Society and the Bavarian Nazi Party by means of Hitler's Vice-Fuhrer Rudolf Hess. The prevalence of anti-Bolshevist sentiment immediately following World War I obviously played a part in the frienship Gurdjeff developed with such students of his as Rudyard Kipling and Karl Haushofer (Rudolf Hess's mentor and teacher):

http://en.wikipedia.org/wiki/Gurdjieff http://www.sophiaperennis.com/perry\_gurdjieff.html http://en.wikipedia.org/wiki/Karl\_Haushofer

Influence of Buddhism Upon the Ancient World

A thesis largely ignored by the modern West is the influence of Buddhism upon late pagan Hellenic society. The influence of Buddhism upon China is evident and obvious. The influence of Buddhism upon the West is less obvious as it has taken different forms. Hellenic philosophy became very degraded particularly after Aristotle. This was also precisely the period which witnessed the rise of globularism (and other false doctrines) in the ancient Hellenic world. Two chief schools developed:

- 1) the Stoics founded by Zeno
- 2) the Epicureans after Epicurus

The Stoics were nominally conservative and coressponded with the Jewish Pharisees. The Epicureans were notable for lack of belief in the miraclulous and corresponded with the Jewish Sadducees. in fact, it is likely that the respective Jewish orders took the lead in forming the Gentile philosophic schools after themselves rather than the other way around with all that would imply politically and otherwise.

As far as Buddhism is concerned, after the time of Alexander the Great, trade and exchange between Greeks and the East was greatly increased and many Hellenic philosophers travelled East. This fact combined with the fact that Buddhism was much stronger in the West prior to the existence of Mohameddanism in Arab lands or the Gupta Dynastic revival in India (AD 300 to 500)(which saw Buddhism decline in India in favor of a newer hinduism, makes the case for a large Buddhist causitive role in the rapid degeneration of late Hellenic paganism completely tenable at a minimum. This thesis has been advanced among others by mohammedan writer Harun Yahya in his book 'Islam and Buddhism':

http://www.harunyahya.com/buddhism01.php

and early in the twentieth century in 'An Introduction to Hindu Doctrines' by Rene Guenon: http://www.sophiaperennis.com/guenon\_hindudoc\_toc.html

Jain Cosmology

Jain Cosmology

Two Monographs on Jainist Geography of the World <a href="https://www.jainpushp.org/munishriji/jg-1.htm">www.jainpushp.org/munishriji/jg-1.htm</a> www.fas.harvard.edu/~pluralsm/affiliates/jainism/workshop/Jain%20Geoghaph.PDF

As will be seen from the corresponding post on hinduism (Brahmin Cosmography), an element of western sphericism crept into hindu cosmological belief during the Gutpa Empire era (AD 300 - AD 510)probably about the year of the Lord 400 with the publication of the sphericist hindu book 'Surya Siddhanta.' Jain cosmology, however, has been much more consistent. It has retained its flat Earth character from its foundation millenia ago even until today.

It is significant to point out a few characteristics of Jainism that distinguish it from hinduism. First, jainism is acknowledged by all as a much stricter religion than hinduism. Most hindus today allow certain substances like milk that come from animals as part of their "vegetarianism." Not only do Jains reject this, but they also reject certain vegetables like onions and potatoes. Jainism is not a proselytizing religion which is why it never left India. Its strictness is part of the reason so few people follow it. It is in many ways the opposite of buddhism and buddhism's doctrine of the middle way.

Many modern secular historians date jainism's origin from the sixth century BC and its founder as Lord Mahavira who did live during the same time as Buddha, both from India. As buddhism was a protest against hinduism and a movement in a liberal (atheistic) direction (roughly like protestantism was to roman catholicism), jainism was a movement in the opposite direction. Actually, the jains and their records maintain that jainism is more ancient than hinduism. The sages of jainism are called tirthamkiras, and Mahavira was not the first but rather the twenty-fourth and last of the tirthankiras. The jains state that the first tirthankira lived before Vyasa who is reguarded as the compiler of the rig-veda and the founder of hinduism. The only people I have found doubting the antiquity of jainism are secular historians who rewrite history by saying it started around the same time as Buddha as part of the protests against hinduism about 550 BC, or at the earliest they admit it started around 800 BC, not the third millenium BC which jain historians maintain. And also I have not found any traditional hindus who dispute the antiquity of jainism, but only modern secular historians who do not follow either religion. As a matter of fact, Ashoka (the most powerful emperor of India ever who converted to Buddhism and became its most prominent sponsor in the middle of his reign) had a grandfather by the name of Chandragupta Maurya. Chandragupta Maurya was the King of India at the time of Alexander's invasion, but as his capitol was in Patliputra (modern Patna), his kingdom never fell as it was beyond the furthest march of Alexander's armies which only went so far as such areas like Punjab and Kashmir in the northwest of India. And King Chandragupta Maurya was a jain rather than a hindu, and he was still king of all India (north and south) decades after Alexander's bones had gone to rest in a crypt in Alexandria, Egypt.

Incidentally, the jain records indicate that the first tirthankira, or founding sage of jainism, was of immense size in that he was a giant much taller than average men. Seeing that giants do exist now as well as then and they were much more widespread in the third millenium BC when the Bible as well as ancient records speak of them, there is know reason to doubt the authenticity of this fact. I myself am not a jain and view it as a cult. It makes perfect sense to me that a false religion would trace its history back to the son of a fallen angel (which is what a giant is, according to Genesis).

As to jain cosmology, I will summarize it briefly:

Jains believe the entire cosmos consists in the form of the 'cosmic man.' The shape of the cosmic man is that of three pyramids. The bottom pyramid representing the region of the legs is taller than the top two pyramids and sits on its base, and it has a flattened top. The middle pyramid also has a flattend top, but it is inverted so that its top rests on the top of the bottom pyramid. The top pyramid is right side up, and its base rests on the base of the middle pyramid, and it also has a flattened top. The top two pyramids represent the waist to the head of the cosmic man with his elbows outward. These three pyramids consists of different levels within them called rajjus. The upper rajjus are the heavens, and the lower rajjus are the hells. The flat earth in which people live is in the middle of the structure near the waist of the cosmic man. They believe the central continent is a flat circle surrounded by an ocean. Outside of this is a ring of land surrounded by another ocean which is surrounded by another ring of land and another ocean. They also believe that there are two suns and two moons. The flat circle of earth is a cosmological trait shared by all ancient civilizations. Of the greatest importance is the existence in the middle of this circle of a mountain of tremendous height (it extends into the heavenly rajjus) named meru, which is also included in the ancient cosmologies of all other countries from the norse to the chinese. One of the principle ancient books containing the jain cosmology is the 'Tattvarttha Sutra.' I bought a copy of this in hindi at the Digambara jain temple book store across the street from Red Fort

in Delhi. This has fold out maps of all these things, and explanations are provided in english books explaining the jain geography and astronomy which are sold there also. Another more expensive but excellent book entitled 'Jain Cosmology' by Ravi Kumar is also available in more upscale stores. I was able to meet with the author of this book and we discussed cosmology at the cafe of the India International Centre in Delhi.

The following link is a brief description of Kumar's book on Jain cosmology which he co-wrote with the knowledgeable French professor Mrs. Collette Caillat:

Besides the cosmic man or triple pyramid, another cosmological symbol very basic to jainism (as well brahminism) is the swastika. I will post some on-line descriptions of its cosmological significance as I find them. So far the best I have come across in books are descriptions of this symbol by Rene Guenon. The following is a Jain symbols page with hand and swastika symbols on the cover. These same two symbols are on the cover of my own hindi language copy of the tattvartha sutra:

tattvartha sutra - I want to add concerning the tattvartha sutra that it is considered the best one volume summary of Jainism in existence (this is the opinion of everyone from ancient Jains to modern scholars). I am certainly not endorsing the jain religion despite the fact i have some agreement with elements of its scienmtific cosmology, but the only individual whorevied the book described it as so mindblowing that it transformed him from an agnostic into a religious with the reaing of this single book. The following link is to an english translation of the 'Tattvartha Sutra' which includes a description of the flat earth cosmos. I will post a link to an on-line edition as soon as I come across one:

Yin-Yang Cosmologists

The robes of Chinese Emperors had a symbolic design. Both Taoist and Confucian philosophers explained that since they held their Emperor to be the representative of Heaven on the Earth, his garments were rounded from head to waist as the Heavens are a dome, and his garments were squared from his mid-section to the ground because the Earth is square.

China (Kathay) Located West of India

Alexandre the Great conquered China according to the 'Ethiopian Book of Alexandre' yet he did not conquer Patliputra (Patna), the capitol of India under Chandragupta Maurya (the Jain Emperor of India at the time of Alexandre's conquest). This is because Patliputra is further East than Xi'an as ancient World maps attest. In fact, all maps prior to the sixteenth century maps of renaissance Europe indicate that India is located East of China.

Chinese are descendents of Japhet.

Alexandre the Great in China

Yeti exist in Tibet. There is an Ethiopian history of Alexandre the Great which records that he subdued all of Asia including China. According to this book, his armies came to the gates of Xi'an where he went in disguise as a messenger to the Chinese Emperor who acknowledged Alexandre's military superiority and agreed to pay him tribute but refused to allow him to keep a standing army in China as he said the Chinese would rather die fighting than be slaves in their own country to which Alexandre agreed. Ancient histories indicate that an Alexandropoulis (city) exists in Tibet. The Ethiopian Book of Alexandre has been reprinted by AMS Press in New York.

Alexandre the Great in Tibet

Saint Andrew the Fool for Christ (of Constantinople circa A.D. 1000) was revealed a prophecy connected to Alexandre's visit to China. He said that Alexandre's army encountered a race of half men and half beasts in the mountains of Tibet in the depths of Asia. Alexandre prayed to God to help him in the warfare, and two distant mountains moved very close together with the army of the monster race in between the mountains. Alexandre then had his army contruct a large wall and roof between the mountains which penned the monsters inside the large cave. Saint Andrew the Fool's prophecy says that during the time of the Apocalypse at the end of the World, one of the plagues sent to the Earth will be that these monsters which Alexandre penned up in Tibet will be released from that confinement and spread across the World killing men by physically eating their hearts. This information is contained in the life and miracles of Saint Andrew the Fool for Christ's sake in Migne's Patrologiae Graece. http://www.fatheralexander.org/booklets/english/saints/andrew\_foolish.htm http://www.worldcatlibraries.org/wcpa/ow/f561520778fb95efa19afeb4da09e526.html www.lorencoleman.com/bigfoot.html

The Sibylline Oracles http://www.sacred-texts.com/cla/sib/sib00.htm

The Sibyls were prophetesses of different lands and different times, but they all hail from the ancient pre-Christian world. These Holy Women were all virgins from widely differing pagan civilizations who lived hermetic lives and whom God chose to prophesy truths as they are acknowledged and honoured by the Church Fathers who hold them in the greatest

esteem and respect and reguard them as wellsprings of the knowledge of God. They are outstanding examples of the knowledge of God among Gentiles from the pre-Christian world (only one of them was Hebrew). As with the Church Fathers, these Holy Women of God knew no other cosmology than that consistent with Flat Earth cosmography.

Hellenic Philosophers

« Reply #7 on: October 19, 2006, 02:28:52 PM »

Hellenic Philosophers

The idea that most Greek pagan philosophers believed the world is globular in the days of Aristotle or even as late as Claudius Ptolemy is a false hood. This false idea is the result of wishful thinking on the part of modern heliocentrists so eager to find their counterparts or predecessors in the past that they overlook the truth in order to find them.

To begin with, the heliocentrism contemplated by Aristarchus was an obscurity. It never received any significant attention until writers like Nicolas of Cusa and his follower Nicolas Copernicus promoted it well into the renaissance.

As far as the ancient pre-Christian Greek philosophers are concerned, the majority of them held flat earth cosmological beliefs and perspective of the cosmos. This is true of all pre-Socratic Greek philosophers without exception (before 500 BC).

\_\_\_\_\_

Hesiod

http://en.wikipedia.org/wiki/Theogony http://en.wikipedia.org/wiki/Hesiod http://www.sacred-texts.com/cla/hesiod/theogony.htm

Hesiod who lived in the ninth century BC wrote the "Theogony" which describes the classic ancient Greek flat earth cosmography. Hesiod's 'Theogony' also contains the old western pagan doctrine of the four ages of world civilization which proceeds from initially glorious to gradually lesser and inferior quality: the golden age, the silver age, the bronze age, and the iron age. Interestingly, this doctrine corresponds with that of the Vedas which also describe four ages known to Brahmins as the four yugas, the fourth of which is the kali yuga meaning the dark age which corresponds with the ancient greek pagan concept of the iron age. According to the vedic books of ancient india and their doctrine of cyclical time, the kali yuga or dark age is the age in which the world is currently passing through.

Homer

Homer lived at the same time as Hesiod around 850 BC according to the historian Herodotus. As can be discerned from various verses relating to cosmology in the 'Iliad' as well as the 'Odyssey' Homer also naturally believed the flat earth cosmogony which contemporary writers like Hesiod wrote about in more detail.

Anaximander (610-546 B.C.)

http://en.wikipedia.org/wiki/Anaximander

Credited by many with constructing the first map of the World, Anaximander's map depicted a flat rather than a globular Earth.

\_\_\_\_\_\_

Hecataeus of Miletus (550-476 B.C.)

http://en.wikipedia.org/wiki/Hecataeus www.livius.org/he-hg/hecataeus/hecataeus.htm

The Hellenic geographer and historian Hecataeus also produced a World map based upon Anaximander's flat Earth geography.

Socrates, Plato, and Timaeus

Plato and the men of his time knew that the Earth is flat as demonstrated by the writer Ananda Coomaraswamy:

In the second appendix of 'The Guardians of the Sun Door' entitled 'The Rotation of the Earth' (on page 146 of the Fons Vitae edition) author Ananda Coomaraswamy quotes several translations of a verse from the 'Timaeus' of Plato which apparently describes the earth as circular or globular. Well versed in Greek, Coomaraswamy first states that "All these versions reflect a doubt."

Coomaraswamy then stated "Plato could no more have thought of the Earth as a planet than of the Sky as a planet; the Earth is the floor, and the Sky the roof of the cosmic house. The orbits of the planets lie in the space between these limits."

"Sky and Earth correspond to one another like the roof and floor of a house."

"Sky and Earth are at once held apart and connected by an (invisible) pillar, whether of fire or smoke or resonant or luminous or pneumatic, the Trunk of the Tree of Life, and only pathway up and down these worlds; this pillar extending from Nadir to Zenith penetrates the naves of all the world-wheels and is the Axis."

"At the foot of this axial pillar, with which the pillar of the sacrifice is also identified, at the "navel of the Earth," burns the "central Fire," and at its summit the solar Eagle nests, and from this eyrie he surveys all things in the worlds below him. The Sun is not merely, however, the capital of the pillar, but the sky-supporting pillar itself, and so the "single nave" on which all turn. These worlds are collectively his vehicle."

"The Earth on which the whole is supported floats like a flower on the primordial Waters, and is thought of as their consolidated foam. It is from these Waters that the Sun rises in the East, and to them that he returns from the West; it is because he passes behind the Earth from West to East at night that the Earth can be called the maker of day and night."

"Like the Sun, the Earth is central because it is from the central axis that the quarters radiate; just as the capital of a kingdom is traditionally its centre, surrounded by four provinces. The planets other than the Sun are only "excentric" in that they are bodies "wandering" on the peripheries of their orbits; and by analogy, whoever on Earth lives far away from its centre, whoever in any land does not sacrifice, whoever in his own person lives "superficially" and not at the centre of his being, is likewise "excentric."

'The Guardians of the Sun Door' by Ananda Coomaraswamy is published by Fons Vitae: http://www.fonsvitae.com/coomaraswamysundoor.html

The on-line edition of 'Timaeus' by Plato which is actually Plato's record of a discussion between Socrates and Timaeus concerning cosmology: http://www.hermetic.com/texts/plato/timaeus.html

As a warning to any who might wrongly think from reading the above the translation that Plato actually believed the Earth to be rounded, the link above to the 1871 translation by Benjamin Jowett is the very first translation Coomaraswamy cites as reflecting doubt: "For eillomenen in Timaeus 40 B Jowett has "clinging round," with a footnote, "or 'circling'"; Bury has "which is globed around"; and Cornford "as she winds round.""

One should be wary of modern translations of ancient texts lest the translators have forced modern ideas into the translation to which the original authors never subscribed. The English translations of 'Timaeus' are an outstanding example.

#### Aristotle

As Plato was Aristotle's teacher, it follows that Aristotle likewise believed the Earth was flat, especially as this fact was common knowledge at the time. Shy of any forthcoming evidence to the contrary, Aristotle's flat Earth belief is a forgone conclusion. This is significant in light of all the influence that Aristotle has had throughout history including but not limited to Alexandre the Great and Hellenes of all generations since that time, Arab and Islamic philosophy and science as well as late medieval Latin philosophy science.

Plutarch (Anno Domini 46-127)

# http://en.wikipedia.org/wiki/Plutarch

In AD 150, all Christians believed the Earth is flat and the novel idea that the Earth is a globe was only popular with certain educated pagans like the Egyptian Claudius Ptolemy. The Greek pagan philosopher and historian Plutarch was Ptolemy's contemporary and senior.

PLUTARCH DEMONSTRATED THAT CLAUDIUS PTOLEMY'S BELIEF THAT THE WORLD IS

SPHERICAL WAS NOT BY ANY MEANS REPRESENTATIVE OF THE MAJORITY OF PAGAN SCHOLARS OF HIS TIME.

In his essay 'On the Apparent Face in the Orb of the Moon' written partly in opposition to the globularist doctrine of Claudius Ptolemy, Plutarch blatantly states that the Earth is flat and not globular:

To answer this question at long last...

...according to both the 'Book of Courses of the Heavenly Luminaries' which is contained within the 'Book of Enoch' and 'A Cosmological Tract' ascribed to the first century Christian Dionysios the Areopagite, the "cold" ultimately issues from twelve storehouses of the winds located along the four edges of the world. The 'Book of Enoch' is common to both esoteric Jewish and Christian tradition.

mystical Sufi orders have an historical continuity to an origin more ancient than Mohammed and the Islamic religion itself.

http://en.wikipedia.org/wiki/Tariqah

Sufism's benign character is one of the reasons for the famed toleration of the Ottoman empire which itself survived many centuries with harmonious Christian and muslim subjects because the empire adopted the principles of Eastern Roman civilization as its own which facilitated its survival until it abandoned those principles during the Tanzimat westernization of the nineteenth century. Sufism has a reputation for peace, intellectualism, and mysticism that sharply differs with the shallow, fanatic branch of Islam known as Wahhabism of which the Taliban and the Saudi dynasty are adepts.

Several Sufi spiritual practices and customs have been inherited from Eastern Christian traditions including specific kinds of prayer and clothing. Another example is *Zhikr*, or Islamic mystical music, especially when it is focused on the Name of God, which is derived from Eastern Christian hesychast tradition - more specifically the Jesus prayer. Zikr is more deeply entrenched with Shiites than with Sunnis because it is often communal and cultural with Shiites and not relegated to a merely private individual practice as with Sunnis.

## ABANDONMENT OF CHRISTIAN TRADITION BY THE MEDIEVAL WEST

The early Christian patristic tradition of hesychasm was actually abandoned by medieval europe because of the scholasticism associated with Thomas Acquinas. In the cold spirit of the agnosticism and deism of Kant and Voltaire that directly flowed from it, papist scholasticism also viewed God as unknowable. Scholasticism artificially separated intellectual knowledge from the heart and placed pagan greek philosophy higher than spirituality or traditional patristic Christian theology. This is the origin of europe's degeneration into an abnormal culture of aggressive individualism, thoughtlessness, and hypocrisy that contrasted sharply with simpler but more genuine peoples of the world whom it exploited for centuries. Thus Sufi Islam inherited and preserved a significant degree of genuine original Christian traditions that western europe neglected, forgot, and even physically attacked from the fourth crusade onwards.

In the colonial spirit of crusaders, the 14th century Italian heretic Barlaam of Calabria represented europe's and scholasticism's aggressive attitude against traditional Christian hesychasm which continued unbroken in the east in spite of europe's apostasy.

# RELATIVITY & THE FLAT EARTH

# Newton's Laws of Motion

Every object in a state of uniform motion tends to remain in that state of motion unless an external force is applied to it.

The acceleration of an object as produced by a net force is directly proportional to the magnitude of the net force, in the same direction as the net force, and inversely proportional to the mass of the object. **F=ma**For every action there is an equal and opposite reaction.

# Einstein's Equivalence Principle

Einstein was fond of a form of inquiry known as thought experiments. In a thought experiment, a premise is assumed to deduct from it the possible consequences. One of these thoughts experiments in particular involved a solitary passenger on an elevator that is alone in the universe.

When the elevator starts accelerating upwards, a pull downwards is felt by the passenger. This is due to the passengers inertia. Recall that a body at rest tends to stay at rest. Einstein hypothesised that since this pull, caused by the momentum of the passenger fighting against his acceleration, is indistinguishable from gravitational influences, it is only logical to assume that they are one and the same phenomenon. Comparatively, another pseudo-force like this arises from a rotating reference frame, say if one is on a spinning carnival ride one would presumably feel a pull away from the center.

Consider the scenario of this elevator accelerating upwards at 9.81 *m/s/s* . If the passenger were to jump in the elevator while it was accelerating upwards at 9.81 *m/s/s* (the rate at which we are pulled to the earth by gravitational forces) he would observe the same effect as if he was jumping on the earth. An initial resistance would be felt; the ground, or elevator floor, would recede away from him at 9.81*m/s/s* until he has traveled enough distance to expend the force given by jumping. Then the elevator floor would rise up to meet him at 9.81*m/s/s* . This can be seen as an observational illusion: the elevator floor can be seen to either be accelerating upwards at 9.81*m/s/s* or the passenger could be seen as *falling* towards the floor. To the passenger - its indistinguishable! Einstein's inductive leap here was the realization that perhaps the forces are indistinguishable because they are. They both are accelerating frames of reference. The idea that gravitation is a pseudoforce arising from a naive view (which is to say taking a non-inertial frame of reference as an inertial one or vice versa) is known as *the equivalence principle*.

In short, gravitational pull then is shown as an observational illusion hinging on our naive view of our frame of reference being inertial. Gravity is actually revealed as an inertial force (also known as a fictitious force).

# A Flat Earth Theory

First let us construct a Wish List, so that we can be sure to be fair when we claim we've shown sufficient proof for our model. A simple list of things we would like to say are true if we have indeed shown a model that says the earth is flat.

# Our Flat Earth Theory Wishlist:

We would like it to be coherent with our previous interpretation or show it as an approximation

Results from a shift in our shift in the observational language, which is to say we are just "looking at it wrong" and this can be disillusioned, much like the Einstein's Equivalence principle or Galileo's inertia.

Show the Earth is Flat Based on and coherent with known laws and facts

# What do we mean when we say the Earth is flat?

Let us remove an obvious point of confusion and simply state that we talk about flat in a broad manner - we are not discussing mountains or valleys here. In similar fashion, we are not making the ludicrous claim that the Earth is two dimensional. What we do say is that it can be transversed via a straight line through space. We would also like to say that all such traversals are straight or can be seen as straight. It can be said to satisfy this if it can be shown to be parallel to another straight line in space along all such traversals.

# The Ferrari Effect

Let us build first from the base of Newton.

Consider a theoretical object in a perfectly stable orbit around a theoretical planet in a traditional round earth manner. Remember from Newtons laws of motion: an object in motion tends to stay in motion and in the direction it is in motion. We can certainly say that the object in orbit that it feels no experimentally verifiable difference in force or pseudo-force - which is equivalent to saying it is experimentally not accelerating (and thus not changing direction or speed.) Remember, Einstein

disillusioned our naive view of space based on the equivalence principle.

Our sight would lead us to believe this might be foolish, but if space is curved (and Relativity relies on the assumption that it is) it would be silly to not question our visual representation of space since by all accounts it appears as if our observational (and theoretical) language is ill equipped to deal with description of it.

We should assume that it is indeed travelling in a straight line as its experimental evidence points us to. The issue is with our naive view of geometry and space. Likewise we take the view that it is indeed in motion and not still.

Let's interpret the ramifications of the statement: an object in orbit travels in a straight (and thus flat), line through space through further thought experiment. First, we can define our field of interest in that taking all such theoretical orbits of our planet and realize them rightly as flat, thus defining the bounding space of interest also to be flat. It follows, given any orbit of this planet to be flat, the planet itself is flat since it satisfies our definition of flatness.

Let us again venture into thought experiment: eject some pods towards the earth from one such of our imaginary satellites at regular intervals along our orbit such that they are in free fall. Again, we can assume these are straight lines extending below to a translatable location on the surface of the earth, its geolocation. We can say these lines are normal to the trajectory of the satellite and they are normal to the ground, thus making the lines parallel. Since the orbit is straight, and the orbit relates directly to the geographical locations it is above, we have come a long way to show the planet is also flat.

Now let us consider what acceleration means. Acceleration by its nature means either a change in speed or direction, which is to say a change in velocity. So when we look at the parabola formed by a ball in motion we can recognize that it is for the most part accelerating - it changes both direction and speed. Now, let us examine the path if we remove the influence of gravity from our model as well as unbound the start and end points to allow it to move freely.

If gravity was not forcing the object downwards, it would then be travelling a straight path, parallel perhaps to our imaginary satellite and in this case tangent to the apex of our balls climb.

We can see by comparison between a theoretical object in orbit and our ball at the apex of its climb that if not affected by gravity it would travel a straight line. By repeating this experiment again and again with lower apexes of our ball, various orientations, and so on we see the earth itself, not just the paths of satellites, is flat.

The effect of viewing the earth and it appearing round is known as *the Ferrari Effect*, based off of former Canadian Flat Earth Society President Leo Ferrari who first predicted this. This describes that effect.

Any honest judge will begrudgingly have to admit that I have shown that the flat earth theory directly follows from our laws of motion and coherence with relativity. Even worse is the realization that we would have been lead to relativity sooner if not for our strict faith-like belief in a round earth.

Hence, making the FAQ that much more in need of being updated.

I recently spent some time trying to update the FAQ to make sure it is still representative of FE theory. However, I want to make sure I did not miss anything, namely alternative answers to questions. If you guys have any suggestions, please tell me so I can revise it. I included some of my own pictures and some from other people. If these pictures are inaccurate, it would be best to know. Thanks a ton.

-Derek

The FAQ template I have so far is shown below the white line.

## Welcome to the Flat Earth Society!

Thanks for taking the time to go through this FAQ. It was created in light of the realization that for someone with a "round-Earth" (RE) background, the FE theory would appear at first glance to have some glaring holes.

This FAQ is subject to change, as discussions raise inconsistencies. It will be updated as necessary.

FE (theory/model): Flat Earth (theory/model), a theory which states that the Earth is flat. FE'er: Flat Earther, someone who believes in the FE theory.

UA: Universal Accelerator, the source of Earth's constant acceleration.

RE (theory/model): Round Earth (theory/model), a theory which states that the Earth is round. RE'er: Round Earther, someone who believe the RE theory.

## Frequently Asked Questions

-General-

Q: "Is this site for real?"

A: This site is real. There are people who seriously believe the Earth is flat. However, there are also people on this site who do not.

Q: "Why do you guys believe the Earth is flat?"

A: It appears to take a flat shape, ignoring obvious hills and valleys of course. Also, Samuel Rowbotham et al. performed a variety of experiments over a period of several years that demonstrate the lack of curvature over long distances. They are all explained in his book, which is linked above.

#### -Authorities-

Q: "Why do the all the world Governments say the Earth is round?"

A: There exists a conspiracy among world Governments claiming to have space programs and has disseminated the lie to the other governments of the world, as well as to the media and the general public.

Q: "What is the motive behind this conspiracy?"

A: Although it is unknown, the most favored theory is  $\underline{\text{financial gain}}$ .

Q: "If you're not sure about the motive, why do you say there is a conspiracy?"  $\,$ 

A: Quite simply, if the earth is in fact flat, then the governments must be lying when they say it round.

Q: "What about NASA? Don't they have photos to prove that the Earth is round?"

A: NASA is part of the conspiracy too. The photos are fabricated for our benefit.

Q: "Why has no-one taken a photo of the Earth that proves it is flat?"

A1: The government prevents people from getting close enough to the ice wall to take a nicture

A2: Due to the false knowledge of civilians and explorers, finding the rim of the planet is extremely difficult and counter intuitive.

A3: If the earth is an infinite plane, no picture from ground level or otherwise could capture the flatness of the Earth.

Q: "How did NASA create these images with the computer technology available at the time?"

A: Computer technology was available at the time and was held secret from the public. Also, additional funds for technological improvement were accessible through funding intended for space specific aeronautical technology.

PLEASE NOTE - This means that pictures confirming the roundness or flatness of the Earth DO NOT IN THEMSELVES CONSTITUTE VALID PROOF

Q: "How could the government pull off the conspiracy successfully?"

A: Restricting the knowledge to key members and minimizing those involved.

Q: "How are the world governments organized enough to carry out this conspiracy?"

A1: They only appear to be disorganized to make the conspiracy seem implausible. A2: Only a few governments (USA, former USSR, certain European countries) need to be involved. The rest readily accept the false claims.

- Q: Why hasn't this site been shut down by the government?
- A: Doing so would prove that the government is hiding something.
- Q: How could the government possibly guard the entire ice wall?
- A: You could do it with a few hundred and some basic equipment.

#### The Flat Earth Model

FIG 1

- Q: "What is the circumference and diameter of the Earth?"
- A: Circumference: 78225 miles, Diameter: 24,900 miles
- Q: "What about the stars, sun and moon and other planets? Are they flat too? What are they made of?"
- A: The sun and moon, each 32 miles in diameter, circle Earth at a height of 3000 miles at its equator, located midway between the North Pole and the ice wall. A dense and unique gravitational field warps the path of the light rays creating a lower perceived sun or moon from greater distances. This continues until the light intersects the Earth appearing to set. Their apparent rising and setting are caused by the interruption of the horizon.

FIG. 2

- Q: "Please explain sunrises/sunsets."
- A: As the warped light intersects with the earth, a spectator further away is too low to see the light rays that didn't hit the ground and cannot receive light through the Earth.
- Q: "Why are other celestial bodies round but not the Earth?"
- A: The Earth is not one of the other planets. The Earth is special and unlike the other bodies in numerous ways.
- Q: "What about satellites? How do they orbit the Earth?"
- A: Since sustained spaceflight is not possible, satellites can't orbit the Earth. The signals we supposedly receive from them are either broadcast from towers or any number of possible pseudolites. These are designed to transmit signals and perform the basic tasks of satellites but function differently.
- A: This is unknown. Most believe it to be just rocks.
- Q: "What about gravity?"

A: The Earth is accelerating upwards at 1g (9.8m/s^2) along with every star, sun and moon in the universe. This produces the same effect as gravity. Einstein proved this.

Q: "Doesn't this mean we'd be traveling faster than the speed of light, which is impossible?"

A: The equations of Special Relativity prevent an object from accelerating to the speed of light. Due to this restriction, these equations prove that an object can accelerate at a constant rate forever, and never reach the speed of light. See in depth explanation.

Q: "If the world was really flat, what would happen if you jump off the disc's edge?"

A: You would enter an inertial reference frame, moving at a constant velocity in the direction the Earth was moving before you jumped. The Earth would continue accelerating upwards past you at a rate of 1g, so it would appear to you that you were falling into space.

Q: "If the Earth was indeed a flat disc, wouldn't the whole planet crunch up into itself and eventually transform into a ball?"

A1: If the Earth generated a gravitational field, yes, it would eventually happen, after a billion years maybe. FE assumes that the Earth does not generate a gravitational field. What we know as 'gravity' is provided by the acceleration of the earth.

A2: There is a counter-mass which pulls the Earth back into a disc shape.

Q: "Why does gravity vary with altitude?"

A: The moon and stars have a slight gravitational pull.

Q: Follow-up to previous question: How is it that the Earth does not have a gravitational pull, but stars and the moon do?

A: This argument is a non sequitur. The cause of gravitation is unknown and RE propaganda would have you believe all masses have the same properties.

#### -Geography-

Q: Do you have a map?

A: See <u>this one</u>, created by one of our members. There is also <u>this map</u> attributed to a person named Wilbur Voliva.

Q: Exactly what shape is the Earth if it's flat? Square or circle?

A: Circle, like in the UN logo, however, the earth is NOT 2D, it is in the shape of a cylinder.

Q: "When traveling in a straight direction, you will always reach the same point on the globe from where you started. How can this happen if the world is flat?"

A: You need to have evidence for this to be true. Also, define "straight." Remember, the northern point on the compass is, under most circumstances (unless near the centre or deep in the ice wall), pointing toward the centre of the Earth. Therefore, if you follow your compass due east or due west, ending up at the same point you started from, you've just gone around the world in a circle.

Q: "Why doesn't water run off the Earth?"

A: There is a vast ice wall that keeps the water where it is. The ice wall is roughly 150ft high. This also explains why you can find a vast plane of ice when you travel south.

Antarctica as a continent does not exist. Is exists as a rim surrounding the Earth.

Q: "How does global warming affect the ice wall?"

A1: The ice wall is likely a mountain range. The distance of the sun's radiation just allows it to be covered in deep ice and snow.

A2: Global Warming would better be described by cyclical climate change. It and its countertheory (Global Cooling) are effects that cancel each other out. Remember, these "greenhouse gasses" can reflect heat back out into space as well as keep it on Earth. Yes, there are recorded rises in temperature, but the only records we have go back, at most, around 150 years. This is very likely an occurrence that happens every [x>150] years, that's happened before (perhaps many times), and that the Earth has thus survived before.

Q: "What about tides?"

A1: The tides exist due to a slight see-saw effect on the earth. As it goes back and forth, the water rushes to the side that is lower. Note, this is a very slight wobble. Remember, these wobbles are created by very minor earthquakes. They keep the tides in check. Notice that large earthquakes result in large tides or "tsunami".

A2: The antimoon, is an object with a gravitational pull just like the moon, and is underneath the Earth. If it was above the Earth, it would be directly across the diameter of the moon path following the same motion as the moon. These create predictable tides.

Q: "Why is the North pole colder than the equator?"

A: The sun circles over the equator, thus the north pole and south rim don't receive the same intensity of light.

Q: "How do volcanic eruptions happen?"

A: The Earth is thick enough to have a core of molten lava. Once there's too much of it in too confined a space, it finds its way out, just like the water will come out of a full bottle if you squeeze it too hard.

Q. "How does our iron core produce the magnetic field?"

A. Both churning spinning molten iron cores work the same way to generate the field. The shape of the field matches based on latitude in both models.

Q: "How can a compass work on a Flat Earth?"

A: The magnetic south pole is near the geographic north pole, just like on the RE. The magnetic north pole is on the underside of the Earth. The Ice Wall is not the south pole, but acts as it, as it is the furthest from the center of the earth that you can follow the magnetic field. The field is vertical in this area, accounting for the aurora australis.

FIG. 3

Q: "What about time zones?"

A: Time zones are mapped around the Earth to match the observed rising and setting times for any region. They are a man made interpretation of time that simply fits the map provided. The same applies to day light savings.

Q: "What about Lunar Eclipses?"

A. The moon gets its light from the sun and reflects it. When the sun is nearing furthest away from the moon, the light that normally extends down and up like a parabola, is interrupted by Earth. Distances approaching this limit, would yield the effects of lunar phases.

Q: "How come the travel time by air from South America to New Zealand, via the polar route, is SHORTER than the travel time going North first and then South again?"

A: The airline pilots are guided by their GPS. Remember that satellites don't exist. The replacement data given from pseudolites deliberately throwing distorting all the paths to make it the flights take different times. The curvature of these paths can add or subtract great distances without the overall turning being obvious to someone traveling it.

Q: "How come when I flush my toilet in the northern hemisphere it goes counterclockwise but I have this friend in Australia and when he flushes it goes clockwise?"

A: You're mistaken. On a round Earth, the Coriolis effect adds at most one (counter)clockwise rotation per day; fewer as you get closer to the equator. The water in your toilet/sink/bathtub/funnel spins much faster than that (probably at least once per minute, or 1440 times per day) so the additional/lost rotation from the Coriolis effect wouldn't be noticed.

Q: "How do seasons work?"

A: The radius of the sun's orbit around the Earth's axis symmetry varies throughout the year, being smallest when summer is in the northern annulus and largest when it is summer in the southern annulus. The image is by the digital nomad.

FIG. 4

## Relgion

Q: "Are most or all FE's Biblical literalists, who feel like their religious belief system would be threatened by a round (i.e. spherical) earth, or are there any atheists/agnostics who are FE's as well?"

A: Very few if any FE'ers are biblical literalists. Although it is true, the FE theory was originally a religious belief, the majority of FE'ers used analytic thinking and the zetetic method to discover the true shape of the Earth without Round Earth bias.

Maybe we could also add a section discussing Dark Energy in FE. It is used to describe many of the things we would see on an FE. I have a topic where I am trying to uncover all the theories of DE.

Awesome. I can't believe I completely left out the UA, even though I added it to terminology.

#### **Terminology**

DE: Dark Energy, the large negative pressure required by GR to explain the expanding universe model.

GR: General Relativity, Einstein's most famous theory relating all physics known on a macro level. As of now, it seems incompatible with QM.

QM: Quantum Mechanics, a branch of physics that attempts to explain erratic particle physics. As of now, it seems incompatible with GR.

**Questions** (to be incorporated under the questions of gravity)

Q: "Why are the Earth, Moon, and Stars accelerating?"

A: There exists a Universal Accelerator which applies a constant force and thus constant acceleration to the terrestrial and heavenly objects.

O: "How does the UA function?"

A1: The mechanism is currently unknown. The same is true of gravitation.

A2: The universe is expanding more and more rapidly. To explain this acceleration, general relativity requires that much of the energy in the universe consists of a component with large negative pressure, referred to as dark energy. This is thought to be the primary cause of the Earth's acceleration.

Q: "Why aren't we effected by the UA?"

A: "The UA's influence on the Earth creates a bow shock closing around it like an envelope in which matter inside is unaffected. However, the Earth beneath them is affected and the FE accelerates into them creating the illusion of gravity."

Personally, I would change the bow shock reference to another term. Perhaps Dark Energy Field (or Shield) or something like that. The term bow shock suggests that the FE is traveling faster than whatever medium it's in and that whole idea causes more problems than it solves.

You may also want to mention that the DEF is an alternative hypothesis for FE models that do not have a greater ice wall as they more or less serve the same function.

No. According to Jack, the heavenly bodies are directly accelerated by the UA. The DEF bow shock is what neutralizes the UA's effect on the atmoplane and things on the surface of the FE so that they don't go flying off into space. Or something like that. There have been a few discussions where Jack tries to explain it better, but I'm too lazy to search for them right now.

Edit: OK, so I found this thread where Ragnarr is trying to collect all of the known (or suspected) properties of DE and the DEF.

What I meant to say was that the bow shock closes in an envelope shielding objects from the UA, but it closes beneath the planets. Therefore, the Earth and Planets are accelerated as well as other planets.

Your proposing what question/answer in the FAQ?

I'm considering mentioning hurricanes that have a tendency to originate from certain latitudes and a tendency to rotate in the same direction. The answer being: "Assuming the coriolis effect is responsible for the direction of rotation for hurricanes is a correlation equals causation fallacy". Or something to that effect.

The science, observations predicted by calculations, etc, imply causation. Your argument is pretty weak.

If someone is saying "A happens along with B therefore A causes B" then there may be merit in using your argument. But the argument here is more like "A happens along with B, and along with C, and along with D, and E, and F, for the reasons of G, H, and I, proven by measurements by instruments/calculations/etc, J, K and L, therefore A causes B."

Bit different.

Disc model is now seriously in question. I have accounts from pre NASA explorers that confirm that there is in fact weeks of perpetual sunlight in Antarctica. That will be tough to explain with the disc model shown in the FAQ.

Q: "How can a compass work on a Flat Earth?"

A: The magnetic south pole is near the geographic north pole, just like on the RE. The magnetic north pole is on the

underside of the Earth. The Ice Wall is not the south pole, but acts as it, as it is the furthest from the center of the earth that you can follow the magnetic field. The field is vertical in this area, accounting for the aurora australis.

MAGNETOSPHERE

MAGNETIC SOUTH MAGNETIC NORTH MAGNETIC SOUTH

FIG. 3

You might need to redraw that, as the magnetic north is at the center of the Earth's underside (geographic south), while the magnetic south is at the center of the Earth's front side (geographic north).

Just thought I'd bring this up: 'Bendy Light' is a ridiculous name for that theory. Perhaps it was given that name in jest, but if it's going to be in th FAQ, I think it ought to have a more credible name.

## Terminology

The following is a list of common Flat-Earth-related abbreviations, many of which come up frequently in discussions of the subject.

- . FET: Flat Earth Theory, a theory which states that the earth is flat.
- . FES or TFES: (The) Flat Earth Society, the organization that promotes Flat Earth Theory and its discussion.
- . **FE'er**: Flat Earther, or someone who believes in the FE theory.
- . RET: Round Earth Theory, a theory which states that the earth is round (an oblate spheroid).
- . RE'er: Round Earther, or someone who believes in the RE theory.
- . **DE**: Dark Energy, a form of energy which accelerates the universe.
- EA: Electromagnetic Acceleration, a theory which states that light curves upward, creating a horizon for the observer.
- . UA: Universal Acceleration/Accelerator
  - . Universal Acceleration, the acceleration of all objects in the universe caused by Dark Energy.
  - · Universal Accelerator, an object which sits underneath the Earth and pushes anything it touches.
- . **BLE**: Bedford Level Experiment, an experiment performed along the Old Bedford River on the Bedford Level, Norfolk, England, proving the Earth to be flat.
- . AW: Aetheric Whirlpool, part of the Aetheric Wind Model which describes aether and how it affects Earth.

#### The Ferrari Effect

« on: January 29, 2014, 06:39:40 AM »

Just posting this here so it doesn't get lost.

http://theflatearthsociety.net/relativity.html

The Ferrari Effect

Let us build first from the base of Newton.

Consider a theoretical object in a perfectly stable orbit around a theoretical planet in a traditional round earth manner. Remember from Newtons laws of motion: an object in motion tends to stay in motion and in the direction it is in motion. We can certainly say that the object in orbit that it feels no experimentally verifiable difference in force or pseudo-force - which is equivalent to saying it is experimentally not accelerating (and thus not changing direction or speed.) Remember, Einstein disillusioned our naive view of space based on the equivalence principle.

Our sight would lead us to believe this might be foolish, but if space is curved (and Relativity relies on the assumption that it is) it would be silly to not question our visual representation of space since by all accounts it appears as if our observational (and theoretical) language is ill equipped to deal with description of it.

We should assume that it is indeed travelling in a straight line as its experimental evidence points us to. The issue is with our naive view of geometry and space. Likewise we take the view that it is indeed in motion and not still.

Let's interpret the ramifications of the statement: an object in orbit travels in a straight (and thus flat), line through space through further thought experiment. First, we can define our field of interest in that taking all such theoretical orbits of our planet and realize them rightly as flat, thus defining the bounding space of interest also to be flat. It follows, given any orbit of this planet to be flat, the planet itself is flat since it satisfies our definition of flatness.

Let us again venture into thought experiment: eject some pods towards the earth from one such of our imaginary satellites at regular intervals along our orbit such that they are in free fall. Again, we can assume these are straight lines extending below to a translatable location on the surface of the earth, its geolocation. We can say these lines are normal to the trajectory of the satellite and they are normal to the ground, thus making the lines parallel. Since the orbit is straight, and the orbit relates directly to the geographical locations it is above, we have come a long way to show the planet is also flat.

Now let us consider what acceleration means. Acceleration by its nature means either a change in speed or direction, which is to say a change in velocity. So when we look at the parabola formed by a ball in motion we can recognize that it is for the most part accelerating it changes both direction and speed. Now, let us examine the path if we remove the influence of gravity from our model as well as unbound the start and end points to allow it to move freely.

If gravity was not forcing the object downwards, it would then be travelling a straight path, parallel perhaps to our imaginary satellite and in this case tangent to the apex of our balls climb.

We can see by comparison between a theoretical object in orbit and our ball at the apex of its

climb that if not affected by gravity it would travel a straight line. By repeating this experiment again and again with lower apexes of our ball, various orientations, and so on we see the earth itself, not just the paths of satellites, is flat.

The effect of viewing the earth and it appearing round is known as the Ferrari Effect, based off of former Canadian Flat Earth Society President Leo Ferrari who first predicted this. This describes that effect.

Any honest judge will begrudgingly have to admit that I have shown that the flat earth theory directly follows from our laws of motion and coherence with relativity. Even worse is the realization that we would have been lead to relativity sooner if not for our strict faith-like belief in a round earth.

The fact that that is not mentioned is that for an object to be in orbit it has to be at a particular speed as not to fly out of orbit or not fall back yo earth. If the traveling object starts to slow down it start to decay and slowly crash on earth. If the object is going faster the orbit will get larger and could fly out in space. It is a balance between centrifugal force and centripetal force. <a href="http://www.diffen.com/difference/Centrifugal\_Force\_vs\_Centripetal\_Force">http://www.diffen.com/difference/Centrifugal\_Force\_vs\_Centripetal\_Force</a>[url]http://www.diffen.com/difference/Centrifugal\_Force\_vs\_Centripetal\_Force[/url]

Incorrect; that is not factual as there is an identical system which describes the same motions that follows directly from these base premises.

#### Taoism

Often times Eratosthenes is cited as having shown us the Earth was round using comparison of the lengths of shadows at various points on the earth. It can be seen upon inspection that this is indeed no proof at all. Consider the cosmology in Huai Nan tzu which takes the same practice, identical validity of reasoning, and similar measurements with instead the intent to measure the distance to the heavenly bodies, in contradistinction to the purpose of Eratosthenes - to measure the circumference of the pre-assumed round planet.

In the the case of Eratosthenes he must begin with the first assumption in his contextual language of a round earth. Without this framework and modelling his data is meaningless. On the other hand, when we look at the Huai Nan Tzu when confronted with a similar issue we are left with the realization of close planets and stars of a smaller size and a flat earth, the same view developed in the 1900s by the (mostly) Christian Flat Earth theorists.

It is very likely many Taoists held this view.

#### Buddhism

Buddhism also holds a belief in Mount Meru.

#### Native American

Several native american mythologies held that the sky was drapped over the earth like a tent. The stars were holes in this "tent".

# THE MATHEMATICS OF THE INFINITE FLAT EARTH

May 16, 2016 JohnDavis

$$S$$
 — the closed surface  
 $A$  — area  
 $\vec{n}$  — a normal unit—vector  
 $g, \vec{g}$  — gravitational pull  
 $m$  — mass

$$\oint_{c} \vec{g} \cdot \vec{n} \ dA = -4\pi Gm \qquad (1)$$

$$\vec{q} \cdot \vec{n} = -q$$

$$-g \oint_{c} dA = -4\pi Gm \qquad (2)$$

$$-q2A = -4\pi Gm \qquad (3)$$

The mass in S has area A and density  $\rho$ , therefore

$$m=A\,
ho$$
 or  $ho=rac{m}{A}$ 

$$q = 2\pi G\rho \qquad (4)$$

Today we will be talking about how to use Gauss's Law to show that an infinite plane would have a finite gravitational pull. Now if you were to ask somebody how much gravitational pull an infinite amount of mass would exert, the common sense answer would be "infinite!" However, upon inspection we can see that certain configurations of mass would actually yield finite gravitational pulls.

This article requires an understanding of surface integrals and so likely the math will be beyond many. However, I will do my best to explain it in the simplest terms possible. If you come across some math you don't understand, do like I do and continue reading past it. You can later go back with what you learned and likely will have a better understanding about it.

First we will introduce a symbol that likely has hidden itself from many of our readers educations. This is to no shame though, I've met Ph.Ds who were not familiar with this! One astrophysicist, working on her PhD dissertation, went so far as to proclaim "Fake Math!" I have to admit, that one made me chuckle a bit to myself. It must be remembered that no one can possibly hope to know everything, especially when we seek to specialize.

This curious symbol looks like one you may have seen before, but it acts somewhat differently. You may be familiar with the integral, with which it shares many properties:  $\int$ . Ignoring the terse mathematical definition, we will use a somewhat easy to understand one. Leibniz, its creator, thought of it as an infinite sum of

infinitesimal summands. So, taking the integral over a small portion of a line, you can find the sum of its area above or below the curve by looking at the sum of infinitely small slices of it and adding it all up.

The symbol you may be less familiar with is that of the closed surface integral ∮. The difference here visually of course is the introduction of that circle in the middle. Think of it roughly as a generalization of the integral over a surface instead. So instead of infinitely small slices, you will be dealing with infinitely small surfaces!

The second key to the puzzle we will need to use to properly examine the gravitational affect of an infinite plane is Gauss's law. Usually used in electromagnetism, Gauss's law actually applies to gravitational forces as well since they both share an inverse square relationship 1/distance2 to their strength. It can be stated as follows:

#### $\phi \mathbf{q} \cdot \mathbf{n} \, dA = -4\pi Gm$

Lets say we have some mass m. We pretend to create a surface around the mass. We divide this surface up into infinitesimal parts, each with an area of dA. Remember that the integral is summing up an infinite amount of infinitesimal surfaces? We take the infinitesimal bits of the area (dA) and sum them over the entire closed surface. Each infinitesimal "bit" has an **n**. **n** is a unit vector that is perpendicular, so facing away from the surface at a right angle away. You might want to visualize that **n** represents "up" since we are dealing with a plane. **g** is the acceleration due to gravity, pointing towards the mass. In our case, this should be "down."

We can use this to examine the gravitational influences of any body. If we were looking at point mass, we would use a sphere. If we were looking at an infinite plane, as we are, we will use a pillbox for our surface.

When we look at the pillbox, we can simplify things nicely. We see the curved surface of the pillbox will "cancel out" its own gravitational influence and contribute nothing. A simple way to think of this is that each point on the cylinder is counterbalanced with another point on the cylinder. This coincidently also shows the infinite plane is a stable body as each point on the plane itself is also counterbalanced by the points around it horizontally, thus answering the common question "Why wouldn't mass form into a sphere?" A more accurate way would be to realize this is that  ${\bf g}$  is at a right angle to our "up" (  ${\bf n}$  ) at all points; all points have an opposite point that is facing the opposite direction as well, and so  ${\bf g} \bullet {\bf n} = 0$ .

We are almost there - this leaves us with only the circle caps to deal with.

Looking at the caps we realize that g and n are parallel and opposite each other and so we realize  $\mathbf{g} \cdot \mathbf{n} = -g$ . This leaves the surface integral of just the pillbox ends. Since we have 2 of them and the integral is the sum of the parts of dA, we have  $-g \not = dA = g2A$  leaving our equation as:  $-g \not = 2A = -4n$ Gm. From there its easy to see g's value is finite -g = 2nGm / A. This is further realized by noting mass = (density \* Area), giving us  $g \not = 2n$ GpA, or g = 2nG p. This is clearly a finite value. If we wished we could continue from here to calculate the depth of the plane using the average density of Earth.

Given it also has depth we are looking at the case of m = (density \* Area \* depth). This gives us instead  $g = 2\pi G p d$ , where d is depth.

g = 9.81 m/s/s

 $G = 6.754 \times 10^{-11} \text{ m}^3 \text{ kg}^{-1} \text{ s}^{-2}$ 

 $p = 5.51 \text{ g/cm}^3$  , the average density of earth

Giving us  $d = g / (2\pi G p)$ . This evaluates to around 4 195.43 kilometers deep, thus showing false my early hypothesis of 9000 km deep.

## The shadow on the moon during a Lunar Eclipse is round

As far as the Lunar Eclipse goes, there is no evidence that the shadow which manifests on the moon during a Lunar Eclipse originates from the earth at all. That shadow could come from any celestial body intersecting the light between the sun and moon.

The only reason the Greeks and ancients (and modern astronomers) are able to predict the Lunar Eclipses was because the predictions are based on recurring charts and tables of past eclipses. It had nothing to do with the shape of the earth or the actual geometry of the cosmos. The Lunar Eclipse is a phenomenon which comes in patterns. By studying these patterns it is possible to predict when the next transit or eclipse will occur. The astronomer can use historic charts and tables with a few equations to predict the time, magnitude, and duration of a future eclipse.

This does not apply only to the eclipse, either: All recurring phenomena such as the transits of planets, occultations of bodies, and precision of paths across the sky are predicable only because they are phenomenons which come in patterns. Astronomers predict celestial events by studying the patterns and predicting when the next occurrence will occur.

There is a good chapter in Zetetic Cosmogony on the subject &.

## Modern Eclipse Models

Q. But what about NASA's yearly lunar eclipse predictions? They must be based on a geometric model, and not simply cycles in the sky, surely?

A. Actually, NASA freely admits that they use ancient cycle charts for their eclipse predictions. The Saros Cycle and those cobby old ancient methods which simply look at past patterns in the sky to predict the next one is precisely how "modern theorists" predict the lunar eclipse today.

Dear friends and colleagues,

I have recently been investigating the notion that the Sun's surface is a bioluminescent material, and the Moon's too. Since the time of the Ancient Egyptians and Greeks, people have known that the Sun was alive, it is attested in a variety of ancient sources from both these cultures. The Egyptian Atenist movement explicity held this belief to be one of their central doctrines, and the pre-Atenist tradition renders the Sun as a living being, or at least, associated and governed by a living being. In the Odyssey, the hero's crew enrage Hyperion, the manifest intelligence of the Solar body, by eating His cows (a fascinating tradition in antiquity exists between cows and the Sun, returning to Egypt, the shrewd anthropologist, archaeologist or other investigator discovers that the threads of solar-bovine intertwining run deep through the traditions of the archetypal beings Menthu and Apis, but this is another concern for another time). Aristotle considered that there is a grain of truth in all opinions, and perhaps I am about to partially fulfill this observation, though as you are about to find out, I certainly do not think the Sun is a cow.

Above: Apis, the Egyptian Sun-Bull

Science tells us that the celestial bodies are for the most part made of metal, probably iron. What I have been contemplating for a long while, is that the celestial bodies may be more like the Earth than we think. It is clear that they have metallic cores at least, just like the Earth, but it is not unreasonable to suspect that over these cores are areas of biomass. This is certainly what we find when we examine the Earth, and while it is not right to make inductions about the celestial bodies based on observation of the Earth, it renders the notion within the scope of proper investigation.

#### What Science Tells Us About the Lights of the Celestial Bodies

I probably need scarcely remind my colleagues of the manifold proofs that the Moon shines by her own light. I provide a sample of them here only in order that they may be readily referenced and fresh in the minds of inquirers. To this end, I replicate here a posting which I made a number of months ago, which I feel covers a range of these arguments and in which I have cited a number of reputable sources.

Quote from: James on June 04, 2009, 01:10:51 AM

not attended by heat. Ouote from: (Lardner: 1854-6, 115) Now this question has been submitted to the test of direct experiment, and the result has been directly opposite to such a notion. The bulb of a thermometer sufficiently sensitive to render apparent a change of temperature amounting to the thousandth part of a degree, was place in the focus of a concave reflector of vast dimension, which being directed to the moon, the lunar rays were collected with great power upon it. Not the slightest change, however, was produced in the thermometric column, proving that a concentration of rays sufficient to fuse gold, if thy proceeded from the sun, does not produce a change of temperature so great as the thousandth part of a degree when they proceed from the moon. Quote from: turtles on June 03, 2009, 03:18:34 PM Quote from: Dogplatter on June 03, 2009, 02:53:43 PM Another characteristic of Moonlight which distinguishes it from Sunlight is its putrefying effect on plants. Oh, now this is a new one to me, please do tell us about this. I'm sure you have a link somewhere... Its night time and my plants in the garden and greenhouse are OK out there. That's because it's now June. During the spring, if you've been an irresponsible gardener, some of your plants may have sustained uncharacteristic damage at night. Quote from: (Lardner: 1854-6, 115) Gardeners give the name of Red Moon to that moon which is full between the middle of April and the close of May. According to them the light of the moon at that season exercises an injurious influence upon the young shoots of plants. They say that when the sky is clear the leaves and buds exposed to the lunar light redden and are killed as if by frost, at a time when the thermometer exposed to the atmosphere stands at many degrees above the freezing point. They say, also, that if a clouded sky intercept the moon's light it prevents these injurious consequences to the plants, although the circumstances of temperature are the same in both cases. I have personally experienced Red Moon Syndrome on a number of my own plants in the past, though this year and the last few years they have been spared thanks to my careful precautions. Furthermore, the topic can again be put to direct experiment. Take two identical plants in the same soil, and give them the same amount of water, but expose one to moonlight and one to sunlight. This can be effected by placing a pot over the sunlight control at night to protect it from moonlight, and the same pot over the other during the day such that it is exposed to moonlight during the night. I assure you beyond a shadow of a doubt that the plant exposed to moonlight will die promptly and grotesquely. Quote from: turtles on June 03, 2009, 03:18:34 PM Quote from: Dogplatter on June 03, 2009, 02:53:43 PM Direct Sunlight also has a diminishing effect on fire, Moonlight has no such effect. Don't you think its the brightness of the sun just drowning out the fires light? OK, thats too obvious and I'm sure you have an answer to that one. No, and if you were at all proficient in cooking and the culinary arts you would be well aware of this. When cooking with a gas stove or any open flame, it is customary to keep curtains closed during the day in order that the flame not be extinguished or diminished by the sunlight. Quote from: (Rowbotham: 1881, 142) It is a well known fact, that if the sun is allowed to shine strongly upon a common coal, coke, wood, or charcoal fire, the combustion is greatly diminished; and often the fire is extinguished. It is not an uncommon thing for cooks, housewives, and others to draw down the blinds in summer time to prevent their fires being put out by the continued stream of sun-light pouring through the windows. Quote from: turtles on June 03, 2009, 03:18:34 PM Oh, and "positive amount of heat". As opposed to a "negative amount of heat"? 🕒 Quote from: (Lardner: 1854-6, 115) According to the notions of these agriculturists the rays of lunar light are endowed with a certain frigorific property, in the same manner as those of solar light are endowed with a calorific virtue; and that as the latter raise the temperature of objects upon which they are directed, the former, on the contrary, lower their temperature. References Lardner, D. (1854-6) 'The Museum of Science and Art', London: Walton and Maberly Rowbotham, "Parallax", S. B. (1881) 'Earth Not a Globe...', Third Edition, London: Simpkin, Marshall & Co.

## A Summary of the Salient Facts So Far Established

- \* The light produced by the Moon is of a different character to that of the Sun:
- \* Sunlight is attended always by a great heat, Moonlight by none (this proven in Dickens, again by Lardner)
- \* Moonlight is highly injurous to plants, animals and humans (this attested by Lardner, subjected to empirical experiment by myself)
- \* Sunlight is essential to plants, &c., &c.
- \* Sunlight tends to extinguish fires, despite its great heat, Moonlight to exasperate them (this

attested by Parallax and easily confirmed by observation).

\* From the above we infer that the Moon is an independant light source.

To me it is the different properties of the lights which seems most important as I apprehend it with regard to the question of whether the bodies are alive and are shining by bioluminescent means. Scarcely do we find such a variety of qualitatively different light sources than in the animal kingdom, such as are found in the bodies and appendages of deep-sea fishes, eels, &c.

As to the notion that the Sun (and perhaps the Moon) are lit by way of nuclear processes, this I discount by virtue of the size of them being incompatible with their apparent longevity, since such processes would devour the substance of those bodies at a considerable rate. Were the light constantly renewed by biological propagation, the apparent longevity of those bodies' lights would be obviously explained.

The effects of Moonlight on living things, the putrefication of plants under the Red Moon, its disturbing of fishes and wildlife, and its propensity to cause blindness and insanity in humans too long exposed to it, while well-documented, have remained so far completely unexplained in their underlying causality. Consider this: within the animal kingdom, we find very many bizarre and wonderful contrivances for the defense of particular animals and plants, such as crabs with electrical claws, eels which are also electrical, plants with teeth and resins to capture and consume insects, all manner of camouflages, poisons, and vectors of violence and irritation by which to defend against other animals. And the effects attendent of Moonlight, to my mind, are very typical of the biological defense responses evolved in the plants and animals of Earth. The ability to ward off predation by plants, fish and animals has found all manner of expression in biology and botany, and this ability is just what the Moon seems to possess. When we consider the terrestrial origin of the Moon, it does not seem unlikely that some algae or insect or other with these properties found its way onto the Moon before the Moon separated from the prehistoric surface.

Biological defense mechanisms in terrestrial animals are as numerous and astounding as the human imagination can countenance

Feeding from soil on the Lunar surface, and in dying, excreting or other activities replenishing that soil, a colony of luminescent creatures could well subsist. So much of their energy dedicated to producing their defensive rays, it is hardly surprising at all that they cannot shine with very much brightness, nor wastefully expend themselves in producing even the slightest bodily heat.

I also believe that one of the great mysteries of the Universe is brought into clarity by this discovery. The regular monthly motions of the illuminated portions of the Moon has been somewhat of an uncertainty to our body of science for a long time. What I now consider to be the cause of these is none other than the migrations of luminescent biomass (be it animal or vegetable, or some other kind of classification entirely), by necessity in the face of some peculiarity of their feeding patterns, or else by some breeding ritual or even by some other of the many cyclical activities of living things.

The Sun, we know to possess none of the aggressive defenses of the Moon (more accurately, perhaps, LESSER defenses, as its cancerous tendencies have been recently discovered, and I suppose on reflection that a nasty Sun-burn is reminiscent of being stung by a nettle, or by wasps, bees, hornets, &c., and certainly these are biological defenses among those animals). In any case, the lesser complexity and severity of its biological defenses make its ability to produce a much greater illumination hardly a surprise, as well as affording its abundant excretion of heat, such as the bodies of many animals can afford to do in the biodiversity of Earth. The absences of much discernable migration of biomass, as we see on the Moon, is perhaps attributable to a greater density of the Solar life, or simply to a higher level of stability in terms of the habits which compel the seasonal migration of the Lunar. HOWEVER -

the existence and motion of Sun Spots testifies further to the notion that some migratory activity is occuring on the Sun, though less noticable to the unobservant eye because of the Sun's brightness and the density of its biological coverage.

#### NOT SO FAR FROM THE TRUTH???

Continually observing the Sun and the Moon and the behaviours of their surfaces, I am ever more convinced of the likelyhood of these suspicions, and I believe the same may be true of other Flat Earth investigators, whom I invite to perform some reflection and investigation, and to share their observations, opinions and other information regarding this discovery.

I trust that these revelations will enable to you to view the celestial bodies in a new... light.

Your faithful servant, James McIntyre

Interesting, I remember proposing an idea similar years ago. I forget the details, and yours is certainly better thought out. Good job, I'll give it a thought or two and post some feedback later.

What causes such regular rigid fading in the lunar luminescence? Such as moon phases.

I still have to hold that it must be some rigid weather system that floats above a luminescent material partially blocking it. With a low atmosphere, eventually given the cyclical nature of movement between the earth, sun and moon and heavens it would certainly form together if it was made of something with the right properties. We see it all the time in nature - crystals forming, water coming together in a certain way, etc.

Of course this pattern could be made by a bioluminescent flock of creatures (bugs perhaps?) However, I'm not sure yet that I could buy that.

Anyways, your theory certainly gives a source for said luminescence and a possible explanation of its effects.

Would you mind if I use an edited version for the .net news site thats coming up?

You may feel free, John.

As for the regularity of the change, in the case of a primitive life-form such as a kind of mold or plant, one might expect such regularity from the presence (or at least luminosity) of the Lunar life in accordance with whatever it is which is the source of their food, or else the conditions suitable to their mating.

Consider that on Earth, all unimpeded Salmon, without exception, will migrate to their spawning grounds. Such biological "clockwork" is not inconceivable on the Moon either.

#### What Magellan's Voyage Didn't Prove or Why the Earth Is Flat

Analysis Volume 35, No.2 December, 1974 By Jerry S. Clegg

Ouote

When seeking to indict some belief as archaic, superstitious or ridiculous, the knowledgeable polemicist is likely to compare the position he opposes to the belief that the earth is flat. He will do this on the presumption that scarcely anything could serve as a better example of a falsehood which only the ignorant or the unthinking have accepted. Magellan's voyage proved that the earth is round. Therefore, so we are all prone to conclude, the earth isn't flat. Those who say it is are to be corrected if teachable, dismissed if not. In truth, however, the earth is flat, more or less. The conviction that it isn't affords a fine example of how easily and powerfully proof can be misconceived. A typical "demonstration" of the folly of believing in the earth's flatness will begin by pointing out the difference between something round, such as a tennis ball, and something flat, such as a table top. The question will then be asked which of the two things the earth is like. Since we know that the earth is a sphere and has no edges, we will say it is like the ball. After saying this we are apt to conclude that it, like the ball, is dissimilar to the table top, and so not flat. The obvious contrast between the ball and the table top appears to give us no other option. We are likely to feel certain that because the earth is round it just can't be flat. Persuasive as it is, a "demonstration" of this kind is faulty. Implicit in it is the assumption that flat and round are always contrasting features. flat. The earth is a case in point. To see that it is, one must bear in mind how in our practical affairs we use the word 'flat'. A horizontal surface we are pre- pared to call flat is one we recognize to be neither a dome nor a bowl. It is neither concave nor convex, but a level expanse. Our grounds for saying this have nothing to do with a measurement of zero curvature. Rather they pertain to the behaviour of liquids and solids placed on its surface. We call a table top flat, for instance, because when a spirit-level is placed on it a reading of zero inclination appears. It does not shed water drops and marbles like an umbrella, nor does it collect them like a bucket. Any surface which does collect water at its centre is a bowl; any surface which does shed water is a dome. By the conventions of language, then, a flat surface is a level expanse on which solids and liquids tend to remain stable. On these grounds there are plenty of regions on the earth's surface which are flat. Its regs, mesas, prairies, soda pans, lakes and oceans certainly come very close to being what any plain spoken man interested in having himself understood would call flat. One walks neither uphill nor downhill when treking across the Utah salt flats. They are, then, appropriately named. They match, too, the general curvature of the earth. They, and all similar areas illustrate the point that being flat and being curved are compatible. Indeed, a little thought must show that a flat surface is necessarily a curved surface. What keeps a marble from rolling off a table is the uniformity of gravitational attraction at all points along the surface of the table-top. Since the force of gravity varies with the distance from the centre of gravitational attraction, all points on a horizontal, flat surface are equally distant from some one point. For us that point is approximately the centre of the earth. Because a surface can have all its points equally distant from some one point outside itself only if it is curved, flat surfaces must be curved. All their points must be equally distant from a point close to the earth's centre Although variable, the earth's surface in general meets this condition. Its curvature acts as what might be called a natural paradigm of flatness. Surfaces whose curva- ture approximates that of a level expanse of the earth just are those we call  $flat. Any \ arc \ greater \ than \ the \ earth's \ curvature-such \ as \ that \ of \ a \ tenn is \ ball-will \ result \ in \ a \ dome \ from \ which \ liquids \ and \$ solids will flow, slide or roll. Any less an arc-such as that of a bucket-will result in a basin or bowl into which water and debris will collect. Flatness, so to speak, is a certain degree of curvature approximating that of the earth itself. If the right hand side of a perfectly flat table were to be extended, it would even-tually curve around the earth to join itself on the left. We do not make our tables this large, of course, and so they all have edges from which items will fall if pushed far enough. This explains why, when mentally comparing a tabletop to the earth, we tend to think of both as having edges. That is our true mistake, not the thought that the earth's surface is flat. In case this observation seems dubious, a thought experiment will confirm it. Imagine the earth with one of its polar regions scraped off to 50 degrees of latitude so that its surface there parallels a ray of light. Many people would be tempted to say the earth would then be flat in that region, just as many now say the poles are, in fact, comparatively flat because their curvature is less than what we find at the equator. The temptation to speak this way stems from our entertaining a faulty picture of a flat expanse as a surface of zero curvature. It is a temptation which experience would very quickly dissipate. If left standing in the centre of a scraped off polar region, we would note immediately that we were in a huge depression. Any walk we took would lead us further away from the earth's centre against the pull of gravity. Any walk would, then, be a climb, and no one who had to hike to the rim of the depression would consider the territory he crossed flat. At o degrees of latitude the slope would approach some 20 degrees of inclination. Clearly, a flat surface is one whose curvature approximates the gen- eral curvature of the earth. Those who think otherwise are guilty of the same mistake our medieval ancestors made. Some of the men sailing with Columbus feared they would sail off the earth, thinking it to be flat and with edges. We now discount those fears on the ground that the earth is round and without edges. The fear and its dismissal, however, rest on the shared error that what is flat cannot be round. The terror of the medieval sailor and the equanimity of mind of the modern seaman have in common a faulty picture of what it is for a surface to be flat. An increase in geographical knowledge has dispelled a groundless fear, but it has not corrected a faulty conception. Indeed, in one respect our knowledge has added to a store of confusion. From an essentially correct belief in the flatness of the earth the pre-Columbian sailor drew a wrong inference on the danger of falling into space, but at least there was no discrepancy between the truth, his usage and his conviction on what is flat. What he called flat is what he rightly believed to be flat. The modern sailor who erroneously denies that the world is flat faces, however, the embarrassment that his usage and his convictions are inconsistent. He is almost certain to call anything whose curvature matches that of the earth flat, even though on reflection he will deny that what he is prone to say is true. He is not in a

position to "correct" his normal habits of speech either, for if he tried he would find that there is nothing he could call flat and still be understood. His offering a surface of zero curvature as an example of what he means would only puzzle others, for what is the point of calling a basin flat? From this example of how easily proof can be misconceived a lesson can be learned. It begins with the observation that a more or less spontaneous picture, or imaginative conception, can stand in the way of our seeing how we use a word. The picture of an uncurved surface gives us a wrong idea of our use of the word 'flat'. The lesson continues with the warning that in such a case we should not follow the advice of pragmatists and positivists on how to clarify our ideas by asking if reality corre-sponds to our picture. Imagining what would verify or refute the thesis that the earth is flat, for example, is apt to mire us deeper in a muddle, leaving our faulty picture intact but our convictions now fully at odds with our usage. For all of us in our unreflecting moments nothing could serve as a better example of a flat surface than a calm lake or salt deposit. Yet, when invited to think about the matter, we are prone to conclude that Magellan's voyage proved such expanses to be less than flat. The imagined "proof" is deceptive; it is the unreflecting usage which is right. Things, after all, are what we say they are. Clarity of mind requires that we honour our usage and resist the "proof" which only stengthens the force of a faulty picture.

It seems to me that all the pictures of the Earth from space are 2 dimensions, its always seen on a computer screen or paper. It is all 2D

Maybe the reason is it is flat. Please brothers what do you think about this.

The reason such alleged pictures of the world may appear as two dimensionl is not because the world is flat. The Earth is flat, but that is beside the point. The pictures are completely fake. A photograph of a globe is a two dimensional representation. Such a picture is what was posted on the windows of the room where Collins, Aldrin, and Armstrong were located in the moon hoax video broadcasted in the summer of 1969. This also applies to subsequent moon hoax videos filmed and broadcasted in the early 1970's as well as to fabricated pictures which are falsely said to be photographs taken by "orbiting satellites." The fact is that orbiting satellites are science fiction, and none of the photos were taken in "space," but manufactured on Earth by disinformation agencies like NASA which was founded to spread belief in fantasies like interstellar travel and orbiting satellites.

In some "photographs" of the world, nothing more is done than to use an aerial photograph of a clouded area and black out everything except a circle and present the finished product as a photograph of the world taken by an orbiting satellite. Photographs presented as pictures of the entire world are fake.

of round earthers, we must band together to defend truth

On that note, my comment is as follows:

Have thought ever since encountering the flat Earth websites below that it would be significant to establish contact with such people:

http://itaylorresearch.com/fes.html

And if Leo Ferrari (the modern day student of Aethicus of Istria) is still alive, then this definitely applies to him as well. That is the long-term direction that serious flat Earthism should take rather than the principle perspective of this website which is devoted to endless debating with new crops of people.

### Why are all pictures of the Earth in two dimentions?

Don't worry, the Flat Earth Society should be making inroads into the rest of the world again pretty soon. Both me and Daniel ma be planning certain respective endeavours in our local areas in the near future, and this may generate some interest and strengthen the Society quite significantly.

Incidentally, my view of the world was always closer to the ancient flat Earth perspective of Leo Ferrari than the nineteenth century flat Earthism espoused by Charles Johnson.

Speaking of Leo Ferrari.. I found out that the University of New Brunswick seems to have an incredible collection of Ferrari's Flat Earth Society materials. Have a look at:

http://www.lib.unb.ca/archives/ferrari/s1.html http://www.lib.unb.ca/archives/ferrari/s2.html

The University of Liverpool has some interesting stuff as well, although not directly related to Leo Ferrari..

It seems to me that all the pictures of the Earth from space are 2 dimensions, its always seen on a computer screen or paper. It is all 2D

Maybe the reason is it is flat. Please brothers what do you think about this.

All talk of the universe is inversional

## Zeteticism

Zeteticism is a system of scientific inquiry. The word is derived from the Greek verb ζητέω (zeteo), which means "I seek; I examine; I strive for". A zeteticist is a person who practises zeteticism.

Zeteticism differs from the usual scientific method in that using zeteticism one bases his conclusions on experimentation and observation rather than on an initial theory that is to be proved or disproved. A zetetic forms the question then immediately sets to work making observations and performing experiments to answer that question, rather than speculating on what the answer might be then testing that out.

For example, in questioning the shape of the Earth the zetetic does not make a hypothesis suggesting that the Earth is round or flat and then proceed testing that hypothesis; he skips that step and devises an experiment that will determine the shape of the Earth, and bases his conclusion on the result of that experiment. Many feel this is a more reasonable method than the normal scientific method because it removes any preconceived notions and biases the formation of a hypothesis might cause, and leaves the conclusion up entirely to what is observed.

Samuel Rowbotham was the first to use the term in reference to Flat Earth research. He devised the Bedford Level Experiment to determine whether the surface of water is convex, reasoning that if the water is not convex the earth cannot be a sphere. This is how he came to the conclusion that the Earth is flat. The method has been a cornerstone of Flat Earth Theory ever since.
